

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

How to Find What you Want —*immediately*

DETERMINE the correct section from the opposite page.

In Section 1 you will find the subject matter grouped as follows:—
Automobiles, Commercial Vehicles, Tractors, Motorcycles, Motor Boats and Aircraft.

In Section 2 you will find the names of products arranged in their regular alphabetical order under the noun.

The numerous cross references throughout the book remove any doubt as to the correct noun.

In Section 3 you will find everything covered by a complete index on Pages 1087 and 1088.

Contents

Section I, Pages 15 to 76

Automobiles, commercial vehicles, tractors, motorcycles, motor boats and aircraft.

Brief specifications of stock models. Names and addresses of manufacturers.

Section II, Pages 77 to 1084

Accessories, parts, materials and supplies for automobiles, commercial vehicles, tractors, motorcycles, motor boats and aircraft. Specialties for Ford cars; also machinery, tools, shop equipment and supplies for factories, garages and repair shops.

All products in this section are listed alphabetically under the noun. For example: "Pressed Steel Frames" are listed under "Frames," "Roller Bearings" under "Bearings," etc.

Section III, Pages 1085 to 1248

Reference tables data, formulae, reports on tests, and S. A. E. Standards. Directory of - National Trade Associations.

A complete index to this section will be found on pages 1087 and 1088

ALL-AMERICAN TRUCKS

PERFORMANCE RECORDS LIKE THESE MAKE ALL-AMERICAN SALES

Here is more proof of All-American Strength, Durability, Speed and Economy. Proof that backs up every claim we make. Read this letter from Kohn & Pollock, Inc., of Baltimore.

"After eight months of daily operation (except Sundays and holidays), we are pleased to report the truck has stood up wonderfully; and it has exceeded our expectations, in taking care of quick deliveries, on account of its speed.

"It is most economical in fuel consumption; and the maintenance to date has cost nothing, except for gas, lubricating oils, and greases, as no repairs have been required to any part of the truck.

"We cheerfully recommend the "All-American" to be and do all that is claimed for it by its manufacturers."—Kohn & Pollock, Inc., Baltimore, Md.

If you're interested—Ask us for more All-American Facts.

Let us tell you in detail about All-American construction. Let us show you why owners everywhere are boosters for the All-American Truck—the biggest, best truck value on the market—The Ton-Mile Champion.

Write today for Booklet R, and get the story of All-American Supremacy.

Something **NEW** under the **HOOD** —

"Under the Hood"

Of the ACE is a new type automobile power plant. Write for copy of "The ACE," a publication containing a complete description of this marvelous motor.

The Greatest Advancement Made in Internal Combustion Engine Design in Recent Years

Passel! "Indications are that the streamline, straight side body is passing out." So stated a writer in a recent issue of a well-known motor journal.

What more fitting and proper than a car, bearing the name ACE and powered by a motor incorporating the greatest forward step in engine design, should set the style and fashion in new body designs?

In the mad race for quantity production, style and appearance were secondary considerations. For proof, observe the marked degree of sameness common to most cars. Style, always a big factor in the choice of a motor car, now influences to a greater degree than ever the selection of this or that car.

NEW! The ACE in four, new, handsome body styles establishes a new standard in motor car fashions. There is an air of smartness and originality in their makeup that is as welcome as it is refreshing. Each of these four bodies portrays true grace and beauty in every line and curve and offers a pleasing change in appearance to the man and woman who have grown tired of a style which has lost its attraction.

Compatible with its distinction and good taste in body improvement are mechanical features which lift the ACE from the ranks of the commonplace and identify it as a truly great and extraordinary motor vehicle.

PREMIER

—the new Aluminum Six, with magnetic gear shift—126 $\frac{3}{4}$ -inch wheel base—roomy seven passenger—\$4300 f. o. b. factory—a super-de-luxe equipage with unusual refinements and advantages.

PREMIER MOTOR CORPORATION, Indianapolis, U. S. A.

HAYNES CHARACTER CARS

BEAUTY, strength, power and comfort—these are the essential factors of character in a car.

Real character cannot exist if one factor must be sacrificed to secure another. Haynes engineers and designers have held this principle through 27 years of Haynes history—and the new series and new 1921 Haynes character cars exemplify the worthiness of their skill.

A descriptive brochure, and prices, will be sent on request. Address Dept. 16.

MITCHELL

The Mitchell always wins more friends when competition is keenest. For then it shows best its comparative worth.

Years may come and years may go, but an increasing number of wise motorists seek a car like the Mitchell. Mitchell has been building good automobiles for 19 years—and Mitchell owners are loyal.

The Mitchell is built by one of America's oldest concerns. It was founded in 1834. Into the Mitchell is brought all these years of experience and sound business policy.

BELL *Motor Cars*

DEALERS!

Write today for agency.

WE need a few more good wide-awake distributors for the "Bell Car"—it is a car that almost sells itself, owing to its high standard of construction, embodying as it does the same general principle as contained in cars selling for \$2,000 to \$3,000.

Write us today for our facts about the "Bell" and our proposition to distributors.

Winther Trucks

**With the Winther line
there is a truck for every
kind and condition of service.**

**Not only does it include the "Delivery Special,"
1½, 2, 3½, 5 and 7 ton rear drives, but also 1½ and
2½ ton four wheel drives. ¶ Backed by an or-
ganization thoroughly experienced in manu-
facturing and marketing problems, the Winther line
offers exceptional opportunities to the progressive dealer**

 Factory, BELLEVUE, OHIO

LUEDINGHAUS Quality Motor Trucks

*Are you in a position to
 profit by a franchise?*

Here is a truck built throughout on a leadership basis of **quality** that has definitely and permanently placed it in a class by itself in performance, low operating and upkeep cost and long life.

A Luedinghaus franchise is valued on the basis of its being the soundest selling proposition of any truck.

Remember that not only from the viewpoint of the quality of the truck, but from the viewpoint of dealer policies, the Luedinghaus has 78 successful years in the building of high class transportation vehicles back of it.

Our dealer policies will be placed before you upon request. Write, wire or 'phone.

LUEDINGHAUS Quality Motor Trucks

DEARBORN TRUCK COMPANY
Chicago, Illinois

Dependable

Red Seal

TRUCKS and TRACTORS

Dependable Red Seal Trucks are the result of years of intensive study and experimenting to overcome the faults common in ordinary trucks.

The one weak place in so many trucks is in the face of the gears—they are too thin and easily break under extra stress. Anticipating this weakness we equip every Dependable Red Seal Truck with "extra wide face gears" of hardened steel.

It is not possible to explain in this space all the interesting details concerning Dependable Red Seal Trucks—so we ask you to send for our complete story. Naturally you want a Dependable Truck.

WRITE US TODAY.

Dependable Truck & Tractor Co.

INDIANA TRUCKS

The Highway Freighters

INDIANA Truck representatives have unlimited opportunities, because:

1. INDIANA worm-drive trucks are the best buy on the truck market today.
2. INDIANA Trucks give the largest possible returns on the investment. This has been proved by the performance records of INDIANA Trucks for ten years.
3. INDIANA representatives are assisted in every possible way to further the sale of INDIANA Trucks.

Write at once if you desire to become a member of our organization.

HAWKEYE MOTOR TRUCKS

If you are interested in specifications—Hawkeye Trucks compare favorably with any Truck in America.

If you are interested in performance—Hawkeye Trucks can show you a very enviable record, wherever they have been introduced.

If you are interested in price—Hawkeye Trucks, while not the cheapest, retail at a very moderate price, for the quality of the truck.

We should welcome an opportunity to give you more information.

FAGEOL COMPOUND TRUCKS

91% More Pulling Power
36% More Road Speed

It's in the Gear Box

The Fageol—the truck with the compound transmission (patents pending)—is now ready for good dealers.

An unapproached range of power and speed, together with unusually low gasoline consumption gives this great truck tremendous selling advantages. It will be marketed through a limited number of high class dealers. Your territory may still be open.

Two Models—Medium and Heavy Duty

Fageol Motors Co. (of Ohio) Cleveland
Fageol Motors Co., Oakland, Cal.

HIGHWAY KNIGHT

2 Capacities, 4 and 5 Tons

Knight sleeve-valve motor, 4 cylinder 4x6 inch, flexibly mounted; force feed oiling through drilled crank-shaft; thermo syphon cooling; high tension magneto; electric starting and lighting; governor on carburetor; dry disc clutch; amidship transmission and clutch in one single demountable unit; cold pressed steel frame; worm-drive axle; oil lubrication throughout; wheel base 159 inches.

FWD More Efficiency Less Bulk

The following comparisons with the FWD are based on averages exactly figured from the specifications of ten other leading makes of trucks.

	FWD	Average of 10 Standard rear drive trucks
Chassis Weight . . .	6400 lbs.	7284 lbs.
Wheel Base . . .	124 in.	161.4 in.
Over-all length . . .	200 in.	243 in.
Width from hub to hub . . .	70½ in.	83.8 in.
Body length allowance	148 in.	148 in.
Tread	56 in.	66.9 in.
Percentage of weight on rear axle—loaded	55%	80%
Tire surface of driving wheel in contact with road	24 in.	20 in.
Cost per complete tire replacement	\$244.20	\$312.30
Speed per mile on high	15 M.P.H.	14 M.P.H.

Trade Mark registered U. S. and other countries

ATTERBURY
MOTOR TRUCKS OF MAXIMUM SERVICE

WE do not claim that the Atterbury is the "best motor truck"—

But we do know that there is no better truck built today.

Behind the Atterbury is a record of eleven years' satisfactory service to owners—the best evidence that the Atterbury Franchise is a paying investment.

Atterburys are made in 1½, 2½, 3½ and 5-ton capacities.

OSHKOSH 4-WHEEL-DRIVE MOTOR TRUCK

*Designed and Built for the exclusive use of
Pneumatic Tires*

No Oshkosh 4-Wheel Drive Truck has ever been sold with any other tire equipment

We pioneered in the use of pneumatics. Our guarantee is nullified by the use of solids. We were first to include pneumatics all around as standard equipment.

Pneumatics greatly lessen road shocks, save on repairs, reduce slipping, permit greater speed, and give increased gasoline mileage.

Power on all four keeps the Oshkosh 4-Wheel-Drive Truck going, where other trucks stall, and yet gives operation costs that compare most favorably with the average rear drive truck.

SPECIFICATIONS

SPECIAL STANDARD EQUIPMENT

Tire—32½-inch Pneumatic Cord truck type tire, front and rear, Goodyear All-Weather tread, or U. S. Nobby Cord tread, optional.

Demountable Rims—One extra.

Cab—Enclosed, all-weather, adjustable windows, rain vision windshield and with door on both sides. Seven-inch upholstery in seat and 4-inch upholstery in back. Inside seating width, 54 inches; distance from dash to back of seat, 65½ inches. Open buck seat with same upholstery and measurements furnished if desired.

Starting and Lighting System—Northcut, 2-unit, starting generator built into the motor, conveniently located for inspection and is equipped with Bendix drive, built into fly-wheel housing. Only one wire leads from starting motor and generator, thus eliminating shorts, etc. Two Indiana lamps 5½ inches in diameter and tail lamp 8 inches in diameter are included.

Governor—Duplex, limits road speed to 25 miles an hour, but does not effect speed of motor for slow, strenuous pulling.

Vacuum System—Stewart-Warner.

Electric Warning Signal—Button on steering post.

Ammeter—Weston.

Speedometer—Stewart-Warner.

Bumper—4-inch channel steel.

Motor—Herschell-Spillman, 4-cylinder, cast on bloc; 3¼-inch bore by 8-inch stroke; 8-point suspension. Excessive twisting of frame cannot bind motor or transmission. Oil capacity, two gallons.

Carburetor—Zenith. Choker on dash to permit easy and convenient starting.

Gasoline Tank—Capacity, 34 gallons. Located under driver's seat.

Ignition—North East distributor. Willard Heavy Duty Storage Battery. Magneto ignition optional.

Cooling System—Radiator, cast iron head, sides and bottom (own make). Siphon core. Thermo-siphon system.

Transmission—Brown-Lipe Model 25, 4 speeds forward and reverse. Multiple disk dry plate clutch in unit with motor. Transmission drive shaft, Merchant & Evans, with two universal joints to center transmission (own make), which has automatic locking equalizer which conveys power to front and rear axle through very heavy front and rear propeller shafts of equal length, both equipped with Peters' universal joints at both ends.

Axles—Own make. Conventional full floating type, bevel gear, front and rear, embodying our own patented driving and steering mechanism in the front axle. **Differential**—Own design, built by Brown-Lipe.

Frame—A. O. Smith, 5-inch pressed steel with 3¼-inch flange, ¼-inch gauge. Model AA chassis equipped with truss rod connections to give additional strength to center of frame.

Steering Gear—Rams irreversible. Adjustable wheel, 18 inches in diameter.

Control—Left-hand steer, center control. Spark and throttle controls located on steering post under wheel. Foot accelerator pedal.

Brakes—Service brake, external contracting, located in center of chassis in front of sub-transmission on drive shaft, breaking through sub-transmission on

all four wheels with equal resistance. Brake drum, 3¼-inch diameter, 3¼-inch face. Emergency brakes external contracting, 16 inches in diameter, 3¼-inch face, located on rear wheels.

Springs—Tuthill-Titanic. No center bolt. Guaranteed forever against center breakage. Front, 44 inches long, 2½ inches wide. Rear, 50 inches long, 2½ inches wide. ¾-inch bronze bushings. Spring clips, 3¼-inch.

Wheels—Artillery type, 2-inch second growth hickory spokes, 14 to wheel, 10½-inch flange.

Turning Radius—36 feet either way.

Weight—Chassis with cab, 4,500 pounds.

Body allowance, 1,000 pounds.

Pay Load—4,000 pounds.

Chassis Measurements—

	Model A	Model AA
	In.	In.
Wheel base	130	135
Length over all	194½	220½
Width over all	67½	61½
Height over all (top of cab)	96½	94½
From back of cab to rear and of frame	100½	143½
Tread	54	50
Frame width	34	34
Ground clearance (under differential front and rear)	10½	10½

Heavy Duty Truck Jack and Complete Set of Tools.

Color—Chassis, brown, black stripes. Cab, maroon, white stripes.

Price—Model A, \$3,750.00. Model AA, \$3,850.00. F. O. B. Oshkosh.

- REAL ESTATE -

"MANUFACTURING SITES" — CHICAGO AND VICINITY

Lease or sale, with or without railroad connection, from a 50 foot lot up to large acre tracts on the different belt lines.

Will build, sell or lease on long term any size to suit.

If you contemplate moving your factory or desire to expand, write for list now available.

N. J. SIMON & CO.

CHICAGO

330 So. Dearborn Street

ILLINOIS

Member, Chicago Board of Underwriters

The Dual Truck-Tractor

An epoch-making invention. Supreme in its field.

Will easily pull three-bottom plow. Can plow closer to the corner than with a horse.

Will do all farm hauling. Makes 15 miles an hour as a truck running on rubber tires, 3 miles an hour as a tractor.

Combined in this one machine is First: The most efficient Tractor ever made. Second: A serviceable runabout. Third: A power plant. Fourth: A truck for all pulling purposes.

Employs a low intermediate, direct and reverse drive in either truck, tractor or belt drive. Investigate!

CHASE TRACTOR

No Differential Gears

Chase Tractors have no differential gears. The full driving power of the heavy-duty motor goes direct to both rear wheels.

The no differential feature insures longer service; it avoids uneven wear and unnecessary strain.

The Chase Tractor pulls evenly, thus saving both power and gas.

If you haven't seen a CHASE, write for illustrated literature and detailed information.

The Chase Tractors Corp., Ltd.

Milwaukee, Toronto, Syracuse

Do You Sell Automobiles or Accessories?

Then you need

VANITY FAIR

IT shows the newest and smartest cars in the world. It gives facts and information which you can use in your selling; it tells what the customer wants to know—about your car and the other fellow's car; it's the smart magazine for the live "he" man—the brightest review of New York life as lived by the brightest "New Yorker".

Financial Service Building, 9 East 40th Street, New York City

Used Cars Wanted

Bought Anywhere in the U. S.

Do not dispose of your car before hearing from us.

Through our traveling buyers and state representatives, we can reach you any time, anywhere in the U. S.

We buy and ship to our New York Salesrooms high class used cars of all types of bodies, and will pay cash for your car, provided the price is not prohibitive. Write or telegraph a description, stating price, and our buyer in your territory will get in touch with you, prepared to close. If near enough, telephone Columbus 2797.

The M. & M. Company, 109 to 123 W. 64th St., New York

SECTION 2

Accessories, parts, materials and supplies for automobiles, commercial vehicles, tractors, motorcycles, motor boats and aircraft. Specialties for Ford cars; also machinery, tools, shop equipment and supplies for factories, garages and repair shops.

EVERYTHING in this section is listed alphabetically under the **NOUN**.

For example: "Pressed Steel Frames" are listed under "Frames,"—"Roller Bearings" under "Bearings."

"NORMA"

PRECISION BALL BEARINGS

(PATENTED)

There is but one true measure of value, viz.: the capacity for service. It is a recognition of this fact by responsible manufacturers which has made "NORMA" Bearings the standard in the high-grade magnetos and lighting generators internationally identified with cars, trucks, tractors and power boats of the better class.

See That Your
Electrical Apparatus
is "NORMA" Equipped

"The Motor Truck as an Aid to Business Profits"

WOULD you know practically everything there is to know about motor trucks—upkeep, care, maintenance, mechanics, cost of operation, delivery systems, routing, preservation, trailers? Then read "The Motor Truck as an Aid to Business Profits," by S. V. Norton of the B. F. Goodrich Company, a specialist who has made an intensive study of motor trucks.

First Examine—Then Decide

If you would like to examine "The Motor Truck as an Aid to Business Profits," we will send it free for 10 days. If you decide to keep it, send us \$7.50, payment in full. If not, return it at our expense. For free examination address Dept. A. T. D.—A. W. Shaw Company, Wabash Ave. and Madison St., Chicago.

Weston

Electrical Indicating Instruments

for

Motor Cars and Boats AND FOR GARAGES AND SERVICE STATIONS

For the Dashboard or Cowl

Model 354
Ammeter

Tells instantly and accurately the exact charge or discharge rate of current flow and promptly detects loss of current due to short circuits or grounds.

For the Garage and Service Station

Model 280—Garage Testing Set

Most complete, reliable and perfect testing instrument ever designed for garage and service station use. Makes every type of test known for automobile electrical equipment. Has six ranges—80 and 3 volts, 100 milli-volts and 300, 30 and 3 amperes.

ALSO:

Battery Testing Voltmeter—Model 443

Takes exact measurements of the E. M. F. of individual cells. Also provides for the Cadmium Test.

Model 441—"Fault-Finder"

A general utility instrument. Makes every test except measuring starting current or making short-circuit test on armatures. Has separate voltmeter and ammeter—cables for plugging into instrument—clip terminals to quickly connect to circuits. Ammeter protected by replaceable fuse to prevent burnouts.

The G-Piel Cut-Out Pedal

The Cassco Engine-Driven Tire Pump

The Long Horn

The Kimball Auto Jack

Steady demand and rapid turnover, due to extensive advertising, make Cassidy accessories profitable to handle.

THE trend in the trade is to handle specialties of acknowledged leadership. The very fact that the biggest automotive-parts selling organization in the world stands sponsor for an accessory is itself evidence that the article is one of importance in the trade.

Accessories marketed by the Cassidy organization are moderate in price and enjoy a steady, year-round demand. Sales are always easy, due to liberal advertising and Cassidy sales-help.

These accessories keep moving at a rate that gives your invested dollar a chance to make several profits during the year. You are never caught with a stock that can be moved only at "sales" prices.

ADJUSTABLE ACCELERATOR FOOT REST, a reliable safety device. Prevents unintentional acceleration when driving over rough roads. Permits delicate advancement or retarding of accelerator. Relieves foot tension. Adjustable to driver's comfort, adaptable to all automobiles. List, \$1.00 each.

SAFETY STEP PLATES, rubber vulcanized to a perforated metal plate, 34 projecting solid rubber ribs. Size 8 1/2 x 1 1/2 inches. Keeps car clean. Assures safety. Adds to car refinement. Quickly applied. Will not mat down or discolor. Type C, List, \$1.00.

ACCELERATOR HEEL PLATE is same as Type C Step Plate, except in size, which is 4 x 1 1/2 inches. Furnishes a stable position for heel of shoe when operating pedal, and protects floor covering. List, \$0.85.

CONFORMABLE HAND PAD for auto doors, consists of a ductile metallic sheet enclosed between front and back leather sections of the pad, insuring through pressure of the hand, perfect conformity to the contour of door. Prevents finger marks and wear. Leather in various grains. Price \$0.90 to \$1.50 each.

ONE-PIECE-HOUSING
AXLES

STRENGTH SPECIALIZATION

Safe!—Thanks to what?

A CITY STREET at a quiet noon. All clear ahead—rushing to make a train.

Then from a side street an absent-minded car noses into your path. A sudden sharp turn; wheels locked, a half-circle skid and you bring up against the curb.

Safe!

Thank the brakes. Thank the wheels. But most of all, thank the rear axle, for it *held* the brakes and the wheels, it resisted the impact of the curb, it withstood the antagonistic twistings and turnings of terrific forces exerted simultaneously; and it was ready to deliver the engine's power the moment you were ready to go on again.

Vitality important—the rear axle—no other part of the car has such a multitude of duties or so many antagonistic forces to resist! Wouldn't you say it deserved the whole attention of an organization of specialists?

We believe so. From the beginning of our association, we have acted on this belief. We have devoted all our energies, our thought, our resources to the building of axles.

The result is that there is not an incident that can occur in motoring which affects the axle that we have not endeavored to foresee and prepare for. Therefore, the owner of a car equipped with a Columbia One-piece-housing Rear Axle has a feeling of unusual confidence and comfort.

The Columbia trade-mark appears on the plate covering the differential housing—look for it.

Columbia Axle Company
Cleveland, Ohio, U. S. A.

THE Columbia Rear Axle Housing is built in one piece, which our tests show adds 50% to its torsional strength. Extra large and strong brake drums, differential and driving shafts complete the distinctive strength and safety of the Axle as a whole. Columbia Front Axles are equally strong and safe.

Look for **Columbia**
under the car

"FLINT DRIVE" TRUCK AXLES "Built for Hard Work"

A DISTINCTIVE type which has all the good features of the worm drive as well as the internal drive and is free from the disadvantages of each.

Specifications

Tread, 56".
Carrying capacity on spring seats, 3800 lbs.
Spring seat centers, 40" max., 38" min., 39" standard for 2 1/4" width, 1/2" clips.

GEARS—Gear Ratio, 7 1/4 to 1 to 3.8 to 1 total reduction.
Bevel gear ratio, 2.14 to 1 to 2.647 to 1.
Internal gear ratio, 3.33 to 1.
6-8 pitch internal gears, 1/2" face.
5 pitch bevel gears, 1 1/4" face.
Hardened steel, cut gears, used throughout.

BRAKES—14" dia. x 2 1/4" wide toggle external contracting type and cam internal expanding type.

BEARINGS—Hyatt high duty roller bearings in wheels and at position directly back of pinion on pinion shaft and on differential. New Departure ball bearings at outer end of pinion shaft.

SHAFTS—Extra strong, made from chrome nickel steel splined on both ends and heat-treated.

Vulcan' Motor Axles Are in Production

Three months ago announcement was made of the Vulcan Motor Axle Corporation.

At that time a factory had been acquired and machinery purchased.

It is a pleasure to announce that this large and modernly equipped factory is today in operation.

It is not surprising that these rapid strides have been made. The personnel of the Corporation is composed of men who have been in constant successful association with one another for many years as principals

in one of the biggest producing axle concerns. These men know the axle business in such a way as to eliminate any lost motion in manufacturing.

Moreover, these men are intensely gratified at the reception already accorded the Vulcan Motor Axle Corporation. The announcement of an axle concern whose primary functions would be to build better axles, form a dependable source of axle supply and carry on business with the utmost of co-operation and courtesy has found an instant appeal among the users of this equipment.

HOOVER STEEL BALLS

BOTH speed and safety can be enjoyed when Hoover balls are used to liven bearing surfaces.

Their highly polished flawless finish and their absolute sphericity permit the highest speed because they prevent the theft of precious power by friction.

The use of bearings built on Hoover balls lets speed be made with safety, too. For such unusual care controls their manufacture that Hoover balls display a uniform load capacity surpassed by no other ball of equal dimensions.

Automobile Starting, Lighting and Ignition Service

AJAX Batteries are specially constructed to deliver better Automobile Battery Service at reasonable prices.

Long individual experience in all branches of the battery field enables us to produce types that will withstand reasonable abuse with long life and uniformly high capacity.

AJAX Batteries are made for all models of electrically-equipped cars.

Write for our Complete Replacement Book.

Everything is listed under the NOUN or principal word

In the Federal Battery

are combined the most valuable time-tried and tested principles, and the most modern improvements that engineering and inventive skill of the highest order have been able to create.

Life, power, endurance, dependability, are all FEDERAL characteristics, but more important still is the FEDERAL'S wonderful capacity—its uncanny ability to give, at least, 25% higher discharge than any other battery of the same size. This is due to a patented process which increases by 40% the surface area of the plates—an exclusive FEDERAL feature.

The FEDERAL policy is based upon SERVICE and SATISFACTION—to the customer. This company, therefore, stands squarely behind the 18 months' guarantee in writing furnished with each battery sold. It builds only a quality product.

To reliable distributors and service stations who believe in, and practice, the FEDERAL policy, we have a highly profitable proposition to offer. Our franchise will prove your most valuable asset. Write today—if your territory is still open.

RAY

The Ray Battery Company Has Finished a Year of Achievement

THE year 1920 has been nothing short of an achievement for the Ray Battery Company.

Although Ray Batteries, containing the famous "Lavier Formula Plates" have been in active service under every condition for over four years, they were not offered to the public until the spring of 1920.

Ray Batteries were immediately acclaimed as the most advanced engineering achievement of the present day. Without great advertising or sales expense we began to close excellent distributing and service station connections within a few weeks after the first announcement was made. The battery was recognized for its merits and for the excellent selling plan which went with every battery, namely the Ray two-year **Unconditional Guarantee**.

It was a matter of a few weeks when there was indication that the original manufacturing plant in Detroit was entirely inadequate to take care of the demand. Consequently the com-

pany purchased a large factory in Ypsilanti, Michigan, situated on the New York Central, Michigan Central and interurban railway lines, which was fitted with great speed with the most modern of battery making equipment.

This fine battery plant is now in full operation and the company is into large production.

Territory for RAY Battery representation is going at surprising speed. Although the company has been accepting dealers only since late spring of 1920 it now has representation of the highest order in many sections of the country.

There is still valuable territory open. Inquiries are coming in from distributors and service stations with such rapidity that there might be a few days' delay before a representative of the company could get in touch with you.

If you want to make 1921 your banner year in sales and profits, apply for a Ray Service Station contract at once.

Types	Prices
6 Volt-11 Plate	\$29.00

Discounts quoted upon application

The information and bearing sizes given herewith, obviously, are extremely limited. We have endeavored only to show the principal dimensions covering those radial and thrust bearings most frequently used in the automobile industry.

The following is a list of the different types of Strom Bearings manufactured:

Radial

Made in any size for light, medium, or heavy duty; with deep groove ball races accurately formed, in which large sized balls, separated by a light and sturdy retainer, roll true with the least friction. They are especially adapted above all others to sustain large radial loads under severe operating conditions. They are capable of resisting end thrust loads equal to 25% of their available radial capacity.

Angular Contact

Made in the same sizes and interchangeable with the radial bearings. They are of similar construction to the radial bearings, being especially designed to support combinations of radial and heavy end thrust loads acting in one direction. They have an end thrust capacity equal to 150% of their available radial capacity.

Thrust

Made in all types and sizes with flat and grooved races to meet all conditions of speed and thrust loads acting in one or two directions, and compensating for misalignment. They are of the same typical sturdy construction for which STROM bearings are noted, and are especially adapted to sustain exceptionally large thrust loads.

Write for complete catalog, engineering literature, and prices. We maintain a large staff of designing engineers that are at your disposal for the solution of any ball bearing problem.

U. S. BALL BEARING MFG. CO.

ILL., U. S. A.

ANOTHER basic reason why leading motor manufacturers in the automotive world specify Mogul Bearings is the fact that no reclaimed metals are used in the making of Mogul Alloys. We make Mogul Alloys in our own plant—and have done so for twenty-five years. We guarantee that nothing but virgin metals are used in the making of Mogul Bronze Babbitt Lined and Die Cast Bearings.

THE MUZZY-LYON CO., LTD.

Adjustable Boring Cutters and Bars

The Madison Adjustable Boring Cutters and Bars replace reamers on automatic machines, turret lathes, boring mills, etc. They can be sharpened and set to within .00025 inch in less than five minutes.

These cutters do the work more accurately than reamers, insuring absolutely straight holes of any size you may require.

Made in 45 sizes—from 1/4 to 5 inches in diameter. Larger sizes on application.

The Madison Adjustable Boring Cutters

and Bars pay for themselves very quickly out of the money they save in the tool room. Write us to-day for details.

MADISON MANUFACTURING CO.

MUSKEGON, MICH.

Most Satisfactory Batteries

Universal Starting and Lighting Batteries are, and have been for years, the most satisfactory batteries under every condition.

There is a Universal Battery for every car and a repair part for any make or size battery. This fact gives the Universal Dealer the cream of the trade.

Dealers should write at once for territory and sales proposition. Also for our new catalogs and reference book pertaining to batteries for all cars and parts for all batteries.

The Best Auto Bed Made!

Naturally, then, the Best Seller, which for Dealers means More PROFITS. The Popularity of the

"Red Seal" Auto-Porch Bed and Tent

is due to their many points of Superiority: The Bed Cannot Sag. It is Light, Compact and Durable. Can be set up with or without car, or over the seats WITHIN any 5-passenger Auto in two minutes. Demanded by tourists and campers everywhere because of its convenience and comparatively low price.

Live Wire Dealers! Send for descriptive literature, illustrating superior features of this bed and tent. Generous discount to reliable dealers.

PRODUCTS of the Automotive Division of the Graton & Knight Manufacturing Company, as illustrated below, are made on an engineering basis.

Our automotive engineers have worked long to bring forth automotive leathers that endure. Their success is shown by the many letters received from our satisfied customers.

Remember, there are more than sixty-eight years of experience in tanning leather and making leather products, behind these products.

The following list represents the principal Automobile Leathers which we manufacture:

- | | |
|--------------------------------|-----------------------------|
| 1 & 2. Universal Joint Boots. | 13. Standard Crank Holders. |
| 3. Clutch Leathers—square end. | 14. Special Crank Holders. |
| 4. Leather Links. | 15. Liners. |
| 5. Boot Straps. | 16. Special Washers. |
| 6. Laminated "V" Fan Belts. | 17. Back Top Straps. |
| 7. Solid "V" Fan Belts. | 18. Tire Straps. |
| 8. Clutch Leathers—endless. | 19. Rebound Straps. |
| 9. Steering Wheel Covers. | 20. Hood Straps. |
| 10. Magneto Coupling Discs. | 21. Front Top Straps. |
| 11. "V" Fan Belts—with blocks. | 22. Tail-board Straps. |
| 12. Link "V" Fan Belts. | 23. Flat Fan Belts. |

No matter what your needs in this line may be, send us specifications and we will promptly quote prices and submit samples.

Old Hickory CORD BELTS

Flat and V-Shaped — "Built to Last"

Dealers say they have yet to find an owner of a pleasure car, truck or tractor who doesn't want an Old Hickory Cord Belt the moment he sees one. Jobbers say that Old Hickory Cord Belts are the first items of the orders — "pullers for more business."

Each belt is faultlessly manufactured from heavy Sea Island Fabric, treated with an asbestos compound that holds the belt to the pulleys without chance for friction. OLD HICKORY CORD BELTS are made for every make and model of motor car. They stand up under hard punishment. They are endless. They last!

Motor Belt & Manufacturing Company

Sole Manufacturers of
OLD HICKORY CORD BELTS

KANSAS CITY
MISSOURI

This belt conforms to Old Hickory Cord Belts. Be held as well as for this.

The

Line

of Leather Fan Belts and
Leather Parts

for Cars, Trucks, Tractors

RUSCO PRODUCTS

Tests by engineers result in the selection of RUSCO Products as standard equipment for many of America's foremost cars.

Rusco Brake Lining
Disc and Cone Clutch Facing
Endless Fan Belts
Anti-Squeak Webbing
Woven Strapping for Auto
Tops—and Tire Straps

For Ford Cars:

Transmission Lining
Endless Fan Belts
Cam Brakes

The Russell Manufacturing Co.
508 Russell Ave., Middletown, Conn.
New York City Chicago Detroit

Smith Fan Belts

Does the pulley side of the belt you use soon develop cuts and cracks and so break prematurely? All ordinary fabric belts do. If you wish to avoid this and find how good a really scientifically built fabric belt can be, order a trial lot of SMITH BELTS. The price is right too.

Woven endless fan belts for all cars.

Also Ford Transmission Lining, Anti-Squeak, Webbing and Tape.

Gilmer

WOVEN ENDLESS

FAN BELTS

Factory equipment on more than 80% of the cars built in America.

Built to fit exactly-built of basically correct material to best resist heat, oil and moisture.

Individually wrapped. Each belt stenciled "Gilmer." Each wrapper marked with group number and makes and models of cars the belt will fit.

Packed in cartons of 10 belts of one size. 29 groups comprise the complete stock and cover every car that uses a flat type fan belt.

Ask your jobber.

L. H. GILMER CO.

PHILADELPHIA, PA.

The exact belt for any car is easily ascertained by referring to the chart below.

Woodward & Cochey, Inc.
550 Broad Street Lynn, Mass.

FLEXO Laminated "V" BELTS

Protected by U. S. and Foreign Patents

FLEXO BELTS are made of sections, cut only from solid center back belting hides and are assembled with steel copper-plated rivets. They are made endless with machine screws and nuts and can be readily lengthened, shortened or adjusted without special tools.

FLEXO BELTING in $\frac{5}{8}$ " and $\frac{3}{4}$ " widths in the Oak Leather on 50 or 100-foot spools is the most popular with the Supply Dealers. Motor Car Dealers usually buy Flexo Belts made up to fit the cars they sell, either open or endless.

FLEXO BELTS are giving complete satisfaction on all high-grade cars, trucks and tractors. Prices and samples on request.

Tool Rolls, Universal Joint and Steering Knuckle Boots, Crank Handle Holders, Magneto Covers, Straps, Liners, Shims and all leather parts, made to order. Send samples or blue prints for quotations.

Batteries Guaranteed a Year and a Half

Automobile & Motor
Boat Batteries

ACME Storage Batteries are guaranteed to give satisfactory service for a term of a year and a half from the date of purchase. Most ACME Batteries do much better than that.

In spite of the fact that ACME Batteries are designed to give a full stream of current, and although on account of their unusually sturdy construction they are remarkably free from short-circuiting, bucking and other battery troubles, they sell for no more than ordinary batteries.

The man who sells ACME Batteries sells satisfaction.

FAIRBANKS

Automobile Repair Equipment

Fairbanks' Worth

Automobile repairing has developed to such an extent that modern and efficient tools are absolutely essential in the up-to-date repair shop. New tools and devices, well designed, and offering guaranteed service, mean repeat orders for the dealer and satisfied customers for the repair man. In these pages you will find some of the popular items in the Fairbanks line—a line which is recognized as the standard throughout the world.

And the Fairbanks line is progressive. It is being increased constantly. The new devices have been tested and approved by experts and when they put their "O. K." on a product, the Fairbanks Company is willing to guarantee it as a real time and labor saver, with its own well-known "O. K."

The Ford and Fordson Special Burning-In Machine

The Ford and Fordson Special Burning-in and Running-in machine is built to stand the test of time and hard usage. A base of one solid casting, a low center of gravity, split bronze bearings and Hyatt roller bearings are all features which insure a satisfactory job.

By means of a $3\frac{1}{2}$ to 1 gear reduction the bearings may be burned-in at a speed of 175 R. P. M., while the speed for running-in with oil is increased to 600 R. P. M. Experiments and tests have proved that these are the best speeds for perfect work.

One of the main advantages of the Ford and Fordson Special is the fact that the repair man has full view of the operation while the main and connecting rod bearings are being burned-in. After this is completed the motor block is turned and the bearings, connecting rods and pistons are run-in with oil.

STANDARD OF THE WORLD

FAIRBANKS

Automobile Repair Equipment

Universal Motor Stand

The Fairbanks Universal Motor Stand handles motor blocks of any type with ease. The blocks may be adjusted to any position and secured in that position.

The Universal Motor Stand is made to take all sizes or makes of auto and auto-truck motor blocks, having either three point or four point suspension. The leg brackets move in and out to increase or decrease the distance to fit any motor. The stand is fitted with worm wheel drive, making it possible to place the motor in any required position. It is substantially constructed of angle iron and well riveted throughout. Cast iron brackets support the side members. Four casters permit the stand to be moved easily to position desired, and two lock screws elevate the corners.

U-8

M-35

Coil Unit and Magneto Test Stand

The Coil Unit and Magneto Test Stand (M-35) is designed to test and facilitate the adjustment of the coil units and the magneto. It consists of a coil testing apparatus which is a two ampere model, 156 ammeter, a Ford magneto provided with a crank and rotating spark gap, and a device for clamping the coil unit in place and at the same time making the necessary electrical connections. For this test the magneto ammeter and primary of the coil unit are connected in series. The coil secondary is connected across the rotary spark coil.

When the magneto is revolved the ammeter shows the primary current flowing. Seven-eighths of the number of sparks produced by the passage of the magneto poles in front of the coils per one-sixteenth of a revolution may be counted by watching the rotating spark gap as it passes over the graduated dial. This dial is graduated into 16 parts, the magneto having 16 poles. One good spark should pass over each one-sixteenth revolution of the crank and the current indicated by the ammeter should be between 1.2 and 1.4 amperes.

To test the magneto in the car, one terminal of the ammeter is connected to the magneto terminal through an impedance coil and the other terminal is connected to the crank case. With the impedance coil used the meter should indicate 0.8 or more amperes when the engine runs at a moderate speed.

The function of the impedance coil is to cause the indications of the instrument to be substantially independent of the engine speed.

STANDARD OF THE WORLD

FAIRBANKS

Automobile Repair Equipment

M-14

Dixie Combination Front and Rear Axle Stand

The Dixie is a well-designed device for supporting the front and rear axle while overhauling. This stand is equipped with two vises, one tipping to the side to make the axle housing accessible for the removal of the roller bearing sleeve, and the other turning on a spindle to permit the easy removal of

the differential and axle shaft. A heavy cast iron removable grease pan is provided to catch the grease and oil from the disassembled differential.

The Dixie Stand has proved very efficient in repair shops. The rear axle can be placed in any position, and the tool tray and axle shaft support can be neatly folded when not in use and can be left until the entire operation is complete.

Make Your Stock Room a Display Room

Fairbanks Servistock units are made in sizes to hold parts stocks of \$5,000, \$25,000 and \$50,000, with supplements for truck and tractor parts.

The bins bear the numbers of parts contained therein and are arranged in numerical order, irrespective of the size or shape of the part.

The Servistock Units can be supplied in either wood or steel. Either style will add to the attractiveness and pulling power of any Service Station, and at the same time will save labor. Everything is at the finger tips of the salesman and in sight of the customer. This system is also an excellent indicator of stock depletion.

S-1 TO S-7

STANDARD OF THE WORLD

FAIRBANKS

Automobile Repair Equipment

Save Time and Labor on Rebabbitting Jobs

Your profits increase as your time and labor decrease. We can show you how to save time and labor on rebabbitting jobs.

First you must remove the old babbitt from the block. This is easily accomplished with the four way torch, which melts and removes the old bearings and at the same time melts the babbitt for the new bearings.

C-7

Next fill the ladle-jig with the molten babbitt. Place it over the bearing and give the handle a quarter turn to give it its exact position. Then lift the plunger in the handle and the hot metal will flow into the bearing from both sides at once—the correct way to do it.

C-3

Now place the Bearing Boring Machine in position on the motor block and bore the bearings. This

C-1

machine bores all three bearings at one time, insuring accurate alignment and a perfect fit of the crankshaft. Simple, isn't it? That is characteristic of all Fairbanks Repair Equipment.

Watch for the "Fairbanks O. K." on all repair equipment.

Combination Dump
Bodies and Hydro
Hoists

**Build Bigger
Truck Profits**

Heil's 4 in 1 Bodies can be used for wide variety of purposes. They are furnished with 2 sets of removable sides and double acting tail gate. Upper sides—coal capacity; lower sides—gravel capacity; sides removed—platform body. All bodies tapered 3" wider at rear to allow load to slide out freely.

The Hydro Hoist is simple, compact and direct acting; utilizes all loading space; eliminates pipes, cables, pulleys and rollers, etc.

CLOSE-TITE

FOR FORDS

Close-Tite showing operation of curtains

The CLOSE-TITE for Fords shown in cut is a practical, common sense attachment. Not a whole top, but an attachment that is installed on your regular Ford top. It will instantly convert your open car to a closed car. When closed it is proof against all weather conditions, making it possible for Ford owners to enjoy the comforts of the expensive cars at only a nominal cost.

The attachment installed weighs only 37½ pounds.

Curtain Construction

The curtains are 24 inches in width, being made almost entirely of Pyraline, insuring the greatest amount of light in the car possible, are constructed on flexible steel frames, which gives them a rigidity so necessary to prevent displacement by the action of the wind. The curtains travel in pressed steel channels, extending from the body of the car upward to the center of the top. They are operated in much the same manner as a curtain to an ordinary roll top desk.

Here Is Your SYSTEM

Auto Dealers—Garage Men

A complete and inexpensive
Accounting System designed
especially for the automobile and
garage business—approved by the
most successful men in the game.

Simplifies your bookkeeping and cuts
the cost—keeps your accounts
RIGHT to the smallest detail, with
least amount of time and labor.

You Need It—You'll Like It

We send actual samples of the com-
plete system FREE to all who ask
for them—do it NOW?

GREGORY MAYER & THOM CO.

Printers, Engravers, Lithographers, Loose Leaf Devices,
Blank Books, Stationery and Office Furniture

19-21 CADILLAC SQUARE DETROIT, MICH.

HERE IS WHAT YOU NEED TO RENDER BETTER SERV- ICE AND MAKE MORE MONEY, MR. MECHANIC.

There is nothing similar on the market at any price
that gives you the authentic, down-to-date informa-
tion contained in the new issue of the Automotive
Wiring Manual.

It contains 850 official blueprints of standard car
manufacturers—a complete collection of official wir-
ing diagrams on original blueprint form, bound in so
you cannot lose them.

Don't be deceived into buying "something just as
good" at a lower price. There is nothing published
that gives you the real information contained in the
Automotive Wiring Manual.

Send for your copy today. Price, \$15.00, delivered.

Dow Body Brace for Ford Cars

Thousands of Ford Owners are getting more pleasure and longer life from their cars by the use of the Dow Body Brace. It makes riding easier, strengthens the running board, stops annoying squeaks and rattles, avoids side play and prevents broken springs. Easily attached. Fits all Fords—any model. Undoubtedly one of the greatest boons to the Ford Owner known.

*"One of the best selling accessories that we stock."—
A prosperous dealer.*

PATENTED IN U. S. & CANADA

Made of heavy $1\frac{1}{2} \times 1\frac{1}{2}$ inch steel angle, heavy steel hooks and oak silencers that fit under the running board.

Pyramid Automobile Brushes

ARE YOU INTERESTED IN A BIG LITTLE BUSINESS?

Big because there are millions of automobiles constituting the field of demand to be supplied with new brushes. Big because the turnover and profits are rapid.

Little because the initial investment is small—for instance, there are

PYRAMID BRUSH Assortments

approximating from \$10 to \$100; popular assortments provided with neatly constructed containers.

Simply refer to the car list furnished with each assortment showing the standard brush to install on the starting motor or lighting generator of the most popular automobiles.

NATIONAL CARBON COMPANY, INC., Cleveland, Ohio

Automobile Brushes

A brush, properly applied, for every starting and lighting system known to the automobile industry.

Every car owner realizes the service rendered by the lighting generator and starting motor. Speer Automobile Brushes make that service reliable.

Carried in stock by the leading jobbers, dealers, garages and repair shops. Specify "SPEER" when you have your brushes replaced.

Manufactured by

SPEER CARBON COMPANY

Luther Dimeo-Steel Wire Brush

SEVEN PRACTICAL USES

A perfect wire brush and hub which will stand up under hardest use. Here is what you can use it for:

Cleaning and roughing inner tubes before splicing or patching.

Cleaning fabric in tire casings.

Cleaning or roughing any surface before vulcanizing.

Cleaning iron, brass and aluminum castings.

Removing scales from hot forgings, shovels, etc.

Cleaning sheet brass and copper.

Cleaning metal articles before plating.

Store Your Cars

COULD N'T you increase your production and reduce your cost per Car or Truck if you could only arrange for equal monthly shipments throughout the year?

Couldn't your Distributors and Dealers increase their sales if they could always make immediate deliveries from their floor or local warehouse, and not await delays of shipment, etc.?

Our charge for Storing Cars is figured to the exact day—not fractional parts of a month.

Investigate our plan for the purchase of Monthly Time Sales paper at 100% Spot Cash—no "Certificates" or "Holdbacks."

Popular Bumpers and Supplies

Mono-Spring Bumper

A one-piece spring bumper that may be attached to front and rear of most standard cars. Reinforcing plate of spring steel, bolted securely to the front of the bumper, increases its strength and adds greatly to its appearance. Retail prices, \$11.50 and \$13.00.

Spring Bumper for Fords

Made of one continuous strip of heavy, high-carbon, oil-tempered steel, looped at the ends, this Gemco Spring Bumper is one of the very best for Ford cars. Reinforced in front with heavy steel plate. Complete unit is substantially fastened to two spring steel clamps attached to front of car frame. Black or nickel reinforcing bar. Retail prices, \$10.00 and \$11.50. Without reinforcing bar, \$9.00.

Spring Arm Bumper

A durable, efficient bumper of pleasing appearance that fits most all cars. "S" shaped brackets are unusually strong, being made of specially heat-treated spring steel. Finished in Nickel or Black Enamel. Retail prices, \$11.30 to \$16.04.

Triple-Gard Spring Bumper

This handsome bumper offers the utmost in protection and appearance. The two protection bars—furnished in either nickel or black—are securely bolted to bumper rail. Bumper is attached to car with famous 3-way fastening—using forged hooks. Fits 90% of all cars made. Retail prices:
With Nickel Plated protection bars.....\$21.50
With Black Enamel protection bars.....19.50

Spring-Arm Front Bumper for Fords

The "S" shaped brackets of this Ford bumper, which are each made from one solid piece of tempered spring steel, absorb collision shock without damage to car frame. Bumper is attached securely to front of frame by means of two heavy dropped-forge yokes for each bracket. Bar is finished in nickel or black. Retail prices, \$11.46 to \$16.18.

Wilfit Bumper

Fits such a wide range of cars that only a limited assortment of bumpers need be carried. A strongly built, neat-looking bumper of front or rear. Diamond or Nickel Finish. Retail prices, \$10.82 to \$16.23.

Please mention The Automobile Trade Directory

for Fords and Many Other Cars

Gemco Tri-Chek

Attached to the front of any Ford, between the leaf spring and axle, the Tri-Chek spiral spring increased riding comfort regardless of speed or road conditions. Absorbs the shock, snubs the rebound and stops side-sway. Makes steering easier, too. Retail at \$5.30.

17-Inch Steering Wheels

For Fords and Chevrolet "490's." Beautifully finished corrugated rims of selected walnut, mounted on aluminum spider. Also made with black malleable spider in tilting and non-tilting styles. Retail prices, \$5.32 to \$7.44.

Tire Saving Jack

Takes the weight off the tires when the car is not in use. Easily placed in position. Made in 3 sizes. Fits all cars. Retail prices, \$4.20 to \$7.88.

Many new items are displayed in the 1921 Gemco Catalog, which is cross-indexed for every make of car. Send today for this valuable book. Your jobber can supply you with any of these Gemco Products.

Gemco Tonn-O-Wings

These attractive-looking, practical tonneau wind-shields provide that long-sought rear-seat protection from wind and dust. Forward wings are hinged so they may be swung out of way of passengers entering or leaving the car. Beautifully made of best quality plate glass, securely set in solid frames by special Gemco method, which prevents loosening or rattling. Frames finished in black enamel with nickel plated trimmings. Tonn-O-Wings are quickly and easily attached—made to fit most cars. Retail prices, \$51.00 to \$60.00.

Full-Tilt Detachable Steering Wheel

Easily tilted or completely detached. Gives 8 1/4 inches more room to enter or leave car. Protects car against theft. Corrugated 17-inch walnut rim; polished aluminum spider. Retail prices for Ford, Maxwell and Chevrolet, \$12.00. For Dodge, Overland "4" and Buick, \$12.50.

Foot Accelerator With Foot Rest

For Fords. Operated independently of hand control. Gives greater driving freedom. In great demand. Installed easily and quickly. Retail price, \$1.80.

TURNER TORCHES

(GASOLINE—KEROSENE)

"DOUBLE-JET"

"HOT-BLAST"

OUR new line will burn either gasoline or kerosene without changing adjustment. All the trouble, since the low grade fuel has been forced upon us, we have eliminated. It was necessary to generate our present fuel sufficiently. This we have accomplished by placing a baffle in the burner tube, filled with asbestos and on which the flame is constantly applied. We have a slot in the top of the burner tube forcing the flame onto the baffle so as to generate the fuel into a hot, dry gas. (Hot dry gas takes on more air and produces more heat on less fuel.) The difficulty formerly experienced by enlarging and corroding orifices has also been overcome.

All JOHNSON Bronze Bushings

bear the same stamp of accuracy, all are mathematically perfect, all carry with them the same guarantee of wear resisting ability.

"The Reputation Behind the Name"

promises you satisfaction and guarantees the ultimate in service.

What are your requirements?

Johnson Bronze Co.

New Castle,
Pa.

BENJAMIN

Buttons are made in a variety of styles and mountings to care for all requirements. Flush-type style may be used also for door-bells and call systems, as well as for automobiles.

The several types shown for spark-advance levers are used by the prominent steering-column manufacturers as standard equipment.

also include an extensive line of automobile and motorcycle horns, as well as garage lighting equipment and industrial signals.

Write for our descriptive booklet.

Accurate

INTEGRAL CAM SHAFTS

The Result of Intensive Specialization.

WE are equipped to build any type of integral cam shaft; from the one cylinder shafts with single inlet and exhaust cam to the twelve cylinder "V" type with twenty-four cams; lengths ranging from 4 to 72 inches.

NUMBER OF CYLINDERS

1 Cyl.	2 Cyl.	4 Cyl.	6 Cyl.	8 Cyl.	12 Cyl.
Farm Lighting Equipment.	Tractor	Passenger	Passenger	Passenger	"V" type
Stationary	Marine	Truck	Marine	both	for
Heavy Duty		Tractor	Aircraft	"V" type	Passenger
Marine		Marine		Straight	Aircraft
				Marine	Marine
				Aircraft	

The cam contours may be made in practically any shape suited to any kind of tappet, either roller, flatfoot, mushroom or shoe.

For the purpose of oiling and weight reduction, a hole is often required running the entire length of shaft and these holes may vary $\frac{1}{2}$ " to 1" diameter.

In addition to ordinary lathe and grinding operations of the perfectly plain cam shaft, any one, or a combination of the following, may be incorporated on the shaft:

Eccentrics	Keyways	Splines	Cross Holes
Reamed Holes	Threads	Helical Gears	Flanges
Tapped Holes		Oil Grooves	Thrust Collar

**UNIVERSAL
PUSH BUTTON**

2,000,000 in use

In appearance this button has the automobile look of simplicity, strength and reliability.

The button itself is large and get-at-able, but there is no unnecessary bulk, in fact, it is about all-button. Retail for 30c.

Write us today for price in quantity.

The General Phono Mfg. Co.

Formerly Named

The Garford Mfg. Co.

Elyria, Ohio

Standardized Drilling and Reaming Jig Bushings

There's a **WRIGHT-FISHER STANDARDIZED BUSHING** for every type of drilling and reaming jig work. They are ready for instant use without additional grinding and lapping. Progressive manufacturers carry them in stock the same as drills and reamers.

Made from the finest tool steel obtainable, with metallurgical control of heat treatment, an unvarying hardness of 80 to 90 degrees Scleroscope

is secured—ensuring unusual uniformity and long wearing qualities.

Each **WRIGHT-FISHER STANDARDIZED BUSHING** is exact to .0003", making interchangeability and replacement of worn bushings positive, convenient and extremely economical.

Unlimited Stock in All Sizes Ready for Immediate Delivery.

Send for our *Bushing Data Sheets* for all Standardized Drilling and Reaming Jig Bushings

Tillotson

CARBURETOR

Automatic Air Valve

The Tillotson air valve is set primarily to equal the requirements of the motor at idling speed with the throttle closed. From that fixed point the air valve automatically responds to all throttle ranges and maintains a uniform mixture that insures the highest motor efficiency at all engine speeds.

The Tillotson Carburetor is flexible and positive in its delivery of the correct mixture necessary to develop utmost power.

It represents a scientific achievement no less than it does a practical solution of carburetion problems.

Let us confer with you on your requirements.

KINGSTON

CARBURETORS *for* FORD CARS

THE NEW KINGSTON CARBURETOR (Model L2S) built specifically for the Ford car, is the fastest selling and most generally satisfactory accessory of the season. It is backed by the largest carburetor factory in the world, and is guaranteed to the limit. It is offered at a price that will insure quick sales. It is a fuel saver and trouble saver. It insures greater mileage with vastly more ease of operation. It is being launched on the biggest general advertising campaign ever conducted on carburetor sales. Initial orders indicate a business of at least half a million on this model during the current year. Alert dealers will prepare for the heavy demand.

Price Complete, with separator and air preheating device (shown below).....\$10.00

SPECIAL AIR PREHEATING DEVICE

Simplicity of Air Preheating Device

The Kingston Special Air Preheating Device combines extreme simplicity with exceptional efficiency. It consists of an aluminum warm-air collector to be clamped by a simple hose connection to the exhaust pipe, and a section of flexible metal tubing for the carburetor connection. It can be installed in five minutes, by anybody. It delivers preheated air directly to the mixing chamber, insuring perfect carburization, greater ease in operation and a big saving in fuel. It will more than pay for itself in a short time. The device is shown in the cut on the left. Method of installation is shown on the right.

Method of Installation

Maxwell
Insures easy starting,
more mileage, ease of
operation.
\$12.50

Chevrolet
Handsome and efficient. Thousands of pleased users.
\$12.50

Dodge
Quick pick-up, flexibility and pronounced economy.
\$15.00

Buick
Velvety smoothness, exceptional reliability.
\$16.50

THE ENTIRE KINGSTON LINE is receiving the benefit of a tremendous advertising campaign. More than a half million pieces of direct mail will be sent during the next few weeks, and five million readers are being told every month about the advantages of this splendid line. Live dealers everywhere will find the Kingston their biggest and readiest seller. Write for special information.

RING TRUE

Standards of Accuracy

Out of hundreds of thousands of Ring True Bearings manufactured in our plant every month our rejection-sheets show only 1/10th of 1% are rejected for any reason whatsoever.

Our very rigid inspection system makes this possible.

Special gauges and fixtures enable us to make an accurate and rapid check between operations.

Every day, all gauges are tested by means of the Johansson Blocks—the pride of the tool-room, capable of detecting wear as small as one-ten-thousandth of an inch. When completely finished, every bearing is given a rigorous final inspection.

Do you wonder that 82% of the automobile manufacturers in the United States use Ring True Bearings.

CRAMP

Super-Strength Gear Bronze

*See our
exhibit at
the
New York
and
Chicago
Auto Shows*

Hobbing Axle Drive Gear Wheels of Cramps Gear Bronze

Hundreds of these wheels are in use in trucks and not one has broken. This is due to the strength of this super bronze.

Government Tests Have Shown

Tensile Strength	122,000 lbs. per sq. in.
Elastic Limit under Tension.....	89,000 lbs. per sq. in.
Elastic Limit under Compression.....	58,000 lbs. per sq. in.
Permanent set at 100,000 lbs., on one inch cube.....	.014 inches

This Bronze is the result of 90 years' experience in building machinery of all kinds. We can supply it either in the form of castings or machined and hobbed complete, including the furnishing of the steel worms—ready for installation.

We would like to hear from Automobile and Axle makers who are looking for better bronze at no increase in price.

Applied to the Automotive Industry

THE development of all branches of the automotive industry, both as to increased efficiency and decreased price, has been hastened by Franklin Die-Castings.

The die-casting process has long been a success. It was originated by Franklin engineers nearly thirty years ago. Millions of castings ranging from bearings to magneto parts and tire pump housings have been doing their work regularly and efficiently for years.

Franklin Die-Castings save labor, save material, save costs. They are highly specialized, made of different materials for different purposes and applied to various industries.

The advantage they give in increasing production and saving production costs in other ways is easily figured.

We cast in aluminum, zinc, tin, and lead base alloys.

We welcome inquiries as to the practicality of applying the die-casting principle to any product submitted. Sample part or blueprint is sufficient for our report and estimate. Consultation on request.

OUR BOOKLET

"Franklin Die-Castings in Many Fields," relates in detail some of these accomplishments. Write for it.

Everything is listed under the NOUN or principal word

Used throughout the industry

A census of modern American automobiles and motor trucks would show few into which Doehler Die Castings had not been built. The last reckoning showed that over 80 per cent of the annual output of die-castings came from the big Doehler plants.

Quality is the outstanding reason for the general standardization on Doehler Die Castings. Manufacturers have learned by experience that anything less is not fully satisfactory. In the long run, Doehler Die Castings are not only most dependable, but also least expensive.

The die cast babbitt lined bearings pictured here are but one of hundreds of parts produced in quantity for the automotive industry. Bearings are made by thousands every month—babbitt lined bronze backs and the new aluminum backed type. Many parts formerly machined out are now made as "Do-Di" Finished Brass Castings.

The Company offers the advisory service of its engineering staff or is prepared to die-cast parts to your specifications.

**Xylonene.**

Xylonene is a transparent cement, made for patching celluloid in curtain and rear windows.

With Xylonene anyone can repair a hole or crack in the curtain or rear windows of their cars.

If care is used, patch will be scarcely noticeable.

Missing windows can be replaced with Xylonene better than by sewing.

Xylojust.

Xylojust is a waterproof lacquer. It is a perfectly clear solution that will render celluloid that is opaque from scratches transparent and bright.

It can be applied with a brush as easily as varnish.

Top Repair Outfit.

Xylo Waterproof Top Cement for repairing Pantasote, Mohair, Imitation or Real Leather; Auto Tops, Side Curtains, Cushions, etc.

Write us today for our terms to the trade.

New York City

Why "X" Liquid Is The Only Scientific Repair For Leaky Radiators

Hand repairing is clumsy at its best. It can never make a radiator like new.

"X" Liquid is poured into the water. It finds the tiniest leak. Makes a permanent metal-like repair in half an hour.

Keep it in the radiator at all times. Cleans out rust and scale and prevents more forming.

Large Size
\$1.50

Ford Size

LEAKPROOF • RUSTPROOF • SCALEPROOF

WONDER "FLASH"

Starting Fluid

Starts cold motors the first turn over, no matter if the temperature is 20° below zero! Saves the batteries of the self-starter for the man who owns the big car; saves the cranking struggle for the man who drives a FORD. Requires but

a few drops squirted through pet cocks or spark plug openings to start engine instantly. In ½ pint cans, price 75c, list.

WONDER WORKER

Specialties include more than 60 items—a specialized article for every different purpose in the care and repair of cars. This largest of all lines enables the jobber and dealer to obtain all items from a single source—doing business with one concern, saving time and transportation extras, simplifying purchasing and shipping.

Longer Life

It is not hard to understand why the MORSE Silent Front End Chain Drive has become known all over the world as the superior long life, accurate chain.

The reason is simple: the ability of this chain to remain at its best for long periods without the need of expert attention.

The users of Front End Accessory Drives have learned that this unusual quality means faithful, efficient service from the Car or Truck.

They also find MORSE Silent Chains a source of great and lasting economy.

**Write us your Front End problems
There is a MORSE CHAIN DRIVE Remedy**

D & O SAFETY STEERING CONTROL

Not a new idea but positively the best of those now on the market. Correctly designed—carefully made. Simple in construction and easily attached. Will outlast your car. Effects a considerable saving on tires and wear on pins and bushings. Keeps your car from creeping on crowned roads. Saves strain on arms and shoulders caused by tight grip of steering wheel. Car can be steered by one hand. Permits car or truck to be driven faster, easier and more safely. Eliminates weaving motion of front wheels.

As necessary as your windshield and sold under a **MONEY BACK GUARANTEE** if not satisfactory in every way.

BRONZE- BACK BEARINGS

Inseparable
—*Babbitt and Bronze*—

By a unique and proven process of cohesion of metals, a two-part bearing—babbitt and bronze—has been produced which has the rigidity and strength of a single metal. This bronze-back bearing—the Stewart—is designed especially for use in automobile, motor truck, tractor and air craft engines, electrical equipment and on any machine requiring a smooth-running, long-lived bearing.

Through this special Stewart process of bearing construction, the babbitt lining and bronze-back are so united that they are practically one metal.

THE "BRANFORD" AUTO CLEANER

Every garage or factory needs one or more of these **AUTO CLEANERS**, because: It cleans wire wheels, hoods, tops and cushions.

It sprays priming coats of paint on running gear or bodies. It cleans motors, radiators, transmissions, etc., —in a word, it has a hundred various uses around a garage or motor car factory.

Sells for only \$3 f. o. b. Factory or \$3.50 with 12" extension nozzle.

MALLEABLE IRON FITTINGS CO.
BRANFORD, CONN. U. S. A.

Nipple furnished to fit tire inflator connection if specified

The DE LAVAL Method of Clarifying Varnish, Japan, Enamel, Etc.

The De Laval Multiple Clarifier completely removes the finest particles of dirt and sediment from varnishes, Japans, lacquers, shellacs, enamels and test block oils.

The clarification is instantaneous and done at much lower cost than is possible by filtration methods. It is also much more thorough than the older methods.

The Multiple Clarifier requires about two square feet of floor space and less than one and a half horse power to drive.

Write nearest office for Bulletin No. 200.

The De Laval Oil Purifier is another new centrifugal machine, which instantly and perfectly removes grit, dirt, carbon, water and other impurities from lubricating and cutting oils, restoring them to their original brilliancy. Ask for Bulletins No. 100 and No. 102.

De Laval Multiple Clarifier
Made in 2 sizes and for steam, electric or belt drive.

KOR-KER

ELIMINATES
TIRE
TROUBLES

Seals Punctures—
Stops Slow Leaks

Gives 50% more mileage
Preserves tubes. 7 years'
success in 40 countries.
Not a filler. Does not affect
resiliency. Keeps tires fully
inflated. Prevents rim cuts.
Stops slow leaks. Is not a
filler. Makes strong the
weak link in motoring.

JUST ONE EASY MOTION ACROSS and the
Klear-Sight Windshield Cleaner

gives you a clean dry glass. Clings firmly to the shield.
Ready for instant use. Made of sturdy steel with rubber
squeegee. Handsome and durable. Heavily japanned.
Drawn spring steel insures uniform contact over all.

**We are the largest
Manufacturers of
Fibre Specialties
in the world**

We have a capacity of three million washers daily, one million handles, knobs, etc., and a million weekly capacity for various other fibre specialties.

In addition to this, we make at least one hundred thousand different kinds of FIBRE specialties a year, thus showing the versatility of our plant.

We are not only the largest manufacturers of FIBRE specialties in the world, but we have one of the most complete departments for working out ways that vulcanized fibre can be used in place of more costly material.

Get in touch with our nearest office today. They will immediately tell you if we can make your product of fibre in place of the more expensive product you are now using. This advice may save you thousands of dollars a year—it has for others, why not you?

PROPER TIMING MEANS BIGGER REPAIR PROFITS

The only way to get proper returns from your repair work is to know the actual time consumed on each job.

Henry Kastens Time Stamps furnish an accurate record of just how long each job takes—the correct basis for repair charges.

It stops the mistakes, losses and complaints due to inaccurate charges. Also useful for timing the arrival and departure of rented cars, taxis, etc.

Made in several models to meet every requirement.

Write for booklet and prices.

OHIO

SLIPOVERS
Slips Over No Buttons -- No Hacks
Protects the Motorists Clothes

One Piece Overalls With Many Advantages

Patented spring-back permits freedom of motion. "When you bend Protexall gives."

No straps, no coat to catch. Means safety and convenience.

Protected buttons avoid scratching of car or merchandise.

On top of all this Protexalls can be made to advertise your business with your name stitched right into the back with fast color thread.

A line of inquiry will bring you complete information.

The Protexall Company
500 Pearl Street Abingdon, Ill.

The Uniform of the Automotive Industry

"AUTOMOTIVE" BRAND

Utility Suits

Designed and built especially for
the Automotive Trade

DISTRIBUTION: Exclusively by bona-fide Jobbers of Automotive Equipment.

MATERIALS: A high-count, sulphur-dyed, KHAKI TWILL. Fast colors.

PACKED: Each suit or coat is in a strong, good-looking, properly-labeled box that handles stocks and displays most advantageously. Shipping cartons contain one dozen such packages. Contents and sizes are shown on outside of case.

CATALOG shows complete line and will be mailed to any legitimate Jobber for the asking.

DILECTO

Tell Your Customers

AKSALA

REALLY REMOVES CARBON

Every motor car-owner in your town would give many dollars if they really knew of a positive carbon remover.

Now you can tell them that at last a scientific formula has been found that will absolutely remove carbon from gasoline motors—known as AKSALA.

Dealers: Order through your jobber. If he can't supply you ask us for our profitable proposition today.

Jobbers: There is a real demand for AKSALA. Our mail is bringing in dealers' inquiries every day. If you want this business write us for our terms to the trade.

BAKELITE

[REG. U. S. PAT. OFF.]

Insoluble, infusible, and dielectric, Bakelite has become the foremost insulating material for electrical equipment in the automotive field. Because of its permanent high finish, mechanical strength, its fast color, and excellent weather-resisting qualities, it is rapidly replacing rubber, wood, composition, and other materials in the manufacture of door handles, radiator caps, shift gear balls, and other mechanical parts.

Perfect Bearing Surfaces

Produced With

Lightning-like Rapidity

The announcement of the discovery of a practical method of grinding in soft metal bearings came like a flash of lightning—like a bolt from the blue.

It meant that inaccurate and laborious hand scraping was forever done away with. Shop practice took a great step forward.

The simple statement that **TIMESAVER** Bearing Abrasive Compound was harder than babbitt, brass or bronze and softer than iron or steel, and that it turned from an abrasive to a lubricant after a few minutes' use, told the whole important story to mechanical men. They knew that another milestone in mechanical achievement had been passed.

Perfectly fitting bearing surfaces in a quarter the time with a quarter the labor, by unskilled men, is the everyday experience of the rapidly swelling ranks of **TIMESAVER** users.

Mail the attached coupon with \$1.50 for a trial can and convince yourself of its extraordinary merits. Six can cartons, \$9.00.

M. T. K. SALES CORPORATION

Ohio Karbon Killer is, without doubt, the surest, purest, and most efficient carbon remedy in existence.

Ohio Karbon Killer eliminates old carbon deposits; cleans the engine thoroughly; and effectually puts an end to knocking, missing, back firing, loss of compression, etc.

Ohio Karbon Killer is mixed with the gasoline; is on the job every minute; and prevents the formation of carbon on the spark plugs, cylinder walls, piston and valves.

Ohio Karbon Killer increases speed, power and mileage; produces more uniform combustion; reduces gasoline and repair bills; and makes the car run smoother, easier and quieter.

Ohio Karbon Killer comes in condensed form, and is used at the rate of one level teaspoonful to five gallons of gasoline. One pound will treat 480 gallons, and costs \$1.00—about one-fifth of a cent per gallon. Liberal discounts to dealers. Write for prices, etc.

Vol. T—TRANSCONTINENTAL BLUE BOOK. Including the main, heavy trunk lines of travel for use of long distance tourists, particularly for Coast to Coast tours. The volume is absolutely limited to these main highways and no other roads or side routes are given. **\$5.00 net**

Ready, June, 1921.

Vol. A—NEW YORK METROPOLITAN BLUE BOOK. An intimate guide to New York City and surroundings within a radius of 50 miles. A complete New York guide not only for the automobile tourist but also for anyone who is living in or visiting New York City. **\$3.00 net**

This cancels all previous trade prices and discounts

Trade Price Sheet

The New 1921 Automobile Blue Books

The Automobile Blue Books, unlike other commodities, are sold for actually less than their cost of manufacture. This is only possible on account of the advertising carried in them but, as the advertising rates are determined in advance, and as a very large edition would not increase our income, but, on the contrary, decrease it, our printing orders are based on actual orders in hand before we go to press.

The special discount schedule on orders placed before press dates offers a real inducement to dealers to place their orders early and, at the same time, absolutely insure a supply of the books after they are published.

Special Schedule effective only before dates on which 1921 Blue Books go to press

Volume	Retail Price Each	On Orders Placed Before	Will Be Published, Delivered and Billed	In Lots of Less Than 100		In Lots of 100 or More	
				Discount	Net Price F. O. B. Chicago	Discount	Net Price F. O. B. Chicago

The Standard Road Guide of America

The Automobile Blue Book

Glance at the open book at the top and see how complete each detail is and how thoroughly the information will serve motorists not only before they start, when they are planning their tours, but also on the road, with a Blue Book in their lap.

The distance—brief description of the route and of the roads—running directions for every mile—mileages between every fork and turn—railroad crossings, curves and grades—hotels and garages—detail maps of towns and cities—interesting descriptions of historic and scenic points en route—it is all so simple that one merely reads his or her way. The speedometer is a constant check.

Motorists never guess with a Blue Book. They know every minute where they are. They know exactly how to reach their destination, where to eat or stop en route, what to see and where to put up their cars.

Every bit of information that they want, to make their trips successful and free from worry, is anticipated for them in the Blue Book.

JUST WHAT EVERY CAR OWNER NEEDS

Every car owner who comes into your place of business is a possible customer for Cleroline.

Cleroline is a liquid chemical compound, which is easily applied to the windshield, with a cloth, sponge, or a piece of tissue paper. One application will last for many hours through the most severe rain storms, snow, mist or fog.

**Sells on Sight
75c a Can**

Cleroline is not a soap. Not a grease. Not a chemical compound. Requires no mechanical device.

WITH CLEROLINE ON YOUR WINDSHIELD YOU CAN DRIVE WITH BOTH HANDS ON THE STEERING WHEEL.

All you have to do to make a sale of Cleroline is to display a dozen cans in your window and the small attractive sales display card on your counter.

Cleroline retails for 75 cents. There is enough in each can for about 150 applications. Once you introduce Cleroline in your town, you will continue to receive repeat orders and besides there is a generous profit for you. If your jobber cannot supply you, write us direct.

COMPOUNDS, Tire Preserving

(Chemical compound or paint for applying to tires to preserve the rubber—See also Paints, Rubber.)

Dees & Wheatley, 47 Main St., Midlothian, Tex.

Kerpurer—See Rubber Preserving Co.

Rubber Preserving Co., Otis Bldg., Chicago, Ill. "Kerpurer."

Saye-O Co., Asylum & Ann Sts., Hartford, Conn.

To Prepare Automobile Bodies for Painting Use DEOXIDINE—It Prevents Rust

from forming under the paint

Deoxidine prevents rust from forming under paint. Removes, rust, dirt, oil, grease, hand marks, acids, before painting. Prevents all defects from developing in the painted finish. Deoxidine is successfully used by the leading automobile makers.

TASGON

"The Magic Fluid of Many Uses"

Loosens nuts, bolts and any fitting that is rusted or otherwise stuck. No clipping. No cutting. No parts destroyed. No time wasted.

A necessity to automobile owners, repairmen, mechanics, etc.

Tasgon prevents Carbon, Stops Squeaks in Springs, Fixes Cold Motors and has hundreds of other handy uses.

Tasgon is the Original, Genuine and Patented Rust Loosener.

Tarr-Gon

Cleans Automobiles Inside and Outside.

Removes any Grease or Tar spot and gives an excellent polish.

Cleans grease and dirt from leather cushions, makes leather and pantanote tops look like new.

Cleans running boards, headlights, windshields and tires.

Cleans grease and dirt from the hands.

Tarr-Gon is just as useful in the home.

Tasgon and Tarr-Gon—for sale by all dealers. Write for descriptive literature. Big repeat-order sellers.

INSIST ON THIS YELLOW CAN

**PUTS PEP
AND POWER
INTO MOTORS**

**ONE GRADE
FOR
ALL JOBS**

***The non-lubricating grinding
compound that "Does the
Best Job in the Shortest Time"***

"PEP" contains no oil whatever. There is nothing in its paste-like mixture to retard the quick action of the abrasive.

"PEP" has a peculiar smooth-cutting property that cannot be found in any other grinding compound.

With "PEP" one grade does *all* the work. With other grinding compounds two separate grades, one for cutting and one for finishing, are usually necessary. When the grinding is done the valve seats are wiped with damp cloths; that's all. But the result is—valve seats of glasslike smoothness, true and perfect in fit. For quick and profitable results always use "PEP."

If not stocked by your jobber write us for discounts, giving jobber's name.

Always insist on the yellow can.

WORCESTER ABRASIVE COMPANY, Worcester, Mass.

UNION TWIN CYLINDER STATIONARY COMPRESSOR

*The above illustration shows our
Model 45 AIR COMPRESSOR*

This COMPRESSOR is adaptable to heavy truck tire service—it pays to cater to the vast growing truck industry. Trucks are on the job 365 days a year. They consume gasoline and oil in big quantities—so why not make your garage the stopping place for the trucks of your town and those that pass your door.

We manufacture a complete line of AIR COMPRESSORS, both portable and stationary.

Catalogue of complete line mailed upon request.

UNION AIR COMPRESSOR COMPANY
Butler, Pennsylvania

BRUNNER

BRUNNER AIR COMPRESSORS

Handled by Leading Jobbers Everywhere

No. 102

No. 102—Double Cylinder Vertical Belt Driven Air Compressor

This compressor is designed for the average garage with line shaft. The bore is 1½ in., stroke 2½ in., guaranteed pressure 175 lbs. to the square inch (fitted for higher pressures upon order), capacity from 2½ to 3 cubic feet free air per minute depending upon speed, splash system lubrication, floor space 6¼ in. by 10 in. Each cylinder is fitted with a reliable safety valve which can be readily adjusted for varying pressures which is absolutely dependable under all conditions. A very efficient, durable and economical compressor.

No. 247

No. 247—Heavy Duty Tire Service Outfit

For serving giant pneumatic tires. Especially designed for installation where high pressure in generous volume is frequently required. This outfit is furnished complete with the exception of piping and includes our No. 47 two cylinder water cooled compressor, mounted with motor on cast iron base and operated by a 2 H. P. motor, 80 gallon Brunner heavy duty tank, No. 72 Brunner safety valve, Model B. air gauge, No. 70 horizontal check valve, No. 84 needle valve, No. 82 needle valve with swivel hose connection, two especially ground brass unions, one 25 foot length Brunner special air hose, (¾"); and one automatic tire connection, cooling tank, automatic controller, safety fuses and all necessary fittings included. Capacity 7 cubic feet of free air per minute.

This outfit is large enough to take care of the heaviest air service, is reliable, economical, durable and everything about it is up to Brunner standards.

No. 542—Motor Driven Assembled Outfit
Especially designed for Gasoline filling stations, garage and similar installations where space is limited. Has sufficient capacity for garages housing up to 75 cars. Compressor—Two cylinder, air cooled having a displacement of 2½ cubic feet of free air per minute, ½ H. P. motor capable of starting compressor against 130 lbs. pressure without overloading, extra heavy Brunner Air Tank, 32 gallon capacity. The outfit is complete, including air gauge, check valve, 25 feet ½ in. "Existoll" Air Hose connected to one No. 82 needle valve on one end and having an automatic tire connection on the other.

No. 542

No. 742—Belt Driven Outfit

This is similar to the No. 542 described in adjoining column but designed for use where exceptionally quiet operation is desired. It is especially recommended for oil stations, small repair shops, accessory stores and other service stations occupying small quarters and where the noise incident to gear drives would be objectionable. It has the same equipment and same capacity as No. 542.

BRUNNER

BRUNNER AIR SERVICE FITTINGS

Handled by Leading Jobbers Everywhere

No. 66—Portable Tire Inflator

Designed for inflating tires direct without the aid of a tank and storage system. The compressor is a two cylinder, air-cooled, with accurately ground cylinders, piston and piston rings. The motor $\frac{1}{4}$ H. P., specially designed, powerful enough to meet all conditions, all accessories, including 20 feet of electric cord and plug, 20 feet Brunner "Resistoil" Air Hose, Tire connection, and air gauge to register tire pressure, makes this outfit complete and ready to operate when taken from the crate.

An exceptionally good outfit for concerns operating a fleet of delivery trucks or salesmen's cars.

No. 66

No. 72—Brunner Safety Valve

Is an absolutely dependable safety valve. It has a ball seat, which is commercially air tight, and may be readily adjusted to blow off at any desired pressure up to 175 lbs. It is intended only as a tank safeguard by preventing higher tank pressure than that for which the valve is set. Furnished with either $\frac{1}{4}$ in., $\frac{3}{8}$ in. or $\frac{1}{2}$ in. male connection. $\frac{3}{4}$ in. supplied unless otherwise specified.

No. 72

Brunner Model "M" Pressure Controller

Automatically maintains air tank pressures between predetermined limits. It insures a constant supply of air, avoids delays, yet prevents waste of current caused by pumping after pressure in tank reaches that to which safety valve is set. It is very compact, substantially built and all moving parts are protected from dirt and dust.

Brunner Extra Heavy Galvanized Air Tanks

Are made of the very best Open Hearth Flange Steel, are heavily galvanized inside and out. They are made especially for air pressure and meet the most exacting specifications. Tested to 300 lbs.; guaranteed for a working pressure of 150 lbs. For special installations a heavier tank for 200 lb. working pressure may be had in genuine Brunner tank.

Air Tanks

Brunner "Resistoil" High Pressure Air Hose

Has an oil resisting inner tube, which in ordinary service will not become porous. It is especially made for air service, is guaranteed for 200 lbs. working pressure and will wear several times longer than ordinary air hose. Sizes $\frac{1}{4}$ in., $\frac{1}{2}$ in. and $\frac{3}{4}$ in.

No. 82—Brunner Needle Valve

For use in place of an ordinary air stop cock. One end is threaded to screw into the air line. Other end fitted with a swivel hose coupling to fit $\frac{1}{4}$ in., $\frac{1}{2}$ in. or $\frac{3}{4}$ in. hose. This valve is heavily constructed of brass suitable for 200 lbs. air pressure. It is absolutely air tight and is provided with stuffing box on the stem so that it can easily be repacked when necessary. Supplied with either $\frac{1}{4}$ in. or $\frac{3}{4}$ in. male connection, but $\frac{3}{4}$ in. is always furnished unless otherwise specified.

Model "M" Controller

Model "A" Gauge

**SAVES
TIRES**

**FREE
CURTIS AIR
FREE FROM OIL**

A Friendly Sign

Drivers of cars everywhere seek this sign because it is their assurance of clean, pure air, which means fewer blowouts, greater tire mileage and less repairs.

CURTIS AIR—Free From Oil

Blowouts—the bugbear of every auto driver—are often the result of the rotting of the inner tube, due to oil-soaked air. Offer your customers Curtis Air—free from oil—and cash in on the increased patronage that is sure to follow.

Ask Your Jobber

We manufacture several styles, types and sizes of Compressor Outfits. Ask your jobber for prices and complete information, or write us.

Profit by Doubling the Capacity of Your Ford

Makes a speed truck of a Ford without any change in Ford mechanism. No change in regular Ford engine speed. Heavy, square spoke wheels—with brake drums—fitted with hubs ready for mounting. Extra heavy ball bearings—giving double set of bearings, taking weight and strain off rear axle. Highest quality springs. Castings made of malleable iron. Guaranteed for one year.

The process that has taken uncertainty out of bronze backed babbitt lined bearings.

Olsen Centrifugal Force Patent Process bearings have solved the problem of too rapid disintegration in bearings. The process is a logical one, combining a solder, babbitt, and a special cooling process that lengthens the life of the bearing and improves its performance to a degree that has received favorable comment from the best known engineers.

Porosity is eliminated — absolutely. The bond is so positive that broken down bearings will show a cohesion which is practically a fusion of the metals.

The liner has a uniform density throughout.

We will be pleased to give detail information upon request.

**AMERICAN BEARING &
DIE CASTING CORP.**
Indianapolis, Ind.

BRONZE SHELL BABBITT LINED BEARINGS

We specialize in the manufacture of Bearings for Automobile, Tractor, Truck, and Stationary Engines.

By our SPECIAL PROCESS we have attained a PERFECT COHESION of Metals making the Babbitt and Bronze practically INSEPARABLE.

Accurately Machined and Oil-Grooved to your specifications.

Magneto and Generator COUPLINGS

"The Coupling that
possesses timing as accu-
rate as a watch"

WE want to particularly call attention of automotive engineers and the trade in general to our Style "B" "ACME UNIVERSAL COUPLING."

This style coupling possesses a range in timing of 132 positions. The timing can be done accurately in the coupling instead of removing the gear cover or drive gear.

Remember, it is not necessary to remove the magneto when timing is done with this coupling.

The large number of adjustments of this coupling is obtained by Vernier principle; moving both hubs in either direction, the magneto is advanced or retarded 132nd part of the revolution, equaling 2 degrees 48 minutes 33 seconds.

Write us today for complete details, price, etc.

Style B

ACME MOTOR PARTS CORP.

MILWAUKEE, U. S. A.

CLIMAX COUPLINGS

Save money by placing your orders for these parts with us. Our patented process of manufacture out of stampings enables us to quote attractive prices and give you a lighter and better finished product.

We adapt our couplings to conform to your construction. Send us your blue print for quotation today.

PROVEN AUTOMOTIVE PARTS AND EQUIPMENT

For Passenger Cars—Trucks—Tractors—etc.

A SELLING SERVICE BACKED BY A BIG ORGANIZATION

Established over 13 years

The ZINKE COMPANY sells 94% of the jobbers in the entire United States, Canada, Hawaii, the Philippines, Cuba and various foreign outlets through its big export connections.

The ZINKE COMPANY sells exclusively to jobbers and manufacturers of passenger cars, trucks, tractors, etc., and is equipped to handle the entire output of any factory with which it becomes associated.

The ZINKE COMPANY relieves the manufacturer of a burdensome and expensive selling department. Consider the tremendous value of being able to have your products introduced by an established selling organization directly into the markets that you wish to enter and at a minimum predetermined selling cost.

The ZINKE COMPANY is departmentized and operated after the most modern and approved selling methods. Accumulative value of over 13 years has made the ZINKE COMPANY foremost in its field.

UTILITY AUTOMOTIVE PRODUCTS

Price Per Set, \$1.25

Utility Pedals for Fords

"The absolutely necessary accessory for Fords" sums up in the words of the user the reasons for the popularity and fast selling qualities of Utility Pedals for Fords.

They transform small smooth Ford clutch and brake pedals into standard size, comfortable pedals. Heavy rubber pad and side flange prevent slippage. Instantly attached. No holes to drill. Made of pressed steel, black enamel finish. Price, per set, \$1.25.

UNIVERSAL WRENCH SET

Will fit automatically any nut of any size or shape. No screws to manipulate or parts to get out of order. All the advantages of expensive 16-piece socket wrench sets. Price, only \$3.50.

UTILITY

UNIVERSAL RIM WRENCH

Fits every nut on every demountable rim. Absolutely automatic in action. All steel with indestructible handles and jaws even in the face of rough usage. Carries in any tool box. Finished in black enamel and nickel. Packed in fibre board cartons of 10. Price, \$1.75.

ROMORT AIR APPLIANCES

**Auto-
matic
Air
Valves**

Style "AA." This is a heavy duty automatic air valve especially designed for use with the Romort Universal Hose Coupling shown on this page. It has $\frac{1}{4}$ -inch I. P. threaded stem. Price, each.....\$3.00

Style, "A." For heavy duty the styles "A" and "AA" are recommended. Style "A" is furnished with step-up type stem which accommodates $\frac{1}{4}$ -inch, $\frac{3}{8}$ -inch or $\frac{1}{2}$ -inch inside diameter hose. Special stems can be furnished to fit any style metallic hose. Price, each\$3.00

**Auto-
matic
Air
Valves**

Style "BB." A light and inexpensive automatic air valve, equipped with $\frac{1}{4}$ -inch I. P. thread. Particularly designed for use with Romort Universal Hose Coupling. Price, each\$1.25

Style "B." Similar to the Style "BB" valve, excepting that it has the "step up" type stem, accommodating $\frac{1}{4}$ -inch, $\frac{3}{8}$ -inch or $\frac{1}{2}$ -inch inside diameter tubing. Price, each\$1.25

Universal Hose Coupling. For use with threaded stem automatic air valves, also for connecting air hose to tanks. Has $\frac{1}{4}$ -inch I. P. thread. May be used with either rubber or metal covered hose, up to $\frac{3}{4}$ -inch, inclusive. Price, each.....\$1.25

Tire Tester Attachment. Combines tire tester with Romort Automatic Air Valves. Simply slip gauge manufactured by A. Schrader's Son, Inc. into attachment. Price, each.....\$1.50

ROMORT AIR & WATER STATION

Combines effective advertising and ornamental lamp post with air and water service.

Hinged air pipe always stands in vertical position when not in use, holding hose and valve connection clear of the ground. The reach of the hose is sufficient to supply air to either tire without moving the car. The return of the arm through which the air hose passes is gradual, being controlled by an oil piston, preventing damage caused by quick return. Flexible wire armor on hinged air pipe and automatic air valve prevents kinks, breaks or short bends in hose.

Made for use with the customary air compressor service.

No joints to leak as there is one continuous length of hose from valve to base of air station.

Electric light in globe at the top.

Price, Model 11 (air only)	\$75.00
“ Model 12 (air and water)	80.00

The Zinke Company, 1323 Michigan Ave., Chicago

A distinctly individual type of radiator for the Ford car.

Spirex spirals are the principle of the patented construction, making for greater cooling capacity than can be obtained by the use of any other radiator. Forty-two per cent greater cooling capacity guaranteed.

The flexible metal used in its construction reduces the possibility of breakage as a result of freezing, to a minimum.

Carswell-Hammond Motor Bench Stand

The motor bench stand shown above is built and designed especially for the Ford motor. When the motor is placed in the stand, it can be disassembled or assembled without removing. The stand has a foot lever to operate the swinging table. Shipping weight of the above, 170 pounds.

We also supply the above stand specially constructed to handle Fordson tractor motors as well as Dodge motors. Shipping weight of Fordson tractor stand, 325 pounds. Shipping weight of Dodge motor stand, 210 pounds.

Dealer's Price.....\$42.50

With Portable Base... 62.00

Carswell-Hammond Alignment Machine for Ford Connecting Rods

All connecting rods should be tested before replacing them in the motor. A bent connecting rod will cause a slap in same. This is the most efficient type of alignment machine built for straightening Ford connecting rods exclusively. Shipping weight, 40 pounds.

Dealer's Price.....\$24.00

Carswell-Hammond Rear Axle Vise Stand

This stand is especially designed for Ford rear axle work, but can be used for other axles as well. The stand holds the axle housing firmly. Shipping weight of the above is 140 pounds.

Dealer's Price.....\$36.50

No Base with Axle Vise Stand

Carswell-Hammond Portable Base and Castors

This caster base makes any of our motor bench or axle vise stands portable. This base makes it possible to easily move your work as necessity demands. Shipping weight, 90 pounds.

Dealer's Price.....\$19.50

Carswell-Hammond Piston Vise

This piston vise will be found excellent for quickly and securely holding a piston without damaging same, enabling the workman to easily drive out bushings on pins and remove or replace piston rings. Ford and Fordson size jaws are furnished with each vise. Other sizes can be furnished at a small additional cost. Shipping weight, 25 pounds.

Dealer's Price.....\$15.00

Carswell-Hammond Revolving Assembly and Disassembly Stand

As the above illustration shows, this stand will permit the turning of the entire Ford motor as a unit to any position about the revolving axis. The above stand is shown with the castor roller base attached, but is furnished without it if desired. This stand will be found valuable in performing work on several sides of the motor at once, enabling several workmen to operate without interference with each other and having the parts properly exposed to them and within easy reach.

Dealer's Price.....\$42.50

With Portable Base.... 62.00

Carswell-Hammond Adjustable Connecting Rod Alignment Machine

Any connecting rod can be straightened or lined up with our adjustable machine. The arbor pins are for Ford connecting rods. Bushings are used for the different size crank shafts. Pins can be furnished for any type rod. Shipping weight, 60 pounds.

Dealer's Price.....\$85.00

ROBERTS

CUT-OUT and SAFETY VALVE

THE Roberts Cut-Out and Safety Valve combines the utility of an efficient cut-out with a safety valve of positive operation. It allows the burnt gases free and unobstructed passage from the cylinders and prevents them from mixing with the fresh charge.

When the cut-out is open, the exhaust or the dust it stirs up cannot get into the car because it is ejected straight out at the rear end of the muffler.

A GUARANTEE AGAINST BURSTED MUFFLERS

The spring-controlled safety valve opens instantaneously when there is abnormal back pressure or muffler explosions due to faulty ignition or carburetor troubles.

The Roberts Cut-Out and Safety Valve can be quickly installed and replaces the standard exhaust end of the Ford muffler. There is nothing to get out of order, loosen or rattle. Complete with hand control and cable, \$4.00. Packed in attractive, two color cartons in standard packages of twenty each.

The Roberts Cut-Out and Safety Valve is a genuine sales opportunity for dealers and jobbers. Write for our proposition.

TO PUT GREASE IN A

Ford Car

IN THE RIGHT QUANTITY
AND AT THE RIGHT PLACE

To INSURE Perfect Lubrication Requires a

FORC-FUL LUBRICATOR

NOT MERELY A GREASE GUN, BUT A HIGH PRESSURE LUBRICATING SYSTEM

that enables you to force out the old accumulation of worn out grease, grit, dirt, and fill the bearings with clean fresh grease.

The FORC-FUL lubricating outfit includes the FORC-FUL Lubricator and Special Connections for every place on a Ford Car, designed for hard grease lubrication, including:

King Bolts—2, Tie Rod Bolts—2, Rear Wheel Bearings—2, Universal Joints, Transmission Bearing, Differential Gears, Rear Drive Shaft Bearings, Steering Post, Fan Bearings, and **THE FRONT WHEEL BEARINGS.**

The FORC-FUL Lubricator is the only lubricator ever designed for supplying grease to the front wheel hubs, and it not only fills the entire hub with new clean grease, but first forces out the old grease and grit, thereby prolonging the life of the bearings and stops the stripping of hub cap threads.

Grease Cup Lubrication is a tedious, messy job, that is invariably neglected, if not entirely ignored.

FORC-FUL Lubrication is easy, clean and 100% efficient, requiring but a few moments to go over the entire car without soiling the clothes; the bearings are filled **FULL** of new clean grease and the old grease eliminated.

Let the Customer Choose

Next time a Ford driver asks you for a replacement timer, just let him see a **Milwaukee Timer** along side of any other make you have in stock.

Nine out of ten will choose the **Milwaukee**. They like its simple, rugged design (only two moving parts). They can see that it's built to last—of the best materials and without frills. In fact, it is guaranteed to outwear any other timer made. They know it is standard—over 3,000,000 Fords already use the same type. And its price is right—\$2.25 retail.

More **Milwaukee Timers** are sold than all other makes combined. Hundreds of thousands sold in 1920. Capacity of great new plant, 5,000 every 24 hours.

If you're not handling the **Milwaukee Timer**, ask your jobber about it. It is one of the best selling Ford items you can handle. Nationally advertised in 14 publications, including The Saturday Evening Post.

MILWAUKEE AUTO ENGINE & SUPPLY CO.

Milwaukee, Wisconsin

MILWAUKEE TIMER *for* FORDS

There is only one genuine Milwaukee Timer—look for the name on the shell.

Guardian Bumpers

Another super-plus product made by the Milwaukee Auto Engine & Supply Co. —"the timer people."

Trufit Bumper

Fits Essex and 1919-20 Buick. Also many other cars. Strongest and best clamp ever designed.

Conqueror Bumper

Fits almost any car, front or rear. Long enclosed springs. Very popular with the trade.

Kennedy Auto Storage Covers

To meet the need of an inexpensive and efficient cover for automobiles while in dead storage we are making a paper cover, which is proving the right thing for this purpose.

These covers are made of strong, heavy paper, properly reinforced to prevent tearing.

They protect the car against dirt, dust and moisture and will prevent the polished portions from tarnishing and the finish from checking in cold weather.

These covers are salable to individual car owners at a good profit as well as to furnish the dealer a protection for his stock of new cars.

We make them in four sizes: 7 Passenger, 5 Passenger, Ford Special, Electric

Winter will soon be here and dealers can handle these covers with satisfaction and profit. Further information on request.

The Kennedy Car Liner & Bag Co., Shelbyville, Ind.
Canadian Branch Factory: Woodstock, Ont.

Make Old Boreas Pay You Dividends

Old Boreas—King Winter—is the source of comfortable profit for the automobile accessory dealer who carries Campbell Radiator and Engine Covers.

Campbell Covers are favorites with the motorist because they fit with a snug trimness that preserves every fine line of the car. An overcoat—yet Campbell Covers give the car a dress-suit look.

Then there's the square flap in front—exclusive in these covers—that scientifically controls the air current and minimizes winter motor troubles.

These covers are diamond-stitched, fine pebble-grain material outside, and warm kersey blanket in between.

READY TO "BUTTON-HOLE" ON AND BOXED, READY FOR QUICK, EASY SELLING

Gordon Jiffy Cushion Slips are an excellent merchandising proposition. They offer every motorist a simple attractive seat covering that is easy to attach or detach.

Removable—Washable—Low Priced

These new Cushion Slips button on like a garment and they can be instantly attached or taken off. They are made of heavy, cold-water-shrunk materials that launder perfectly without fading. The price is within reach of every motorist. \$2.00 to \$5.50 per seat.

Gordon Jiffy Cushion Slips are made in only twelve standard sizes, each size fitting a number of cars. They come packed one to a neatly labeled box which contains a list of the sizes needed for any car and photographic instructions for putting them on.

They are easy to handle and easy to sell. Write us for catalogue, price list and samples.

The J. P. Gordon Company

555 North Fourth Street

**QUALITY
GRAY IRON CASTINGS**

This is the bag that brings you the perfect protection for spare shoes. The Allen Tire Case—it's useful, too, in many different ways.

Truly the Allen Tire Case is as necessary as the spare itself, because it helps the shoe deliver full mileage by preventing the destructive effects of sunlight, water and oil.

Aside from its utility, the Allen Tire Case adds greatly to the appearance of the car. Made in several styles and all colors to suit individual taste.

Oil The Springs

Cover, protect and lubricate the moving spring leaves from mud, dirt, rust.

Make it possible for the spring to absorb its share of shock burden.

Tire life is lengthened by the Jeavons patented lubricator, squeak is eliminated, riding comfort is increased.

To order successfully give name of car, year, model, style, type of car.

Use Jeasonoil with your Jeavonnizers

Everything is listed under the NOUN or principal word

This is a Kantsag Ford Rear Seat. Makes a Ford ride like a Hudson. Therefore every owner is a prospect at the list price of \$10.00. Pat. in U. S. and Canada. Guaranteed not to pack or sag for the life of the car.

JOBBER AND DEALERS, YOUR LINE IS NOT COMPLETE

Here is Why You Should Sell Kantsag Seats
Because There Are Over

3,000,000 Fords in use Daily
340,000 Maxwells in use Daily
400,000 Chevrolets in use Daily
The life of a common seat is very short.
Surely the seats must be replaced.
Think of the large field.
A word to the wise is sufficient.
Full particulars on request.

Kant Sag
UPHOLSTERY

926-28 St. Aubin Ave.
Detroit, Mich.

This seat was first introduced at the Detroit Automobile Show, March 8-10, 1919

PRATT & WHITNEY

Precision Machine Tools

Pratt & Whitney Precision Machine Tools include a large variety of machines used in the automobile industry. They have long been recognized for their superiority in design and workmanship.

Bench Lathes
Engine Lathes
Turret Lathes
Hand Screw Machines
Hand Milling Machines
Automatic Milling Machines
Thread Milling Machines

Spline Milling Machines
Die Sinking Machines
Surface Grinding Machines
Multiple Spindle Drilling Machines
Sensitive Drilling Machines
Profiling Machines
Vertical Shapers

Machinists' Small Tools

No effort or expense has been spared in the manufacture of Machinists' Small Tools to obtain the necessary refinement and accuracy.

Taps
Dies
Die Stock Sets
Milling Cutters
Reamers
Punches and Dies

Drills
Taper Pins
Lathe Mandrels
Threading Tools
Knurling Tools
Lathe and Planer Tools

Hand Chasers
Hollow Mills
Counterbores
Forming Tools
Hobs
Special Tools to Order

Standards and Gauges

As a result of their exceptional accuracy Pratt & Whitney Standards and Gauges have been recognized as the predominant influence in the standardization of the machine tool industry.

Plug and Taper Gauges
Snap Gauges
Taper Gauges
Thread Gauges

Pipe Thread Gauges
Measuring Machines
End Measures
Dial Indicators, Etc.

Quality Castings

If you would visit our wonderfully equipped plant at Waterbury and see how our castings are made, you would understand our reasons for calling them "quality castings."

Everything that can assure a finished product, free from flaws of construction or errors of design, is carried out in our foundry. We are specialists in the manufacture of castings. Our formulæ are based on actual experience. We have increased our capacity to meet the growing demand for our superior castings. Our experience in this line guarantees you a perfect product.

Hotchkiss Design Steel Dash

Sheet Metal Parts for Motor Trucks and Tractors

We have every facility for channeling, bending, angling, and forming sheet metal in every conceivable shape.

We manufacture steel dashes, toe plates, floor plates, pressed steel running boards, folded equalizer bars, radiator guards, hood ledge supports, and other sheet metal parts.

Write for information and price on our standard one-piece steel dash, and give us an opportunity to quote on your specifications and blue prints.

UNDARK

RADIUM
LUMINOUS
MATERIAL

"I Want That On Mine"

Gasoline gauges illuminated with UNDARK can be seen on the darkest spot of road or garage without the aid of electric torch or the danger of a lighted match.

UNDARK also makes oil level floats visible in the dark, minimizing the danger of burned out bearings and scored cylinders.

UNDARK is the compound that makes watches, clocks, compasses, electric switches and hundreds of other things as useful in darkness as in the light.

UNDARK doesn't get dark in the dark

Pierce Arrow, Kissel-Kar, Stevens-Duryea, Lincoln, McFarlan, Stutz and others have UNDARK gasoline gauges as standard equipment.

UNDARK contains real radium.

We are miners and refiners of radium bearing ore, also the pioneer and largest manufacturers of Radium Luminous Material.

Automobile manufacturers are invited to send gauges for sample treatment.

The Knowledge and Special Training to Plan Exactly the Tools Best Suited to Your Production Plan

CARROLL

ENGINEERING SERVICE

Your Tool Engineers, when designing your production tools, are actually writing your "Profit and Loss" statement. Efficiency in this department is necessary to the success of your production plan.

We have carefully built up an organization of experts in the design and manufacture of special tools for production purposes.

This organization can serve you far better,

and even cheaper, than any ordinary Tool Room force, or any other organization of any kind unless it possesses the same special training and wide experience.

Our Designing Department, we believe, is the best of its kind. It is so considered by some of America's largest automotive manufacturers and machine tool builders.

Let us tell you what we have done for others.

MERCHANDISING ACCESSORIES

The Chicago Tribune has new ideas and improved methods on merchandising of accessories for automobiles and trucks in the Chicago Territory—the five States of Illinois, Indiana, Iowa, Michigan and Wisconsin, the world's best market for accessories.

These ideas will be of value to you if you have anything to sell in this market.

Lansing Stamping & Tool Co.
LANSING, MICHIGAN

Gordon Cam Shafts

It goes without saying that when an organization made up of conscientious men, who have had years of technical and practical experience, have devoted twelve years to their chosen line, that they can produce a product second to none.

The truth of the above assumption is well proven by the fact that we are never able to serve all of those who desire us to do so. This in spite of the fact that we are continually enlarging our plant and adding to our equipment, which is universally recognized as being the most up to date and highly specialized to be found anywhere, and we cannot refrain from saying that,

"Some Build More, None Build Better."

We stand ready at all times to give you the benefit of our experience and take pride in saying that our work has never been criticized by our customers.

L. O. GORDON MANUFACTURING CO.

MACBETH LENS

AN AUTOMOBILE HEADLIGHT LENS WHICH IS BUILT ON THE SAME FUNDAMENTAL PRINCIPLES OF LIGHT CONTROL AS THE MARVELOUS MACBETH LIGHTHOUSE LENSES.

THE green visor and the scientifically accurate prisms on the front together with the concave recesses on the back eliminate all glare and give long range and side lighting necessary for safe driving. The Macbeth Lens is distinctive—this because of the green visor.

It took four years to develop the Macbeth Lens and it takes 72 hours to manufacture one lens. It has solved the headlight problem. Macbeth Lenses are made in all sizes to fit standard lamps.

PRICE LIST

All sizes	\$5.25 per pair
Denver and West.....	5.75 per pair
Canada	6.00 per pair
Winnipeg and West.....	6.50 per pair

Macbeth-Evans Glass Company

LEGAL

SAFE

The Lens with the Emerald Tint

KOPP'S HEADLIGHT LENS*"Keeps the Cops Away"*

Developed by one of the foremost illumination experts to meet the demand for an automobile headlight lens which, while complying with "Glare" laws, would give a ray powerful enough to permit of driving under all conditions—fog, snow, rain, without injurious eye strain.

LEGAL IN ALL STATES

Bends the light from the headlights downward, keeping it below the 42" level 75 ft. from the automobile and distributing it over the roadway to a width of 35 ft.

"RED SPOT" SEARCHLIGHTS ARE EASY to SELL BECAUSE

The ruby cylinder that slides forward at the touch of a button, changes the piercing white searchlight to an imperative red danger signal. It costs nothing extra, but gives the car owner added security and protection in emergency. It is an **exclusive** "Red Spot" feature, and an effective sales argument for the accessory dealer. Always sell two spot lights to every car owner, and be sure that one of them is a "Red Spot."

PEERLESS

Automobile Specialties

Makes old cars look like new

A different product for each part to make all used cars look as good as possible.

Quality goods sold in lithographed cans. Complete directions on back of each can.

Peerless Mohair Top Dressing

Waterproof, dresse and dye mohair, dash and canvas tops and curtains like new. Dries over night, leaving tops soft and pliable.

About one quart to dress a five-passenger car top.

Pint, 90c; Quart, \$1.65

Peerless Leather Top Dressing

An all dressing to renew the finish, and keep rubber, leather and patent leather tops and curtains soft and pliable. Dries over night. Not for seats or cushions.

About one quart to dress large five-passenger top and curtains.

Pint, 90c; Quart, \$1.65

Peerless Ford Top Dressing

A dressing made for Ford top material, making a rich black gloss finish, adding life and color to old top. Dries over night, wears indelibly.

About one pint for a runabout top; one quart for a touring car top.

Pint, 90c; Quart, \$1.65

Peerless Cushion Dressing

Without danger of washing or rubbing off, it brightens and renews the finish of leather seats and cushions. Dries in thirty minutes.

About one pint for small car and one quart for large car.

Pint, 90c; Quart, \$1.65

Peerless Lamp Enamel—Gloss and Dull

A rich finish for brass, nickel or iron.

One coat covers solid over the metal or old enamel. Air drying over night.

Pint, 90c; Quart, \$1.65

Peerless Cylinder Enamel—Black and Gray

A rich gloss enamel that saves cylinders and all metal engine parts from rusting. Not injured by heat, grease or gasoline. Air drying over night.

Pint, 90c; Quart, \$1.65

Used throughout the world by owners, garages and chauffeurs. Also used by over 8000 particular automobile painters.

DEALERS AND JOBBERS, NOTICE!

For your special convenience we have listed our complete line so that at all times you will have our catalogue before you with dealer, garage, hardware store, and paint shop discount of 25% from list prices. Ask your jobber or write us for latest catalogue, also window display material and other selling helps.

Made and sold on a quality basis only by.

The Columbus Varnish Co.
Sole Makers Columbus, O., U.S.A.

Peerless Tire Paint

A white waterproof coating for tires containing nothing injurious to rubber and keeps tire looking bright and new.

One pint will cover five regular castings.

Pint, 90c; Quart, \$1.65

Peerless Liquid Wax

A wax polish for all varnished surfaces of automobiles. In liquid form so that it is easily applied in a light even coat. Polished with ease and ready for use at once. Does not collect dust, and is not injured by water.

One pint will polish a large car.

Pint, 90c; Quart, \$1.65

Peerless Auto Body Polish

A varnish food to brighten and renew the appearance of all varnished surfaces on an automobile. Applied and polished ready for use in a very few minutes.

About one pint will polish a car.

Pint, 90c; Quart, \$1.65

Peerless Battery Box Black—Acid-Proof

An acid-proof coating for wood and metal that comes in contact with acid and fumes from batteries. Keeps acid from destroying wood and metal.

Pint, 90c; Quart, \$1.65

Peerless Color Finishing Varnishes

The idea of an owner wanting to paint the body, wheels or chassis of his automobile his favorite color is now realized by the use of these products. The work can be done at home. The goods will cover solid with one coat and dry satisfactory over night. Very durable products. Made in eight colors.

Straw Color		
Medium Yellow		
Red	Quart,	
Royal Auto Blue		
Gray	\$1.90	
Brewster Green		
Black		
White		

Peerless Black Japan—Extra Fine

A rich gloss air drying enamel for touch-up and all-around use on wood and metal parts of automobiles. One coat covers solid and dries over night.

Pint, 90c; Quart, \$1.65

Peerless Fender Japan—Jet Black

Made especially for coating fenders and hoods with a rich black gloss enamel. Air dries and has a finish like a baked job. Dries in twenty-four to thirty-six hours.

About one quart to coat fenders of a small car.

Pint, 90c; Quart, \$1.65

Peerless Mirroroid

A varnish renewer; to be applied to varnished surfaces that have lost their lustre and become dull through use. Dries over night with a fine lustre that will wear for months.

One pint to one quart to finish an automobile.

Pint, 90c; Quart, \$1.65

Peerless Gasket Shellac

A strictly high grade shellac for gaskets, cork, carburetor floats, and such parts on an automobile. This is a high grade product cut in pure alcohol. Is not affected by gasoline.

1/2 Pt., 50c; 1 Pt., 90c;
1 Qt., \$1.65; 2 Oz. Bot., 25c

Peerless Lining Dye

A powerful black dye that dyes all cloth lining a black uniform color over stains and faded parts alike. Dries in two to three hours.

About one quart to dye inside of five-passenger car top.

Pint, 90c; Quart, \$1.65

Peerless Rim Paint—Anti-Rust

A protective coating for automobile rims, to allow tires to be removed with ease and keep rims from rusting. Dries in four to five hours.

About one pint for rims of a small car.

Pint, 90c; Quart, \$1.65

The Tool to use on Broken Screws

Three minutes' easy work removes a broken set or cap-screw, stud, pipe fitting, cylinder bolt, etc., IF you use

EZY-OUT SCREW EXTRACTOR

WHERE TO USE IT
On any sort of broken screw, no matter how far down in the hole it's broken off or how tightly it's stuck. Saves retapping and danger to neighboring surfaces.

HOW TO USE IT
Just drill a hole in the broken screw, insert "Ezy-Out," slap on a tap wrench and twist—and the broken screw backs out on its own threads.

Designed by a garageman and made by the largest makers of twist drills and reamers, and stocked by our dealer.

Arnold Electric Drills

Combine Sturdiness, Lightweight and Balance with Abundant Power

Appeal to your workmen and hence speed up production and increase quality of work produced.

The Type C $\frac{1}{2}$ " Drill possesses super power. It is made for service and speedy, accurate work. Built in sections, each section coming apart in a unit without disturbing rest of machine—means low maintenance cost. Tool is equipped with five sets of ball bearings, insuring exceptional easy running qualities.

Type B $\frac{3}{8}$ " Drill can be used also as Valve Grinder and Bench Grinder by means of attachments illustrated.

No. 1 Bench Drill provides adaptability not found in other types of bench drills. Can be set to drill at any angle, graduations being provided for accurate adjustment. Unexcelled for systematic manufacturing and tool room work.

All types equipped with Universal air-cooled motors.

Type A— $\frac{1}{4}$ "
Weight, 6 lbs.

Type C— $\frac{1}{2}$ "
Weight, 13½ lbs

Type B— $\frac{3}{8}$ "
Weight, 7 lbs.

Valve Grinding
Attachment for
Type B— $\frac{3}{8}$ "

Type B— $\frac{3}{8}$ "
Drill with Valve
Grinder Attached

No. 1 Bench Drill—

STANDARD MACHINERY COMPANY'S BEARINGS

The Right Bearings for Every Part and Every Purpose

We are Specialists on the whole subject of bearings. We understand every phase of this intricate problem. We know the functions and uses of ball bearings and of roller bearings and will give expert advice concerning the use of either.

We make both kinds of bearings and they are the best that can be made. They will stand up and wear indefinitely under the severest test.

Our journal and thrust bearings for automobiles, motor trucks and general machine service have been perfected through years of experience.

STANDARD MACHINERY COMPANY

AUBURN, R. I.

In quantity, price and promptness of delivery we leave nothing to be asked for.

Send blue prints and specifications and we'll solve all the problems.

STANDARD EQUIPMENT ON ALL OF OUR FORD CARS

Each month adds many names to the list of firms who have thoroughly tested Williams Accelerator—and adopted it as standard equipment on their Ford cars and delivery trucks.

THE WILLIAMS ACCELERATOR FOOT THROTTLE

WILLIAMS ACCELERATOR makes driving your Ford easier. It is safer to use than the hand throttle—and saves gasoline.

Just as the self-closing faucet saves water, WILLIAMS ACCELERATOR saves gasoline. It automatically shuts off throttle when the brake is used and gas is not needed.

Only three
working parts—
all interchangeable

Built for
continuous
heavy-duty service

CORPORATION**
SAN FRANCISCO

SPRING-EEZ

Get the magic rust solvent that stops squeaks in automobiles. It is applied to springs with a brush,—no need to even spread them.

It penetrates between the leaves without help, eliminates rust and deposits a lubricant.

In the same manner it makes the removal of "rust-frozen" nuts, bolts, etc., easy—when applied.

Dealers may purchase through their jobber. If not yet stocked by your jobber or dealer advise us and we will see that you are supplied immediately.

RE-BORING MACHINE

Accurate!

Accurate to .0005 of an inch.

Weight to be lifted to cylinder base 60 lbs.

Re-bores cylinder varying from $2\frac{1}{2}$ to $5\frac{1}{8}$ inches (inclusive) in diameter.

THE HUBACO Re-boring machine makes errors in cylinder re-boring mechanically impossible. It performs perfectly the most difficult re-boring job without the services of a skilled mechanic.

Used wherever an extremely accurate, portable, inexpensive cylinder re-boring machine is required.

Valley Electric Company

227 S. Kingshighway, St. Louis, Missouri

Wotton Battery Station Chargers

Motor Generators 6 to 100 Amperes capacity. Economical in operation. Low upkeep cost.

One, two, four, or eight circuit switchboards—built in sections—additional circuits added when needed.

Each circuit separately controlled, giving charging rates to suit all batteries. Can be paralleled to obtain high rate for hurry-up charge.

Multiple circuit rheostats for direct current.

PURE ELECTROLYTE For Storage Batteries

We were not only the first to manufacture pure Electrolyte—but we were the first to realize that the Automobile trade was really in need of a

"Standard Electrolyte Product"

Therefore we once and for all put a standard of value on every gallon of Electrolyte we manufacture.

Every gallon is made to a definite formula. This insures long life to Storage Batteries, and a quick and ready response to the call for power.

For your own protection send your Electrolyte orders to us.

Everything is listed under the NOUN or principal word

3½-in. Bore, 5-in. Stroke—Overhead Valves

Either 3 or 4 point
suspension; also
3½x4L head type.
Wt., 285 lbs.

THOROUGHLY standardized; no untried features;
wonderful staying power. Same model used by
Government in most exacting war service.

Many thousands now in use all over the world.

Just as dependable for power work as for motor
vehicles; three or four point suspension.

LE ROI the Little Giant of a Motor

If we could bring you through the
plant where Le Roi Motors are made,
you would see the diligent care and
ingenious craftsmanship that is built
into every motor.

Every little detail of balance and
finish on a Le Roi is given the care
typical of men who love the motors
they make.

The reward for this careful manufac-

ture is reaped in every field where Le
Roi Motors are furnishing the pulse
of power in machines of many descrip-
tions.

Wisconsin

CONSISTENT

FOR the manufacturer of trucks, cars, or tractors who wants a power plant that he and his entire sales organization can bank on—a power plant that will hold the good will of the consumer by unfailing power service delivered at minimum cost, the Wisconsin motor is offered

In Nine Great Models

CAU	3¾x5	4 cyl.	VAU	4½x6	4 cyl.
EAU	4 x5	4 cyl.	RAU	4¾x6	4 cyl.
TAU	4 x6	4 cyl.	RBU	5 x6	4 cyl.
UAU	4¼x6	4 cyl.	M	5¾x7	4 cyl.
P		5¾x7	6 cyl.		

Every Wisconsin motor is run-in, torn down, inspected, reassembled and dynamometer-tested before shipment. It leaves the shops *ready to run*. Think what a saving this means to you in assembly costs.

TRADE MARK

HIGH TORQUE MOTORS

(Maximum Pull at Usable Speed)

In heavy duty motor manufacture, the name **WAUKESHA** stands for maximum achievement. It stands for the High Torque principle of construction which dominating performance has proven to be correct. It stands for *quality* both in material and workmanship.

Year after year, **WAUKESHA** Motors have been specified by leading tractor and truck manufacturers as standard equipment.

Year after year the wisdom of their choice has been exemplified by owner appreciation of unfaltering service under every possible condition. As a result the demand for **WAUKESHA** powered equipment has experienced a steady growth.

WAUKESHA engineers have proven to be of material aid in helping many automotive equipment manufacturers to solve their problems. They will gladly co-operate with you. You are invited to correspond.

The Lycoming Motor

An Equipment Asset of More Than Timely Value

The Lycoming is not a special motor designed to meet a transient condition.

Ten years ago this organization dedicated itself to the creation of a motor with characteristics that would meet what we then and now believe to be the real representative American car market—the simple, economical, substantial lower priced four.

Our confidence in that type of car as representing the really characteristic American type has been justified in the steady cumulative Lycoming demand that has created here in Williamsport one of the largest, if not the largest plant, in the world devoted to specialized four-cylinder motor manufacture.

The Cameron Air Cooled Motor

The finality of motor design that makes cooling flanges practical. Not a water cooled motor, but a special design which includes direct opposing inlet and exhaust valves, smooth interior cylinder head, and complete valve operating mechanism which works submerged in oil. These features, together with oversized valves and special valve cages, make the Cameron Motor "even cooling." The flanges or fins surrounding cylinders and valve cages, complete the work. These motors carry heat to the point of maximum efficiency only. They cannot deviate from this pre-determined temperature point. Write for full information.

AUTO-STOP

"You're Safe in Its Grip"

for Fords

When your engine stalls on a steep hill—your brakes fail you—you simply step on a pedal like a cutout. You can't slip back when equipped with an Auto-Stop. Saves wear and tear on tires and brakes in parking, and requires no adjustments. Attached to rear wheel of Ford. Anyone can install it. Put it on your Ford for 30 days. If not satisfied, simply return it.

Banishes short, sticking door latches on Fords. Fits snugly over present door latch, and affords ample leverage hold. Opens door easily and quickly. Made of aluminum. \$2.00 per set of three.

Fitz-Awl Valve Spring Compressor and Valve Lifter—A heavy duty lifter, made of cold rolled steel and polished. Extreme range of adjustment, and lift and adjustment is very simple. Folds up.

Wilkins Low Gear Control—A comfort device for Ford owners.

Dealers and Jobbers—Write for the Wayland proposition.

Positive Protection Minimum Cost

Dealers are waking up to the tremendous field for the sale of an efficient low-priced Fire Extinguisher. The "Auto-Fyr" Extinguisher has no

mechanical complications. It is simple to use and astonishes everyone by instantly annihilating a blaze.

Superior to Liquid Chemicals. No leakage, evaporation or corrosion.

Price, \$3.50

Sells on sight. Every sale means a big profit.

Write for Exclusive Agency proposition. Plenty of good territory yet to be had.

The best Fire Extinguisher for motor car and garage protection. Also needed in every home.

U. S. Fire Extinguisher Co.
East Syracuse, N. Y. U. S. A.

Export Sales Office: 17 Battery Place,
New York City

BOYCE AUTOMATIC FIRE EXTINGUISHER

The "Boyce" is an automatic chemical sprinkler system. Once installed in the motor compartment (where 98 per cent of fires originate), a fire can never become serious. By creating the heat that sets the "Boyce" in operation, a blaze destroys itself. A fire is so soon started than the automatic fuse melts off, and a fan-shaped torrent of chemical is sprayed over the entire motor. In fifteen seconds the fire is out.

HARDY FANS

FOR

Cars :: Trucks :: Tractors

Hardy Fans are light, strong, durable and silent. They use a minimum of power yet produce a volume of air that permits of maximum radiator efficiency.

Hardy Fans are designed and built with the desire to maintain an even balance of quality, workmanship and results.

Send us your blue prints and engine designs and we will quote you.

"Hardy Fans are Better"
"Hardy Prices are Lower"

Manufactured by

HARDY MANUFACTURING COMPANY
PENDLETON, INDIANA

Die Casting is More Accurate than Drawing or Punching

Dies are virtually gauges, fixing the size of each part cast from them. Thus, in Precision Die Castings, the "Human Variable" is eliminated to a greater extent than in any other process of making complicated duplicate parts.

There is not the same wear on the dies nor distortion on spring or metal as in punching or drawing. Consequently a high degree of accuracy and interchangeability can be maintained.

Die Castings are solid and substantial in appearance and can be cast in almost any shape; they can be made graceful in outline, suitable for high class machines. Send blue prints or models and let us show you how Precision Die Castings can serve you economically and efficiently

Booth

TRADE MARK.

FELT PACKINGS

Exemplify quality in every sense of the word. There's a big difference between "shoddy" washers and Booth's felt washers.

The "shoddy" washer, gasket and packing never did and never will retain oil—

And they cannot give satisfaction from any view-point—it isn't in the material.

Booth's washers, gaskets and packing are cut from "Simon pure wool felts"—especially selected for the various uses to which they are adapted.

They retain lubricants indefinitely and exclude dust and dirt always—eliminating all risks incidental to insufficient oiling.

We make them to your order in sizes from $\frac{1}{4}$ -inch diameter and $\frac{1}{32}$ thick on up.

"If it's made of felt ask Booth"

The Booth Felt Co., Inc.

463-473 19th St., Brooklyn, N. Y.
732 Sherman Street, Chicago, Ill.

We are Headquarters

for Felt Goods Used in the Electrical,
Mechanical and Automotive Fields

No matter what the nature or purpose of felt washers; gaskets; oil, grease or dust retainer, we can turn them out better, more quickly and more economically than any other manufacturer.

All the facilities of two thoroughly equipped plants are devoted to the making of felt goods—from die making to the finished article.

In consequence manufacturers find it to their advantage to entrust to us their entire needs in felt goods year after year.

"If it is made of felt, ask Booth"

The Booth Felt Co.

Incorporated

463-473 19th Street .. Brooklyn, N. Y.
732 Sherman Street Chicago, Ill.

For wearing parts that must function as insulators use *Vul-Cot* Fibre

The ease with which *Vul-Cot* Fibre is machined, drilled, stamped, sawed, and threaded has gained it wide use for parts that were formerly made of hard rubber, rawhide, horn, leather and celluloid.

Vul-Cot Fibre is uniform in density. It has no hard or soft spots, neither is there any grit or similar substance in it to dull edge tools.

You can purchase *Vul-Cot* Fibre in sheets, rods and tubes. We will also machine it to your specifications.

Think—where can you use *Vul-Cot* Fibre in place of some other material that costs more to buy and work? Perhaps our comprehensive book "The Material with a Million Uses" will suggest to you many ways in which you can save money through the use of this most handleable of materials.

Where shall we send the book? We'll also send a sample of *Vul-Cot* Fibre with it.

The

FACTORY

Where better bushings are made

Our plant has grown from a small shop to the plant you see in the illustration.

As our plant has expanded in size . . . so have our men increased in skill.

Just as "making better bushings" is the aim of our factory . . . so "making better bushings" is the life work of our men. They have grown up with the plant. Our aims, our ideals . . . have become their aims and ideals.

It is only reasonable to believe that men who make one thing their life work can do that thing better than anyone else, provided they have the proper tools and machinery to work with.

Our factory is equipped with the most up-to-date machinery. Every piece of machinery that is needed to turn out a "better bushing" is found here.

By using this machinery and employing men who have made "making better bushings" their life work, we feel that we can honestly call our factory "The Factory Where Better Bushings Are Made."

Self-Fluxing Solder

Saves One-Third the Time in Automotive Work

Made with a core of acid flux that eliminates the pot of acid, paste, or separate flux.

Kester Acid-Core Wire Solder

Is saving one-third the soldering time in many garages. As the solder melts off, the flux flows out in just sufficient quantity to assure a perfect bond under all conditions, making soldering easy, speedy, and economical. Comes in one pound coils in cartons and in one, five, and ten pound spools. We also make Kester Rosin-Core Wire Solder for delicate electrical work.

Parish & Bingham FRAMES

can be heat-treated

Our heat-treating plant is the largest and best equipped of its kind in the frame making world. Here we have 22,400 sq. ft. of ground containing a large assemblage of furnaces, a pickling room, and a chemical laboratory.

We have facilities for handling huge quantities of steel required in the making of a vast number of frames for which we are constantly contracting.

Over fifteen years of heat-treating experience is at your disposal.

Parish & Bingham FRAMES

*are designed and built to suit
every particular need*

Typical design of Automobile Frame Side
Rails made from P & B Special Analysis Steel.

We build frames either to your own design
or will design them for you.

We have a large assortment of stock dies
for almost any type frame required.

We can, if required, supply frames from any
special analysis steel, and can also heat treat
the frames if desired.

THE PARISH & BINGHAM CORPORATION
Cleveland
Fifth City

The Birthplace of the **HEAT TREATED AUTOMOBILE FRAME**

The Parish Factory at Reading, Pa., will go down in automobile history as the birthplace of heat-treated automobile frames.

When automobiles were first introduced, comparatively little attention was paid to the quality of the frame, for there were many other things which were deemed of greater importance, hence the frame received but little consideration.

When we entered the field, we found that substantially all automobile frames were made of low-grade steel. Steel lacking in the qualities essential to safety and lasting service. We found that bulk took the place of strength and there was no warrant against accidents due to defects developed in the process of manufacture.

Seeing these conditions existing, here we found our opportunity to give to the motor world a better frame with greater lasting qualities and the high degree of safety.

After exhaustive experiments, we found that a particular grade of Chrome Steel, made according to specifications (original with us), combined, to a greater degree than any other steel, all the qualities desirable for automobile frames.

It has also been our belief that it is folly to risk an accident for the sake of saving a few dollars in raw material, so we adopted this steel; a decision we have never had cause to regret.

Having secured what we believed to be the best existing steel for automobile frames, we proceeded to the subject of treatment.

We discovered that if we hardened and tempered precisely as you would temper a cutting tool the metal became homogeneous throughout and all weakness at the point of bending disappeared, hence there were no weak points in the frame. The above is the story of Parish Chrome Steel Heat-Treated Frames. Since we originated and started the heat-treating of automobile frames, we have been imitated and copied by others, but the distinction of being the first has kept our heat-treating process always a step in advance and has made the name "Parish Heat-Treated Frames" stand for the last word in the science of automobile frame construction.

A GAS MACHINE FOR EVERY HEATING PROCESS

HEATING MACHINE No. 29

This machine is for continuous hardening and annealing.

For hardening ball-bearing, detachable saw teeth and for annealing brass shells or any other work not exceeding 2½ inches in length.

HEATING MACHINE No. 51 For Coloring Iron and Steel Work

Made in various styles.

For tempering and coloring steel work "Carbonia" (or gun metal finish). This machine is practically an improved "Tumbling Barrel" heated with perfect uniformity; the temperature can be controlled by reference to thermometer.

OVEN FURNACE No. 38

Open Furnaces are designed to heat pieces of any desired dimension, uniformly to any degree of temperature required for annealing and hardening metal work.

For high-speed or tool steel.

Made in various sizes.

CYANIDE FURNACE No. 1

This style of furnace is made for hardening steel work in cyanide of potassium, as cutters, dies, springs, rolls, etc.

Made in various sizes and styles.

Gas as Fuel

has many advantages over other fuels. For example: with gas you can control the heat within 5° F. and maintain a uniform temperature for annealing and hardening up to the heat required.

During the past 30 years we have acquired an experience in the utilization of gas in mechanical heating process that will help you solve your heating problems.

Tell us your problems and we will show you how to overcome them in the most efficient manner. Write us today.

Everything is listed under the NOUN or principal word

Small illustration shows what happens when inferior gaskets are used.

Note to Repair Men: The best engineering authorities specify that a new gasket be used each time the motor head is removed. By doing this you insure against oil, water, and compression leaks, and add an extra profit to every job.

Victor Gaskets Hold Compression

Victor copper asbestos cylinder head gaskets withstand the terrific pressure caused by the explosion in the cylinders.

The power is confined and directed to the driving parts without loss.

Victor gaskets are accurately made of the best materials by skilled workmen to hold this compression under all conditions.

In the Victor line there are nearly 400 types of cylinder head gaskets and more than 4,000 other types.

Jobbers and dealers thus have at their command a complete assortment for every motor need.

The Gasket Supply Company

Manufacturers of

"Right" Gaskets and Sheet Packings, "Gasco" Piston Packing,
also Stampings, Punches and Dies

1728 Ludlow Street

Philadelphia, Pennsylvania

"Right" Gaskets

copper
steel
brass
lead

asbestos
rubber
paper
fibre

We are specialists in the manufacture of gaskets and will make your gaskets according to your specifications.

"Right" Gaskets prevent power losses and oil and gas leaks by making and maintaining a perfectly tight joint under any pressure.

Made for Automobiles, Gas Engines, Locomotives, High Pressure and Super-heated Steam conditions and for other system requirements.

Gasco Packing

Made in all other materials in Sheets, Rings, Spirals, Coils, Tucks and Millboard forms.

asbestos
rubber
leather

flax
canvas
compositions

Made for steam, gas, water, acids, brine, ammonia, oils and other purposes in thicknesses suitable for any purpose.

Right Brand Washers

asbestos
aluminum
bronze
brass
cork
cardboard
copper duck
fibre
felt
iron
lead

leather
mica
paper
zinc
millboard
rubber
steel
rawhide
Monel metal
tin
wood

We make "Right" Brand Felt Washers and strips for oil and grease packings and for automobiles, any shape, size, thickness or degree of hardness.

Metal Stampings

We are thoroughly equipped for quantity production of Metal Stampings in Brass, Steel, Copper, Lead, Zinc and other metals.

Our facilities enable us to handle the stamping of all parts requiring up to 100 tons pressure.

If you need any kind of Stamping, Shaping, Forming, Bending, Drawing or Piercing work done, let us quote our prices.

oline

Cork— the Natural Gasket Material

Careful repairmen use Acco Cork because it satisfies all the requirements of an efficient gasket material:

1. It is resilient and requires only moderate pressure to insure tight joints.
2. It is non-absorbent and provides an effective barrier against leaks.
3. It is easily cut and is especially convenient to use where quick service is required.
4. It is durable and gives longer and much more satisfactory service.

Joints that leak are inefficient and unsightly, and nine times out of ten the car owner attributes them to faulty workmanship. Can you afford to take a chance on losing a customer when Acco Cork Gaskets will eliminate all cause for complaint on this score.

For general repair work Acco Cork is supplied in sheets, 12 x 36 inches, $\frac{1}{8}$, $\frac{3}{16}$ and $\frac{1}{4}$ inch thick. For Ford cars, Acco Cork Gaskets and Washers are packed in dust-proof boxes containing complete sets, or ten gaskets of any one shape.

Samples and Prices Cheerfully Supplied on Request

An Important Improvement

in

CYLINDER HEAD GASKETS

We are introducing to the trade a gasket for Ford engines, embodying a new principle in gasket construction—putting the binding on the outer edge—as is shown in the illustration.

This new principle improves the construction of the gasket to a wonderful extent, as it prevents blowouts where they occur in 75 per cent. of the ordinary gaskets—around the outer edges.

Bottom layer of gasket pure Lake Copper .010 gauge, with a layer of long fibre asbestos.

Insert plate of special copperized metal that severest tests have proven much better than copper.

Write us TODAY for Sample Gasket, Prices, etc.

The Fitzgerald Mfg. Co.
TORRINGTON, CONN.

ROSS STEERING GEARS

The superior and distinctive feature of Ross Steering Gears is the screw and nut mechanism, which transfers the rotation of the steering wheel to the steering arm. The nut completely envelops the screw so that the entire bearing surface of both screw and nut are utilized. Because of the easy steering, reliability and satisfactory service which these enormous bearing surfaces guarantee, Ross Gears are used as standard steering equipment by 166 different manufacturers, representing considerably over half the entire industry. This wonderful record has earned for them the distinction of being

*The Steering Gears that
Predominate on Motor
Trucks.*

**Fore and Aft
Steering Gear
Models
BM and BL**

**The
Nut and
Discs**

The Trunnion Shaft

**The
Screw**

As the screw turns, the nut, which completely envelops it, travels up or down, rotating the cylindrical discs in their recesses. These discs, which hold the projecting arms of the trunnion shaft, rotate it in turn and move the steering arm forward or backward. Compare the enormous bearing surfaces of this screw and nut mechanism with other designs in which only three or four teeth are in contact at one time

**Fore and Aft
Steering Gear
Model BU**

The illustrations show the three general designs in which Ross Steering Gears are made. These designs, in different sizes and with special fittings, adapt Ross Steering Gears to meet the requirements of any motor truck manufacturer.

*Write for catalog and for any
special information desired.*

WARNER GEAR

WARNER Gear Clutches and Warner Gear Transmissions, Controls and Differential Units for motor cars and trucks are all made under *one* management and all in *one* plant. Keep this ever in mind for it is your *guaranty* of Warner Gear *quality*.

Manufacturers who seek to buy driving gears as a complete and unified mechanism welcome this system of gear units made by Warner Gear—correlated and co-ordinated through nineteen years of progress in gear making.

Dyneto 1 and 2-Unit

Starting and Lighting Systems

for All Motor Cars and Motor Trucks

SIMPLICITY is the keynote of Dyneto design. For this reason Dyneto Starting and Lighting Systems are found as standard equipment on many well known cars and motor trucks. Ball bearings, freedom from complicated switches and wiring, and their thorough dependability make Dyneto—1 or 2 unit—systems a valuable aid to any manufacturer.

BIJUR SYSTEM ON ALL TEN FLOORS

WHERE TO GET BIJUR SERVICE

The Bijur Motor Appliance Company specializes in the design and manufacture of starting and lighting equipment. A ten-story plant located in Hoboken, N. J., is devoted entirely to the manufacture of electrical equipment and supply parts for passenger cars, trucks, seaplanes, airplanes, blimps, and other automotive machines.

Complete Bijur Equipments, including Motor, Generator, Gear Shift and Supply Parts, are made under one roof at the Bijur Plant.

The Bijur System was first adopted by Packard in 1912. Today it is standard equipment on many leading cars.

Over 130 Bijur Service Stations in the leading centers of the country are provided with complete information concerning the various models in service and spare parts and supplies manufactured by the Bijur Motor Appliance Company are carried in all the leading cities of the country.

FOR CHEVROLET

and All Cars Equipped With CANTILEVER SPRINGS

A—Spring Steel Radius Rod
B—Pendulum Leverage Hanger
C—Vibration Equalizer Springs
D—Pivotal Support or Axle Standard

Here Is What Marvels Do for Cantilever Springs

1. Lift the Cantilever Spring entirely off of the axle and suspend it free to move in a pivotal hanger. Now all the propelling, or transmission force of the car is eliminated from the cantilever spring. Sounds unusual, doesn't it? But 5,000 sets have been running for many months in mountainous territory, and they proved to be a sensational winner right from the start.

2. Next a yieldable radius rod of spring steel transmits the propelling force.

3. Impact forces delivered by ruts, bumps and rough spots, act instantly on the pendulum leverage arm (sensitive to a few pounds) and are drawn off in the top equalizer springs.

Four Points of Resilience

Each Marvel Shock Absorber produces resilience at four points—four sources of gentle springy action, where only one existed before. The only shock absorber of any type that absorbs more than a vertical rebound bump. Marvels will cushion a lateral thrust (head-on), as the impact force is shunted directly to a pendulum hanger and are drawn off on the sensitive equalizer springs.

Easy to Install

Marvel Shock Absorbers come assembled complete, ready to install, with full set front and rear. Quickly installed and nothing to get out of order or to adjust.

Price

The cost of a complete set of Marvel Shock Absorbers for a 490 Chevrolet is \$35.00 at any distribution point in the United States. For other type cars having cantilever springs the price varies.

**Motor Truck Manufacturers
Now Furnish Pierce Governors
as Standard Equipment**

The overwhelming endorsement that the truck industry has given Pierce Governors proves conclusively two things:

—It proves that these manufacturers recognize the necessity of automatic speed control if their trucks are to deliver maximum service at minimum cost.

—and it proves beyond any question of a doubt the superiority of Pierce Governors over governors of other types.

\$15

IN U.S.

It Governs Speed absolutely!

For Ford Trucks and Commercial Cars

A tremendous money-saver! Compels careful, consistent driving of Ford trucks, or salesmen's cars. Prevents all speeding. You set it—and seal it! Unvarying. Unbeatable.

What causes ruined bearings, damaged pistons, and most motor ills? Excessive speeds. Racing engine. These things are avoidable. This is the remedy.

Ask to see a Dell governor. It does the work. Simple, reliable, and guaranteed absolutely efficient, or your money back. Quickly attached. Prevents accidents.

The Best Lubricant

and the easy way to use it

Lubrophite Transmission and Differential Grease is a non-fluid fibrous lubricant manufactured from pure mineral oils. It contains no rosin, no tallow, no acid, no chemicals, no foreign fibre, not even perfume. Particularly designed for the lubrication of transmission and differential gears, nothing else.

The **Lubrophite Flexible Grease Gun** is a flexible, moisture-proof bag, the neck of which is fastened on to a metal funnel or snout, four inches in length. Capacity six pounds. To operate, you merely insert the spout in the gear case opening, then—

“Just Squeeze The Sack”

Dealers: This outfit sells as fast as you stock and profits are worth while. Write today.

The Lubrophite Oil Products Co.
1515-17 W. Sixth Street, Cincinnati, Ohio

When Gear Meets Gear

there is bound to be more or less friction. But it can be held down to a negligible minimum by proper lubrication.

DIXON'S
GRAPHITE
Transmission and Differential
LUBRICANT

Dixon's Graphite Lubricant stands the terrific pressure when gear meets gear—pressure that “sequences out” ordinary oils and greases. And it sticks to gears when idle.

Write for Booklet No. H-G and Lubricating Chart, giving name of your car.

GUARANTY Spark Intensifier.

A Real Gasoline Saver!

Backed by a Money-Back Guarantee

"The best selling accessory we have sold since being in business." That's what the Motor Accessories Inc. called Guaranty after selling out their first order like "hot cakes"—"enclose our order for one thousand" backed up their praise.

"A Blessing to Motorists."

That's what Mr. F. W. Norris of the Norris Real Estate Company called Guaranty, after it had fired dead spark plugs and added power and speed to his Marmon car.

("Creating Customers"—a broadside of interest to jobbers and to every retail accessory dealer, garage, etc., mailed free upon request.)

Throughout the country the Guaranty Intensifier is adding fame and prestige to the well-known Guaranty Line—Guaranty Rear End Truck Units that convert pleasure cars into sturdy trucks—Guaranty Pliable Drives for Ford Trucks—the Guaranty Auxiliary Power Take-off—the Guaranty Motor Repair Arm for Broken Ford Crank Case Arms.

GUARANTY MOTORS COMPANY

Cambridge 39, Mass.

Mfrs. of the well-known Guaranty line.

DURSTON TRANSMISSIONS

For Trucks and Passenger Cars

Manufacturers of trucks up to one ton capacity, speed wagons, or passenger cars are invited to investigate the adaptability of Durston Transmissions to their requirements.

Increased Demand

There are one million more cars in service this year than last.

This means that the demand for *Twitchell Gauges* has been automatically increased by just that many units, since every car user is a logical prospect.

*Keep this in
mind when

Grinding Machines

We manufacture a machine especially designed to grind the bore of cylinders or any large, awkward-shaped casting.

Our internal grinders finish the holes in gears, connecting rods, ball races, etc. It is also valuable in tool rooms for gauges, dies or bushings, grinding either straight or tapered holes.

Piston rings or any flat work which requires facing is best handled on our surface grinders, 8", 12" and 16" size.

No other method of chucking the work is as rapid or successful as with a Heald Magnetic Chuck. Built in all sizes, rotary or rectangular shape.

We will be favored if we can furnish you literature.

BIGGER PROFITS for TIRE MEN

Why do the biggest Tire Shops use JOHNSON ELECTRIC BUFFERS?

Liberal size ball bearings; Dust - proof mountings; Heavy, sturdy shaft.

Request literature and prices. Distributors: Ask for Proposition.

LEADING Tire Vulcanizing Shops and tire companies throughout the country rely on Johnson Buffers to do preparation work quickly and cleanly, at a minimum power and labor cost. The Fisk Rubber Company says: "Giving us great satisfaction, both in work accomplished and lack of attention required." We have dozens of letters from successful tire shops highly praising the Johnson.

Increases Efficiency Four Times

You can cut down your labor costs and be assured of bigger profits with this buffer. We can prove it. Look at the illustration. All parts are guarded and housed. Sturdy, compact; occupies smallest space. No noisy, slipping, dangerous belts. The motor is of special design built for buffer service.

Safety Extension Pedals For Fords

PATENT PENDING

Insures perfect control
Makes driving safe and pleasant

NEW-WAY "SAFETY"
Foot cannot slip

OLD-WAY "DANGER"
Foot can easily slip and cause accident

"The Quick Selling Accessory"

They transform the small smooth tread, inefficient and dangerous Ford standard clutch and brake pedals into safe and comfortable foot rests.

They are provided with Safety Guards on the sides, which absolutely

prevents the feet from slipping in wet weather. The heavy Rubber inserts eliminates vibration, insures perfect control and makes driving safe and pleasant under all circumstances.

There is no side wear on the pedal causing the foot to slide off.

The rubber inserts can be replaced when worn out at the small cost of ten cents each, making the Safety Pedal a lifelong proposition.

The Safety Extension Pedals are graceful in design and substantially made. They are easily attached in three minutes with an ordinary wrench and last a lifetime.

Price \$1.25 a Pair

AMBU BATTERY SHOP

Equipment, Fittings and Books

AMBU Electric Trouble Shooter

The greatest system ever devised for locating any trouble in the electrical mechanism or wiring of an auto. Whether in starting or lighting system, the AMBU Trouble Shooter will, in less than half an hour, locate it and tell you what it is—no more guessing. Pays for itself in a few weeks. Write today for details.

AMBU Cadmium Voltmeter and Leads

Makes it easy and simple to test each set of battery plates without taking down the battery. Specially calibrated positive and negative reading voltmeter and flexible leads with cadmium electrode complete, \$25.00. Voltmeter only, \$22.50. Leads only, \$3.25.

AMBU ARMATURE TESTER

AMBU Armature Tester

One man tests any armature having a commutator—from 1 inch to any size; locates grounds, shorts, broken connections, crossed connections and open circuits. Operates on any circuit. A portable device with no sensitively adjusted parts. Works fast and sure. Necessary when testing generators or starters. Price, complete, \$50.00.

Address Electrical Division

AMBU Battery Steamer

Softens compound for opening battery in 15 minutes, while men are busy elsewhere. No chance to damage battery box or connections by burning.

Auto Storage Battery—Its Care and Repair

The only authoritative book ever issued that tells all about the storage battery in simple language. Tells how to take down and reassemble batteries—how to locate and fix trouble—how to equip a battery shop—how a battery is made. A complete guide to the mechanic or boss—5 days' approval, \$5.00.

AMBU Plate Press

Increases the life of batteries by renewing plates. Presses the active materials of bulged negatives back into the grids. Made of wood with acid-resisting finish—nothing to corrode. \$82.50.

AMBU Plate Burning Rack

Holds the plates in position while the lead is melted in. Price of small rack, \$7.50. Large rack, \$12.50.

AMBU Battery Turntable

Makes work on batteries fast and easy. Saves handling heavy batteries. Each, \$2.50.

AMBU Lead Molds

Saves all your scrap lead. Molds it up into usable form for lead burning. Each, \$1.50. Pair, \$2.50.

AMBU Battery Carriers

One man can carry two batteries. Easy to lift batteries from car. Each, \$1.50. Pair, \$2.50.

Address Appliances Division

Ford Standard Electrical Equipment

A layman's book written by experts. Tells all about the new F.A. Starting and Lighting Systems now in all Ford cars. A necessity in every shop making Ford repairs. 150 pages—47 diagrams and illustrations. 5 days' examination, \$2.50.

Address Publication Division

AMBU Wiring Diagrams

The original authoritative diagrams, simple, convenient, easy to follow. A necessity in every shop. All cars: 700—1911 to 1919; 180—1917 to 1919 cars. In loose-leaf binder, \$3.50. All others ready for book, 25c each. Get just what you need, not a lot you never will want.

STERILIZED CURLED HAIR

Upholstery must do its part. Cushions upholstered with our **Sterilized Curled Hair** do not become matted and lumpy with use but retain their resilience, softness and shock-absorbing qualities throughout the life of the car.

We also specialize **Woven Hair**, furnishing same in rolls of continuous yardage or cut to dimension from buyer's patterns.

Our unusual facilities enable us to fill all orders promptly and accurately.

Prices and samples sent on request.

BLOCKSOM & COMPANY

OXNARD, CALIFORNIA

Radio-Thrust Bearings for Worm Shafts

Thrust bearings on worm-driven truck axles, or in any other worm-gear speed reduction units, **must stand up.**

Gurney Radio-Thrust Bearings in the Worm-Driven Sheldon Truck Axle, shown herewith do stand up.

Note the simplicity of design—two opposed R-T bearings to carry both the radial and reversing thrust loads at one end of the worm shaft, and one radial bearing at the other end, for the radial load only. Fewer parts, easier machining, and longer life are salient features of this construction.

Everything is listed under the NOUN or principal word

Our big national advertising campaign is creating everywhere a strong demand for Perfection Motor Car Heaters.

Dealers: There are scores of car owners in your territory who are potential buyers of Perfection Heaters. They are completely "sold" on them and it only remains for you to let them know you have Perfection Heaters for sale.

There is still opportunity for one wide-awake dealer in every town to share in the profits of Perfection Heater sales this season.

Write TODAY for full information.

The heat is there; why not use it?

K. & S. Auto Equipment

Our Auto Heater can be used on any gas car.

It contains an aluminum heating coil, and, owing to its quick heating action, it develops sufficient heat for comfort on the coldest day while car is running at low speed.

The K. & S. Lock has been pronounced 100% perfect for its quality, simplicity and mechanism. Approved by Underwriters' Laboratory. Reduces insurance.

K&S

K. & S. Auto Shifting Lever Lock locks in neutral position, making it impossible to mesh gears. Models made for all ball and pivot type levers.

K. & S. Auto Heater & Lock Co., Inc.

3357 So. Michigan Ave.
Chicago, U. S. A.

Major Quick-Start Manifold Pre-Heater for Fords. Makes starting easy. Price, \$1.75. Also for Chevrolet. The Major Coil Protector will make the Ford safe in wet weather, rain or storms. We guarantee you against ignition trouble caused by wet coil terminals. Price, 60 cents.

Dealers—Write for Agency Terms.

Major Coil Protector Co.

370 Vinewood Ave., Detroit, Mich.

EMCO PRODUCTS

Taber Model G Muffler

A small, light but very strong muffler that cannot be blown out.

Cast of gray iron in two pieces.

Joints perfectly ground insuring against leak and rattle.

Easily installed.

Price \$2.25
West of Rockies..... 2.65

Taber Tire Carrier

Strong, light and durable — guaranteed for life of car.

Toggle locking device makes tire easy to remove but theft proof when locked.

Adopted as standard equipment on Ford enclosed cars.

Prices

F. D. 3—Single Demountable for Fords....\$7.00
F. D. 4—Double Demountable for Fords... 8.90
F. C. 3—Single Demountable for Chevrolets. 7.00
F. C. 4—Double Demountable for Chevrolets 8.90

Prices F. O. B. Williamsport, Pa.

Specify Types in Ordering.

Taber Spring Support Clamp

For Chevrolets, Saxons, and all other cars equipped with quarter elliptic springs.

A positive insurance against breakage of spring bolts on all cars equipped with Quarter Elliptic Springs.

Retail price, \$2.25 each, \$4.50 per pair.

Taber Unlined Brake Shoe for Fords

Comes in one or two pieces as desired.

Made of special formula gray iron casting and reinforced at points of greatest wear.

Every pair tested on a Ford Brake Drum before leaving factory, thus insuring perfect fit without waste. Retail price per set, \$1.00.

The Taber Pedal

The most versatile item of its kind on the market—adapts itself to a score of uses.

Note extra long leverage of bottom Thrust Arm.

Automatic Locking device holds Pedal down when in use—a kick of the heel releases it.

Made of special formula gray iron casting and heavy wearing parts of malleable iron to insure against breakage due to sudden strain.

Retail price, each.....\$0.35

NATIONAL HAND HOISTS

SPEED WITH EASE OF OPERATION—3-TON

The National Hand Hoist is the most efficient 3-ton Hoist on the market. Combines lightness with strength, compactness with capacity, speed with ease. Fits any chassis. Pull is always at right angles with dump body. Occupies but 9 inches space. No arms extend below body when down, nor above body when up. Will raise 3-ton body to angle of 40 to 45 degrees in two minutes with only 60 lbs. pressure on handle. Low in first cost—and no expense for up-keep. Fully guaranteed. Write for complete particulars.

NATIONAL STEEL PRODUCTS CO.

1610 Crystal Ave., Kansas City, Mo.

THE GIANT "EASY LIFT" HOIST

Designed for Any Truck

The Most Practical Hoist Made

The GIANT "Easy Lift" gives twice the lifting power with one-half the lifting resistance. This means less power used for hoisting, less strain on the power plant and time saving operation. It is mechanically constructed, with all the advantages and none of the disadvantages. No oil to freeze—no leak-outs, no oil pumps, no space lost between body and driver's seat—stops automatically and is held up by brake, no racing of Motor while lifting, lighter in weight. Hand Hoist for all trucks up to two ton, Power Hoist from two ton up. For further particulars and price write—

LAMBERT

License Plate Holder

A Distinctive—One Piece Boltless Holder

Simplicity is the basis of this holder. Can be put on or taken off entirely by hand. For the average motorist it does away with rusty bolts and bothersome noises. This holder will fit almost every standard make of car. Just slip holder through slot in plate, then through slot in bracket—give quarter turn and your license plate is on to stay. Absolutely locked until you reverse the operation to take it off.

These holders are mounted on an attractive counter display card having 25 pairs on each card that retail at 50c a pair or \$12.50 list price a card.

We would be very glad to ship you a card through your jobber. Just send us the order and mention your jobber's name. Sample pair by mail for 25c.

The Fastest Selling Second Spare Tire Carrier On the Market

Every motor car owner, who has a car equipped to carry only one spare tire, wants an Erp Rim Carrier set as soon as he sees it.

Made to Fit Any Size Rim or Tire

The bolt and nut construction is so simple that a tire can be attached or detached without any special tools in one minute; an ordinary wrench is all that's needed.

The Erp Spare Rim Carrier has the three point suspension, inside grip so that there can be no chafing at any point.

The Complete Set for \$3.50

(\$4.00 West of Rockies)

There are no straps, no rattle, no chafing and no soft spots on a tire which is carried by this device.

Dealers: If you want live business getting literature send your request direct to us on your letterhead. Sent free

Manufactured by

SEDGWICK SALES COMPANY

1405 Sedgwick Ave., New York City

(See Other Side for Jobbers)

This illustrates one of the three units of the Erp Spare Rim Carrier which completes the set. Securely bolted to tire rack found on the car. Second spare removed instantly by turn of 1 nut.

The complete set comes in a box no larger than a pound box of candy.

Erp Spare Rim Carrier

"CARRY TWO SPARES AND BE SAFE"

DEALERS: Order the Erp Spare Rim Carrier From Your Nearest Jobber

For your convenience we show here the jobbers in your territory that carry the Erp Spare Rim Carrier in stock. This accessory has proven to be the fastest selling article that accessory dealers carry. If you are not stocking it ask your nearest jobber about its merits and selling possibilities.

Marquette Luggage Carrier

Marquette Luggage Carrier LENGTH ADJUSTABLE

It is without question one of the most popular and most useful accessories on the market today. A Luggage Carrier must have all of the following three points embodied in it to give maximum service to the user.

First—Capacity
Second—Safety
Third—Convenience

The Marquette Luggage Carrier gives all three of these and more.

We co-operate with both the dealer and jobber thru not only our advertising, but also thru dealer and jobber helps of various nature. Fits all cars. Folds down neatly to the running board when not in use, being scarcely noticeable. Attached quickly without the use of tools and without mutilation of running board. Once installed always ready.

Provides liberal storage for all kinds of luggage, camping equipment, parcels, etc., where they will not crowd the seating capacity of your car. Keeps them safe from loss or damage.

The strap feature of the Marquette Luggage Carrier holds the luggage absolutely stationary. The luggage is strapped to the Carrier and securely held in place away from the body of the car. The straps are adjustable and can be easily detached.

Made of high grade steel, neat in design. Nothing to break or get out of order. Finished in black enamel, furnished as follows:

4 ft. size adjustable from 27 in. to 46 in.....	weight 5½ lbs.....	Price \$4.50
5 ft. size adjustable from 36 in. to 60 in.....	weight 7½ lbs.....	Price 5.00
5 ft. size furnished with three straps.....	weight 8½ lbs.....	Price 6.00

Expanding and Contracting Split Rims

The Little Giant Rim Tool performs every function of this task with ease, speed and dependability. It is handy, efficient and rapid in its application and operation.

The rim is placed in a suitable position in the grips of the Little Giant. A few turns of the handle contracts the rim and the tire is easily lifted off. A reverse motion of the handle will expand the rim, locking it securely in place.

It is designed to handle the most difficult tasks in expanding and contracting the different split rims used today. Repair and garage men are quick to appreciate the value and economy of this device. The investment involved will be saved a good many times figuring the cost of time, labor and damaged rims.

The stand is built of strong steel angles with proper reinforcements. A one inch square acme thread spindle is used, which positively will do the work required of it. The gripping parts are made of high grade malleable iron. Nothing but heavy, durable material is used throughout.

The tracks or slides in which the arms travel prevent the tool from buckling or the arms from sliding. The distance between gripping points are equal at all times. This prevents damaged or sprung rims. The mechanism of the tool is very simple. Nothing to break or get out of order. The tool is guaranteed against defect in material or workmanship.

The Little Giant will handle all styles and sizes of split rims made.

The machine comes knocked down into a comparatively small box, convenient for reshipping, simple to set up, you cannot put it together but one way and that is the correct way. It can be fastened to the floor, but this is not necessary.

We guarantee the Little Giant Rim Tool to give satisfaction.

LIST PRICE \$30.00

TIRE CARRIERS

FOR TWO SPARE TIRES

Price, \$12.00

Can be attached in five minutes to cars using felloe band single carriers. By simply clamping to the felloe band it makes it possible to carry either one or two tires without the necessity of removing nuts or unfastening straps. It also embodies a locking device with which a padlock can be used preventing the removal of either tire while locked.

Manufactured by

B & B**AUTOMOTIVE****WHISTLES****THE WARNING SIGNAL FOR CARS,
TRUCKS AND BOATS**

All B & B Compression Whistles are fitted with cast bronze valves and cast aluminum bowls highly finished.

The Valves are gas tight and milled from a solid bar of steel. We guarantee B & B Whistles for the life of any car or truck.

The B & B Adjustable Tone Whistle permits a variety of tones by setting the tone adjusting shutters.

The B & B Tri-Tone Whistle produces a musical blending of three tones and is particularly suitable for passenger cars.

BUELL
EXPLOSION WHISTLE
WARNS EVERY TIME

The agitation for greater caution in the handling of motor-driven vehicles has resulted in a tremendous increase in the demand for the Buell Explosion Whistle.

With over ninety-six manufacturers adopting the Buell as equipment, and with its attachment on thousands of pleasure cars—72 per cent of our output goes on private automobiles—our dealers are enjoying a rush of profitable business on Buell Explosion Whistles that is beyond anything they have thought possible.

The dependability of the Buell, its certainty of operation and 10 year guarantee, is the assurance of steady profitable business to all Buell dealers. Write your jobber now.

**Warning
Signal**

\$2.50

Complete

Simple attachment for
cars without priming
cups, 50c additional.

In the emergency, here is
the whistle that never fails
—no adjusting, no wires to
loosen, no short circuiting.

TROUBLE PROOF

The Sampson is solidly made of
heavy metal stampings, hand-
somely nicked. Simple, scien-
tifically correct. The patent valve
cleans itself of carbon. Nothing
to break or get out of order.

EASILY APPLIED

Operates by cylinder compression
—simply attached with a wrench
in place of priming cup on any
cylinder. Out of the way under
the hood. Satisfaction assured
by money back guarantee.
Dealers—Get your share of the profit-
able demand for the SAMPSON.
Manufacturers—the SAMPSON means
more goodwill for you.

Write to-day for interesting proposition.

ROYAL Generator Tubing.

Special Rubber Parts moulded to order.

Specify TRIPLEXD—Be Sure of Service

There is no hose exactly like TRIPLEXD. TRIPLEXD construction (the way the metal, rubber and fabric are built into a permanent unit) explains TRIPLEXD performance.

Triplexd Gasoline Hose is the strongest, most flexible and durable gasoline, oil and paint spray hose. It will give you better service than any other hose at any price.

List Prices

(Substantial discounts quoted on request)

Size (Inside diameter)	Hose per ft.	Coupling
$\frac{1}{4}$ inch	\$0.70	\$1.00
$\frac{3}{8}$ inch	1.00	2.40
1 inch	1.20	2.90
1 $\frac{1}{4}$ inch	1.80	6.00

Prices of larger sizes on application

We make and carry in stock couplings for all standard gasoline pumps. Briggs Standard Pipe Thread furnished unless otherwise specified.

Guarantee

Every length of TRIPLEXD Pump Hose bears a serial number and is specifically guaranteed for one year's service.* We stand back of every length of TRIPLEXD in the world.

Specify TRIPLEXD for Replacement—it means fewer replacements

*The average service life of TRIPLEXD is over two years.

Lengths of TRIPLEXD are still on the job after four years' service.

HUBS for FORDS FRONT and REAR

Our own high-grade **MALLEABLE IRON** is used in the making of these HUBS, and this basic quality, in connection with the high class workmanship put on the casting, enables us to offer a HUB, either for the Front or for the Rear, that is superior in every respect.

FRONT HUB

(Less Flange
and
Hub Bolts)

Machined, drilled and threaded; assembled complete with Hoover "A" balls, inner and outer races, felt ring and dust

collar. Drilled for application of speedometer gear.

Packed 36 in a case. Method of packing eliminates any chance for damage due to rough handling. Approximate shipping weight—185 lbs. per case.

REAR HUB

(Less Flange and Hub Bolts)

Completely machined, taper bored, La Pointe broached keyway. Threaded for hub cap and ready to install. Workmanship put on this HUB will be found to be of a higher order than usually expected.

Packed 36 in a case. Method of packing eliminates any chance for damage due to rough handling. Approximate shipping weight—185 pounds per case.

YANKEE TESTED TIMER

Ford Car Type

Of standard design, perfect pressed steel shell, Egyptian grey fibre race-way. Accurately fitted and ground segments, fibre insulated terminal plugs.

Inside assembly, or brush of pressed steel with case hardened roller, bearing on a case hardened steel bushing anchored, (not loose) between side frames. Tested to 120 volts before delivery.

List price.....\$1.75

YANKEE HYDROMETER

Licensed under the Freas Patents. An exceptionally efficient and durable hydrometer of the "Safety Type". Securely packed in wood case. List price.....\$1.25

PISTONS

for fifty-seven different cars. regular and all standard oversizes. Made of the finest semi-steel, and machined to the exact manufacturers limits, or closer.

Freezometer and Battery Test-O-Meter

Below is brief description of two very necessary motor car accessories needed by every car owner.

Write us today and we will send you our terms to the trade.

FREEZOMETER

Radiators will freeze. Every year thousands are destroyed from this cause.

The "Freezometer" is the only article of its kind. It is an assurance against frozen radiators or cracked cylinders.

Another accessory that every car owner should have.

Retails for \$1.50.

BATTERY TEST-O-METER

is used for determining the charge, mixing the acids, and diagnosing the troubles of Storage Batteries, Motor Trucks, etc.

This instrument also has an exclusive patented (non-stick) feature, which makes it impossible for the hydrometer to stick to the side of the barrel.

Retails for \$1.50.

Write us today for terms to the trade

Durham Testing Equipment for Electrical Service Stations

AC Transformer Armature Tester
(With 110-volt ground test)

Quickly and surely locates "shorts" or "grounds" in automotive armatures. Accurately tests all armatures in general use. Necessary in any service station.

Type A-Universal Holding Stand
Holds securely for testing any style or shape of generator, magneto or starting motor. Provided with a lateral and transverse adjustment for belt tightening and aligning with drive pulley.

These instruments were originally designed for our own use; now giving thorough satisfaction in many large service stations.

RELIABLE JACKS

No. 46 "RELIABLE"

Capacity—3000 lbs.
Weight—10 lbs.
Height, lowered— $11\frac{1}{2}$ ", raised— $17\frac{1}{2}$ ".
Broad, flat base.
Solid steel rack-bar with large machine-cut teeth. One of the most popular jacks in the entire "Reliable" Line.

In this one line you will find a jack to suit the requirements of every possible buyer, and while there is no such thing as a "cheap" Reliable Jack, the line includes moderate priced jacks of the characteristic dependability and sureness of performance which have made the name "Reliable" a safe guide to satisfaction.

Write us soon regarding your Spring needs.

ELITE MFG. COMPANY
Ashland, Ohio

No. 1 "RELIABLE"

Made in five sizes, from 3000 to 6000 lbs. capacities. Weights from $4\frac{1}{2}$ to 7 pounds. Patented crank motion enables the jack to be brought into action in less time than with any other jack and obviates pumping of handle except when actually raising and lowering the load.

Using the Old-Style Jack

Using the
Weed
Chain-Jack

WEED Chain-Jack

THE JACK
THAT SAVES
YOUR BACK

Simply a few pulls on its chain and the heaviest car is raised or lowered without danger and without exertion.

Every motorist has dreaded using the ordinary jack—an unpleasant operation, to say the least, and constantly fraught with danger and much tiresome work. Now all the unpleasant, disagreeable features have been *entirely eliminated* by the Weed Chain-Jack. With it, whether raising or lowering the car, you are always *out of harm's way*—No knocking of head, or soiling of clothes against springs or other projections—*No skinning of knuckles* or flying up of a “handle”—*No chance of the car coming down*, often resulting in serious bodily injury—Infinitely easier to operate than any jack on the market.

To operate a Weed Chain-Jack it is not necessary to get down in a cramped, strained position and grovel in mud, grease or dust under a car to work a “handle” that is apt to fly up, with unpleasant results.

To lift a car with the Weed Chain-Jack, simply give a few pulls on its endless chain while you stand erect—clear from springs, tire carriers and other projections. *To lower* a car pull the chain in opposite direction. Up or down—there's no labor.

Once in place you never have to touch a Weed Chain-Jack. You do not have to crawl underneath to either raise or lower the car and after the car is lowered, you haul the jack out from under the car by the chain. *Much superior* in safety, economy, utility, simplicity and construction.

You will never be satisfied with any other if once you use a

Weed Chain-Jack

Powerful — Safe — Easily Operated

Has a strong cap, providing the kind of support from which an axle will not slip, while a *broad base* prevents the jack from upsetting on uneven roads. *Every Weed Chain-Jack* is submitted to a lifting test and will support over twice the weight it is ever required to lift. *Never gets out of order*. Gears and chain wheels protected by a stamped-steel housing. *Chain heavily plated* to prevent rusting.

The 8 inch and 10 inch sizes are made with an auxiliary step as illustrated above. When in operative position this step adds two inches to the height of the jack.

Size	Height When Lowered	Height When Raised	Height When Raised with Auxiliary Stepup
8 inch	8 inches	12½ inches	14½ inches
10 inch	10 inches	15½ inches	17½ inches
12 inch	12 inches	18½ inches	No. Aux. Step
12 inch Truck	12 inches	19½ inches	No. Aux. Step

Passenger Car Model

REES
DOUBLE WORM GEAR DRIVE
JACK
Reg.
U.S.
Pat.
Off.

There is just one test of a jack that really counts—put it under your car or truck and see how easily and quickly it lifts.

The Rees is the practical jack. The patented double-worm-gear-drive makes it powerful, simple, practically unbreakable. It is the jack that makes you say, "I want one," as soon as you see it work.

KEROSENE MANIFOLDS FOR FORDS—See Manifolds, Intake

It would be easier
to count the makes
of cars and trucks
that are not SPICER
equipped, than to count
those that are.

SPICER MANUFACTURING CORPORATION—SOUTH PLAINFIELD, N.J.

—a powerful
rugged
transmission
unit

Build these advantages into your car:

By adopting ARVAC joints get *greater strength* at every vital point between transmission and rear axle. In light and heavy passenger cars and trucks of well-known makes ARVAC joints have proven their unequalled flexibility, accessibility, dependability.

Universal **ARVAC** TRADE MARK Joints

Forged steel housing. Swaged tube. Yoke bushings completely enclosed by yoke jaws. Positive lubrication. Grease tight construction. All wearing parts case hardened—ground to size.

ARVAC MANUFACTURING COMPANY
ANDERSON, INDIANA

This chart shows the distance in which a car should stop, at any given speed, if the brakes are efficient.

The most practical way to increase your sales of brake lining

NO advertising can make the motorist use more brake lining—unless it teaches him safety first.

"Keep your car safe! Have your brakes adjusted frequently." This is the program of Thermoid Brake Lining in national advertising to ten million customers.

Thus Thermoid is increasing the potential brake lining business of the United States.

Put out your Thermoid signs. Connect yourself up with this Safety Campaign. Cooperate with the thousands of police chiefs, street commissioners, and officials who are trying to promote greater traffic safety.

UNIVERSAL JOINTS, *Quick Delivery*

What are your Universal Joint requirements? Let us quote you per your specifications.

Our "Standard" Universal Joint covers the whole range of load capacity—from the lightest car to the heaviest truck or tractor. Having few parts, it is without complication.

Parts are all oversized and are made from the best high carbon steel forgings case hardened and ground.

STANDARD UNIVERSAL JOINTS

The "Standard" Universal Joint has a self-feeding lubrication system, and the housing is so constructed that we guarantee it against the entrance of dust and dirt.

FEDERAL Mazda Automobile Lamps

There is a steady profit in the sale of automobile lamps just as there is steady profit in the sale of gasoline and other automobile supplies. Automobile lamps are a staple necessity that will bring car owners into your store frequently as customers for other things.

Federal MAZDA automobile lamps are in constant demand. They are easy to handle and bring you a steady profit at very small investment.

STEINLE TURRET MACHINE CO.

MADISON, WISCONSIN

**Originators of the Heavy Duty Full Swing
Side Carriage Turret Lathe**

"Standard 24" Steinle Full Swing Side Carriage Turret Lathe with 4" Hole Through Spindle and Equipped with Oil Pans, Pump and Piping for Direct Belt Drive."

The machine shown above is the superior of any heavy duty turret lathe on the market as a general purpose machine. It has exclusive features that are invaluable and permit of better tooling arrangements than can be applied to any other machine of this character, thereby greatly increasing efficiency in point of quality and quantity of production.

This machine will turn out exceptionally accurate duplicate or interchangeable parts at a very low production cost.

Interchangeable parts mean low assembling cost, high quality product, and good repair parts service.

The Steinle 24" Full Swing Side Carriage Turret Lathe is accomplishing these results for many tractor, truck, and gas engine manufacturers.

Send us drawings of your work and let our Engineering Department tell what this machine can do for you.

Illustrative and descriptive folders, list of prominent users and full information on request.

A Word to the Man who Buys Upholstery Materials

Atholeather is the material you have been wishing someone would put on the market.

It is a material that combines every quality essential to superior upholstery. Soft and pliable, yet tough and wear-resisting—Atholeather will last during the life of the car.

Atholeather will not crack or peel.

Atholeather can be kept clean by washing with soap and water.

Manufacturers who buy Atholeather are buying for the future as well as for the present, because Atholeather will retain its fine appearance during the life of the car.

Atholeather is also made in weights suitable for panel board coverings and gimp bindings.

If you want your panel board coverings and gimp bindings to be in keeping with your upholstery be sure and specify Atholeather.

Have You a Copy of this Sample Book?

We want every car manufacturer and trim shop to have a copy of this book. Write us today on your letterhead and we will send it to you.

Atholeather is a superior upholstery material.

We want to send you our sample book so that you can examine it yourself. A careful inspection will show you that Atholeather is soft and pliable yet

strong and durable.

Atholeather is sun and waterproof and will not fade.

Atholeather is also made in a wide range of colors. There is a grade and color of Atholeather suitable for use on any type of car.

If you are interested in a superior upholstery write us today so that we can send you our sample book.

National Luggage Carrier

Rigidity, Strength and Large Carrying Capacity are the three BIG points of interest in the National Luggage Carrier. Made of steel, with SIX points of anchorage, this Carrier will prove the biggest seller of the year. Costs no more, and pays standard profits.

**ATTACHED OR DETACHED QUICKLY
AND EASILY WITHOUT TOOLS**

National Luggage Carriers are so constructed as to be easily attached to any running board without tools. Fasten to both running board and fenders—solid type of attachment. The adjustment in length is accomplished by set screws, as illustrated. Nothing to break or get out of order. Make the National YOUR leading accessory in Luggage Carriers. Order through your Jobber, or direct from factory if your Jobber cannot make delivery.

THE CLIMAX MOTOR INDICATOR

A DEVICE

Indicating the Actual Temperature and Performance of the Lubricating System Upon Which Depends the Life and Proper Operation of a Gasoline Motor.

Combines in one instrument—a Pressure Gauge—an Oil Sight Feed—and a Motor Heat Indicator.

Eliminates Repair Bills due to running a car with insufficient lubrication because it keeps you in constant knowledge of the pressure, quantity and temperature of the circulating oil in your motor.

Installation is made on the dash, where it is always visible from the driver's seat.

Special types for Overlands, Buicks and other cars which can be easily installed.

Engineers of automotive plants are invited to investigate.

Our discounts are so arranged that the supply trade will find this a most profitable accessory.

Electric Automobile Bulbs Nitro and Vacuum Types—All Sizes

Simplex No Glare

The Auto Lamp
of the
Hour and Future

"Makes Lenses Obsolete"

We are the sole manufacturers of the **SIMPLEX No Glare** Auto Lamp shown in the illustration. The patented exclusive feature of this lamp is its Parabolic shape. The lower and upper portions are frosted. This forms a light-throwing reflector, directing a strong, clear light beam on the road. This bulb is legal from coast to coast and can be used with or without lenses. Simple and efficient—Sells wherever displayed. We also manufacture standard bulbs for headlights, dash and tail lights and also full line of lamps for all lighting purposes. Catalog, including prices, on request.

Bergenline and Franklin Streets,

Union Hill, N. J., U. S. A.

"EVER - CLEAR"

Rear Curtain Lights
FOR FORD CARS

These glass lights, which are made to fit the openings in a Ford, increase the attractiveness of the car.

Light steel rust-proof frames, finished in black enamel (fired) are securely held together with rust-proofed screws through the reinforced edges, preventing rattling or tearing of curtains.

**WE ALSO MANUFACTURE ROBE
RAILS FOR FORDS.**

Write us today for our terms to the trade

PROOS MFG. COMPANY
Grand Rapids, Michigan

HASTINGS Glass Rear Curtain Lights

A Dress-Up or Fords

Gives the Ford a smart look. Protects from weather. Outwears celluloids many times. Will not tear or sag curtain. The glass fits present opening; metal sashes, one on each side, clamp tightly to reinforced edges of opening with eight screws.

Set of three.....	\$2.50
West of Rockies.....	2.70
In Canada.....	3.50

**Ask Your Jobber or Write to Us for

Visors for Headlights

The jeweled visor—practical, durable and beautiful. Made of heavy metal, finely finished. Only three sizes. No. 1 for lenses up to 7½" diameter; No. 2, 7½" to 8½"; No. 3, 8½" to 9½". Furnished regularly with red and green jewel in peak. Opal jewel if desired.

High gloss black enamel, per pair, No. 1, \$2.00; No. 2, \$2.50; No. 3, \$3.00.

Heavy nickel plate per pair, No. 1, \$2.50; No. 2, \$3.00; No. 3, \$3.50.

Spotlights. Mirror back.

All metal parts solid brass. Water proof cord. Best plating. 5½" lens.

Best black enamel. Nickel trimmed, \$7.00. Full heavy nickel plate, \$8.00.

Ask for circular about the Diamond Jay Dee, special rubber neck spot light, "the light of a thousand uses."

Wind Shield

Visors or Awnings

Three styles. No. 1, best heavy fabrikoid, black above, green below on heavy steel frame. No. 2, best fabrikoid, cemented to heavy sheet steel, black above, green below. No. 3, transparent green in fine nickerled frame. Sturdy, brass, adjustable clamps on all.

No. 1, \$8.00; No. 2, \$12.00; No. 3, \$20.00.

Patent applied for.

Wind Shield Wings

Clamps are our own design. The best clamp made. All metal parts, solid brass, rust-proof. Very highest quality glass.

Best wind shield glass, polished edges, round corners, per pair, full nickel, \$12.00.

Best heavy polished plate, polished edges, round corners, per pair, full nickel, \$18.00.

Fine beveled plate, per pair, full nickel, \$24.00.

Clamps only. Glass to be furnished, nickel \$5.00. Give glass thickness. In every case state if clamps are wanted for Ford windshield or universal clamps for all other types.

Radiator Shutters. Dual Dash Control.

The only shutter that enables the user to control the radiation of both upper and lower half of the radiator, either separately or together, and do it from the dash. With shell and leaves covered with best fabrikoid cemented to the steel and lined with felt, adding greatly to its heat-retaining qualities, \$10.00 to \$15.00.

Shock Absorbers. Double Action.

The simplest, strongest, most efficient shock absorber made, regardless of price. Controls spring action, both up and down. A combined snubber and shock absorber. Resistance to shock and recoil adjustable separately or together. Ready for delivery March 1st, 1921.

Price, complete, per pair, \$10.00 to \$15.00.

Price for trucks, \$18.00 to \$22.00.

Diamond Jay Dee Products

Diamond Jay Dee Products are reasonable in price, but are unexcelled in quality, design and workmanship. Everything bearing our trade mark is guaranteed completely. You cannot buy better goods.

Everything is listed under the NOUN or principal word

"and besides Raybestos"

Raybestos Molded Clutch Facing is displacing woven facings everywhere, because of better performance and longer life.

Raybestos Brakes are built to specifications. We have been brake specialists since the beginning of the industry.

Raybestos Lined Cold Rolled Steel Cam Brakes for Ford Cars are so made that the lined surface bears on the inside of the brake drum.

Royal External Emergency Brakes for Ford Cars are built on the same principles as Raybestos Brakes for larger cars and lined with Raybestos.

Raybestos Lined Internal Cam Brakes are specially constructed to replace the regular equipment.

Raybestos for Ford Transmissions is made without wire to prevent wire particles getting into the magneto.

Chatterless Transmission Lining for Ford Cars absolutely eliminates the chatter and wears almost as well as Raybestos.

Rayco Ford Transmission Lining is a woven cotton material that is treated to withstand heat and gives very smooth action.

Raybestos Oak Tanned Fan Belts for Ford Cars are lap stitched, one lap to the belt, two rows of lock stitching, waterproofed, cemented and dressed.

DOMINION

Asbestos & Rubber Corp.

Dominion Auto Sheet Packing (Red and Black). The one sheet packing that will answer every automobile gasket demand. Graphited on one side—easily releasing gasket when necessary. Other side natural red and holds gasket to flange. Not affected by gas, oil, heat, water or steam. Will not burn, blow-out nor squeeze-out. Resilient and pliable. Standard sheets 50" x 50" weight square yard 1/32"—2¾ lbs. 1/16"—5½ lbs. Also, in attractive cartons, 40" x 10".

Kidskin Sheet Packing. Kidskin Sheet Packing is especially adapted for service on flanges where gasoline, benzine, naphtha, kerosene, oil, greases, water or air is encountered. Kidskin contains no rubber or mineral matter. It will make neat, even-edged gaskets, at low cost.

Rodtite Auto Pump Packing. Asbestos water pump and valve stem packing designed especially for automobile, airplane, motor truck, motorcycle, motor boat, motor tractor and all other gasoline engine requirements. Packed in ¼ lb. cartons, in ¼" size. Strands may be untwisted to make any size desired.

Griptite Asbestos Brake Lining. The lining with the **Green Edge**. A solid woven asbestos brake lining interwoven with brass wires and treated all the way through. It is impregnated with a heat and wear resisting compound and then baked, which renders it impervious to heat, oil and the elements and gives it better wearing qualities. It will not char nor burn out from heat or friction.

Price List (Per Lineal Foot)

Widths	Thickness			
	1/8"	5/32"	3/8"	1/2"

Manufacturers of Asbestos Textiles Generally

Six Million Cars NEED BRAKE LINING

HOW much of this business are you going to get?

Over 50 million feet of brake lining will be sold during 1920. Have you put in a stock? Are you ready to supply the great demand?

Goods well displayed are half sold. That is why we supply a very attractive display stand for EVERREADY Brake Lining.

EVERREADY is a Solid Woven Asbestos Friction Fabric. It is the result of 11 years' experience in the manufacture of millions of feet of this material.

Write today for full details both as to EVERREADY Brake Lining and our display cabinet which we give to the trade.

Ford Transmission Sets

EVERREADY CLUTCH FACING

EVERREADY Clutch Facings are made for all of the leading cars and trucks.

Clutches faced with EVERREADY Friction Fabric engage with the smoothest possible action. NEVER GRAB—NEVER SLIP.

Our 100-ton presses enable us to compress our Clutch Facings to an extreme density and to such dimensions as may be called for under the most exacting specifications.

THE GREEN LOCK

The handsome Display Board sells Green Locks automatically. The certain protection is evident to every driver—it is only necessary to display Green Locks to sell them.

*Fully Protected by
Patents*

**See Jobber's
Proposition
Next Page**

THE GREEN LOCK

Makes a Policeman of Every Passerby

Placed in the most conspicuous position possible on the right front wheel of the car and painted a brilliant lasting green — thieves do not tamper with the Green Lock. They cannot without every spectator knowing it.

Note the Spoke Grip!

The Green Lock fastens firmly around the wheel and also to the spoke of the car. It is impossible to move it on the wheel without unlocking it. The Green Lock is unbreakable and is equipped with a new non-pickable lock. It is the lowest priced lock offered which affords complete protection.

Jobbers — Write for Proposition

Green Locks are marketed through the jobber to the dealer. List the Green Lock in your catalog — we will furnish electrotypes or complete inserts in color, if desired. We will back you up with dealer literature and with advertising direct to the dealer and consumer, and furnish display boards for the dealers' use.

Write TODAY for prices and discounts

**F. O. B. COMBINATION
AUTOMOBILE LOCKS***For All Cars***HOW THE
F. O. B. LOCK
WORKS**

The F. O. B. Lock is made of chrome aluminum alloy. Every part is carefully machined to establish tolerance limits under the most rigid inspection and supervision. When attached it becomes an integral part of the steering system, being located a few inches below the steering wheel.

At the outer end is the combination dial, exactly like the dials used on vault doors. When the dial is turned, a direct action locking device causes a steel bolt to engage the steering column, effectually locking the entire steering system in a rigid position.

The lock has a combination as easy to remember as your own telephone number. Turning the dial to the right numbers withdraws the bolt and the steering gear is again free to operate.

100% PROTECTION AT ALL TIMES**CAR MANUFACTURERS ATTENTION:**

Specialty designed models will be submitted for meeting standard equipment requirements at your request.

DECKER LOCK-STEERING WHEEL

**[For
Ford, Dodge
Chevrolet 490
Maxwell and
Overland 4 Cars**

Approved by Underwriters' Laboratories

FORD DESIGN

OTHER MAKES DESIGN

A strikingly handsome steering wheel with a built-in lock that is correct in principle, simple in construction and faultless in operation.

Oversize wheel—17"—increases steering ease and driving control from thirty-three and one-third to fifty percent.

You should know beyond the question of a doubt that the steering wheel lock you recommend and sell positively gives maximum theft protection and is absolutely safe to drive with.

Study illustration of operating mechanism shown herewith.

Prove to your entire satisfaction that the principle of the Decker Lock-Steering Wheel is correct, therefore, does offer the limit of theft protection and that there is absolutely no chance of anything going wrong while car is being driven.

Decker Lock-Steering Wheels Aluminum Spider Models dress up the car. They are distinctive in design and faultlessly finished.

Retail prices range from \$7.50 to \$15.00.

Representative jobbers will be pleased to serve you.

The One Theft-Proof, Self-Lighting AUTO COMBINATION LOCK

Made in five models, to fit any Automobile.

In working principle as secure as the lock of a bank vault; in construction much stronger and absolutely proof against the car theft.

Sold as complete steering wheel unit comprising a corrugated rim of select wood mounted on a polished aluminum spider, with the locking mechanism in the center.

The lines and figures of the combination-lock dial are filled in with Tuma Radium which illuminates the dial so that it can be operated at night.

The Paul Auto Combination Lock needs no key; it cannot get out of order; operates quickly; is easily attached to any car; can be operated in the dark; the combination can be changed hundreds of times giving different readings.

We still have some territory proposition for exclusive selling right

Powers Norwegian Transmission Lining

This extra-quality lining is made of selected long fibre cotton, substantial yet pliable. A special process and compound makes it resist oil, grease, water, gasoline and heat. Can be worn down to the thickness of paper without raveling or losing its grip.

Chatter, jerky, jumpy and uncertain starting and stopping is completely eliminated and every stop is smooth and silent.

Packed in a neat carton—three pieces of proper length with rivets. Also supplied in 100 foot rolls.

A Mirror By Day—A Light By Night

PARK-LITE

Used On Front Left Fender

This lamp is so designed that it may be used as a rear view mirror for day driving. At night when a car is parked, by lowering mirror to horizontal position a 2CP6V lamp is automatically lit, it is used in place of the regular lighting equipment on the car—thus saving 11 times the electrical energy that otherwise would be drawn out of the storage battery. Shows white light front and red rear light.

Write us today and we will tell you the full story of the Park-Lite, prices to the trade, etc.

Quantity & Quality Production in Machine Work

BRASS, BRONZE & ALUMINUM CASTINGS
BEARING BRONZES
AUTOMATIC SCREW MACHINE PRODUCTS

ATLAS Special Circulating Pump for Fords

The fact that 90% of all high grade cars are equipped with circulating pumps is proof that this is an ideal system of cooling cars.

We have designed a special circulating pump for Ford Cars that greatly increases their cooling efficiency.

If you are a dealer or jobber, we have an interesting proposition to offer you.

ATLAS Standardized Bronze Geared Circulating Pump

These pumps are designed for Automobiles, Trucks, Tractors, Aircrafts and Motor Boats. If you manufacture any of these vehicles, we will gladly submit best prices in quantities.

We also manufacture Centrifugal Water Pumps for automobiles in large quantities. We are also in a position to design and build pumps to suit any requirements. Literature describing the above products will be mailed upon request.

Exaggerated?— Yes

But a gear that is heated and suddenly quenched **will warp**—unless special pains are taken to prevent it.

Brown-Lipe Gears are quenched in a special machine that holds them **absolutely true** under great pressure.

This directly affects the car- or truck-owner. It increases the dependability of his gears.

EGYPTIAN FIBRE

Each *Lucia* Auto Lock Sold

Means another thoroughly satisfied customer!
The most dependable locking device ever produced!
Cannot be cut through with a back saw!
Cannot be picked! Cannot be master-keyed! No two locks alike!
Locks car in "reverse" gear or "neutral" with emergency brake
"set." Cannot be driven or towed!
Attached permanently by car owner, within two minutes, without
aid of any tools!
Assures car owner 100% protection. Will fit all cars having shift
and brake levers together. Provides with fire and police regulations
Write for full particulars NOW.

DURAND STEEL RACKS

DURAND Steel Racks are instantly adaptable to any storage need. By the use of steel dividers, and steel bin fronts, or Durand Steel Boxes, the most minute parts may be kept safely. On the other hand, fenders, tires, wheels, gears, and the like, may be stored compactly and conveniently.

The flexibility of arrangement of Durand Steel Racks makes it possible to group component parts for greatest convenience. Durand Steel Racks save floor space, save unnecessary steps, speed up service, and reduce inventory labor. They are fireproof, easily taken down, moved and re-erected, and constitute a permanent asset on your books.

Durand Steel Lockers are the product of long specialization and experience, and are unsurpassed in simplicity and strength. Having few projecting parts, they are easily kept clean. Locks, doors, hinges, etc., are accurately made and smooth-working.

Write for catalogue of
Steel Lockers or Steel
Racks. Our Engineering
Department will gladly
help you with plans.

POWER-RITE TRANSMISSIONS

CONSTANT MESH

POWER-RITE transmissions are constant mesh type with an over-running ratchet gear for speed equalizing as between car or truck and the members of the transmission itself.

Speed selection is made by sliding keys which pick up internal teeth in the gears.

POWER - RITE transmissions come in three sizes for use on $\frac{3}{4}$ to 5 ton trucks in either unit or amidships type.

POWER - RITE transmissions are furnished optionally with either the stick control or our specially designed steering post lever speed selector.

25% to 30% lighter in weight.

THE Marvel Cylinder Reboring Machines

USED and endorsed by hundreds of satisfied purchasers.

Converts your shop losses into substantial profits. Add this money-making machine to your shop.

It is easy to establish a reboring business that will start an endless chain of personal advertising that will keep repairs coming your way.

Thousands of dollars will be spent this year having cylinders rebored.

Our Model No. 8, here shown, is a dandy. It is thorough, accurate, dependable, and easy to operate. Any machinist in a shop can handle it and turn out a first-class job, because there is nothing left to chance or guesswork in its design and construction. All its operations are positive, simple, easily understood and performed.

We make various models. Our No. 8 is our latest, but the others are as dependable and efficient, though not so complete.

Send for illustrated folder.

See which model is best adapted to your needs.

DO IT NOW!

"NIGRUM"
IMREGNATED HARDWOOD
OIL-LESS BUSHINGS

Save the Cost of Neglect

Neglected lubrication exacts a heavy toll in premature wear and breakdown.

"Nigrum" (impregnated hardwood) Oil-less Bushings, by their ability to function smoothly in spite of neglect, afford a welcome protection against these costly dangers.

We also manufacture "Bound Brook" graphite-and-bronze Oil-less Bushings.

All Genuine Graphited Oil-less Bushings have always been made at Bound Brook, U. S. A.

Bound Brook Oil-less Bearing Company

Specialists in the manufacture of Oil-less Bushings for more than a third of a century

Newark Worm Gears

Cut upon automatic machines, to suit the most exacting requirements. We cut worm gears of any diameter, lead, pitch or number of threads in worm.

NEWARK GEARS are the result of many years of experience.

Our Gear Cutting Department is under the supervision of Mr. Henry E. Eberhardt and his sons, specialists in this work. We are prepared to offer our engineering experience in the solution of problems in gearing which require technical knowledge combined with sound practical judgment.

ENGLISH & MERSICK.

Rotary Lever Lock

VISIBLE ON
EVERY LOCK

A SINGLE, easy motion—a quarter-turn of the handle—both unlocks and opens the door.

The Rotary Lever Lock is the one lock that harmonizes in operation and appearance with the refinements and appointments found in motor cars of the better type. There's no unsightly slot in the finishing rail or inside upholstery of the door equipped with this lock.

It is dust, dirt and rain proof, and adds real selling value to *any* car.

Everything is listed under the NOUN or principal word

Easier to Sell and Why

Every month more than a million users and prospective users of automobile running board mats are reading our message.

We are not advertising just cocoa fibre running board mats but are concentrating attention on one mat and its name—"Never-Slip."

As the season progresses our advertising campaign to the consumer will hammer the message home until "Never-Slip" will signify running board mats and the demand will concentrate on that name. Dealers will do well to make their arrangements accordingly. Already car owners are specifying "Never-Slip," the trademarked cocoa fibre running board mat and the only one.

Distributors listed on the following page—they cover the country and the world—can supply any demand. Get in touch with them now.

THE MAT COMPANY

MUSKEGON, MICH.

WHITEHOUSE HIGH-SPEED BRONZE BARS

Parts for Ford Cars—Shackle Bolts fitted with Oil Cups and Grease Cups. A full line of Oil Cups and Grease Cups.

Veeder

HUB
ODOMETER

Records truck mileage with the necessary accuracy to show *exact costs* for every mile traveled—and for every item, such as fuel, oil, tires, battery-maintenance and repairs. Registers up to 100,000 miles in tenths of a mile, then repeats. Seals onto front hub; cannot be made to register falsely. In ordering, mention the make, model, year of manufacture of truck and size of front wheel.

Always registers miles forward, whether truck runs forward or backward. Regular model, price \$20. Special model for FORD trucks, \$15. Write for brief literature.

A GOOD MIRROR REFLECTS IN SALES

C-BAK INSIDE DRIVE MIRRORS

SEND FOR PRICE LIST

We Want Distribution in Your Territory

INTERNATIONAL SALES CORPORATION

311 Fairfield Ave., Bridgeport, Conn.

Simple to Attach

The practicability of C-BAK Mirrors lie in the bracket, which permits the adjustment to any desired angle of driving vision.

These brackets are strong and well made and are unaffected by continual use—and are constructed—NOT TO SHAKE LOOSE.

Guaranteed to Fit Any Car Made

KALES *Hindview*

"TRADE MARK"

AUTO MIRRORS

Dealers and jobbers are finding the Kales "Hindview" a profitable line. There is a steady demand for an accessory which contributes so materially to the safety of the car and its occupants; the features and construction of the Kales "Hindview"—either round or oblong—are unequalled. A style for every car and truck.

KALES STAMPING CO.

1663 W. Lafayette Blvd.
Detroit, Mich.Canadian Plant
Walkerville, Ont.

Makers of pressed metal parts, washers, clips, etc.

"The Standard for Quality"

Johansson Gauges plus skillful workmanship guarantee the accuracy of

CROFOOT GEARS

to specification. What better guarantee could you ask?

Spurs Spirals Bevels
Helicals Mitres Worms
Worm Gears

Made in small and medium sizes (1 in. to 12 in. diameter), in medium and large quantities.

Crofoot Gear Works, Inc.

Hyde Park Ave. at Readville, Boston 37,
Massachusetts

"COP-SPOTTER"
REAR VIEW MIRROR

Reflects full view of entire width of the road, as seen through the rear curtain window, without detracting from your line of vision. You see ahead, to the side and behind by simply shifting your eyes. Made of the finest plate glass with ground edges, securely mounted in a handsome nickel-plated frame, easily attached to any style open or closed car.

Retails for \$4.00

**Window Slide Channel Felt****WASHERS****PLUGS****WICKS****DISCS****GASKETS****WHEELS****PACKING****ALL SPECIAL****STRIPS****CUTTING****THE FELTERS CO., Inc.****CUTTING FACTORY****MILLBURY, MASS.****WE MANUFACTURE THE FELT****Retread Tires**With *The* **VULCAN** Method

Vulcan Molds are made in Four sizes. They are instantly adjustable to fit all sizes of tires from 30x3 to 37x5.

Vulcan Molds cure the Complete Tread in one Heat. Other machines take from 2 1/4 to 3 hours to accomplish what our Molds do in 45 minutes.

Tires Retreaded by the Vulcan Method give from 5,000 to 6,000 miles of service.

Garages, Tire Stores and Vulcanizing Shops should all start in this Great Money Making business. "We help finance you to get started."

Model "F"

OLDBERG SPECIAL SERVICE

We can supply from stock any of our standard Oldberg models illustrated herewith, and can make up, to your order, any special exterior construction or fitting which may be necessary to mount our muffler in your chassis. The standard constructions shown completely cover all the sizes which will be required by either pleasure or commercial motor vehicle manufacturers. Free samples to manufacturers upon receipt of the size of motor and exhaust tube and whether or not cut-out is required. Write for specifications and quotations.

In addition to Dodge Brothers, Multibestos brake lining is factory equipment on the cars and trucks shown below

SOME parts of a car can be chosen with comparative ease. But brake lining—never. Automotive engineers test brake linings pitilessly to find the one lining that will stand up best—give safe, dependable service at all times.

The choice of automotive engineers favors Multibestos overwhelmingly. Look at the Multibestos factory equipment list below. Make this list your guide when relining brakes. Use only Multibestos. Know, as these engineers know, the safety and long wear of the Multibestos Interlocking Weave, long-fibred asbestos and sturdy wire strands! With Multibestos, you can get more and more brake lining business.

*Ask us how you can become
a Multibestos Service Station*

212 BROADWAY NEW YORK

Showing sediment formed after 500 miles of running

Reduces Sediment 86%

AUTOMOTIVE engineers agree that sediment in ordinary oil causes 90% of all engine trouble.

The famous Veedol sediment test proves that Veedol reduces sediment by 86%. Common engine trouble is greatly reduced.

Dealers who specialize on Veedol, the lubricant that resists heat, win good will and build up powerful repeat business that pays great profits. Write today for the Veedol proposition.

TIDE WATER OIL.

LOCOMOBILE**

**and most all other
new models are
equipped with the**

**Fully protected by basic patents
as the latest improvement in top curtains.**

Curtains that open and close with the doors give the normal winter weather protection that curtains should without the annoyance and delay of unbuttoning them. This final improvement in quick acting curtains makes any car as good as a Limousine, and does away with heavy detachable bodies for winter use.

Your top maker can give you this result on your present car at a small cost.

Easy selling specialty for top makers

THE REFERENCE BOOK

"EVERYTHING ELECTRICAL FOR THE MOTOR"

WE WILL SEND YOU A COPY FREE ON REQUEST

Every dealer and repair man who calls himself up-to-date should have for ready reference a copy of our latest reference book on "Everything Electrical for the Motor."

The **REFERENCE BOOK** illustrates each part that goes into the construction of all of the standard makes of lighting, starting and ignition systems, showing the number of the part and the price; also the dealer's discount.

The **REFERENCE BOOK** contains illustrations of practically every conceivable device to enable the electrical service station to quickly perform its work at a minimum cost and in the shortest possible time. New and efficient methods for locating troubles are set forth. Instruments specially constructed to trace faults in wiring and insulation.

The **REFERENCE BOOK** opens up a fund of information for the repair man and for the electric service station. This book is sent only to the trade, consequently we request that you make application on your business letterhead.

It Is Free For The Asking—Write For It To-day.

Standley Automobile Utilities

Carry the Standley Line and get in line for bigger profits.

The Standley Automobile Utilities are built for service.

Your customers will need every one of the Standley Utilities. They are a necessity, add to the pleasure of driving and are designed and finished to add to the appearance of the car.

Standley Adjustable Luggage Carrier

Fits any car. It can be carried under the seat and when needed attached in a moment—no tools are required.

When clamped on it forms a complete basket. Clamps are provided with lock nuts which prevent them from working loose.

Adjustable to any length from 10 to 65 inches.

Simple, strong and efficient. No holes in the running board. Does not mar the car. Every car owner in your town needs the Standley Adjustable Luggage Carrier. Constructed of steel. Baked black enamel. Price \$6.00. West of Rockies, \$6.50. Weight, 13 pounds.

Standley Rim Tool

For contracting and expanding the rim.

The most simple Rim Tool on the market. Can be operated easily with the hand, enabling one to remove the tire in a moment.

Will remove 22, 24 and 26 inch tires.

Upper cut shows Rim Tool in use, lower cut shows it knocked down for tool kit.

Price, \$1.50 (West of Rockies, \$1.60).

Finished in baked black enamel. Weight, 2 lbs.

Standley Ford Radius Rod and Axle Support

Holds axle rigid and prevents it from doubling under.

Constructed of $\frac{1}{2}$ in. Standard Welded Pipe. Made in two pieces and attached to radius rod with Pressed Steel Clamps.

Price, \$1.50 (West of Rockies, \$1.60).

Finished in baked black enamel. Weight, 5 lbs.

Standley Safety Tread

Prevents slipping on the running board, provides a place to scrape mud and snow from shoes.

Attached with clamps, no tools necessary.

Can be thoroughly cleaned without removing.

Adds to the appearance of the car.

Constructed of steel. Baked black enamel.

Price, \$1.50 (West of Rockies, \$1.60).

Weight, 2½ lbs.

Standley Ford Truck Chain

For two rear wheels: 12 Cross Chains, 12 Spoke Anchors, 2 Adjustable Rings. Cross Chains form diagonally on tire when pulling and ride in various positions on tire when running idle.

Price, \$14.75 (West of Rockies, \$15.75).

Standley Ford Running Board Support

Strengthens Frame—Holds Running Boards Rigid and Keeps Them from Sagging—Prolongs Life of Fenders by Reducing Vibration.

Constructed of heavy Angle Iron. Attached to frame with hook bolts fitted with lock washers and nuts. Ends of cross bar fitted with rests which fit snugly under the running board.

Finished in baked black enamel.

Price, \$2.50 (West of Rockies, \$2.75).

Weight, 9 lbs.

Standley Camp Grid

A necessity to tourists, campers, fishers, hunters, outing parties, scouting parties, picnics.

Adjustable to any length.

Folds in small, compact package 1 by 6 by 10 inches.

Price, \$1.50 (West of Rockies, \$1.60).

Weight—3½ lbs.

REPLACEMENT

GUARANTEED

AXLES AND PINION SHAFTS

"Machined on Centers"

Each REPCO Shaft and Axle is finished to duplicate those furnished by auto manufacturers. Every one is tested to fit gears, and bearings of all standard cars. Each REPCO Axle is equal in quality and accuracy to the part it replaces.

Here are reproductions of representative Axle Shafts for twenty familiar and popular cars. Each is numbered to make the business of ordering a comparatively simple matter.

250—for Hudson Super Six

110—for Buick

310—for Maxwell

152—for Chalmers

312—Drive Shaft for Maxwell

100—for Chevrolet 490

350—for Overland 69, 79, 80, 81, 83

161—for Chevrolet "Baby Grand"

352—for Overland 75T, 75R, 90CC, 90R

164—Drive Shaft for Chevrolet 490

354—for Overland 90T

180—for Dodge

362—for Overland 82, 84, 86, 88-4, 88-6, 88-8

190—for Dorr

367—Propeller Shaft for Overland

210—for Ford

403—for Saxon 6Y-1919-1920

211—Drive Shaft for Ford

410—for Studebaker 1915-16-17-18

220—for Grant Six

JOBBERs: REPCO Products are sold exclusively to legitimate jobbers. Shipped crated in standard units, packed 15 and 25 to the crate. We protect you.

Everything is listed under the NOUN or principal word

The Hole Shooter has a capacity of $\frac{1}{4}$ " in wood and $\frac{3}{16}$ " in steel. For drilling jobs of this size there is no handier or huskier tool made.

Weights only
 $3\frac{3}{4}$ Pounds

A Handy High-Speed Drill for Every Automobile Worker

Garagemen, automobile trimmers and body-builders find the $3\frac{3}{4}$ -pound Hole Shooter "made to order" for dozens of small drilling jobs that are hard, awkward work with an 8 to 10-pound power drill or a hand tool. This handy electric drill is easier on the wrist and does more accurate work faster, with a big saving in drill points.

For installing clocks, speedometers or cigar lighters on instrument boards; for attaching robe-rails or sun visors; for equipping enclosed cars with spot-lights or mirrors, The Hole Shooter is a big time-saver. Just the tool for body work, such as fastening upholstery moulding, attaching locks, hinges and curtains, or installing vanity cases or flower vases.

The Hole Shooter is a guaranteed, standardized tool—designed right, beautifully made, aluminum cased. Lasts longer than heavier, higher-priced drills. List price, \$42.00.

To save time, order The Hole Shooter direct, to be billed through your jobber.

A. H. PETERSEN MFG. COMPANY
MILWAUKEE, WISCONSIN

Specifications

Capacity, 0 to $\frac{3}{16}$ " in steel;
0 to $\frac{1}{4}$ " in wood.

"HOLLANDS" VISES

Hollands Vises—for strength, durability and
firm gripping power—are superior to all other
makes, and every tool bearing the Hollands name
is **fully guaranteed**.

Manufactured of a high-grade composition
that is especially adapted for the hard service to
which vises are subjected and, to doubly insure
against possible breakage, all points of most
strain are heavily reinforced.

The jaws of our vises are faced with steel
made to a special formula, to insure a tough,
hard jaw that positively will not chip.

HOLLANDS MFG. COMPANY
ERIE, PA.

"VICTOR" BOLT and RIVET CLIPPER

Tool Steel Jaws all machined and will interchange. Rubber
Buffers between the handles take the jar from the wrist as
well as protecting the operator's hand.

Sizes of "Victor" Clippers

 The Necedah Timer Kept Lubricated Lasts Indefinitely
 Dealers order through your Jobber

The Brush is the Thing

NECEDAH TIMER

THE BRUSH IS THE THING

A Few Reasons "Why"—

The brush has a "straight-from-the-shoulder" action that holds it squarely and firmly against the fibre ring which remains as smooth as glass even after long usage.

The contact segments are made of high grade steel, electrically welded to the posts and firmly embedded in the fibre.

The fibre is of a special laminated construction, impregnated against oil and properly aged to avoid warping.

The patented spring hinged oil cap "snaps" up out of the way and uncovers a large sized oil hole, making it an easy matter to use either an oil can or grease gun.

The entire assembly is enclosed in a nickel-plated extra heavy steel shell to prevent vibration

The only trade-marked tube patch. Made of pure white Para gum rubber. Fully proven and guaranteed.

A patch of highest quality. Will remain fresh for almost two years before use.

What Las-Stik Is.

LAS-STIK is the strongest tube patch made, having a breaking test record of 2600 lbs. and a heat test record of 250 degrees. Las-Stik is 3.64 in. thick, which is the same as the average inner tube, and weighs 4 pounds per square yard. Stretched to full capacity and nicked with a scissors in several places, this patch will not tear.

What Las-Stik Does.

Las-Stik repairs permanently any tube leak from the smallest puncture to a 17 in. blowout. When a tube having a Las-Stik Patch is inflated, the stretch and pull-back of the patch is about equal to the stretch

and pull-back of the tube itself. Thus the Las-Stik, Patch soon vulcanizes itself in and becomes an inseparable part of the tube, lying flat and smooth during the life of the tube.

Conveniently Carried and Easily Applied.

Las-Stik is made in three sizes and packed in round screw top containers conveniently carried in any tool kit or door pocket. Anyone can easily apply Las-Stik in a few moments, after which the tube is ready for immediate use. The cost to seal a small puncture forever is about one cent.

LAS-STIK PATCH MFG. CO., HAMILTON, O.

Giant Grip

**Traction Equipment for Motor Trucks
Keeps Trucks Going**

Giant Grip Traction Equipment is the master of snowy hills and icy roads. The chains give a firm, broad road grip. They are attached to the permanent clamps on the wheels in two minutes' time without tools or jacking up.

Word of mouth advertising from satisfied users plus consistent advertising in magazines, is bringing an ever multiplying business to Giant Grip dealers. Are you getting your share? Winter is the time when sales are largest. Ask without delay for our dealer proposition.

DELUXE

LIGHT WEIGHT GREY IRON PISTON

DELUXE

"The Successful Light Weight Piston"

DE LUXE grey iron pistons are 40 to 50% lighter than stock factory cast iron pistons. The weight is saved by the scientific design. The reinforcing ribs give such unequalled strength that less metal may be used in the walls. These ribs are heat conductors making a very cool running piston with minimum expansion.

DE LUXE pistons are furnished either semi-finished or finished to standard and all over-sizes, accurately machined, and as superior in quality and workmanship as in design.

**"Look Inside—
You can't go wrong
Very Light and
Very Strong."**

Improve Fords with Levett Pistons

- greater speed, power, acceleration
- less vibration, gas, wear on bearings

THESE light, strong, tough Levett pistons of magnalite (aluminum alloy) are the kind used for years by the winning racing drivers—RICKENBACKER, MULFORD, the CHEVROLETS, RESTA, HEARNE, AITKEN, VAIL, de PALMA, etc. Levett pistons are now used as STANDARD by many of the most prominent automobile and aeroplane manufacturers.

Good Business for Repair Men

Both new and used Fords can be given a smoothness found only in multi-cylindere engines by replacing heavy iron pistons with Levett Magnalite (aluminum alloy) pistons.

Every Ford owner is a good prospect for you. Write for more information.

PISTONS

That's

Our

Business

Houpert Machine Company

Harris Avenue and Marion Street
LONG ISLAND CITY, NEW YORK

KANT-SKORE PISTONS

The new and sensational Aluminum Piston that can be set at a total clearance of one-thousandth and positively guaranteed that they will not "SEIZE" "SCORE" "PUMP OIL" or "SLAP."

The Piston that produces results for which aluminum was originally designed.

A trial order will convince you.

Manufactured for all STANDARD makes of cars in standard and over-sizes up to and including .050 in steps of .005.

The Kant-Skore Piston Co.
520 Mutual Life Bldg., BUFFALO, N. Y.

\$20⁰⁰

The Automatic Rear-Warning Device

One size fits all cars

The only absolutely mechanical four-in-one, day and night rear-warning device. Positive in its action—operates independent of electricity. Installs on any motor vehicle in 30 minutes. Signals instantly, accurately, constantly. Foot brake says "Stop" automatically; finger-tip says "Right" or "Left" turn. Red bull's-eye and double arrow head combined signals "Caution" at all other times.

Auto Indicator is authorized by law, endorsed by automotive engineers, guaranteed by its manufacturer and is already in use guarding life and property on 35,000 fine American motor cars and trucks. Write for complete details regarding our proposition and discounts to dealers.

THE AUTO INDICATOR COMPANY
210-218 Ottawa Ave., N. W., Grand Rapids, Michigan

AUTO INDICATOR
Commands Attention—Demands Safety

THE KIND OF PISTONS YOU SHOULD USE

FOR EITHER REPLACEMENTS
OR PRODUCTION

Pistons manufactured by the Detroit Auto Piston Company are quality pistons.

They are machined accurately from carefully selected semi-steel castings. Made to fit all makes of automobiles, trucks, tractors, stationary, marine, or aircraft motors.

If you want the best pistons it will pay you to write us for prices and discounts on quantities.

DERF

360 Points Ignition SPARK PLUG INDESTRUCTIBLE CORE

This is not just another spark plug, but a distinctive plug so designed that it conforms with the present day low grade of fuel—in other words it's a 1919 plug for 1919 gasoline. Think what that means and then you'll want to handle it yourself.

Automobile Club of America, certified test No. 58, with 8-cylinder Cadillac Limousine, shows saving of 25%.

Motor Truck Club of America, certified test 5 ton truck, 8 tons of coal, total weight 30,700 lbs. shows saving of 34.4%.

This test makes 27¢ gasoline cost 18¢ per gallon.

Live dealers can find no excuse for not selling this Spark Plug.

Write at once for full details.

NORTHWIND

Ventilated Spark Plugs

Stay Clean

It is impossible for a Northwind Spark Plug to foul.

At the Brooklyn Polytechnic Institute they tried deliberately to make a Northwind foul by heavily coating the gap with lubricating oil and lamp black.

With the plugs in this condition, the motor started on the third turn. Other plugs were similarly treated but the motor would not start.

Yet the construction of the Northwind is very simple. This is why it will never foul.

The center electrode is hollow. On every suction stroke, a little air is taken in through a tiny hole at the top, passes through the center electrode and is blown out in a powerful jet at the bottom, right over the sparking points.

When you think what this plug will mean to the car owners in your town, you will realize that it is the plug you should have in stock.

Already used by many factory service stations and by manufacturers.

Write us today for our terms to the trade.

There is a NORTHWIND SUPER-SPARK PLUG for every engine.

Retail Price, \$1.50

Consider a Plug's Daily Performance Record

That's the big reason for selecting any make. It's the big reason why Reflex Spark Plugs are highly regarded among all classes of buyers. And note the variety of types—

DIAMOND Reflex, for general use.
GIANT Reflex, the heavy service plug.
TRACTOR Reflex, special type.
FORD Reflex, special type.
ARROW Reflex, regular extension, and Buick.
KID and **BABY** Reflex, for motorcycles
LIGHTNING Reflex, for general use.
PRIMER Reflex, the real priming plug.
NUMBER 1 Reflex, for general purposes.
NUMBER 2 Reflex, made in millimeter sizes.
CONICAL Reflex, for hot running engines.

Engineers, Manufacturers, Jobbers,
 Dealers—an inquiry will receive prompt attention.

A SPARK PLUG THAT IS DIFFERENT

The Kahn Globe Spark Plug is backed by more than implied promises or stories of what it will do. No plug has ever been subjected to the severe tests that this plug had to meet before it was placed on the market. On land, sea, and in the air, from single cylinder half horse stationary engines up to the gruelling tests of airplane service, this plug was tried and proven better.

This Plug Sells Itself

It's the only plug on the market that has directions for installing. Those directions sell the plug, for there must be a saving in gas and a more smoothly running engine before the plugs will work right.

Jobbers—Dealers—Get our proposition. It puts Spark Plug selling on a different basis.

KAHN MFG. CO.
 MILWAUKEE WISCONSIN

FIVE MILLION JOLY SPARK PLUGS USED IN THE GREAT WAR

80% of airplane plugs used by England, France, Italy and Russia, were JOLY SPARK PLUGS.

The Joly Spark Plug cannot develop carbon, leak compression, short circuit, cause pre-ignition or fail to synchronize between explosions.

The 'Insulation' on Joly Spark Plugs prohibits short circuit. Breakage is impossible.

Automobile type retails at \$1.50.

25, 50, 100 Pound Kegs
Barrels or Sacks

Why The Thomas "Twin Seat" Spark Plug is Best

Its "Twin Seat" construction provides for easy cleaning without removing Shell Body from motor. The firing points are self-adjusting after cleaning.

All pressure is relieved from binding nut thus preventing insulator breakage, but if insulator should be broken through carelessness or accident it can be easily replaced thereby saving cost of new plug.

Pre-ignition from overheated electrode is prevented and efficiency of combustion increased thereby reducing carbon deposits. Eliminates gas, compression and electrical leakage. Makes priming cocks unnecessary. To prime slightly loosen binding nut, prime and tighten.

These are a few of the reasons why Thomas "Twin Seat" Spark Plugs are BEST for both motorist and Dealer. Write us today for further information and our trade proposition.

Patented in U. S. and foreign countries.

Manufactured by

THOMAS SPARK PLUG CO., Inc.
Roselle Park, New Jersey

A Spark Plug That Sparks

under the meanest conditions to which a Plug can be subjected.

For more than a year this Plug has given perfect satisfaction in motors where ordinary Plugs failed.

It is so designed that it stays clean under the most adverse conditions of oil and carbon.

No porcelain to crack, chip or break. Best grade

mica used for insulation, producing a trouble-free, indestructible Plug. The Dealer whose first consideration is to handle a quality product will find that this plug exceeds his most sanguine expectations.

Attractive discounts to the trade.

Sell and Recommend

U-Sav-Your Automobile Dressing

You will do more business,
more often—for U-Sav-Your
Satisfies—Satisfies so many—re-
peats make its sale immensely prof-
itable to you. You make liberal
profits, too.

Notice—4 Quart Bottles \$5.00
40% to Dealers

Here are some reasons why you
can recommend U-Sav-Your:

Every bottle makes good, or we
will. U-Sav-Your does not stick.
No paraffin or wax. Very eco-
nomical. Cleans as well as pol-
ishes. Keeps cars looking like
new for years. One cleaning holds
the gloss for weeks.

Automobile Drop Forgings

**Steel Tanks
Sheet Iron Work
Prompt Deliveries**

For years we have satisfied the most exacting demands of the leading car manufacturers. The ACCURACY of a modern HEAT TREATMENT PLANT and the CONTROL exercised by a fully equipped CHEMICAL LABORATORY have been a means to this end. We invite your inquiries. Let us figure on YOUR requirements.

WESTERN DROP FORGE CO.

MARION

INDIANA

25% SAVING

is big, yet it is less than half we have shown on some cars with the *Colburn Economy Vaporiser*. Heated by the exhaust gas—Costs nothing to run.

Cleaner combustion. More power. More miles to the gallon.

We spray the gas onto hot metal and deliver vapor ready to mix with the air supply.

It works. It saves.

Price \$5.00

Agents Wanted.

KANT-MIS SPARK PLUG CO.
GREEN BAY, WIS.

A Better Spark Plug in the KANT-MIS

We offer one of the most successful and clean working plugs. The special three-in-one electrode and its common sense arrangement of points, combined with prime insulation, wide inside clearance, generous size and good workmanship insure satisfaction.

\$1.00 at dealers or direct.

Everything is listed under the NOUN or principal word

The "Zephyr" Piston is recognized abroad as chief factor in developing greater efficiency and used entirely by the leading car and aeroplane manufacturers, including Rolls-Royce, Vauxhall, etc.

If you keep the following facts in mind you will see that there are strong arguments that can be used in favor of replacement with "Zephyr" Pistons, either at once or when repairs offer opportunity.

"Zephyr" Pistons give greater economy in operation.

They eliminate engine vibration.

They make hill climbing easier and stop overheating.

They do away with carbonization and sooting spark plugs.

They reduce wear on bearings.

The "Zephyr" Piston is the **LIGHTEST** and **STRONGEST** Piston in the World, Made in Lynite, Magnalite or Iron

Prices on Application

THE WRIDGWAY COMPANY, Hallstead, Pa.

JORGENSEN

VAPOR PRIMER

The Jorgensen Vapor Primer may be used on any type of motor—automobile, truck, tractor, marine or stationary engine. It is strictly mechanical in operation and will vaporize any grade of fuel at any temperature.

Fig. 1

Fig. 1 shows the connection used when the car is equipped with a vacuum tank. Fits any style of vacuum tank.

Fig. 2

Fig. 2 shows the special connection for the Ford car. It replaces the regular one that connects the gas line to the carburetor.

Fig. 3

Fig. 3 shows the connection for obtaining the gas supply for the primer by cutting into the line leading to the carburetor. This connection furnished for 1/4 inch, 3/8 inch or 1/2 inch O.D. Tubing.

Style A-2

May be installed on any type of metal dash. Especially recommended to manufacturers for factory installation.

Style A-3

For installation on trucks or cars that have no instrument board. Also used on the earlier model Ford cars.

Style A-4

May be used with either metal or wood instrument boards. The most popular type for installation by garage and repairmen.

We also manufacture a complete line of high-grade machined brass motor fittings—Sediment Traps, Pet-Cocks, Priming Cups, etc., also Motor Tappets.

**J. & B.
Original
Timer
for
Ford
Cars**

This Timer has been found to wear longer—and therefore to sell better—because it is so designed that the oil reaches the vital spot which is the "Contact Roller."

Other Big J. & B. Sellers Include

Heavy Duty Timers, Right Hand Timers, Bushing Removers, Gasoline Injectors, Ford Switch Keys on Sell-Self Show Card, Replacement Coils for all cars, Valve Cage Remover for Valve-in-the-Head Engines.

*Every item a money maker for the live dealer

**J. & B. Manufacturing Co.
Pittsfield, Massachusetts**

B. & L. Hot Gas Petrolizer Assembly

The units composing the Petrolizer are: Heating unit, fuel injector, electric switch, signal light, gas line T, 7 feet extra heavy copper fuel tube, 8 feet No. 14 double-covered wire and terminals.

Sales Department

G. B. VAN BUREN CO.

Guaranty Trust Bldg., 522 Fifth Ave., New York

Mfd. by Bintliff-Laing Co., Plainfield, N. J.

Starts a Motor on One Turnover and Sells Almost as Fast

Wherever dealers have taken on the B. & L. Hot Gas Petrolizer it has proved the star seller among motoring accessories. Installed on a car, it not only nets the dealer a minimum profit of \$4.87—and in many cases an additional profit for installing—but its absolutely un-failing operation is bound to please the customer.

B. & L. Hot Gas Petrolizer

is simplicity itself. It shoots a charge of superheated, dry gasoline vapor into the combustion chamber, independent of the carburetor; this charge explodes at the first turn of the motor. The consumption of heating current is negligible, lasting only a moment, but gasoline consumption is reduced and the storage battery is relieved from the usual ineffectual cold-weather starting efforts.

Retail price, \$19.50. Sold with Money-Back Guarantee.

THE

ANTHONY

450,000 users of ANTHONY Pumps are satisfied. This is the verdict of men who paid for quality and expected service.

400,000 of these previously tried other makes of pumps. They first used cheap junk, double acting stuff, or two or three cylinder varieties.

Then they bought the best pump on the market. The original quality pump. A guaranteed genuine ANTHONY with all metal valve.

Now they are satisfied.

THE GENUINE ORIGINAL RED WONDER

A most remarkable single cylinder pump.
Distinctive and individual in appearance.

Built by
SIDEL-RATTNER MFG. COMPANY, Inc.
BUSH TERMINAL BROOKLYN, N. Y.

The Story A Gauge Tells

It does not take 175 to 200 lbs. pressure to fill a tire, but the question is, will your pump do it and besides, without physical torture?

Probably never tried a severe test of this nature, but the point is this—it can be done and is done many, many times a day by owners of the Jensen Lever Pump.

One-half the strokes and one-quarter the effort sounds good on these hot days.

A trial will convince you and we can ship at once.

Power-Driven Tire Pumps

Simplicity

Of Wizard design, eliminates all troublesome features of the valve type pumps with their multiplicity of parts and their necessary adjustments and repairs.

There are only three moving parts in the Wizard Pump and for its service-life no adjustments, renewals or repairs are necessary. A turn of the grease cup before starting is the only attention needed.

Immediate deliveries of all models. Literature sent upon request.

ROSE

TIRE PUMP

**Quick, Easy Sales
With Good Profits**

The Rose Tire Pump will give you quick, easy sales with good, steady profits. It's the one pump that gives lasting satisfaction—that's its best advertisement—over 2,500,000 Rose Pumps have made tire pumping easy for their owners. The Patent Valve of the Rose Pump has made it the one big leader in the tire pump field.

GREASE GUNS AND BUCKETS

The Rose Taper Nozzle Grease Gun is the cleanest, handiest, most efficient and most economical gun on the market. The Rose Fil-A-Gun Grease Bucket pumps grease direct from the bucket to the point where it is needed. Like the Rose Pump, both sell easily and will make you good profits.

Can be operated in all standard types of four, six, eight, and twelve cylinder motors. Full universal adjustment that can be set standard for any one type of motor.

CRANKSHAFT GRINDER \$75.00

A hand tool producing results that surpass an expensive power driven machine. ONE quick and simple adjustment. Can be operated without dismantling the motor. Will true a shaft in one-fifth the time ordinarily required. Self-contained, requiring no replacements.

CYLINDER SURFACE PLANER \$6.00

For finishing off the excess Metallic Filler from a scored cylinder repair, in perfect cylindrical alignment. Cannot scar the cylinder-wall. Instantly adjustable to all sizes of cylinders.

METALLIC FILLER per pound \$5.50

For the repair of scored cylinders, cracked water jackets and other imperfections in iron, steel, brass and bronze castings. Working at 300° makes a wear-resisting repair which will sustain a pressure of 75 to 100 pounds per square inch.

ALUMINUM BRAZING COMPOUND per pound \$3.50

Guaranteed non-corrosive—resisting chemical action of oil. Working at 500° makes a stronger repair than any known method of aluminum welding or soldering and without risk of warping or distortion.

SECURITY DISPLAY TIRE RACK

Sells Tires and Guards Against Thefts

This is the safest, most convenient tire display rack ever devised. It enables the dealer to display his stock to best advantage, within the smallest space and in orderly, systematic fashion.

The entire rack and every tire in it may be securely locked, preventing theft and unauthorized handling. As many units as may be needed can be combined, as with sectional bookcases.

In the Security Display Tire Rack tires are protected in a novel way, by means of Lazy Tongs operating from a lever which locks and unlocks all sections. The rack itself is constructed of strong steel tubing; the Lazy Tongs are made of flat steel.

Tires cannot be removed from the Rack while it is locked or closed. The unlocking or opening is done by a single movement of the handle. Moreover, any attempt to force the toggle guard open has only the effect of closing it tighter. A Yale spring lock built into the operating handle affords the fullest protection. The whole arrangement offers so many advantages that every tire dealer should write for further details to

IN this shop—the largest in the world, devoted exclusively to finishing crankshafts—are finished crankshafts for motors that are famous in every land. Even Europe with her vaunted “skill” pays tribute to the high efficiency methods and unfailing accuracy of this shop.

There is no secret formula to our work. It is simply good workmanship—*always*—plus modern production methods and real inspection.

Machining crankshafts! Doesn't it sound simple? But the crankshaft is the most important element in the motor—balanced pistons, fine bearings, clever oiling systems, and machined combustion chambers avail nothing if the crankshaft is not rightly finished.

Because Automotive Engineers know this even better than we do, they send their crankshafts here to be finished.

Kenyon Cord Tires and Tubes

The Kenyon Cord Tire is made full oversize, with black rectangular tread and gray side walls.

The Kenyon Cord Tire is essentially a quality tire, built on the principle that the best is ever the cheapest.

The Kenyon Rectangular Tread maintains superior non-skid resistance to forward or sideway impulses.

The Kenyon Tread has a continuous unbroken road surface, affording complete steering ease.

The Kenyon Tire inflated to the maximum still possesses the greatest resiliency: *Result:* Long life—greater mileage—comfort.

Sold by reliable dealers.

DEALER'S SERVICE DEPT., 754 Pacific St. Brooklyn, N. Y.

Continental Motors will be on exhibition at the Chicago Automobile Show, Coliseum Gallery 50-51.

There is no one factor, of course, that is responsible for the dependability of the Red Seal Motor. Red Seal performance is the result of a combination of factors each of which contributes toward the perfection of the finished motor. ¶ But in the Continental Testing Room there is just a suggestion of the eternal care that is

largely responsible for Red Seal quality. For here, newly completed Red Seal motors are tested under their own power—dismantled—inspected—re-assembled and tested again—all as part of the program for upholding the reputation of quality that is everywhere associated with the Continental Red Seal.

STANDARD POWER FOR TRUCKS, AUTOMOBILES AND TRACTORS

ANDERSON

AUTOREELITE MORE THAN JUST A SPOTLIGHT

The AUTOREELITE is the only spotlight with an automatic extension trouble-light feature. This is a real necessity for country driving and a valuable feature at any time and place where trouble may occur. Show this to a motorist and he immediately appreciates its usefulness, for it robs touring of its most disagreeable feature—the fear of a breakdown on the road after dark.

DIRECTIONS—To use as a "trouble light" simply unscrew the knurled nut and withdraw the lamp to desired length. 12 feet of cord on an automatic reel. Cord winds and unwinds just like a curtain roller.

The Anderson Autoreelite is an accessory for which you'll find a ready sale.

Stocked by the best jobbers. If yours does not carry it, write us and we'll tell one who does, or supply you direct.

Write for complete details, list No. D-301-A and discounts.

NOTE THE WOOD WHEELS EVERYWHERE

For the life of the Car

Wood Wheels manufactured by the members of the Automotive Wood Wheel Manufacturers' Association are guaranteed for the life of the car on which they are placed.

This is a remarkable obligation. Wood Wheels are working units. They must withstand unnumbered road jolts and side-thrusts. Still, by the terms of this guarantee they are pledged to outlive other parts that their resiliency actually

protects from the shocks of service.

This guarantee sets forth, as nothing else could, the degree of perfection that has been attained in the construction of Automotive Wood Wheels. It expresses the faith that the makers of Wood Wheels have in their product. And it supplies a new and even greater reason why Wood Wheels will continue to be featured as standard equipment on the world's best cars.

Costs You No More

HERE is a Covert tool the product of which is Silence.

So accurate is the large master gear, and so sensitive the testing instrument that, when a production gear is slowly rolled between, the dial shows variations as small as the twenty-fifth of a hair's breath.

Every Covert Transmission gear must pass this warrant of its perfect accuracy.

Accurate gears are silent gears.

The vehicle builder who offers you a product equipped with Covert Transmission well deserves, therefore, the higher selling price he may justly ask you to pay.

LONDON

MANY are asking what the new Chrysler Six will look like. ¶ We are not ready to say, except to remind you that a car that is to meet a great public demand, selling to people of varied tastes and interests, cannot be extreme or reflect the whim of a day or a season in design or construction. ¶ There is no doubt that buyers of cars will demand greater value for their money than they have received in the past. This will mean cars of longer life, less eccentricity of design, greater stability in used car values. ¶ These have been the things first in mind in the engineering, design, material and workmanship of the new Chrysler Six. ¶ We believe the public will be so quick to recognize the intrinsic and permanent value of the Chrysler Six that, early in its production, it will come to be looked upon as the best value among sensibly priced automobiles. ¶ Chrysler production starts in July.

CHRYSLER MOTOR COMPANY, ELIZABETH, NEW JERSEY

CHRYSLER sales policy will provide for the establishment of distributors and dealers only as production grows. Parts of the country may remain uncovered for some time to come. When a distributor is established, it will be with the assurance that he can depend upon getting from us a sufficient supply of cars to make his business successful and profitable from the start.

WIRE WHEELS

AUTOMOBILE owners everywhere are recognizing the superiority of Wire Wheels. This is evidenced by the large quantities of HOUK and HOUSE Wire Wheels that are being sold by our Service Stations—by the surprising number of old cars that are being rejuvenated with Wire Wheel equipment.

Wire Wheel Service Station territory is open to organizations that have, or are willing to install, the equipment necessary for proper servicing. If you can qualify—write for our proposition.

WIRE WHEEL CORPORATION OF AMERICA

(Successor to Houk Manufacturing Co.)
1700 Elmwood Avenue, Buffalo, N. Y.

Direct Factory Branches and Service Stations:

New York—835 11th Ave., at 57th St.

Philadelphia—328 North Broad St.

Los Angeles—1216 South Grand Ave.

San Francisco—1690 Pine St.

Cleveland—519 Citizens Building

Chicago—23rd St. and Indiana Ave.

Detroit—433 Leland St.

Canadian Factory: Ajax Wire Wheel, Ltd., 64 Niagara Street, St. Catharines, Ont.

A set of Houk or House wire wheels consists of five wheels, four inner hubs, four hub caps, hub cap wrench and spoke nipple wrench

HOUK

For over 600 models of 150 makes of cars. Specify make, model and year of car when writing for particulars.

HOUSE

For FORD, CHEVROLET 490 and OVERLAND Model 4. Finished in White, Black, Red, and Cream—color optional.

Turn-Auto

What Is a Turn-Auto?

Car Being Pulled Onto Turn-Auto in Case of Dead Engine. Note Crane for Hoisting Out Engine.

THE TURN-AUTO is a steel holder or cradle, which will firmly hold any size car or truck.

It sets anywhere on the ground or floor without bracings or fastenings.

By a turn of the crank the car is rolled over on either side and held at any angle.

The car when rotated occupies only the same space as when standing.

A Word to the Trade

Mr. Repairman, in seven minutes, a car can be placed in the Turn-Auto and rolled over on either side for inspection and repairs.

A few turns of the windlass and you can hoist the engine out and swing it clear of the car.

The front or rear end of the car can be quickly hoisted with our Tandem Jacks and one or both axles and the transmission removed.

The Turn - Auto turns a car over for demonstrating, inspecting, adjusting, cleaning, painting, car body repairing, engine, axle and transmission repairing, acetylene frame welding, etc.

Allowing You to Work at an Automobile From a Position of Unaccustomed Convenience.

Worm Drive Axles *for* Motor Trucks

Built in a new, modern axle plant, conveniently located in Chicago's steel and iron manufacturing district, where every facility for the prompt supply of necessary axle material is at hand.

Truck builders will get dependable axle service from us, coupled with a product which embodies the latest and best engineering practice in rear axles.

IRON MOUNTAIN CO.

927 East Ninety-Fifth Street, Chicago, Illinois

NATIONAL Zig Zag Radiators are built for pleasure and passenger cars.

They are light in weight and symmetrical in design, adding much to the appearance of any car. Yet that is not all. Their deep air cells and unobstructed waterjackets guarantee greater cooling surface and unusual expansion and contraction flexibility.

A NATIONAL Zig Zag Radiator reduces operating costs and will eliminate such winter annoyance as frozen or steaming radiators.

THE service that most motor trucks and tractors are put to, is especially trying on the cooling system.

National Spiral Tube Radiators have been scientifically built to withstand such excessive abuse. Their greater surface exposure of water channels insures them against overheating.

Make sure that your motor truck or tractor is equipped with a National Spiral Tube Radiator.

Everything is listed under the NOUN or principal word

There's a Type of Fedders Radiator for Every Purpose

Here are Three

FEDDERS TUBULAR—for Trucks and Tractors. Has copper tubes with spiral fin, and can be assembled with either cast iron, pressed steel or brass top and bottom tanks. Can be taken apart to repair, or plug any leaking tube. Tubes furnished to order. Fedders throughout in quality and workmanship.

DIAMOND CORE—for Passenger cars, Trucks and Tractors. The original of the cellular or "honeycomb" types of radiators; has large water spaces and cooling area; light in weight and sturdy in construction. Its delicate lines and attractive design add greatly to the vehicle's appearance. Widely used on autos and tractors—and on more high grade trucks than all other makes and types of radiators combined.

GENUINE HONEYCOMB—for Autos, Trucks, Tractors, Airplanes. The original and only radiator of its kind. Built up of individual cell-like tubes—hexagon or square—joined at their expanded ends to form water spaces on all sides of each tube. Practically every bit of metal has air on one side and water on the other. Uniform water spaces, non-clogging. Flexible core, leak-proof construction. Withstands freezing without injury. Easy for a novice to repair.

A **QUALITY**
PRODUCT

THE ANSTED COMPANY, INC.

MANUFACTURERS OF HYDRANTUBE
RADIATORS FOR MOTOR CARS

600 West 57th Street, New York.

ANSTED RADIATORS

A Motor Car is Known by Its Radiator

The Ansted Company, an organization devoted to the production of super-quality radiators for fine cars, has preserved its individuality and made a permanent place for itself in the industry by keeping far ahead in the development of many exclusive features in fine radiators.

Among Exclusive Ansted developments are listed:

- Genuine square cellular Spherical face cores.
- Genuine Hydr-A-tube seamless front semi-spherical face cores.
- Genuine square cellular Mercedes type seamless front "V" shape cores.
- Genuine square cellular machine beveled "wire type" "V" shape cores.
- Genuine Seamless individual Venturi tube cores.

The "Watermark" process by which a manufacturer's trade-mark, or a monogram or crest, may be built into a radiator is an exclusive Ansted development which will meet with instant favor.

The pace in the automotive industry is altogether too fast for any buyer to make a habit of a source of supply, and when, as the culmination of fifteen years of specialization, there becomes available at moderate cost, a radiator which may be guaranteed for the life of the car, the manufacturer who would keep faith with his sales force and his trade, owes it to himself to investigate so refined a product.

THE ANSTED CO., Inc.
600 West 57th St.
New York, N. Y.

The exclusive distributing franchise by which we offer genuine EXTRUDED seamless individual tube cores, makes available a product of phenomenal strength and durability, and this combined with the latest scientific development in giving the tubes a Venturi diamond shape cross section makes for the ultimate in thermal efficiency. The tubes are manufactured by The United States Cartridge Company of Lowell, Mass. of finest grade pure Lake Copper, EXTRUDED (not drawn) Seamless, Uniform Removable.

"Made Well—Just a Bit Better than Necessary"

At Last — The Radiator for Trucks

A COOLING section of the type here shown has become standardized among many truck manufacturers because of features which make for improved radiation and greater convenience.

Consider carefully the following advantages:

Collar on fin insures complete metallic union with tube, and holds fin securely in place.

Tube driven through fin, giving the closest possible fit.

Damaged fins may easily be restored to shape and usefulness without being loosened from tube.

Tube is of seamless copper, 3-8 inch O. D., .025 wall thickness. And header plates are low brass or copper, of .050 thickness.

The cuts clearly show its distinctive features

Two supply sources, insuring delivery and interchangeable product. Your drawings will receive prompt attention.

Please mention The Automobile Trade Directory

The framework of the modern skyscraper and the continuous fin tubular core are similar. Strength and rigidity result from the perfect system of bracing.

A RETROSPECTION of the motor car industry cannot but show the outstanding accomplishments of McCord engineers in the development of cooling systems.

Their research and experience qualifies them to make recommendations. The performance of the continuous fin tubular type of radiator has shown such marked superiority in truck and tractor service that McCord engineers are firm in their favor of this type.

The reasons are numerous: light weight, thorough dissipation of heat, provision for the circulation of large volume of air, resistance to blows, easy repairing and, above all, strength.

In the great McCord plant are manufactured all types of cellular and tubular radiators. Years of experience have given this company, the largest radiator makers in the industry, a standing which permits it to authentically make recommendations. Promoting the use of the continuous fin tubular type of core is done, therefore, to insure maximum results.

LONG

COOLING SYSTEMS

Every Long Cooling System is scientifically adapted to the particular engine which it serves, thereby assuring the maximum efficiency.

The Kinship of Years and Efficiency

In the span of a human life, 18 years are but the attainment of youth, but "18 years" when associated with an institution of foremost rank in the automotive industry—this titanic prodigy of commerce—signify the purposefulness and fullness of maturity, the wisdom and resourcefulness of ripened knowledge and experience; the enthronement of an ideal.

Such are our years; these are their fulfillment—strength combined with judgment; fitness united with deliberation; desire associated with capability; success expressive of merit.

And these—in unstinted measure—are at your service.

NO ENGINE CAN BE MORE EFFICIENT THAN ITS COOLING SYSTEM. The Long Cooling system guarantees the accomplishment of maximum efficiency at minimum cost.

ROME-TURNEY HELICAL TUBE RADIATORS

are sturdy and strong; a cooling system with increased radiating surface of seamless helical tubes. Their use on America's best trucks and tractors is a proof of their superiority.

Ask for catalogue

ROME-TURNEY RADIATOR CO.

Rome, N. Y.

Cut Showing Water Passages

GORDON RADIATORS

Our construction permits of expansion and contraction, the strain being on the spacer and not on the water passages; our radiator will stand shocks and vibrations.

A high grade radiator made in an up-to-date factory, by practical experienced radiator men who have been in the radiator business since its inception.

The water passes downward at an angle of 135°, the water passages being longer than when straight, hold more water, and produce a cooling medium of greatest efficiency. There can be no dead water. The "spacer" between the water passages gives indirect radiation in addition to the direct radiation from the water passages.

KEYSTONE REAMERS & MILLING CUTTERS FOR AUTOMOBILES

**Keystone Expansion Reamers
Especially Designed for
Ford Cars.**

Expansion Reamers have the advantage over solid Reamers of being adjustable as to size. They are finished very close to size and can be adjusted from about .006 to .015 of an inch larger. They should be set to the correct size before using.

FORD SET No. 15

**Thirteen Reamers covering
20 Bushings, taking care of
every bushing that needs
replacement.**

We also manufacture Cylinder Reamers for Fords; Die and Screw Plate Sets; Hand Reamers in all sizes for all uses. Taper Pin Reamers. Write for complete catalog and prices.

Real points of superiority in a product, not mere selling arguments, are a firm foundation for the continued satisfaction of users

Why Tungars Sell and Stay Sold

Thousands of garage type Tungar Battery Chargers (for garages and service stations) have been sold and are giving satisfaction BECAUSE:

1. Tungar gives the largest charging capacity for the least money invested.
2. It costs less to operate than others that are more expensive to buy.
3. It operates alone and just as well as when it is being watched. It works twenty-four hours a day, and requires no attention except to give it more work to do after it has charged a group of batteries.
4. A Tungar can be put in operation in a few minutes after it is received. Very easy to install. Complete instructions are furnished.
5. Heat or cold makes no difference to Tungar.
6. There are **no moving parts—no oil or grease** needed.
7. Tungar is simple to operate. Just a turn of one switch—then regulate the current.
8. It is **safe**—approved by the Fire Underwriters.
9. Batteries can't discharge through the Tungar if the alternating supply fails. It is further protected by fuses as an additional precaution.
10. Tungar is flexible. One to 20 batteries can be charged at various currents up to six or seven amperes.
11. Tungar is self-starting. Turn a switch and it starts. If the alternating current fails the Tungar stops, but as soon as the alternating current comes back again the Tungar begins charging at the same rate as when it stopped.
12. Tungar is strong mechanically, well designed electrically, neat in appearance and all live parts are totally enclosed.

Let him help you

**There is a better way to keep
the store records you need**

In your city there is a representative of The National Cash Register Company. He is a student of business systems. He has been trained to be of service to merchants—to help them solve their problems.

Let him show you how you can get the store records you need without working overtime on day books, pass books, ledgers, and memorandums.

He will show you the easiest way to get these records. You need them once a year for your Income Tax report. You need the same figures every day to control your business.

We make cash registers for every line of business. Priced \$75 and up.

RADIATORS FOR TRUCKS

The Bush Mfg Co.

HARTFORD, CONN.

The Thermostat Does It

The CURRAN

An All Year Radiator

From 15 degrees below zero to 100 above—a range of 115 degrees. The Curran is the one radiator built having this range of temperature in mind. Its construction permits solid freezing without injury—its angle strike and simplified thermostatic control regulates the flow of the water to the cooling requirements of the engine (note cut away illustration of our patent circulation control). Special construction adaptable to Ford trucks and delivery cars.

DEALERS—Write us to-day for our exclusive agency proposition. Our method of dealing directly with you facilitates service and insures maximum dealer profits.

The Perfection Rack Displays and Protects Your Tires

Every tire is held securely in place by an individual patented hanger. They are well displayed and protected against theft by a master locking arm.

The rack is made of metal and reinforced at all joints. Carried in stock sizes of 10 and 12 feet—either 2 or 3 tier. We can also make to order any size to meet your individual requirements. Write for Booklet "D" and prices.

RETAINING RINGS—See Fillers, Tire Bead

Johnson Rims

For Wire, Wood and Disk Wheels

Tire Changing Is Easy — with
Johnson Rims. No Wrench. No
Hammer. No Spreaders. No
Effort.

Just use a screwdriver—pry one end of
ring loose, remove ring, and tire comes
off as easy as picking it up from the floor.
Johnson Rims are rustproof—

Replacing tire is equally easy.

Johnson Rims, laced into wire wheels,
can be secured from all prominent wire
wheel manufacturers.

The "S. I." Rim

*makes your
rim problems
simple—*

BECAUSE

It is made to fit from 70% to 80% of all cars now in use without a solitary change.

If you sell the S. I. RIM you can give the most service on the least investment.

One rim of each size will be an 80% complete stock.

The Stone Interchangeable Rim

is made to replace and interchange with the following rims:

Kelsey No. 20 and 30
Stanweld No. 21, 22 and 76
Baker Standardized
Dodge T41
Perlman-Jackson
Baker
Detroit

Made in the following sizes:

30x3½	CL		\$3.30
32x3½	SS		4.65
32x4	SS		5.00
33x4	SS		5.25
34x4	SS		5.60

Everything is listed under the NOUN or principal word

Gill

One-Piece Piston Ring

Any Size, Where You Want It, and
When You Want It.

The thirty-three branch offices of this company are so located that no jobber in America is more than twenty-four hours from some one of them.

And since these branch offices carry complete stocks of, or can supply Gill One-Piece Piston Rings in more than 3,000 sizes and over-sizes, it means that your customers can have Gill Piston Rings in *any* size they want, *where* they want them, and *when* they want them.

Identify the Gill One-Piece Piston Ring by the Joint, but do not measure its merit by the joint alone.

THE GILL MANUFACTURING COMPANY
Chicago, Illinois

Gill

One-Piece Piston Rings

are carried in stock ranging from 500 to 10,000 rings each, by nearly all jobbers. If your jobber happens to be out of the size you want, tell him to get in touch with the nearest of these branch offices—The Gill Piston Ring Company:

We guarantee Gill Rings to increase power, prevent smoking resulting from oil suction, to overcome excessive carbon trouble, and to reduce gasoline and oil consumption. When the motor is fully equipped with Gill Piston Rings we will refund the full purchase price upon return of rings, if they fail to meet this guarantee. This guarantee does not cover rings used in scored or out-of-round cylinders until they have been reground.

American Hammered Piston Rings

INDIVIDUALLY CAST AND TESTED—From special mixture of close grained gray iron, accurately tested, assuring uniform metal in every ring.

ONE PIECE—Easily installed—and not subject to the high breakage of multiple piece rings.

CONCENTRIC—An equal wall thickness at all points of the circumference allows the ring to fill the piston groove and leave no pocket behind the ring for oil accumulation and carbon deposits.

LEAKLESS—Accurately machined to fit the piston groove and cylinder—American Hammered Piston Rings are leakless. The tension, hammered into the rings uniformly, keeps them leakless. Heat from the motor does not affect American Hammered Piston Rings.

OVERSIZE—No extra charge for oversize rings. In ordering always give the diameter and width of rings wanted.

SEALED CONTAINER—Every ring is sealed in a moisture proof envelope, 12 to a box. The box is also sealed, giving a double assurance that every ring will be received in good condition.

★ **SPECIAL FOR FORDS**—American Hammered Piston Rings, made to fit the deep grooves in a Ford piston, are held to the same rigid specifications as those used as factory equipment for Pierce-Arrow, Mercer, Stutz, and other of the more expensive cars. In ordering these special rings, please specify "for Fords."

FOR ALL MOTORS—American Hammered Piston Rings for all makes and sizes of motorcycle, automobile, truck, tractor, marine and stationary engines, supplied on your order. Rings for replacement are subject to the same rigid inspection as those furnished to the highest class of motor manufacturers as factory equipment.

KELLY

ONE-PIECE PISTON RING

Oil-Proof High-Powered Quick-Seating

ANNOUNCING the—KELLY ONE-PIECE-piston ring, a new and better product—one that is based on sound engineering principles and has withstood every test under every trying condition, and found equal to all emergencies.

Manufactured by engineers with years of piston ring experience and who know the requirements and the need of a high grade piston ring and spare no expense to make the KELLY ONE-PIECE a quality product.

*Sold by jobbers at a popular
price on a money-back-guaranty.*

KELLY PISTON RING CO.

DETROIT - - MICH.

Making Assurance Doubly Sure

You want to know what EFEMCO rings will do where you install them. Our care in making them is what brings your customers back to you.

EFEMCO Piston Rings are tested to unusually fine micrometric limits, the rings that fail to pass this test are promptly rejected—unfit to be branded an EFEMCO product.

That's why you should recommend EFEMCO rings

Important Piston Ring FACTS

Piston Rings in Any Quantity

We have a daily output capacity of 45,000 rings and available capital for unlimited expansion.

Men at the head of our Company have been actively prominent in the manufacturing of PISTON RINGS for the last seven years—in a word, we have a complete organization.

If you have any PISTON RING problem, our Engineering Department will be glad to solve it for you.

* * *

ULTRA SEAL NON-LEAK PISTON RINGS are distinctive from other rings in that they go through an improved process of shrinking and compressing the metal, thus leaving the outer diameter soft, so that it does not wear the cylinder walls.

Every ring is tested for its tensile strength, gauged and inspected before leaving the factory.

As we have said, if you are in the market for PISTON RINGS, we are in an exceptional position to supply your wants. Let us hear from you.

Every Car Should Carry a Towline

Thousands of car owners are coming to look upon a "Towline" as they do upon carrying a spare tire—this is the reason why more and more towlines are sold every year.

How Many Do You Sell?

Do you realize that every car owner that comes into your store or garage is a possible customer for a towline? Then why not sell him one? The "Excelsior" Towline is made for both pleasure cars and trucks. Compactly coiled and packed in a neat canvas bag.

NO CARBON - MORE POWER - LESS FUEL

NO-LEAK-O

THE RING WITH A REASON

The cylinder walls of all gasoline motors warp and wear and the piston ring cannot conform to the warped places. The explosion and other forces destroy the seal of oil as it passes over these places; the gas escapes and oil passes up.

"NO-LEAK-O" "oilSEALING" Piston Rings have a 45 degree angle groove full of oil, which pulsates as the piston moves up and down and KEEPS a film of oil between the ring and the cylinder wall REGARDLESS of warped or worn places on the cylinder wall. The motor maintains maximum power.

RESTORES POWER IN OLD MOTORS WITHOUT REBORING. ON MARKET 5 YEARS. OVER 20,000,000 IN USE. POPULAR THROUGH SERVICE. PRICE 50c UP. If your jobber cannot supply you, order direct.

FACTORY: MUSKEGON, MICH.

NO-LEAK-O PISTON RING CO., BALTIMORE, MD.

Besides Goodyear Detachable Rims

Cleveland Welding Products include Standardized Demountable Rims; Clincher Rims; Tire Bases for Solid Tires; Flanges and Motor Truck Wheel Bands; Gear Ring Forgings; Special Electrically Welded Rings; Special and Irregular Shapes of Tubing. We also manufacture and market Goodyear Detachable Rims for Wire, Disc and Wood Wheels; and Demountable Rims.

Every process, from the making of the steel to the finishing of these products, is under the direct supervision of our own skilled men.

THE McKINNON RADIATOR

"REALLY CELLULAR"

COMPLETE FOR FORD CARS

SOME STRONG POINTS

Endorsed and Used on Prominent Makes of Cars. No Experiment
One Million in Use on Higher Priced Cars.

Soldered All Over. Consequently Strong, Rigid Mass of Separate
Cells. In case of Freezing, Provision is Made for Expansion of
Tubes. Facility of Repair in Case of Damage.

Misener Rotary Hack Saw

Fills a long-felt want in factory, garage and repair shop. Cuts round holes in Metal, Wood, Slate, Marble, etc. Cuts holes from 1" to 3 1/2" in diameter and from 1/4" to 1 1/4" deep. Just the thing for installing speedometers, ammeters, etc. The price is so low that the MISENER ROTARY HACK SAW pays for itself on the first job.

DEALERS: The MISENER ROTARY HACK SAW sells on sight. Full particulars and discounts to the trade on request.

Heat Treated Screw Machine Products

PERHAPS a cap screw does not have to be heat treated—but nobody knows how it is going to perform.

All Ferry Hexagon Head cap screws are heat treated and users know they can be depended on for uniformity and strength. That is why those who know specify Ferry Process Screws year after year.

Other Ferry Products are: Set Screws, Milled Studs, Connecting Rod Bolts, Spring Bolts, Special Screw Machine and Nickel Steel Products according to your requirements.

MACHINE AND CAP SCREWS

All standard sizes. Special sizes made to order in quantities.

SNAP FASTENERS

Our ACME Snap Fastener is particularly desirable for fastening automobile curtains, tops, windshields, seat covers, radiator covers, floor carpet, and door pockets. It is used and endorsed by the largest automobile manufacturers.

We make an almost unlimited variety of standard and special fasteners.

SPECIAL PARTS

Small stamped and formed parts made to order in quantities. Screw machine products.

RAW MATERIALS

Brass, Bronze, Nickel Silver, in sheets, plates, rods, wire, cups, and circles.

Our experience extends from the beginning of the automobile industry.

Martell Reaming System

Most of the prominent automotive manufacturers are using Martell Reaming System because their experience has proven that by its use they have saved from 50% upwards—in bearing fitting and finishing time—not only saved time and labor, but produced equal if not better results than by hand.

The Martell Reaming System also includes adjustable reamers

*Martell
Alignment
Reamer*

for use on machine tools (for reaming and finishing holes to size) as well as adjustable hand reamers for reaming connecting rod bearings, and holes in machinery for studs, bolts or pins.

T. P. Bulletin 101J fully describes Martell Reaming System. Ask for a copy.

Perfection Side Windshields

Perfection Side Windshields Perfection-Hartford Tonneau Windshields

Enclosed car comfort for open models

Add to the pleasure of motoring and improve the appearance of the most beautiful automobiles. They keep out rain, snow and dust. They break the annoying back draught.

Patented October 7, 1919; May 25, 1920, and July 20, 1920

Write for full information

PERFECTION WINDSHIELD CO.

Manufacturers and Distributors

Indianapolis, U. S. A.

STAR GLASS WINDSHIELD WINGS

Are simple in construction and easily attached to any car.

They stop that draught on the back of the neck.

They deflect the wind, rain and dust in summer and obviate the necessity for curtains in winter.

They not only add comfort, but instantly catch the admiring eye of the public.

They can be instantly shifted to any angle by simply pushing them around to the desired position. If you want more air, turn them to a forward angle.

Star Wings have no holes in the glass to weaken it, and can not rattle.

Glass comes in regular lengths, 18 and 20 inches. Other lengths supplied as required. Pleased to furnish electros for your catalogue.

Special fittings for Packard, Marmon and Locomobile.

Write for prices, complete with glass, and for fixtures only.

STAR WING COMPANY

170 West Randolph Street, Chicago

THE PERKINS TONNEAU WINDSHIELD

Adds dignity and luxurious comfort to any car. Adjustable to any desired position or angle. Made of polished plate glass mounted in ornamental nicked metal frame of ingenious construction.

The demand for tonneau windshields is steadily growing and dealers are selling them in ever increasing numbers. The Perkins Tonneau Windshield satisfies the demands of the most exacting motorists. Terms to the trade on request.

THE PERKINS TONNEAU WINDSHIELD CO.

1931 Broadway - - - New York City

H. I. Wind Deflectors

Made to fit all cars. Adds to the joy of motoring. A protection against wind, dust and rain. Deflectors can be attached to windshield in few seconds. Adjustable wing nut enables car owner to set them at any angle. In hot weather, by reversing position of wind deflectors, more air is caused to circulate into the car.

Write for terms to the trade.

Hartford EQUIPMENT

List price
\$75.00 per set of four. Complete
with attaching fittings.

THE HARTFORD SHOCK ABSORBER regulates both the action and reaction of springs. It protects passengers and car mechanism under every changing condition of road, load and speed. It keeps the wheels on the road, saving tires and preventing danger from spring breakage. Makes any car a better, easier riding car. Hartfords are the leading high class shock absorbers on the market. Over half a million sets are now in use and the number grows every day. The new oilless type requires no lubrication, no attention at all.

List price \$12.50 each.

THE HARTFORD AUTO JACK—"the best Jack money can buy". Makes child's play of lifting the heaviest car. 15 pounds pressure on the handle is transformed into a lift of 1000 pounds at the head. It is swifter and safer—stronger and more convenient to work. The extra long handle and short stroke make the Hartford particularly easy and safe to use. Finished in lustrous black enamel. In construction, appearance and performance—the finest Jack that can be built.

Prices

No. 500	Black Enamel	\$14.50
No. 502	Black and Nickel	15.50
No. 501	Nickel	16.50

THE HARTFORD SPRING BUMPER—from end to end, a powerful, yet resilient spring. It parries the *blow* of collision—and absorbs the *shock*. Handsome, smart and efficient, it is a real asset to any car. The Hartford Spring Bumper is made of finest tempered spring steel. Practically unbreakable. Each end is a true loop-spring—the most efficient form of shock absorbing spring. Three-way attachments are practical for a great majority of cars. Approved by Underwriter's Laboratories.

GILMAN

SHOCK ABSORBER

Takes the Kick from the Recoil

The Gilman smoothly and positively controls the recoiling movement of an automobile spring the entire distance of its travel without harsh checking or snubbing at any stage.

It allows a car to ride upon its springs without restricting their downward movement. It completely eliminates the disagreeable upthrow which breaks the springs, jolts the car and jars the occupants.

It is the only shock absorber which can be adjusted with a screw driver while it remains upon the car.

It is handsome and compact in design. Its working parts are completely enclosed. Its attachment is simple. One type of fitting, applicable to fully 90 per cent of all makes of cars, makes it ideal for jobbers and dealers to stock.

PRICES:

Model C, set of 4 with fittings complete for cars weighing up to 3500 lbs., including Dodge, Buick, Nash, Chevrolet, Oakland, Oldsmobile, etc.... \$35.00

Ford Model, set of 2, with fittings complete..... 18.50

Model B, set of 4, for cars over 3500 lbs., with fittings complete, ready for delivery Spring of 1921..... 50.00

ELECTRIC SIGNS

Your customers have seen many electric signs. Did they see yours? If you have the right kind, the right size, and the right location on your building; yes. If you have a poor one, one too small, badly located on the building, part of the lamps burned out and not replaced, or if you have none at all, quite probably they did not.

Automobile merchandising and garage service needs, and will profit by, an unusual amount of electric advertising. People used to be at home reading the papers in the evening; now they are out driving about and will see your electric sign if you have one.

An "American" electric advertising sign will tell your prospective customer **WHO** you are, **WHERE** you are, and **WHAT** you have to sell all at one and the same time. This three fold impression is not produced by any other form of advertising.

The "American" is made to order (not a stock job) beautiful and attractive by day as well as brilliant, fascinating and convincing by night.

The "American" has no superior in design, construction, durability, and economy.

The "American" is furnished in any of the important types of electric signs; lens letters, outside lamp type letters, opal glass letters, or in art glass faces.

The latest creations in colored illumination with moving effects, possible only through a combination of colored lamps with the colored "American" lenses.

Our flexible oven-baked enamel finish is produced in any desired color or tint, with trimmings in harmonizing colors or gold leaf.

The "American" is built and finished as you want it and not like your competitor's sign—an advertising advantage decidedly beneficial to you.

Buy an "AMERICAN". Write for illustrations, special hand sketch, or any other desired information.

NOISE

"My car always used to sound like a threshing machine. Since I had the new Tappets put on, it is beautifully quiet."

Writes a 1916 Buick Owner

"Such a relief to get away from the noise of my valves. I can hardly believe it is the same car. It runs quieter and has more get away."

Writes an Oakland Owner

OIL CUSHION TAPPETS

DEALERS: Every Buick, Oakland and other overhead valve car in your town, is a possible customer for a set of "Oil Cushion Tappets." For no one likes to drive a car with a noisy motor now-a-days.

Write us today and let us send you the complete story of "Oil Cushion Tappets"—and our liberal terms to the trade.

4 CYL. CARS \$2.50 Per Set
6 CYL. CARS \$4.00 Per Set

SOENKSEN-SPIERS ENG. CO.
AURORA ILLINOIS

SILENCE

The reason why oil cushion tappets make a motor silent is because, after the oil cushion tappets are installed on the motor the cap is filled with oil and when the motor is put in operation this oil is drawn in between the two springs on the upstroke of the valve so that as the rocker arm strikes the down blow it hits on a cushion of oil; deadening the noise of the valve tap.

SIMPLEX

THEFT-PROOF
AUTO LOCK

Approved by Underwriters' Laboratories. 15% Reduction in Theft Insurance Premiums.

An Approved Lock for Every Car

Quickly installed on steering post without change in its construction. Unpickable Corbin lock—unbreakable housing. Locks front wheels in straight ahead position—car cannot be steered or towed, yet complies with local ordinances.

Also special locks for Ford, Overland, Maxwell and Chevrolet.

Simplex Locks are guaranteed. Sold by garages and auto dealers everywhere. Dealers: Order from your Jobbers or write us direct.

SIMPLEX CORPORATION
2214 S. Michigan Ave. Chicago, Ill.

STOP THAT NOISE

WITH

K H K
Valve in Head
MOTOR SILENCERS

Guaranteed to eliminate from 75% to 90% of that clacking noise caused by the action of rocker arms and push rods in valve-in-head motors (Buick, Chevrolet, Oakland, Oldsmobile, Scripps-Booth). Adds pep to motor operation. Eliminates constant adjustment of tappets. Exactly what car owners are looking for. Thousands of sets in use. Sold on a "satisfaction or money back" guarantee.

Automatic Extension Reels

For Electric Lamps

Pat. Jan. 30, 1917

Especially adapted for use in Manufacturing Plants, Garages, Machine Shops, etc., and a great convenience for adjustable extensions for portable electric drills, grinders, fans, etc. Equipped

with 25 ft. reinforced cord, lamp socket and guard. Attached to ceiling, beam or conduit. A swivel joining enables lamp to be carried in any direction from Reel, returning it automatically when not in use. An automatic lock holds the lamp at any desired distance from the reel.

Perfect insulation—stands test of an A. C. Potential of 1250 volts—only 250 volts required for lamp service. Safe—satisfactory—convenient—necessary.

Approved by Underwriters. Local Fire and Electrical Boards endorse it.

The "Liberty Bell" Auto Signal

To the ear, the "LIBERTY BELL" conveys a warning and a polite request; to the eye, it shows the universally accepted danger signal—a red light, which flashes when bell rings.

The "LIBERTY BELL" comes in three standard models and three sizes.

Brackets and fittings come for attaching the "LIBERTY BELL" either to the cowl or running board, to the radiator or on the windshield. They sell from \$9 to \$14, according to model and size.

Here is not only a very useful warning signal but a very handsome ornament for any car. These Signals are growing in greater demand every day. Send for discount to the trade.

THE BUNYAN MFG. CO.

REX AUTO SOAP

MADE ONLY OF PUREST VEGETABLE OILS

REX AUTO SOAP surpasses similar products in its quick-working qualities and in its purity. It will not affect the most delicate finish of the car.

The Soap itself, and our lithographed displays furnished to dealers make REX the easiest and most profitable seller in the soap field.

GUARANTY BOND

We guarantee **ZELNICKER Ever-Tyte** Piston Rings to produce higher compression, develop more power, and use less fuel and lubricating oil, you to be the sole judge.

We will refund the full purchase price to any purchaser upon the return of the rings if they fail to give absolute satisfaction within a period of twelve months from date of installation.

THE EVER TIGHT PISTON RING CO. ST. LOUIS

No. _____

M. Zelnickey
PRES.

Read This Guaranty Bond

It is the most sweeping guarantee ever made by any manufacturer of piston rings. No stronger guarantee could be made. It gives both car owner and dealer absolute certainty of satisfaction.

Why We Can Afford to Make This Guarantee

It is because we *know* what **ZELNICKER Ever-Tyte** Piston Rings will do, that we dare to offer so positive a guarantee. We know that the "3 piston rings in one" interlocking construction reduces to a minimum the escape of gas or oil past the rings. We know that the **ZELNICKER 6-point expansion** keeps the *Ever-Tyte* always a perfect circle, however it is expanded or contracted. We know that **ZELNICKER Ever-Tytes** insure maximum compression.

But the case rests not on what we say, but on what users say—voluntarily. Here are extracts from just two of the hundreds of letters we have on file:

"We have been using *Ever-Tytes* for two years and our customers are more than satisfied. These rings do all you claim, and then some."—Leonard Johnson & Co., 2416 Cottage Grove Ave., Chicago.

"Our opinion at present is that it is the only perfect ring made."—Hall Gas Engine Co., Inc., Bridensburg, Philadelphia, Pa.

Why not have the advantages which *Ever-Tyte* certainty of satisfaction gives you? *Ever-Tytes* will bring you in more profits and build business for you. Write for the *Ever-Tyte* proposition.

UNIQUE

SPARK PLUG

Here is a spark plug that is easy to sell because it prevents trouble by anticipating it.

The one weak place in every spark plug is in the point, because this becomes full of soot.

This is eliminated in the **UNIQUE** plug, owing to the way it is constructed with the tapered soot deflector.

Write us for full details and terms to the trade to-day.

MENDALL METAL

Mends Without Welding

Use Mendall Metal to permanently repair cracks in any kind of metal. Chemicals unnecessary. Mendall fluxates with metal when heated to only 250°. Part is repaired in place. Blow torch only tool necessary. Repaired part stands 600° heat or 1200 lbs. pressure. Sold to trade only. Write us today and learn how to do \$100 worth of work with only \$5 worth of material.

Sample Package—Six Bars—\$5.00

THE 4-A PRODUCTS CO.

3103 Downing St., DENVER, COLO.

Motors of Small Bore

require close fitting piston rings
made from metal of first quality.

Eco
Numethod
CONCENTRIC
PISTON RINGS

are concentric one-piece rings machined by a new method from high grade individual castings. They are round, fit shallow grooves accurately and expand with uniform radial pressure. They maintain motor compression to the maximum point.

Ask us for samples.

ECO MFG. CO.

53 State Street, BOSTON, MASS.

EVER SAFE! Known Everywhere—Emergency Brake for Fords

applied it is necessary to remove them to make adjustment.

Type A—Non-adjustable\$2.25
Type B—Adjustable 2.50

Manufactured Exclusively by
NEVER BREAK PRODUCTS CO.

Bangor, Pa.

Type C & D "Adjusto."
The shoe you can adjust on the road without wheel removal. The shoe you can use for service as well as emergency. Cheapest in the long run, best at any price. Instant adjustment for wear of lining, shoe or drum with wheel removal; not a cast iron shoe. Guaranteed unbreakable.

Type C—Unlined\$3.50

REICHERT EMERGENCY TIRE CHAIN No. 220

Reichert's Emergency Tire Chains are easily and quickly adjusted when you are in trouble. Place the malleable clamp on the spoke, then slip the chain over the tire and hook the snap in the loop—that's all. No jacks or tools required.

A set of four chains, packed in a bag, is sufficient to pull you out of the mud, sand or snow.

Important—State size of tires when ordering.

VANADIUM VALVE *and* CLUTCH SPRINGS

HROME Vanadium Spring Wire is a quality product from the ore used straight thru to the finished material. This alloy, when properly treated, combines the qualities of great strength with a high degree of ductility and resistance to fatigue. These factors enable "Vanadium" springs to stand up to their work under the severe service requirements which valve and clutch springs must meet.

HERE in this pressed steel plant, which is one of the most modern and complete in the country, are manufactured all of the hubs, drums and flanges for the divisions of the Motor Wheel Corporation. Yet our capacity is so large that we still make pressed steel parts for other manufacturers and should like to figure with you on any of your requirements.

**MOTOR WHEEL CORPORATION, LANSING, MICH.
Gier Pressed Steel Plant**

Four Million Wheels a Year — *from standing tree to finished product*

WITHIN the confines of our organization, 4,000 sets of wood wheels for motor cars and trucks are made each day—of wood grown in our own forests, cut and seasoned in our own mills and of steel pressed and fashioned in our own plant.

The units of the Motor Wheel Corporation are as follows:

Gier Pressed Steel Plant

Lansing, Michigan

Prudden Wheel Plant

Lansing, Michigan

Auto Wheel Plant

Lansing, Michigan

Weis and Lesh Plants

Memphis and Jackson, Tennessee

Monroe, Louisiana

Light, Arkansas

Saw Mills at Other Points

The men directly responsible for the organizing and operating of the Motor Wheel Corporation are H. F. Harper, President and General Manager; W. H. Newbrough, Chairman of Board of Directors; B. S. Gier, First Vice President and Treasurer; D. L. Porter, Vice President; W. C. Brock, Vice President; and C. C. Carlton, Secretary, who with O. A. Jenison, J. B. Siegfried and Chas. W. Nichols constitute the Board of Directors. Mr. Siegfried is General Sales Manager.

BOSSERT

Sheet Metal Stampings

We are equipped to cold press, form and draw metal up to $\frac{7}{8}$ " thick, "THE BOSSERT WAY" on the largest and heaviest drawing and forming presses in the world. We make over 200 Automobile Parts. Heavy and light cold pressed work of all kinds in any material.

With the largest presses in the industry and a complete and modern plant for annealing, case hardening, nickel plating, electric and oxy-acetylene welding, we solicit your inquiries and orders.

Whatever your "stamping" problems may be, we can solve them for you. Estimates cheerfully furnished on your requirements.

More than 50 standard makes of automobiles and motor trucks use
"BOSSERT REAR AXLE HOUSINGS."

Some of Our Automobile Stampings Include

Axle Housings	Clutch Cones	Hubs, Wire Wheel
Ball Cups	Clutch Discs	Oil Hole Covers
Ball Joint Collar	Clutch Driving Spiders	Running Boards
Ball Retainer	Clutch Drums	Toggle Links
Bearing Retainer	Clutch Sleeves	Torque Arms & Tubes
Bonnet Frame Ledge	Engine Shims	Transmission Covers
Brake Band	Equalizing Bars	Tubing Plates
Brake Band Supports	Fan Blades	Universal Joint
Brake Discs	Flanges, Hub	Housings
Brake Drums	Gauge Cups	Washers
Brake Pedal Bracket	Hangers, Step	Wheel Flanges
Caps, Hub	Housing Covers	Wrenches

MATTHEWS

Matthews' Steel Stamps have won favor in the foremost plants in America. But then that is not to be wondered at because over 70 years' experience in making them better and better puts them in the lead.

Some day you will want such stamps. Write for booklet.

Bridgeport Tire Pumps

Rust Proof:

The barrel is made of seamless - drawn brass, and is, therefore, immune to rust, the greatest enemy of any pump.

Leak Proof:

Our patented reinforcement expands the barrel right into the footbase, making the joint leak-proof. There is no solder or anything to loosen and cause leakage.

Better Built:

From raw materials to finished product, this pump has been built by modern methods in a modern factory by a company with twenty-eight years' experience in the building of better tire pumps.

Guarantee

If at any time this pump should prove unsatisfactory, due to defects in either workmanship or material, return it to us and we shall remedy the defect or send you a new pump.

MOTOR CAR SPRINGS

Our large and highly specialized spring coiling and forming equipment, together with our facilities for drawing and heat treating our own wire, from either carbon or alloy steel, make us the logical source of supply for the motor car and accessory manufacturers.

Our Engineering Department will be glad to lend you any assistance possible. Write our nearest office regarding your requirements.

U. S. Sun Visor

THE U. S. Sun Visor keeps sun glare out of the driver's eyes and rain and snow from the windshield. Disagreeable windshield reflections are diffused and the driver can see clearly without straining his eyes.

The U. S. Sun Visor makes night driving safer because it eliminates the blinding light of the approaching headlights.

Made of metal finished in black enamel and can be easily attached to any make of car.

For Ford Cars . . . \$5.00

For closed cars with stationary brackets . 7.50

For open cars with adjustable brackets . . 8.50

U. S. Thermo Shutter

The U. S. Thermo-Shutter for Fords is necessary equipment for cold weather driving. The motor and radiator temperature can be controlled from the dash under any weather conditions. This increases the efficiency of the motor and saves at least 5% in gasoline consumption, also the alcohol and battery.

Attractive in design and quickly installed. Price \$7.50. Louvre slides to close the

side openings on the head \$2.50.

Dealers: The U. S. Sun Visor and Thermo-Shutter are real business-producers. If you have never sold them, you've missed out on some profitable business. Write us for illustrated literature and trade prices.

AUTOMOBILE Sheets

Automobile Body Stock
Automobile Fender and Hood Stock
Automobile Crown Fender Stock

Careful and thorough investigation of the requirements of automobile manufacturers, has resulted in the establishment of above three standard finishes, the modification of which in finish and forming qualities has enabled us to meet practically every phase of the industry to which sheet steel is adapted. Open Hearth Steel is used, as well as full pickled finish treatment—the products differing in the degree of finish and forming properties.

Deep Drawing Stock “THURITE”

For difficult drawings such as axle housings, radiator casings, hub caps, etc., we supply steels of special drawing qualities, the most capable of which is “THURITE”—a product which has astonished the fabricating world in its remarkable behavior under dies.

We manufacture Sheet and Tin Mill Products of every description and for every known purpose—Black Sheets, Galvanized Sheets, Special Sheets for Stamping, Long Terne Sheets, Enameling and Japanning Stock, Tin and Terne Plates, Black Plate, etc.

\$4.00 Set
of Four

Automatic Whistle Tire Signal

Absolutely reliable
—A perfect insurance
against under-
inflation. Replaces
the valve cap. Ad-
justs to any desired
air pressure and
whistles whenever
pressure falls below
that point. It's a
tire-saver and a
sales winner.

WE have acquired a knowledge that can only be obtained from experience, and this accounts for the excellence, uniformity of temper, exactness of size and finish of our springs. Knowledge of material, improved machinery, experienced workmen and care in testing our work before delivery, are the prime reasons why our springs are used by the leading concerns throughout the country.

MORE MILEAGE—MORE POWER

By Using

RO-GAS-FILTER

The Ro-Gas-Filter is a device of brass and glass, easily attached on the feed line of any car or truck. The Ro-Gas-Filter will remove all water and other impurities from any gas. Now in use on many cars. Popular Low Price.

Its use increases the power and lowers operating cost. Attractive dealer proposition and descriptive matter on request.

THE ROLL MANUFACTURING COMPANY

Macy Street, Fond Du Lac, Wisconsin

MARVEL

"Its name defines it"

MODEL N FOR FORDS

Designed especially to fit right in place of regular Ford installation. No changes whatsoever necessary.

A high class instrument for Ford cars. Increases mileage to 22-25 miles per gallon. Sold on 30 day trial. Money back if not satisfactory.

Dealers' proposition on request.

Price F.O.B. Factory \$10.00

Flint, Mich., U.S.A.

Guarantee
VISIBLE PUMPS

When a number of pumps are to be operated our Vacuum Storage System affords a great saving both in cost of equipment and in cost of installation.

It eliminates all power plants but one.

It doubles the speed of operation.

It is safe, simple and accurate.

It works automatically.

Filling stations equipped with Guarantee Visible Pumps are getting the business.

Guarantee Liquid Measure Company
Rochester - - Penna.

One Model Spring Fits All Cars

Only one Model Spring is required to fit any Ford passenger car because the tension is adjustable to weight of the load. Less stock to carry, always the right type on hand, and a surer profit for dealers.

Burgess equipment performs the important functions of three types of shock absorbers combined, eliminating side-sway, keeping wheels on ground and silencing entire car.

Stamford, Conn.

STAINLESS STEEL

“Neither Rusts, Stains Nor Tarnishes”

WHY IT IS BETTER

Stainless is a high-chromium alloy steel, possessing two very important characteristics.

First: It has the strength and toughness of the best grades of heat-treated alloy steels, and will withstand exceedingly high temperatures while exposed to air and other gases, without scaling or pitting.

Second: Articles manufactured from Stainless Steel have the unique and useful property of withstanding the action of most of the common corrosive agents, without developing permanent stain.

Consequently, Stainless is of great value in the manufacture of valves, control apparatus, tools, dies, punches, moulds, etc. It may be forged, hardened, tempered, polished and annealed without radical departure from ordinary methods. The mechanical properties are such that, for machine parts, Stainless compares favorably with the best alloy steels, while its stainless quality adds a new value that is of decided interest to the automotive and mechanical engineer.

RIMTCO LUBRICATING SYSTEM

AUTOMOBILES—TRACTORS—TRUCKS

A high pressure system whereby all bearings can be efficiently lubricated in from 15 to 20 minutes.

We furnish over 300 different types and sizes of fittings, sufficient to meet all requirements of any make vehicles or machinery of kinds.

HIGH PRESSURE COMPRESSOR

Regular, size 2x5; capacity, $\frac{1}{2}$ lb. grease

Medium, size 2x8; capacity, $\frac{3}{4}$ lb. grease

Large, size 2 $\frac{1}{2}$ x8; capacity, 1 $\frac{1}{4}$ lbs. grease

When a bearing is lubricated in this thorough manner, experience has proved that it needs very little attention and less frequent lubrication. Because of these and many other valuable features, this RIMTCO LUBRICATING SYSTEM is worth many times over its cost.

RIMTCO LUBRICATER CO., Inc.

739 Boylston Street, Boston 17 Mass.

DISTRIBUTORS

RHODE ISLAND MACHINE & TOOL CO.

Island Place, Woonsocket, R. I.

MANUFACTURERS

ALEMITE LUBRICATING SYSTEM

AUTOMOBILES—TRACTORS—TRUCKS

Absolute Lubrication—Abolishes Grease Caps

A uniform method whereby all bearings can be thoroughly lubricated in from fifteen to twenty minutes, without soiling hands or clothing.

"THE ALEMITE SYSTEM"

Makes the former disagreeable task of lubricating your car a pleasure.

"TYPE A"

Straight Nipple

"TYPE G"

Elbow Nipple

HIGH PRESSURE COMPRESSOR

Regular	Size 2	x5	Capacity.....	$\frac{1}{2}$ lb. Grease
Medium	Size 2	x8	Capacity.....	$\frac{3}{4}$ lb. Grease
Large	Size 2 $\frac{1}{2}$	x8	Capacity.....	1 $\frac{1}{4}$ lb. Grease

Caps integral with
Shackle Bolts

"TYPE F"

"TYPE G"

500 pounds' pressure to square inch obtained with High Pressure Compressor, and lubrication forced into tightest bearing, therefore bearings can be kept snug and tight, eliminating all rattles, squeaks and excessive wear.

Standardized by over 50 of the most prominent Automobile and Truck Manufacturers.

Approved by the leading "Automotive Mechanical Engineers" and 500,000 satisfied users.

Manufacturers all concede the "ALEMITE SYSTEM" a valuable asset.

We manufacture and furnish sufficient variety of fittings to meet the requirements of any automotive vehicle.

Can be installed by—Yourself—Garage Man—or a Dealer.

Send for illustrated booklet—"Lubricating Facts"—fully describing this wonderful system.

When Springs Break, put on

VULCAN The Replacement Spring

The VULCAN

name plate stands for the best that can be built into springs. We are suggesting to millions of car owners, through such mediums as the Saturday Evening Post, and other national publications, that they look for this name plate.

Dealers who desire quality, service and profit should insist upon our VULCAN name plate on every replacement spring.

If your jobber cannot supply you, write us — today

G. P. & F. SERVICE

"KNOWING HOW SINCE '81"

OVER 15 ACRES OF FLOOR SPACE

WHAT G. P. & F. "PRESSED STEEL" SERVICE MEANS:

Our years of experience enable us to guarantee the accuracy and dependability of our work.

Our up-to-date facilities and large organization enable us to handle your orders promptly and economically for you.

In a word, G. P. & F. SERVICE stands for accuracy, dependability and promptness, and greatest values.

GASOLINE TANKS

G. P. & F. Gasoline Tanks are made accurately according to your specifications.

We offer you tanks of seamless, welded, reinforced construction, also drawn steel tanks, the locked seamed type (see illustration), also built-up terneplate tanks. Our Tank service is complete and we are equipped for a large quantity, low cost production.

Send blue prints showing shape and size of your tanks for quotations, stating quantity required.

Our experience, facilities and organization enable us to quote you attractive prices.

Write us today

MAXIM SILENCERS

The "Maxim Silencer" stands for a definite result—silence, without lessening the power of the motor.

It is the perfected product of the nationally known H. P. Maxim.

By equipping your motor vehicles with Maxim Silencers, you are putting a strong sales argument in place of a nameless muffler.

Write us today for prices. You will find them interesting.

You are Judged by the Pumps on Your Curb

High prices have caused buyers of gasoline and oil to discriminate. Honest measure has become worth seeking—and motorists are taking note of the pumps that serve them. Wayne national advertising is showing them **where** to seek—why and how Wayne Honest Measure Pumps are mechanically accurate. Protect your customers and add to your reputation for honesty. Put the pumps on your curb that have earned the leading place in the public's choice—Wayne Honest Measure Pumps.

There are other reasons for selecting Wayne Equipment. The exclusive continuous forward crank action (no backward turns) saves time. Four screens and a positive filter assure pure gasoline. The Wayne dial clocks off each gallon after delivery into the tank—not before. Wayne Equipment is built for continuous service and guaranteed for two years.

We will gladly supply you with full information without obligation. When writing, ask for bulletins Nos. 320 AD, 276 AD, 452 AD and 230 AD.

Wayne Oil Tank and Pump Company
703 Canal Street Fort Wayne, Ind.

A national organization with offices in thirty-four American cities. Repair stocks and expert service at your command. Representatives everywhere.

SPECIAL POINTS
(FOR QUICK ASSEMBLY)

AUTOMOBILE SPRINGS

NORTHWESTERN SPRINGS are made of the best grade of motor car steel of a special analysis, and tempered in furnaces and quenching baths built especially for this purpose. They are subject to the most rigid test for deflection, for elasticity and for tensile strength before shipping.

FOR EVERY MAKE OF CAR

We carry in stock springs for practically every make car. Orders shipped the same day received. We are in a position to make up and ship all orders for special or obsolete springs ten hours after receiving order.

SEND FOR REFERENCE BOOK ON SPRINGS

Write us today and we will send you a complete catalogue of automobile springs which we keep in stock ready for immediate shipment.

H&D

SHOCK ABSORBERS

CRAWFORDSVILLE, IND.

In Canada

RICHARDS-WILCOX COMPANY

London, Ontario

H&D SHOCK ABSORBERS are made in single and twin arm types for all Ford Cars. There is a special type for the Roadster, Touring Car, Coupe, Sedan, Taxi, Commercial Delivery and One Ton Truck.

Mechanically Perfect

They are guaranteed against ALL defects, both of material and workmanship. Any part that does not give satisfaction will be cheerfully replaced, when returned, charges paid, free of charge.

30 Days' Trial Guarantee

Dealers are authorized to put H&D's on any Ford. Should the owner decide to have them removed after the 30 days' trial, we give a new set for every one so removed and our draft for \$3.00 to pay for the dealer's time and trouble.

24 Hour Parts Service

H&D distributors are located conveniently to all dealers in the United States and Canada. They carry a complete stock of parts for 24-hour service. Parts broken or giving unsatisfactory wear are replaced free.

No Possibility of Short Circuits.
No Broken Connections or any Current Leakage.
Seamless Bakelite Case.

Replaceable Magnusite Bakelite Ring.
Flexible Metal Conduit.

Price of I X L Shortproof Timer complete with wires as illustrated, and also roller assembly—\$6.50.

DEALERS AND JOBBERS:—Write for details. Will be sold through regular channels only as rapidly as Jobbers' connections are established.

ECLIPSE SPECIALTY MANUFACTURING CO. 549 W. Washington Blvd. CHICAGO, ILL.

The BLUBLAZE TIMER

FOR FORD CARS

Terminals are Sealed

The only practical way to build a timer is of Condensite, same as all other automobile timers. The Condensite shall and Carbon Brush will do for the Ford what a magneto does for all other gas engines. Its principles and construction of Condensite is far superior to all other makes of Ford Timers, giving positive ignition and built to last indefinitely, same as a high grade magneto does.

Jobbers Dealers

A pleased and satisfied customer means repeat orders. Sell the Blublaze Timer and double your sales. Write for full particulars. Our proposition is good.

BLUBLAZE MOTOR SPECIALTIES CORP.

Price \$3

49-51 West 66th St.
New York, N. Y.

DOUBLE SERVICE

The Big Feature of This Timer

RANDALL

DOUBLE **TIMER** SERVICE

Lasts twice as long as the ordinary timer. No "shorts" or misfires—working surface is turned away from engine, thus avoiding oil splash and grit. Made of absolute non-conducting material. Removable dust and oil proof cap. No pins, springs or rollers to rust, break and wear out. Compare the price with others—\$2.50.

JOBBERS AND DEALERS: Write for terms on this sure and quick seller. EVERY Ford and Fordson owner a ready prospect.

DUFF DISTRIBUTING CO., Inc.

B. K. F.

HIGH EFFICIENCY PRODUCTS

The B. K. F. Make and Break Timer for Ford Cars, Trucks and Fordson Tractors

Make and Break construction is used in all high grade ignition apparatus. It eliminates missing caused by worn roller type timers and insures a fat, quick, positive spark at the right instant—saves the battery by cutting off the current as soon as contact is made.

No oiling required—no pitting of contact points—no steel or fibre rollers to wear flat and cause trouble—nothing to get out of order or adjustment.

LIST PRICE \$4.00

THE B. K. F. THERMOTROL

The B. K. F. Thermotrol is a device which gets greatest mileage and efficiency from gasoline—maintains smooth power control and retains body and life of oil in crankcase.

This is accomplished by maintaining an even pre-determined temperature in the engine manifold. This even temperature is maintained by an automatic and positive acting thermostat (which is a simple device that contracts and expands by changes in temperature), opening and closing a valve which admits the proper amount of hot or cold air at the right time.

VICTOR

FABRIC AND CORD TIRES

Victor is a Quality line of tires and tubes at a popular price.

Dealers can back up the Victor line with 100% confidence, knowing that it will stand up against any competition, regardless of price or quality.

The Victor line means more profit to the dealer. It is an exclusive sales proposition.

The Victor line consists of over-size cord and fabric casings, red and gray tubes and an over-size cord special tube.

We educate dealers' salesmen, show them how and why Victor Tires are superior and train them how to present these arguments to your trade.

*Dealers:—*The Victor proposition is for One Dealer in each town. Write Today.

The Henderson Tire— A Distributor's Franchise Builds Repeat Business

The Henderson State Right Franchise is a two-fisted, man-size, five-to-six figure money-making opportunity for an aggressive distributor.

The Henderson Tire and Rubber Co. offers an exclusive selling franchise. It embraces an exclusive territory—an exclusive tire and exclusive selling co-operation—with the resulting repeat business.

Integrity is the backbone of Henderson progress—the simple virtue of being right constitutes an impregnable advantage.

An aggressive tire distributor will find this an unusual opportunity to secure an exclusive selling franchise.

If your territory is still open—it will prove good business on your part to become acquainted with the possibilities of the proposition. Suppose you write—let us send you more details.

Choosing the Camp

IN choosing the location to pitch their encampment the Indians selected a place where existence could be easily maintained.

In choosing the *Standard Four* line, distributors and dealers are influenced by the fact that it offers the least resistance to maintaining a successful business.

The tire is carefully made of best materials. Shipments are prompt. Adequate advertising and merchandising assistance is given.

Profits are exceptionally liberal. Territory is exclusive.

Write or wire today for full particulars.

Sinclair Tires

honestly made - honestly sold

They're Remolded Tires

(Not the same as rebuilt tires)

Our Guarantee of 5000 Miles

Is founded on these
SINCLAIR FACTS

Molded from the best compound of new rubber.

The cement used—a very important factor in tire durability—is of our own manufacture.

Remolded on standard carcasses only—no inferior construction.

Positively not a retreaded or band proposition.

Write for our Price List and Trade Terms. They mean profits to you and satisfaction to your patrons.

We are spending thousands of dollars in advertising SINCLAIR TIRES to the public.

Cash in on this publicity by supplying them to your customers.

Making Good—

We make tires that make good and we make friends by doing it. Sinclair Remolded Tires have satisfied hundreds of users—they will satisfy you.

COOK'S SURE FIRE COMMUTATOR

for Ford Cars

10 Special Features 10

The Timer with 10 Special Features. Here are the reasons why you should sell one of these timers to every Ford Car owner in your town.

No Nuts, Bolts or Screws to become loose. Double-contact, Double-brush, and Double-wiring System, with all Wires permanently inclosed in Redmanol, affording absolute protection against Oil, Water, Grease, etc.

Develops good Hot Spark, so that every atom of Gas explodes, assuring Maximum Power and Fuel Economy with Minimum Wear and Tear of the Motor Mechanism. Reduces Carbon and eliminates Fouling, Knocking, Mis-firing and all other Ailments of the Motor caused by Timers.

Starts as easy in cold weather as otherwise.

Requires no Lubrication.

Materials and Workmanship of the Highest Quality.

Can be installed in less than ten minutes.

Will last as long as the car lasts.

Once installed never regretted.

All orders given prompt attention. Write us today for our discounts to the trade.

LEWSEN PATENT DEVICES

FOR THE

AUTO TRADE

make money for jobbers and dealers—save time and trouble for vulcanizers, garagemen and

Car Owners

No. 1-B Lewsen 2 in 1 Tire Spreader and Iron, \$2.00. No. 2-D Set with Chain, \$4.00.

No. 3-D Lewsen Tire Spreader for vulcanizers, set \$7.50.

Lewsen Quick Rim Spreader, contracting and expanding, \$7.50.

No car with pneumatic tires is properly equipped without one of the Lewsen 2 in 1 Tire Irons. It takes the rim out of the tire and opens the tire and locates the hidden nail between the fabric and the rubber. It locates any break in the fabric, opens the bead so one can easily insert the tube; in fact, it eliminates 99% of tire trouble. The hook part is a forging—bottom part highly polished spring steel non-breakable.

Lewsen Tire Spreader No. 3-D for vulcanizers turns the tires inside out and holds open in position for buffing, cleaning, repainting in the side of the tire.

Lewsen Quick Rim Spreader contracts and expands the rim on three points, without spooling it—will work on spooled rims as well. Guaranteed 6,000 lb. pressure.

Perfect Valve Wrench removes and tightens nuts, no matter how rusty or banged up stem may be.

Sold by leading jobbers and dealers, or address

Lewsen Manufacturing Company

AERO-CUSHION INNER-TIRE :: AND RUBBER COMPANY ::

The above cut was made from the original photograph of an outer casing that had gone its limit on air pressure, and was discarded. The owner had it equipped with an Aero Cushion Inner Tire and got over five thousand miles more service.

Aero Cushion Inner Tires are opening up new fields of profits for jobbers and dealers throughout the country. These tires have the following distinctive advantages which strongly appeal to all car owners.

COST—Aero Cushion Inner Tires cut tire expenses over 50%. In the first place their cost is practically the only one, for being made of pure Para Rubber, they will last indefinitely.

A casing used over an Aero Cushion Inner Tire will give from three to four times the mileage of this same casing on an air filled tube.

They will give this increased mileage because they can be worn completely through before they have to be discarded.

Besides this saving in tires and tubes, think of the expense and trouble that can be done away with by eliminating the necessity of carrying spare tires, tubes, patches and pumps in the car.

ELIMINATION OF TIRE TROUBLES—When Aero Cushion Inner Tires are used punctures and blowouts are impossible. This advantage alone will appeal to every car owner.

Write us today for our terms to the trade. Don't wait for your competitor to do it.

The above illustration is a drawing of a cross section of the Aero Cushion Inner Tire, showing it as it appears enclosed in the outer casing.

The illustration also plainly shows the millions of cells or pores, where the air is confined, making this inner tire very light and resilient.

FENDERS

MANUFACTURERS:

SERVICE in fulfilling your sheet metal requirements is our aim. You incur no obligation in sending us the specifications for **FENDERS, HOODS, SPLASH APRONS, and FUEL TANKS** on your passenger car, truck or tractor.

DISTRIBUTORS and DEALERS:

REPLACEMENT FENDERS for **BUICK Cars** for Models 1917 to 1920, inclusive, carried in stock.

Write for our prices and become a satisfied customer

The high grade of our **ENAMELED** products pleases the car manufacturer, distributor, dealer and owner alike.

The Fostoria Pressed Steel Company
FOSTORIA, OHIO

K-D "Parallel Lift" Valve Lifters

Open and Close Parallel

Universal Lifter, - \$2.00

Special Lifter for Ford, \$1.00

Gasco Mfg. Co.
Lancaster, Pa. U. S. A.
Makers of Gasco Air Compressors

BEARDSLEY NEVER-SLIP VALVE LIFTER

FORD CAR SPECIAL.....	\$1.25
DODGE SPECIAL.....	1.75
FORDSON TRACTOR.....	1.75
UNIVERSAL (Fits All Cars).....	2.50

Regardless of the pin angle in the valve stem, this lifter cannot catch on it. Lifts with the valve in any position. And at the same time it lifts the spring, it holds the valve down.

This dandy tool makes the installing of a new Ford camshaft a one-man job, and the grinding of valves a matter of minutes instead of hours. It strikes a mighty responsive chord with every motor mechanic.

Beardsley Hi-Speed Valve Grinder

Can Be Used on Any Car

This Valve Grinder has speed, accuracy and durability and at the same time is a tool which is light and handy, simple in construction and easily operated. This grinder is preferred by the expert mechanic as well as the amateur. They come complete with necessary attached bits, both with long and short shank.

Mfg. by The LOOMIS-BEARDSLEY CO., Columbus, Ohio

Price

Incredible

That's what the first dealer said who saw
The Champion Reboring Tool

at work on

FORDS and FORDSONS

But It's True

IT rebores and refinishes in one operation.

Rebores Model T Blocks in less than 30 minutes, including

Pat. 6-15-20, time for Foreign Pats. Pending. setting up. Rebores all cylinders with one setting of locating plates.

Rebores in true alignment with crank shaft bearings, and leaves a satiny, absolutely accurate finish. Certain in operation; you can't make a mistake. It's a big time saver, money maker and a tool every Ford and Fordson dealer should have.

For further particulars, address
Champion Manufacturing Co.
2908-10 West Fletcher St., Philadelphia

Atlas Grinding Tool

Price complete, \$10.00 net. Pre-paid. Extra Cutters 30 cents each.

Pat. Nov. 11, 1919

Atlas Crankshaft Grinder

Don't attempt to scrape a bearing to crank pin that has worn oval and don't pay a machine shop \$15 or \$25 for a lathe job.

It will true up a crankshaft to less than one-thousandth of an inch in less than one hour without removing shaft from crankcase. Adjustable to all crank pins from 1 1/4 to 2 1/4-in. diameter. But one tool needed, cutters good for truing 10 to 20 pins. 5,000 in use.

Send for circular describing

Atlas Garage Unit

A machine for testing and straightening crankshafts, and gear press with housing assembly and piston vice attachments.

Jobbers: An attractive proposition awaits your inquiry.

Atlas Manufacturing Company

Millvale Station, Automotive Equipment
PITTSBURGH, PA.

Showing Tool Shrinking Rim

The Hercules Rim Tool Co.

Factory:

115 Commercial St., Los Angeles, Cal.

Chicago Office:

6263 South Western Avenue

**Most Powerful and Efficient
Labor Saving Rim Tool
Ever Devised**

**Indispensable
for Garages and
Vulcanizers**

Will last indefinitely. Breaks, shrinks and expands all makes split automobile rims without being removed from rim.

Automatically locks and holds rim in shrunk position so it can be removed from tire and replaced inside tire with utmost ease and safety.

**Built in two sizes: list prices
\$8.00 and \$12.00**

For heavier shop work we recommend the heavier tool. **ASK YOUR DEALER.**

TRADE MARK

We are makers of both Cord and Fabric **SUPERSHOD** Tires

These Tires are of the very best quality that can be made—
They are **SUPERSHOD**—wear longer—give better service.

We also manufacture **Surety** (red) and **Axiom** (gray) Pneumatic inner tubes.

We fully protect our dealers, and all our products are made
and sold upon this one proposition:

"Necessity may raise the price; Nothing shall lower the quality"

Warman
(Patent)
Radiator Guard

For All Makes of Trucks, both Horn and Bumper Type. An efficient Radiator Protector that is attached in a few minutes with an ordinary wrench. Does not interfere with the hood.

Saves—

Loss of Truck Use.
Delayed by Deliveries.
Loss of Driver's Time.
Costly Repairs.
Loss of Time Installing.

The slant of the lateral bars gives the maximum of protection and increases circulation. The Warman Guard is made to conform with the shape of the Radiator and preserve the INDIVIDUALITY OF THE TRUCK.

THE FUNDAMENTAL CORPORATION
270 Union Avenue, Brooklyn, New York
Standardize on the Warman.

THERE are exclusive construction features of Ajax Tires—both cord and fabric—which set them apart from and above the ordinary tire. These features, coupled with the fairness of the Ajax way of doing business, have earned the splendid reputation which Ajax enjoys among users and dealers.

The Ajax Dealers Sales and Service Franchise offers a splendid opportunity. Write for the details.

PRESSURE PROOF PISTON RINGS

Service Station and Repairmen are finding in Pressure Proof Piston Rings one of the few dependable means of preventing Carbon and Smoke; Increasing Power and Saving Oil and Gas.

DISTRIBUTORS

Distributors for Maine, New Hampshire — Keating & Shaw, Inc., 110 Exchange St., Portland, Me.

Distributors for Lower Peninsula of Michigan—Chas. R. Manes, 1141 Jefferson Ave. E., Detroit, Mich.

CANADIAN FACTORY—Pressure Proof Rings, Ltd., Sun Life Bldg., Sherbrooke, Que.

Distributors for South Carolina — Gibbs Machinery Co., Wheat and Assembly Sta., Columbia, S. C.

Distributor for California—Mr. John Amois, 536 Golden Gate Ave., San Francisco, Cal.

The expander A acts on the bore of ring B, pressing it outward against cylinder wall, and upward against pressure side of ring groove. The small ring C is slightly beveled at the point X, to lock it into the main ring. This locks the two rings together.

The principle on which these rings operate (illustrated below) is mechanically correct—their ability to accomplish all that we claim for them is backed by years of performance unequalled by any other piston ring. "New Facts About Piston Rings" tells you why.

One Pressure Proof 3-piece or Two Pressure Proof 2-Piece rings are a full piston equipment.

Pat. Mar. 2, 1915, Feb. 29, 1916

THIEM

Push and Pull Rim Tool

Since the adoption of the split rim motorists have been looking for this tool.

The THIEM Rim Tool REMOVES THE RIM FROM THE TIRE—not the tire from the rim. Requires but a few seconds in the entire operation.

A simple one-screw adjustment makes the THIEM Rim Tool fit any size split rim, thus making only one tool necessary for you to handle.

The THIEM Rim Tool exerts a leverage of 9 to 1, or in other words, 100 pounds on the lever exerts 900 pounds at the rim, push or pull, amply sufficient to pull an old or rusty rim away from the tire.

Sells at \$3.50 with a liberal profit to the trade.

Rich Tool Company

Railway Exchange Bldg., Chicago, Ill.

Kresge Building, Detroit, Mich.

The cuts below represent valves used in some of the best known present day Aero-
plane, Motor-Boat and Racing Automobile Engines. They are all products of this Com-
pany and most of them have been produced in large quantities and have, therefore, been
thoroughly tested in service.

Needless to say, they are all Tungsten Steel, but we also make one-piece forged valves of all other commonly used Alloy Steels in the manufacture of which we exercise the same care as is used in our Tungsten Valve materials.

One of the newer types of valves which we have been making in very large quantities for the past two years is our Hi-Chromium Valve, which has some very remarkable properties. It is for some purposes an excellent valve and we solicit inquiries from those who are troubled by a persistent burning away of the seats of the valves in their motors.

We also have a material called Cobalt-Chrom that possesses the qualities of High-Chromium as relates to resistance to burning, together with a resistance to abrasion or wear and a strength when red hot more nearly comparable to that of High-Tungsten. This material offers excellent promise of good results in engines running for long periods under heavy load without attention, such as marine motors and tractor motors.

Our Engineering Department is at your service on all questions concerning suitability of material and design.

Float a Ford

SHOCK ABSORBERS

The shock absorbers with the famous "third spring" which checks the rebounds and prevents side thrusts. Float a Fords do not bind or interfere with the free action of the Ford springs or require holes bored in frame or axle.

Made for every type of Ford car or truck. Easily and quickly installed. A demonstration means a sale. Write for full facts.

THE **FULTON** LINE

The Signal that WINS The Right of Way

OVER 250,000 of these melodious chime signals are now in use in all parts of the world. They WIN the right of way by their pleasing tone, a most courteous warning of the road that gives desirable distinction to any car. Easily attached to exhaust pipe. Will last a life time and give no trouble.

The **AERMORE**
Exhaust Horn

Also popular for trucks and tractors. Useful in signaling from the field or while threshing, wood sawing, silo filling, to signal to the crew, etc. A size to fit any motor.

- No. 0**—17-inch Aermore outfit complete with valve for cars of 40 h.p. or over...**\$12.00**
No. 1—15-inch Aermore outfit complete for cars of 30 h.p..... **10.00**
No. 2—13-inch Aermore outfit complete for cars of 25 h.p..... **9.00**
No. 3—11-inch Aermore outfit complete for Fords and other light cars**\$8.00**

Add 50c to above prices west of Rocky Mountains.

Price of Style "G" valve when ordered separate, all sizes.....**\$2.00**

In ordering, give outside diameter of exhaust pipe between muffler and engine. Dealers, ask your jobber. If he cannot supply you, write direct, giving jobber's name.

THE FAMOUS EKLIPS SPARK PLUGS

leak and sootproof,
sure spark, very durable.

THE SPECIAL EKLIPS GIANT

Suitable for heavy trucks and high power cars.

\$1.00 Each

Medium Quality
Eklips "C" only 75c

THE **FULTON** LINE

THE **FULTON** Universal Spring Bumper

A new bumper that combines more desirable qualities than any other bumper on the market. Can be fitted in 30 minutes to any car of the extending frame type. The offset in the brackets accommodates any width frame by merely transposing the brackets. The special hinge gives this bumper more resiliency, and makes it absorb shock without damage to bumper or car.

Face of the bar is perfectly smooth, having no clamps or fittings to catch or rattle or get out of line. 60-inch bar in front and 66-inch bar for the rear, thus giving full protection to fenders and entire rear end. Bumper folds into small package, thus saving freight charges. A handsome, durable, non-breakable, inexpensive bumper for any size car. In ordering, designate them as follows:

Stock Number	Description	List
S-101-B-60"	bar, black finish.....	\$11.55
S-102-N-60"	bar, black and nickel finish.....	13.65
S-103-B-66"	bar, black finish.....	12.10

"BULL DOG" Foot Accelerator

Gives Fords the same sensible, easy foot control of speed as that of highest priced cars. Prevents accidents due to killing the engine when driver becomes confused. Special foot rest provided aids in maintaining uniform speed, even on roughest roads. Easy to install and requires no further attention. Absolutely correct in design, substantial, simple and practically unbreakable. Retail price, complete, \$1.50.

"BULL DOG" RUNNING BOARD SUPPORT

We do not enter the field with our RUNNING BOARD SUPPORT with a view of competition in price, but are offering the trade something absolutely new and individual—built neat and durable with that same view of satisfaction that characterizes the rest of the "BULL DOG" PRODUCTS.

The "BULL DOG" RUNNING BOARD SUPPORT is so constructed as to truss itself by attaching only to running boards and hangers—a very important feature. Prevents vibration, racking of fenders, and securely holds the running boards under any load.

No clamps to work loose—and will not interfere with the removal of the rear axle.

Its construction is the strongest ever offered in an item of this kind, 1" T iron being used. Price \$2.25.

MANUFACTURED BY

THE W. H. THOMAS MFG. CO.

Spencer, Iowa

"BULL DOG" Bearing Protector

Fits all Fords and Chevrolet 490. A useful device, preventing dirt, sand, mud, water and other injurious substances from entering the hub—allows bearings to run in a clean lubricant. Greatly reduces wear on these parts and is of utmost importance to the motorist who tries to keep his car in safe running condition. Price complete, pair, \$1.00.

AMERICAN BUMPERS

Specialization guarantees superiority. American Bumpers are manufactured by a firm whose entire efforts are devoted to making bumpers. Trained specialists and years of experience—skilled labor and the finest materials combined are responsible for the excellent reputation American Bumpers maintain with all dealers and motorists.

AMERICAN BUICK SPECIAL

Especially designed for 1919, 1920 and 1921 Buick cars only. The construction of the splash pan and fenders of the new Buick makes it very difficult to attach any bracket but a special. When equipped with snubbers, as nearly all are, an American Special bracket is without question the easiest to attach to any on the market. Simply remove the spring bolt nut and replace it with a special cap screw, both furnished with bumper.

AMERICAN EXTENSION REAR END

An attractive durable, strong rear end bumper especially made to fit all cars with three-quarters of semi-elliptic springs on rear end. Bracket has an adjustable length of 8 to 15 inches.

AMERICAN CANTILEVER REAR

Manufactured principally for rear end of all Buick Sixes. Attached by means of the bolt to the frame, which extends to carry the gasoline tank and holder. By merely drilling two holes this bumper can be used on Reo Six, Peerless, Kissel Kar and other cars having rear cantilever springs.

AMERICAN NU STYLE

Made for Nash and other cars with splash pans and fenders that reach the end of the frame. One of the principal features of the bracket, uncommon to other brackets, is the part that fits over the end of the frame, accepting the weight of all blows at the strongest point. Hook bolts fasten around the edge of frame and are made flat so they will not bulge the splash pan when in position. This bumper is recommended for the Grant Six, Lexington, Haynes, Maxwell, Liberty, Moline Knight, Nash, Overland, Olds 35-6 and 38-4, Scripps-Booth and Stutz. Also a number of others.

AMERICAN FORD AND CHEVROLET STEERING WHEELS

Non-tilting and Tilting types, plain or corrugated rims all 17 inches in diameter. Locking device on tilting wheels is positive in action, cannot become unfastened, easily operated. Rims finished in black walnut and enamel. Spider furnished in either malleable or aluminum.

MONROE SELF OILING PUMPS

THE FULTON LINE

Most Tire Pumps are discarded before they wear out. The life of the average pump is quite short, because the pump lasts only until its leather washer has dried out and cracked. With every stroke of the piston the patented Monroe Self Oiling device feeds lubricant onto the washer of the Monroe Pump. This not only lengthens the life of the washer but lubricates the plunger path as well. A ball check valve prevents return of air into the pump. Top cap and ferrule on handle bright nickerled.

No. 10—Monroe Self-Oiling Pump, $1\frac{1}{4}$ in. cylinder $21\frac{7}{8}$ in. long. Black enamel—folding base, nickel plated.

Price \$2.75

No. 15—Monroe Self-Oiling Pump, $1\frac{1}{2}$ in. cylinder, $21\frac{7}{8}$ in. long, black enamel, folding base, nickel plated.

Price \$3.00

No. 350—A good pump with which to meet competition — without self-oiling features. 20 in. over all, black enamel. Packed loose, 50 in box.

Price \$2.00

Flexedge

SELF-SEATING LAMINATED VALVES

Sensible-Logical-Inevitable

A Valve-Seat Carbon Remover at Work While You Drive

FLEXEDGE VALVES Prevent Carbon Deposits

The FLEXEDGE principle is merely a slight flexation, which is so small as to measure only a tiny fraction of a thousandth of an inch, yet sufficient to gently scrape the valve seat, removing the tiny flecks of carbon, which collect after each explosion.

FLEXEDGE SELF-SEATING VALVES continuously grind themselves, always seat. They are installed just like all other valves.

SUPER

Guaranteed Not To Warp

*The Efficiency
of its Valves*

*Governs the
Efficiency of the Motor*

The Super Valve is the lightest, most durable and most efficient valve ever produced. Because of their light weight, Super Valves are easier on the cams, springs and timing gears, and therefore they are easier on the motor. They have less weight than the types of valves now in general use, but more power, greater strength and longer life. Super Valves are made in any size and of any alloy steel to suit your requirements.

EASTERN ELECTRIC CO.

WE MANUFACTURE POPPET VALVES

EASTERN ELECTRIC COMPANY

HANOVER, PA.

Adds $\frac{1}{3}$ to Tire Life

Here is the first real valve improvement in automobile history. The Tiro-meter is a combination valve and pressure gauge protected by a transparent cap that always shows tire pressure at a glance. Saves time, effort and permits you to check over or under-inflation at a glance.

Retail price \$1.75 each or \$8.00 the set of 5. If you haven't seen Tiro-meter, write us direct. In ordering specify wood or wire wheels.

The Rubber Washer does not come in contact with the tire valve stem—consequently it lasts indefinitely. The HANSEN Automatic Air Valve is instantaneous in action and does not leak.

Write for full information on HANSEN accessories.

Here is an ideal fuel preheating device

THE ELECTRICALLY HEATED THROTTLE VALVE

This device is a throttle, or "butterfly" valve so constructed that it can be securely placed in any carburetor in thirty minutes time, by anybody. The accompanying illustration shows the valve in place, and shows also the simplicity and effectiveness of its construction.

It will be noted that this valve is placed where it can be most effective. There are many air pre-heating devices on the market, but there is no other effective way in which to pre-heat the actual mixture, after it has been delivered from the venturi tube.

The Electrically Heated Throttle Valve will insure instant starting in zero weather. It will more

than save its cost in a single season in giving longer life to the storage battery. It will effect a big saving in fuel, will give increased power and mileage at lower expense.

This valve is going to be one of the biggest of the season's sellers. Made in all sizes, to fit every carburetor—

Price\$9.00 List

This price includes wire and switch. Heating element carries one-year standard General Electric Company's guarantee.

TO DEALERS:

We believe that this valve will be one of the fastest sellers this season. We have prepared for a big demand, and are doing a large amount of adver-

tising. Interested dealers and jobbers everywhere should get in touch with us at once to see our highly attractive proposition.

Stark-Inland Rings Prevent "Oil-Pumping"

Customers equipped with Stark-Inland One-Piece Piston Rings are satisfied customers.

You need only tell them to look at their spark plugs for visible evidence of the efficiency of the rings.

Usually they will find dry, flaky soot on the porcelain of the plug, indicating an overrich mixture.

If the carburetion is correct they will find only the light, reddish deposit which denotes perfect combustion.

Never, unless the cylinders are deeply scored, will they find black, greasy gum caused by leakage of oil into the firing chamber.

This is possible because Stark-Inland Rings are cut spirally in one piece. They uncoil as wear occurs, keeping a snug, tight fit between the piston and the cylinder walls.

Recommend Stark-Inland Rings to your customers. They bring repeat orders and allow you a substantial profit.

Model B

**INSULATED
HEAT
WITHOUT GASOLINE**
No Odor No Smoke

IT COVERS THE HOLE AND FILLS IT

HORSEY HEAT UNIT VULCANIZER

Perfectly vulcanizes punctures and blowouts in Inner Tubes. Is made of steel and fits your tool kit. Uses a Heat unit tablet which is not affected by dampness. Insulated heating plate makes it impossible to burn tube. Packed in boxes with 6 Heat Unit Patches, 6 Heat Unit Tablets, with cement, buffer and instructions complete.

We also manufacture a model for vulcanizing cuts up to 9 inches long.

For particulars write to

The Horsey Products Company
4815 LEXINGTON AVE. CLEVELAND, OHIO, U. S. A.

**FIVE MINUTE
SUPER-VULCANIZER**
TRADE MARK

The Clamp is constructed in such a manner that the top raises so that the tube can be put in position from above; strong, practical and attractive.

Super-Patches have been developed to a point of perfection, where they are practically "fool proof" and are guaranteed to cure perfectly in Five Minutes, no matter what the climatic condition, humidity, cold or heat. Cannot Overure.

Order from Your Jobber Today

Outfit Complete consists of one nickel plated clamp, with 12 prepared patches and a metal buffer; neatly boxed in a very attractive carton.

WARNER
HEAVY DUTY
TRUCK TRAILERS
TWO AND FOUR WHEEL TYPES

**Warner Trailers
Will Soon be
as Common as
Motor Trucks**

Many concerns have been able to save the purchase cost of additional trucks because Warner Trailers in some size and type multiply the efficiency of trucks already in service and really do more work with less labor and at lower cost. By hundreds of firms in widely different lines of business the Warner Trailer is looked upon as the most satisfactory solution of their hauling problem.

Write for full information on the Warner Heavy-Duty Truck Trailers, Four-Wheel type, Warner Two-Wheel Heavy-Duty Trailers, Warner Semi-Trailers and Warner Auto Trailers.

SHALER Shop Vulcanizer

Makes Every Repair You Want to Make—
List Price of above Model Only \$75⁰⁰
[Subject to Trade Discount]

The convenient and compact SHALER Vulcanizer gives you everything that you get in the big, cumbersome shop vulcanizer outfits—all facilities you need for making every casing and tube repair it is practicable and profitable to make—

Yet it is a small, movable, inexpensive and SAFE Vulcanizing plant. Requires no experienced operators—your regular help can quickly learn to operate it.

Uses the Famous Wrapped-Tread Method

of repairing casings, which is used by tire manufacturers in building tires. Automatic heat control prevents overcuring or undercuring tires or damaging rubber.

The SHALER also makes every kind of a tire repair. Will vulcanize 6 tubes and 1 or 2 casings at one time—12 casings and 200 tubes a day. Complete with all necessary tools, equipment and full instructions the SHALER Steam Vulcanizing Plant costs only about one-fifth as much as other vulcanizers of equal capacity.

Order From Your Jobber

or write us at once for Free Book, "How to Open a Tire Repair Shop," and catalog of the complete line of SHALER Vulcanizers that use gas, gasoline or electric heat for garages, tire repair shops and motorists' use.

JOBBER—HERE IS A QUICK SELLER!

Car owners everywhere are realizing that the CATARACT is just the washer they have been looking for—it is filling a long-felt want. Public garages are buying large numbers of CATARACT Washers. They say that one boy with a CATARACT Washer can clean a car quicker and more thoroughly than two men with the old pail and sponge or brush method.

Why Not Lay In Some Quick Sellers? Our terms to the Trade Are Liberal.

The CATARACT Washer is made entirely of nicked brass; the nozzle portion wound with a soft

CATARACT
WASHER

mop yarn secured with soft copper wire, making it absolutely non-rustable when coming in contact with water. It will not scratch the finest polished surface. Quickly attaches to ordinary garden hose. Great for cleaning the hard-to-get-at places.

NO. 1 CATARACT STOP COCK HANDLE WITH MOP retails at \$4.00 and is ten inches in length without the mop. The water can be turned on or off RIGHT IN THE HANDLE. Our NO. 2 CATARACT PLAIN EIGHT INCH HANDLE WITH MOP retails at \$2.75. Extra CATARACT MOPS \$1.50 each.

MANUFACTURED ONLY BY

CATARACT AUTO VEHICLE WASHER CO., 1269 Western Ave., TOPEKA, KANSAS

“Rhodes DeLuxe” OVERHEAD VEHICLE WASHERS

Designed to meet the requirements where a longer hose arm than 4½ feet is required. The hose arm is supported in any position by a circular steel track which takes all strain from the washer head. This washer is absolutely NON-LEAKABLE and is designed for particularly hard usage and will cover a large amount of floor space. Made in two styles—Plain and Illuminated. Manufacturers of the “Excelsior Plain” and “Superior Lighted” Washers.

Write for information and prices.

We ship direct to you from our factory.

THE VEHICLE SPECIALTY CO.
51 OAK ST., HARTFORD, CONN.

RED-ROLL AUTO-WASTE

Red-Roll Auto-Waste comes in a convenient and attractive package. Just what every car-owner has been looking for. By keeping a supply always in stock you will be in a position to sell Auto-Waste instead of giving handfulls away every time a motorist runs in for “just a little waste, please.”

Write us today for price to the trade.

STOUT'S

ADJUSTABLE
STEERING WHEEL

Patented

Every Ford Car owner in your town a prospect.

The 17-inch adjustable steering wheel gives the Ford a driving comfort heretofore only found in high-priced cars.

All discomfort is eliminated when the "Adjustable" Wheel

is used. There is no squeezing, twisting or sliding into the seat, for by a single motion on the locking button the wheel is pushed up and to one side, as shown in the illustration.

The rims are of selected stock, highly polished and finished, corrugated or plain. The spider is cast from aluminum in a channel or U-mold, thereby insuring rigidity and stability.

The price is right, discounts liberal, deliveries prompt. Write for our proposition today.

NATIONAL Truck Wheel CUSHIONS

National Cushions
protect your truck

When you equip your truck-wheels with cushions, then you make your best investments for truck maintenance.

By the National method any wheel may be converted into a cushion-wheel at a small cost.

"National Cushions" provide torque resilience for every engine impulse, lessen transmission strains, and by resilient means separate the truck from the road.

Exceptional Proposition for Ford Truck Owners

"The Wheel That Stands the Shock"

Forsyth Demountable Rim, Single Disc Wheel

Light Weight

The Forsyth Wheel is made to take any standard demountable rim which can be quickly applied or removed from the disc of the wheel.

Mass Construction

After years of careful study and development, we discovered several principles in metal wheel construction. Our aim was to avoid using simply a mass of "dead" metal and unnecessary weight.

Patents Pending

Increased Strength

Therefore, only four wheels are required, thus saving weight and expense.

Shock Absorption

We were after a "live" wheel, which would immediately respond to and absorb shocks throughout the structure as a whole, instead of locally at any point. We obtained this result with a low peripheral weight.

Forsyth Brothers Company, Harvey, Ill.

We also make Frames, Brake Drums, and other pressings

Not only are Phelps Wheels distinctively individual in appearance, but they are **SAFE** at all times from the common danger of losing the hub cap and from coming loose. Note the illustration above, which shows the hub-locking mechanism at the end of all

Safety and Beauty Combined

PHELPS DEMOUNTABLE WIRE WHEELS

The three cap screws, as shown, fasten directly to the inner hub and the spring tongues rest against the hex of the cap screw, preventing it from turning. When you sell Phelps Wheels, therefore, you sell not alone added beauty and refinement to any car but the complete assurance of safety as well.

Our output is at the service of high-grade motor car builders who desire to enhance their cars' appearance with superior wheels. We have a real business proposition for jobber. Write us for details.

Metal-Bound Wood Truck Wheels

**GUARANTEED TO OUTLAST ANY TRUCK
WRITE FOR CUTS AND QUOTATIONS**

WAYNE WHEEL COMPANY
Newark, New York State

THE ROYER WHEEL CO.

wishes to announce that its entire plant is now devoted exclusively to the manufacture of

QUALITY AUTOMOTIVE WOOD WHEELS

FOR BOTH

TRUCK and PLEASURE CARS

The cut shows Firestone Type "E" Rim on our 32 x 4½ wheel, which is finding great favor in replacing the solid tires furnished with the 1-ton Ford truck. We carry these in stock and can make prompt shipment.

WRITE FOR DEALERS' PRICES

Pneumatic equipment on trucks cuts vibration and relieves road strain to such an extent that the load capacity can be increased 50 per cent, and the average speed of hauling can be increased at least 10 miles per hour.

This equipment consists of two 32 x 4½ truck wheels with Firestone Type "E" Demountable Rims, one extra rim and twelve hub bolts with each pair. These wheels are painted black, and are securely crated for shipment.

THE ROYER WHEEL CO.

FOUNDED 1848

PERFECTION

Beveled Glass Curtain Windows

The Complete Line—60 Styles—A Style to Suit Every Requirement

Perfection Windows offer the last word in finished motor car curtain windows.

Used on side and rear curtains they beautify and bring up to date the oldest cars as well as complete new car equipment.

THE PERFECTION TYPE WINTER ENCLOSURE is the first practical and really fine-appearing winter enclosure designed for open cars. Rapidly displacing other types. Quick and easy to build. Write for complete circular.

Perfection Curtain Windows are used as standard equipment by car manufacturers.

All live jobbers and dealers carry stock. Naturally they are preferred by high-grade trimmers and top makers.

JOHNSTON

REAR VISION MIRRORS

A NEW MEMBER OF THE JOHNSTON FAMILY

With brackets
for both open and
closed cars.

Type C—Mirror
shown installed
in Buick Coupe.

Instantly Adjustable to Afford Perfect Rear Vision

Johnston Rear Vision Mirrors afford a perfect and unobstructed close-up view of the rear at all times. They far excel other types because the driver need not turn or stretch in order to get a clear view of the rear. And they are instantly adjustable without the aid of tools.

Types A, B and C are made with a solid cast brass bracket, heavily nickeled to match every car's trim-

ings. Have beveled edge plate glass mirrors, silvered with a non-oxidizing silver. This is protected against wear and disintegrating influences by a double, impervious, waterproof, wear-proof backing. Securely held in place by non-rattling bracket.

Types D and E have straight edges in place of bevel. Made of same high quality plate glass.

COMPLETE LINE

Type A—Size 3x10 inches. With beveled mirror of Belgian, silvering quality, plate glass. Equipped with standard bracket for all types of open cars. Price, \$5.00.

Type B—Size 3x10 inches. With beveled mirror of Belgian, silvering quality, plate glass. Equipped with extension bracket for Ford Coupes and Sedans and other closed cars where upper half of windshield tips out. Price, \$5.00.

Type E—Size 3x8 inches. Belgian, silvering quality, plate glass mirror, with extension bracket for all types of closed cars. Price, \$3.00.

Type C—Size 3x10 inches. With beveled mirror of Belgian, silvering quality, plate glass. Equipped with short bracket for majority of types of closed cars. Price, \$5.00.

Type D—Size 3x8 inches. Belgian, silvering quality, plate glass mirror, with standard bracket for open cars. Price, \$3.00.

Stocked by all live jobbers and dealers. Send for folder "Good—Better—Best."

Johnston Beveled Plate Glass Curtain Windows

have added beauty to millions of motor cars—our new winter enclosure makes open cars equal in warmth, convenience and appearance to the limousine. Detailed information on request.

Johnston Clear Vision Windshield Wings offer a permanent protection from wind, dust, rain and snow. They eliminate many motoring discomforts in both winter and summer. \$25.00 per pair. Fittings for all cars. 50,000 pairs in use. Write for catalog.

Williams' Superior Drop-Forged Wrenches In Sets

EVER since the automobile became popular, J. H. Williams & Co. have been assembling Sets of selected Drop-Forged Wrenches to make the necessary tinkering around a car easier and simpler for the motorist and mechanic.

With that end in view, we offer our Automotive Tappet Wrench Set No. 50, illustrated above—a Set of eight Superior Drop-Forged Wrenches, thin style, specially milled for valve tappet adjustment work.

Instead of using makeshifts and getting indifferent adjustment, let this Set help you to do the job quickly and efficiently.

Ask for particulars of this particular set as well as of our other assortments.

Booklet on request.

Outstanding Features

- 1—Seamless steel tubing, pressed on and securely riveted to center. No possibility of rupture as in welded type.
- 2—Coarse tooth gears, insuring maximum strength and endurance.
- 3—Heavy tapered drive shafts of special chrome nickel steel, heat treated by special Salisbury process. Every shaft is Brinnell-tested to make certain that it measures up to definite, predetermined standards of strength, quality and exactness of heat treatment.
- 4—Three-quarter floating type, possessing the principal advantages of both the full floating type (ease of removal of shafts) and of the semi-floating type (elimination of excess loads on bearings and tubes when rounding curves). Eliminates danger of shaft-fatigue by reversal of stress as shaft rotates.
- 5—Oil-less bushings on all brake shafts, eliminating the necessity of crawling under car to oil them.
- 6—Double row ball bearings. Takes thrust in both directions. This is the only bearing which is moved in making adjustment of pinion, eliminating the danger of jamming bearings.
- 7—Powerful brakes which act positively, yet without the common tendency of "grabbing."

*Salisbury Pressed Steel Rear Axles
are made in two standard sizes
for cars weighing 2600 to 4000 lbs.*

SECTION III.

Tables and Data

Nine Horsepower Formulas

One horsepower (HP or hp) is the unit denoting the power required for raising 33,000 lb 1 ft. in 1 minute, or 550 lb. 1 ft. in 1 second, etc. It equals very nearly 0.746 kw (kilowatt) in electric power measurement. Under the metric system 1 hp equals 0.736 kw or 75 kgm (kilogram-meters) per second. The French hp (*cheval-vapeur*), as well as the German hp (*Pferdestärke* or *Pferdekraft*), thus equals 0.9866 American or British hp or 542.48 foot-pounds per second.

The actual power capacity of an automobile, motor-boat or airplane engine is ascertained by brake-block test or by other means for offering measurable resistance to its work. The term "indicated horsepower," as used for steam engines, is not properly applicable.

A horsepower formula expressing actual power capacity approximately (for a four-cycle engine), if a good value for P is known from current engine practice and tests, may be written

$$(1) \text{ Horsepower} = \frac{N}{4} \times \frac{3.1416 D^2 P \times SR}{24 \times 33,000}$$

in which N is the number of cylinders, D the bore diameter in inches, P the mean effective pressure per square inch for the power stroke, S the stroke in inches and R the number of engine revolutions per minute. In the case of a four-cylinder engine, $\frac{N}{4}$ eliminates itself.

As piston speed, in feet per minute, equals $\frac{SR}{6}$, the stroke S receives consideration incidentally when this formula is written:

$$(2) \text{ Horsepower} = \frac{N}{4} \times \frac{3.1416 D^2 P \times V}{4 \times 33,000}$$

in which V is piston speed in feet per minute.

Using metric units, a formula corresponding to (1) is written:

$$(3) \text{ Horsepower} = \frac{N}{4} \times \frac{3.1416 D^2 P \times SR}{900,000}$$

in which N is number of cylinders, D bore diameter in cm. (centimeters), P the mean effective pressure in kg (kilograms) per square cm of piston area, S the stroke in cm, and R the number of engine revolutions per minute.

With the metric notations, piston speed c in m (meters) per second, equals $\frac{SR}{100 \times 30}$ and formula (3) can therefore also be written:

$$(4) \text{ Horsepower} = \frac{N}{4} \times \frac{3.1416 D^2 P \times c}{300}$$

(Continued on following page)

Nine Horsepower Formulas—Continued

These formulas are mainly useful for comparing the values for P obtained with different sizes and designs of engines and at different speeds for any given engine, the horsepower being first decided by test. In using them for determining horsepower from dimensions and design features, the difficulty is encountered that P has a fluctuating value. It includes the percentage of mechanical efficiency of the engine as a factor and is affected by compression ratio, valve sizes and lifts, valve timing, the weight of reciprocating parts and the nature of the ignition. For any given engine, P decreases after a certain speed has been reached, while the horsepower continues to be increased until the increase of speed is balanced by the reduction of P .

For classification purposes (legislation, taxation, racing rules) and rough estimates, simplified nominal horsepower formulas are used. Those relating to automobile engines of the four-cycle internal-combustion type, operated with gasoline as fuel, are of widest general interest. They are not, as a rule, directly applicable to airplane engines, Diesel or semi-Diesel engines, steam engines or to two-cycle automobile or boat engines.

Nominal and Official Horsepower Formulas for Four-Cycle Automobile and Motor Boat Engines

The most authoritative formula for the United States is that which was adopted by the Association of Licensed Automobile Manufacturers (A. L. A. M.) in the early years of the automobile industry. After the A. L. A. M. ceased to exist, the same formula was approved by the National Automobile Chamber of Commerce (N. A. C. C.). It reads:

$$(5) \text{ Horsepower} = \frac{D^3 N}{2.5}$$

in which D is the bore diameter in inches and N the number of cylinders.

The derivation is given as follows:

The gross horsepower of a single-cylinder, four-cycle engine is equal to one-quarter times the mean effective pressure P , acting throughout the working stroke, times the area of the piston A , in square inches, times the piston speed S divided by 33,000, thus,

$$\text{Gross horsepower} = \frac{P A S}{33,000}$$

Multiplying this by the number of cylinders N gives the gross horsepower for an engine of the given number of cylinders, and further multiplying by the mechanical efficiency of the engine E gives the brake horsepower. Therefore the complete equation for brake horsepower reads:

$$\text{Brake horsepower} = \frac{P A S N E}{33,000 \times 4}$$

The A. L. A. M. assumed that all motor car engines will deliver or should deliver their rated power at a piston speed of 1,000 feet per minute that the mean effective pressure in such engine cylinders will average 90 pounds per square inch, and that the mechanical efficiency will average 75 per cent.

Substituting these values in the above B. H. equation, and substituting for A its equivalent, $.7854 D^2$, the equation reads:

$$\text{Brake horsepower} = \frac{90 \times 0.7854 D^2 \times 1,000 \times N \times 0.75}{33,000 \times 4}$$

and combining the numerical values it reduces to:

$$\text{Brake horsepower} = \frac{D^3 N}{2.489}$$

or, in round numbers, with a denominator 2.5.

Another formula of American origin is one proposed by E. P. Roberts. It gives:

$$(6) \text{ Horsepower} = \frac{D^3 L R N}{18,000}$$

in which D and L are bore and stroke in inches, R the number of crankshaft revolutions per minute and N the number of cylinders.

With the same connotation for D and L the Royal Automobile Club of Great Britain and the British Institution of Automobile Engineers have used the formula:

$$(7) \text{ Horsepower} = 0.45 (D + L) (D - 1.18), \text{ for each cylinder.}$$

The Strongest Link

The uniformly superior construction of present day automotive appliances permits of the use of only such materials as are consistently superior in their particular field.

Thus, we suggest the use of the Victor Product as the strongest link for binding together the several assemblies which make up the better automotive vehicle.

**VICTOR SCREW WORKS
DETROIT**

Nine Horsepower Formulas—Continued

The official German formula by which taxation was regulated until war began in 1914 read

$$(8) \text{ Horsepower} = 0.3 \times id^2s$$

in which i is the number of cylinders, d the bore diameter in cm (centimeters) and s the stroke in m (meters).

The official French formula adopted in 1912 and 1913 has:

$$(9) \text{ Horsepower} = Kn D^2L \times \omega$$

in which K is 0.00020 for single-cylinder engines, 0.00015 for 4-cylinder engines and 0.00013 for engines with more than 4 cylinders. D and L are bore in cm. (centimeters) and stroke in mm (millimeters), n is the number of cylinders, and ω is the practicable maximum number of crankshaft revolutions per second on the road, the determination being subject to the best judgment of the supervising authorities, with consideration of gear ratio and other features of the vehicle in which the engine is used.

For comparison, a modern automobile engine may be rated by each of the formulas (5), (6), (7), (8) and (9) and the difference in results noted. Let the engine have the following characteristics: 4 cylinders, bore 3 inches, stroke 5 inches, mean effective pressure for three-fourths of the working stroke 130 lb., piston speed 2000 feet per minute (2400 r.p.m.), and mechanical efficiency, 75 per cent.

By formula (5) the N. A. C. C., the rating is

$$HP = \frac{36}{2.5} = 14 \frac{2}{5}$$

By formula (6), the E. P. Roberts, it is

$$HP = \frac{9 \times 5 \times 2400 \times 4}{18,000} = 24$$

By formula (7), British I. A. E., it is

$$HP = 0.45 (3 + 5) \times (3 - 1.18) = 3.60 \times 1.82 = 6.552$$

Multiplying by 4, the number of cylinders, gives 26.108.

By formula (8), German official, it is

$$HP = 0.3 \times 4 \times 57.76 \times 0.127 = 8.80$$

By formula (9), French official rating, it is

$$HP = 0.00015 \times 4 \times 57.76 \times 12.7 \times 30 = 13.20$$

on the basis of 1800 r.p.m., with the possibility that the rating may be $\frac{1}{2}$ higher, or 17.60, namely if the maximum engine speed of 2400 r.p.m. is taken as the basis.

Two-Cycle Automobile and Motor Boat Engines

The two-cycle engine has twice as many working strokes as the four-cycle engine, but its horsepower is often figured from a four-cycle formula by multiplying the result by 1.65, instead of by 2, to allow for the usually lessened efficiency (especially the volumetric efficiency or ability to receive a full charge of fuel mixture) of this type at the higher speeds.

The RAD-A-THAW

Price, \$7.50

Prevents radiator from freezing when in use. Thaws out radiator if frozen when car stands. Covers enough radiator for efficient winter driving. Vapor from radiator helps keep radiator warm. Put on or taken off in two minutes without tools.

No ANTI-FREEZE mixture.

Use pure water.

Put on car you can forget your winter troubles and you won't have to get hot water to thaw you out. For Fords, Maxwells, Overlands, and all Thermo-Syphon Radiators.

$3\frac{1}{16}$	3.0625	7.3662	$4\frac{3}{4}$	4.3750	15.033	$5\frac{7}{16}$	5.6875	25.406
$3\frac{1}{8}$	3.1250	7.6699	$4\frac{5}{8}$	4.4375	15.466	$5\frac{1}{2}$	5.7500	25.967
$3\frac{3}{8}$	3.1875	7.9798	$4\frac{3}{4}$	4.5000	15.904	$5\frac{1}{2}$	5.8125	26.535
$3\frac{1}{2}$	3.2500	8.2958	$4\frac{7}{8}$	4.5625	16.349	$5\frac{3}{4}$	5.8750	27.109
$3\frac{3}{4}$	3.3125	8.6179	$4\frac{9}{8}$	4.6250	16.800	$5\frac{5}{8}$	5.9375	27.688
$3\frac{5}{8}$	3.3750	8.9462	$4\frac{11}{16}$	4.6875	17.257	6	6.0000	28.274
$3\frac{3}{4}$	3.4375	9.2806	$4\frac{1}{2}$	4.7500	17.728	$6\frac{1}{16}$	6.0525	28.771
$3\frac{7}{8}$	3.5000	9.6211	$4\frac{13}{16}$	4.8125	18.190	$6\frac{1}{4}$	6.1250	29.465

Multiply the area figure by the stroke, using the decimal column for the stroke figure.

For example: D = $3\frac{1}{16}$ in., gives A = 7.3662; Stroke = S = $4\frac{1}{16}$ in. = 4.8750 in.

Multiply 7.3662
by 4.8750

00000
368311
515634
589296
294648

35.91022510

As 4 decimals were used in each figure, the period is placed 4 + 4 = 8 places from the right, making the result 35.9102 cub. in. of piston displacement for each cylinder.

To get piston displacement for the engine, multiply this figure by N, the number of cylinders.

For a 4-cyl. engine, this makes in the example

35.9102 cub. in.
× 4

143.6408 cub. in. for the engine.

If it is desired to know the equivalent in cm.³ (cubic centimeters),

Multiply 143.6408
by 16.387

10054856
11491264
4309224
8618448
1436408

2353.8417896

As there are 4 decimals in the first figure and 3 decimals in the second, the period comes 4 + 3 = 7 places from the right, and the total piston displacement of the engine is 2353.842 cm.³ (cubic centimeters).

\$2,000,000 in Prizes

Are offered for Aeroplane Safety Devices and Aerial Contests. Open to members of the Aerial League of America. Write for information to the secretary, Aerial League of America, 280 Madison Avenue, New York City, New York.

PROTECTION FOR AUTOMOBILES

SIGNA-LITE clearly and automatically signals to the driver of the car behind your intention to STOP or turn to the RIGHT or LEFT. You can forget you must give signals—**SIGNA-LITE** gives them for you at the proper moment!

Some good territory open for live agents.

Please mention The Automobile Trade Directory

Rate of Speed from Elapsed Time and Distance

To find the rate of speed in miles per hour (m.p.h.) from total distance covered and the elapsed time, multiply distance by 60 (minutes) and divide by number of minutes elapsed time.

Example: Distance 105.5 miles; elapsed time 1 h. 53 m. 30 s. or 113 m. 30 s.:

$$60 \text{ times } 105.5 = 6330 \text{ and } \frac{6330}{113.5} = \frac{63,300}{1135} = 55.8 \text{ m.p.h.}$$

Seconds are turned into a decimal fraction of a minute (for convenience in dividing) by dividing their number by 6 and writing the quotient as a decimal, one decimal being ordinarily sufficiently accurate for figuring m.p.h.

For complete accuracy in figuring m.p.h. from distance and elapsed time, multiply distance by 3600 and divide the product by the elapsed time in seconds.

Speed Rules for Measured One Mile or One Kilometer

The preceding general rule for figuring m.p.h. from the distance and the time, in minutes or seconds, is further simplified when the distance in question is the unit—1 mile or 1 kilometer. In either case, divide 3600 by the number of seconds elapsed, to find the rate of speed in m.p.h. or km.p.h., respectively.

General rule: When n $\left\{ \begin{array}{l} \text{miles} \\ \text{kilometers} \end{array} \right\}$ are covered in s seconds, the speed in $\left\{ \begin{array}{l} \text{m.p.h.} \\ \text{km.p.h.} \end{array} \right\}$ is $\frac{3600}{s} \times n$

The following two tables give the speed in m.p.h. (or km.p.h.) for measured mile (or kilometer) made in from 24 seconds to 3 minutes.

Speed in Miles or Kilometers per Hour Corresponding to Any Elapsed Time from 24 Seconds to 59½ Seconds for 1 Measured Mile or Kilometer, Progressing by ½ Second.

Speed Equivalents for 1 Mile and 1 Kilometer

1 mile per hour = 88 ft. per minute.
 = 1.46 ft. per second.
 = 27.8 metres per minute.
 = 0.463 metre per second.
 1 km. per hour = 0.6214 miles per hour.
 = 54.9 ft. per minute.
 = 0.288 metre per second.

Federal Cylinder Gauge With Dial Out in the Open

Detects Tapered, Scored or Out-of- Round Cylinders

The Federal Cylinder Test Gauge fills the long-felt want for an instrument that will indicate with absolute accuracy and with the greatest possible convenience the size and concentricity of any engine cylinder throughout its entire length.

It is made in two models—Model A, a built-up gauge for testing a variety of diameters, and Model B, with centralizing device for measuring cylinders of a standard size.

Where it is necessary to set the gauge accurately to a standard diameter a "Master" can be furnished when specified.

Write for Cylinder Gauge Bulletin No. A3

Please Specify When Requesting Quotations:

1. What is the diameter or range of cylinders to be measured?
2. Do you wish Model A or B?
3. Do you need Master Gauges? What diameter? How many?

Relations between the Speed of a Car and the Number of Revolutions per Minute of the Road Wheels

To find the number of r.p.m. of road wheels, divide the speed in m.p.h. by diameter of wheel in inches and multiply by 336.134.
To find m.p.h. of car, multiply r.p.m. of road wheel by wheel diameter in inches and divide by 336.134.
These rules are derived as follows: 1 m.p.h. equals 88 ft. per minute, or 12 x 88 inches (= 1056 inches) per minute. The circumference of the road wheel, if its diameter in inches is D , is πD and $\pi = 3.1416$. Therefore:

$$\text{Number of r.p.m.} = \frac{\text{Number of m.p.h.} \times \frac{D}{1056}}{\frac{D}{3.1416}} \times 336.134$$

The accompanying table gives the equivalents of m.p.h. in feet per minute, and applies the rules, as given above, to road wheels from 24 to 44 inches and for speeds up to 40 m.p.h.

Miles per Hour	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	22	24	26	28	30	35	40

Wheel diameters include tires. It is commonly believed that with soft-inflated air tires r.p.m. is increased and m.p.h. is reduced, perhaps up to 3 per cent on rough roads. With worn-down solid tires the actual diameter should be measured.

KWIK-AK-SHUN

**—for 100% Bearings
in 75% less time**

Garages, repair shops and automobile plants now have unskilled mechanics turning out 100% bearings in one-quarter of the time it used to take experts to "scrape in" the 45% to 50% bearings.

Kwik-Ak-Shun enables them to successfully apply the lapping process to babbitt, brass, bronze, etc. Positively will not cut steel or iron. Does its work; "breaks down" and is then inoperative—no emery, glass or carborundum to stick and injure any part of the machinery.

Van Sicklen Speedmeters

No. 105 Type.

Ford owners of today want a speed-meter that will serve to improve the appearance of their car and at the same time eliminate the annoyance and aggravation experienced with common types in use.

The Van Sicklen cowl board combinations offer a wide selection with a polished, walnut finished board. The instrument, which is built in the Elgin National Watch Factory, is the same as standard equipment furnished for America's leading cars.

DEALERS:—Write your jobber or to us direct for literature and prices.

Car Speed at 1000 R.P.M.

What is speed in m.p.h. at 1000 r.p.m. of engine with road wheels of different sizes? Assumed: the use of direct gear and a $\frac{1}{2}$ bevel-gear ratio; also a speed reduction of 3 per cent due to tire compression and slip.

Answer: If d is wheel diameter in inches (reduced to feet by dividing by 12), one has (since 88 ft. per minute equals 1 m.p.h.):

$$\text{Number of m.p.h.} = \frac{d \times 1000}{3 \times 12 \times 88} = \frac{d \times 3141.6}{3168} = d - 1\% \text{ (approx.)}$$

The m.p.h. thus equal the wheel diameter in inches minus 4 per cent, with the 3 per cent allowance for tire action, and a $\frac{1}{2}$ gear ratio.

Similarly, for a $\frac{1}{4}$ ratio (old type racing car) the m.p.h. equals $3d - 4$ per cent.

From this, the m.p.h. obtained with any other ratio of total reduction is easily found by reducing $3d$ correspondingly and deducting 4 per cent. A $\frac{1}{4}$ ratio (representing low gear, for example) gives $\frac{1}{2}d - 4$ per cent.

For other engine speeds than 1000 r.p.m., increase or reduce in proportion.

The following table shows the approximate speed in m.p.h. for different wheel diameters and gear ratios, at 1000 r.p.m. of engine.

Speedometer and Odometer Readings.

Odometers serve mainly the following purposes:

- 1—To ascertain the mileage of tires.
- 2—To keep track of monthly and yearly service of a vehicle.
- 3—To furnish a control upon the daily work of drivers.
- 4—To check illegitimate use of a vehicle.
- 5—To ascertain mileage of a day's journey or a tour.

If driven from a front wheel the odometer will record the slippage as well as the mileage of the front wheel.

If driven from a rear wheel, it will record slippage (spinning) as well as mileage of that wheel.

If driven from a transmission shaft, it will record slipping (spinning) of both rear wheels.

It seems to be the consensus of opinion that these sources of error are negligible so far as any of the purposes above mentioned are concerned.

Error due to insufficient inflation of air tires is also negligible, as either the soft tire maintains contact with the ground along the entire circumference of its tread—the circumference being merely ovalized—or else, in the case of a flat tire whose tread buckles under the driving effort, very little distance is covered under the abnormal condition.

Errors due to roughness of road are found to compensate for themselves, the bounding and the indentations of the tread resulting as often in advancement as in retardation.

The only notable error arises in connection with commercial motor vehicles when the wheel diameter is reduced by the wearing down of solid rubber tires.

Reliable data on speedometer and odometer readings have not yet been systematically gathered.

Electric Lights Without Battery

The Nicolite No-Battery System can be used on any make of Truck or Farm Tractor. Any good mechanic can make installation in from four to six hours.

The truck or tractor owner of today demands equipment that will give him twenty-four hour-a-day service when he needs it. The Nicolite No-Battery System is the answer. Heavy duty vehicles shake batteries to pieces. This System gives powerful light without that expense and trouble. Can be used with a battery if needed. Nothing else like it. Fully guaranteed. Lowest initial cost and no up-keep expense. Price is right—investigate.

Made Especially for Heavy Duty Use

The Nicolite System is not just an ordinary motor car system adapted, but is built especially for this heavy duty use. Will stand the abuse the average truck or tractor receives. We can supply installation for practically any job. The work can be done by any good mechanic. Complete information on request.

Nelson J. Quinn Company
Toledo, Ohio

Size No. 1, adjustable from 36" to 40"
Size No. 2, adjustable from 39½" to 43½"
Size No. 3, adjustable from 43½" to 48"

No. 3 fits ninety per cent of all cars. This being the case, dealers are required to favor only No. 2. No. 1 for narrow windshields, No. 3 for extra wide windshields. When ordering, specify open or enclosed car.

National Windshield Visor

Price, All Sizes, \$12.50

National Visors are adjustable to meet the driver's line of vision. It protects windshield from sun-glare, head-light glare, rain, mist, or snow.

Made of special pressed steel, baked black enamel on top, satin green underneath, with two-inch adjustment at each end to allow for the various widths of windshields. Attachments are black enameled and held in place by upper wing nuts on each side of windshield post. An auxiliary clamp fastens these to windshield post at lower end. The quadrants by which the visor is raised or lowered are brass, heavily nickel plated.

Air and Wind Pressure

On this subject reliable data are yet to be formulated and established.

When an object is moved in the atmosphere or a current of air strikes an object, a pressure is produced, but the natural laws governing the force and nature of the pressure are as yet understood only in part.

According to previously accepted ideas, which were applied in practice mainly to figure maximum wind pressure upon buildings and bridges, the pressure in pounds, P , against a squarely apposed plane area, S square feet, at a wind velocity of V miles per hour, was expressed in the formula: $P = 0.0025 SV^2$, various investigators having gradually reduced the numerical factor from 0.005, which was first supposed to be correct, to one-half of this value.

In applying this formula to irregular shapes or to plane surfaces held at an angle smaller than 90 deg. to the direction of movement and air resistance, it has been customary to assume that the effective area S is the horizontal projection of the actual area. For example, it has been supposed that a windshield held at an angle of 60 deg. is equivalent, so far as air resistance is concerned, to one standing vertically and reaching to the same height. Its area would be 0.87 of that of the sloping shield, but the reduction of air resistance is much more than 13 per cent.

The principal flaw, both in the basic formula and in the projected-area theory lies in disregarding body shapes and dimensions and assuming that frontal area alone determines air and wind resistance. If the question is one of wind resistance in a motor car, the direction of the wind is an additional factor that baffles calculation and renders any application of previously accepted theories useless.

More modern views originate from experiments with streamline shapes to determine the best shapes for boats. A square or oblong piece of soap that is dragged through water by a string passing through the soap assumes gradually by the wear due to resistance of the water the shape now characterized as "streamline," which is an oval, more elongated and more pointed at the rear the faster the dragging movement has been. This agreed with the requirement of considerable length for fast boats. In airplane experiments it was similarly found that the adoption of streamline sections for construction parts reduced air resistance and the formation of eddies. Air being much lighter and more elastic than water, and having a mobility of a different character, the streamline shapes for aircraft were not in all respects identical with those for boats, but the main principle found to be fully established in both cases was the same, to the effect that the resistance encountered by moving an object against water or air cannot be determined from the areas opposed to the movement and the speed, but undergoes radical changes if the shapes or dimensions of the object are altered without altering the frontal area. And it has been further established that different speeds call for different shapes if the minimum of resistance for a given frontal area shall be realized.

The Eiffel aerodynamical laboratory of Paris, France, gives the following co-efficients for wind pressures against objects of various shapes:

Against flat circular plate	0.0028
flat square plate	0.0030
sphere	0.000445
round side of hollow hemisphere	0.0081
hollow side of hollow hemisphere	0.00384
apex (60 degrees) of cone	0.0013
apex (30 degrees) of cone	0.00085
apex (20 degrees) of cone	
with hemispherical bottom	0.000406
hemispherical bottom of same	0.000222

The pressure upon a rectangular plate is greater than the pressure upon a square or round plate of same area, probably largely because its circumference is greater.

The power required for overcoming wind pressure is: Power = VP , where V is the velocity and P the pressure or resistance. Inserting the value for P , with K denoting the co-efficient, one has

$$\text{Power} = KSV^3$$

This means that the resistance or pressure must be overcome at the rate at which it is created, and the formula could be quite correct if it were certain that the formula for pressure or resistance ($P = KSV^2$) were reliable. V^3 is in reality found to be too high for low velocities and too low for high velocities. Many find it difficult to perceive that the power should be according to the cube of the velocity. It helps the understanding, however, to note that the pressure of KSV^2 cannot be reached before the power has reached the value of KSV^3 in producing it.

**HOW IT LOOKS
WHEN ADJUSTED**

Please mention The Automobile Trade Directory

According to measurements by the United States Signal Service at Mount Washington, N. H., the wind pressure against a vertical plane with nothing behind it is as follows, in pounds per square foot:

Miles Per Hour	Pressure	Miles Per Hour	Pressure
10	0.4	50	10.0
20	1.6	60	14.4
30	3.6	80	25.6
40	6.4	100	40.0

and upon a cylindrical surface the pressure is one-half of these figures for the same frontal area, but this is subject to variation according to whether there is a cylindrical, a flat or a hollow surface at the back of the cylindrical surface turned against the wind.

Features in which automobile design is affected by the greater or lesser knowledge at disposal with reference to pressures and movements of the atmosphere are as follows:

Shapes of vehicles (front, rear, top, bottom and wheels) producing a minimum of air resistance for fast driving or driving against a high wind.

The position and area of windshields and headlights.

The air channels in radiators.

The regulation of air passage under the hood, especially at the carbureter intakes.

Design and timing of intake and exhaust valves.

The ventilating fan and its position.

The carbureter and manifold channels.

The exhaust pipe and the muffler, where sounds as well as resistances are affected.

Provisions for reducing the dust nuisance through vehicle design causing least atmospheric disturbance and eddies along the road surface.

Provisions for making road grit and dust strike the vehicle body and its occupants in as small a measure as possible.

The design of dynamometers intended to measure power by air resistance against the movement of rotated blades.

At all these points the designer's understanding of the air pressures and movements involved is following far behind actual construction based on experience, or is deliberately subordinated, as being unsafe, to conventional design.

Hill Climbing Formulas

Contests for ascertaining the different capacities of different cars for ascending long and steep hills at a maximum of speed are no longer of interest as a means for determining what power, weight and gear proportions should be incorporated in a motor vehicle or for spreading information among the public with regard to car requirements or car merits. By reason of the increased power and reliability of modern engines, the result of an ordinary hill-climbing contest is now dominated by the proportion between power and weight. Long and steep hills can be ascended by almost any motor vehicle at a rate of speed which is higher than desirable, considering the wear and tear of tires. The importance of certain relations between gear speed ratio and the useful range of engine speed, which was very pronounced in the days of small and uncertain engine power, is much reduced, yet these relations are still decisive for getting the best hill-climbing ability from a given proportion of power and weight.

The influence of gear ratio and useful engine speed has not so far been expressed in a formula, however, while old so-called hill-climbing formulas have been discarded as worthless for practical purposes, their place being taken largely by rules for car performance tests, as formulated or projected by the Society of Automotive Engineers (S. A. E. Bulletin, May, 1917, p. 141 to 155) and similar organizations in foreign countries.

If a car has four gear speeds proportioned as 1, 1.6, 2.6 and 4.2 and the useful engine speed ranges from 1200 to 1800 revolutions per minute, the vehicle speed on one of the gears at 1200 r.p.m. remains a little higher than it can be at 1800 r.p.m. on the next lower gear, which is 1.6 times slower, as $1200 \times 1.6 = 1920$. Such a car can drop to the next lower gear on any hill without losing much speed. If the ratio from gear to gear is 1.5, all the loss will be that due to the time required for acceleration and the lesser efficiency of the lower gear. With a ratio of 1.4, making the progression 1, 1.4, 1.96 and 2.75, these factors would be taken care of, and any hill could be ascended at the top speed possible with the power available.

Supposing the car has only three gearspeeds, 1, 2.4 and 5.76, the intermediate ratio being 2.4, then a grade of the hill rendering a lower gear necessary results in a loss of vehicle speed, as the engine speed can be raised only from 1200 to 1800, in the proportion of 1.5 to 1, while the gearspeed drops as from 2.4 to 1. With such a gear equipment the hill-climbing ability therefore depends on the grades of the hill. In competition with a car of equal power and weight having a 1.6 second gear, it will lose, if the hill is such as to make the 1.6 gear sufficiently powerful, but it will win if the grade is steep enough to compel the use of the 2.6 gear on the other car.

Tungsten Manufacturing Co.
Marshalltown, Iowa

Hill-climbing contests are therefore either a gamble on the suitability of certain gear ratios for certain hills, or else demonstrations of the self-evident fact that the principal requirement is high power per weight unit.

The torque curve of the engine would be a factor of more than minor importance if it were not considered beforehand in determining the "useful range of engine speed".

Hill-climbing tests are now resorted to mainly for determining the properties of one fuel in comparison with those of another fuel, the contesting cars being alike; or one carbureter against another; one kind of tires against another.

Complete Car Performance Tests

Tests relating to all the principal operative properties of a car are recommended by the Research Division of the Society of Automotive Engineers. The complete test includes a series of runs at various specified speeds from the minimum to the maximum speed of the car in order to determine fuel consumption and five series of acceleration runs, starting at various specified speeds from the minimum speed of the car on high gear to about 30 miles per hour. In each run the acceleration period allowed is 50 seconds.

To produce uniform conditions as a basis for comparisons, the recommendations include description and illustrations of the apparatus used, and detailed directions for conducting the runs, weighing the fuel, measuring the acceleration, and computing and recording the results. Forms also are provided for recording the specifications of the car and other pertinent data, for recording the observations and for plotting the results.

For the fuel economy runs, the amount of fuel used is determined by weighing in special tanks, and the distance covered is regulated by using measured courses of prescribing length and character. For the acceleration runs a recording instrument has been designed to produce on a continuous strip of moving paper parallel records of seconds and of distance. The seconds record is obtained from an electric chronometer, and the distance record by an electric spark puncturing the paper once for each one-fifth of a revolution of a front wheel of the car.

The results of the whole test are plotted on one chart in the form of curves as roughly indicated in the sketch herewith.

HANDY GREASE AND OIL INJECTORS

For Every User of Grease and Oil. Garages, Fleet Owners, Car Owners and Truck and Tractor Owners thoroughly indorse the handy Bennett Injectors as time and labor-savers. In each instance, these injectors have proved to be a highly profitable investment, serving indispensably in any kind of weather.

Newly Patented

Universal Grease Can Injector

The indispensable injector pictured above; for "every user of grease." The only pump on the market that pumps grease DIRECT FROM ORIGINAL CONTAINER into automobile, tractor and truck. Fits any kind of grease can or pail, round or square; holding from 5 to 50 lbs. of grease. Measures grease, $\frac{1}{4}$ lb. per stroke. Equipped with 50" of good quality hose. See outfit at right, unattached.

List Price
\$7.00

Universal Grease Can Injector

Barrel Oil Injector

This new Rapid Delivery Barrel Injector illustrated at left, fits on all Steel Barrels or Drums with standard $1\frac{1}{2}$ " or 2" bungs. No adjustments or fussy stop setting. Simply push lever to obtain desired amount of oil. Exactly measures $\frac{1}{4}$ pints, pints and quarts. Equipped with Non-Drip nozzle and padlock. Made entirely from high-grade cast iron and brass. Gives quicker, better service than any "crank pump."

List Price
\$22.00

Handy Barrel Grease Injector

List Price **\$37.00**

This Barrel Grease Injector has been a money maker from the start. Attaches to any barrel, wood or steel, and pumps one-quarter pound of grease per stroke. Is equipped with our special Non-Drip Nozzle. Ball bearing swiveled casters make handling barrel weighing as much as 500 lbs. easy. This barrel injector proves an asset in any lubricating department.

No-Valve Cabinet Grease Injector

Greases Rear Axles and Transmissions easily and quickly. Pumps both heavy engine oil and grease accurately throwing $\frac{1}{4}$ lb. of grease with each plunger stroke. Operates with one hand, leaving other hand free to handle hose. Holds 22 lbs. of grease. Entirely eliminates waste.

List Price
\$9.00

Thermometer Scales—Continued

In order to convert degrees Fahrenheit (F.) into degrees Centigrade (C.), subtract 32, multiply the remainder by 5 and divide by 9. To turn Centigrade into Fahrenheit, multiply the number of deg. C. by 9, divide by 5 and add 32.

The Réaumur scale is still largely used in France. Five degrees C. equal 4 degrees R.

These relations are expressed in the formulas at the foot of the appended scales. They also indicate another mode of converting F. into C.; namely, multiply F. by $\frac{5}{9}$ and deduct 17.78, the latter figure representing $32 \times \frac{5}{9}$ or the number of degrees C. that the F. zero is lower than the C. zero. This mode of figuring has the advantage that it is not necessary to remember, or reason out, whether 32 is to be subtracted first or last. In converting from one scale to another, numerical values are taken as negative below the zero of each scale.

Baume Hydrometer and Specific Gravity Equivalents

For liquids heavier than water (such as electrolytes of storage batteries, electro-plating baths etc.), at 60° F.

$$\text{Specific gravity} = \frac{145}{145 - ^\circ\text{Bé}} \quad \text{and} \quad \text{Baumé} = 145 - \frac{145}{\text{Sp. Gr.}}$$

Baumé	Specific Gravity	Baumé	Specific Gravity	Baumé	Specific Gravity	Baumé	Specific Gravity	Baumé	Specific Gravity
0	1.000	10	1.074	20	1.160	30	1.260	40	1.381
1	1.006	11	1.082	21	1.169	31	1.271	45	1.450
2	1.014	12	1.090	22	1.178	32	1.283	50	1.526
3	1.021	13	1.098	23	1.188	33	1.294	55	1.611
4	1.028	14	1.106	24	1.198	34	1.306	60	1.705
5	1.035	15	1.115	25	1.208	35	1.318	65	1.812
6	1.043	16	1.124	26	1.218	36	1.330	70	1.933
7	1.050	17	1.132	27	1.228	37	1.342		
8	1.058	18	1.141	28	1.239	38	1.355		
9	1.066	19	1.150	29	1.250	39	1.367		

For liquids lighter than water (gasoline and other engine fuels), the Baumé scale is based on the formula:

$$\text{Specific gravity (at 60° F.)} = \frac{140}{130 + \text{Bé}} \quad \text{or} \quad \text{Baumé} = \frac{140}{\text{Sp. Gr.}} - 130$$

The scale is as follows

Baumé	Specific Gravity	Lbs. in Gal.	Baumé	Specific Gravity	Lbs. in Gal.	Baumé	Specific Gravity	Lbs. in Gal.	Baumé	Specific Gravity	Lbs. in Gal.
10	1.0000	8.33	31	0.8695	7.25	52	0.7692	6.42	73	0.6896	5.77
11	0.9929	8.27	32	0.8641	7.21	53	0.7650	6.39	74	0.6863	5.74

Here Are Four FAST SELLING Accessories

Automat-Co. Steward Visible Gas Filter

Keeps all dirt and water out of the vacuum tank—thus ending 90% of all carburetor troubles. Any one can attach filter in a few minutes.

Retails for \$5.50.

Automat-Co. B. & M. Engine Lock

is a real protection against theft. It shuts off the fuel supply. Not another key in ten thousand will operate it. Easy to install.

Retails for \$5.00.

Automat-Co. Transformer for All Cars

Multiplies a thin, weak spark into large, blue white blaze of great igniting power.

Will instantly fire a bad plug gone dead because of cracked porcelain or fouled with carbon and oil. Keeps the points clean and in perfect condition.

Means more power and greater economy because all gas is burned. Price \$1.00.

AUTOMAT-CO GAS- KET VAPORIZER

This vaporizer breaks up the gas as it enters the engine into a very fine mist. This insures instant ignition. Just the thing for cold weather. Can be attached in a few minutes. Sells for \$1.00.

Anti-Freezing Mixtures

The percentage of alcohol, by volume, to give a certain freezing point can be obtained from the table below:

Freezing Point, Degrees Fahrenheit	DENATURED		WOOD	
	Alcohol, per Cent.	Water, per Cent.	Alcohol, per Cent.	Water, per Cent.
+10	28	72	17	83
0	40	60	24	76
-10	52	48	31	69
-20	63	37	38	62

So little water is lost by evaporation that it is only necessary to add alcohol to the system from time to time, to replace that which is used up.

The proportions of glycerine and water may be obtained from the table:

Freezing Point	Glycerine	Water
+28 degrees Fahrenheit	10 per cent.	90 per cent.
+15 degrees Fahrenheit	30 per cent.	70 per cent.
+ 5 degrees Fahrenheit	40 per cent.	50 per cent.
0 degrees Fahrenheit	48 per cent.	52 per cent.
- 5 degrees Fahrenheit	54 per cent.	46 per cent.
-10 degrees Fahrenheit	58 per cent.	42 per cent.

The difficulties in the way of using glycerine and water alone have led to the use of a mixture containing alcohol in addition. The alcohol and glycerine are generally added in equal parts to the water, the amount depending upon the freezing point desired. The percentage of mixture to add may be obtained from the accompanying table:

Freezing Point	Mixture Glycerine and Alcohol	Water
+20 degrees Fahrenheit	15 per cent.	85 per cent.
+15 degrees Fahrenheit	20 per cent.	80 per cent.
+10 degrees Fahrenheit	24 per cent.	76 per cent.
+ 5 degrees Fahrenheit	27 per cent.	73 per cent.
0 degrees Fahrenheit	29 per cent.	71 per cent.
- 5 degrees Fahrenheit	30 per cent.	70 per cent.
-15 degrees Fahrenheit	32 per cent.	68 per cent.

Calcium chloride in water is another solution that has been used with success. When purchasing calcium chloride it is very important to ask for the chemically pure salt as the commercial variety contains free acid which reacts on the metal parts of the cooling system. If it is impossible to obtain the former, the latter may be made fit for use by neutralizing the acid. To do this add ammonia or soda ash gradually to the calcium chloride solution until blue litmus paper no longer turns pink when moistened with the solution. The amount of calcium chloride to use may be found from the table:

Pounds of Calcium Chloride per Gallon	Freezing Point, Degrees Fahrenheit
2	+18.0
3	+ 1.5
4	-17.0
5	-39.0

Measurement of Grades

The base of the triangle represents a line 100 feet long and the sloping lines different road grades. The first grade has a rise of 5 feet and is designated as a 5 per cent grade or a 1 in 20 grade. The distance from which the percentage is figured is not that actually traveled by a car in ascending such a slope but is the length of the base line of the slope. This system of measuring a grade (by the tangent of the angle of inclination and not by its sine) has come from the surveyor's practice of measuring grades on maps that show base lines and altitudes but not the actual length or angle of an incline.

A grade of 100 percent, under this accepted system, corresponds to an angle of 45 degrees, and not to 90 degrees as commonly supposed.

At the upper end of the second sloping line the elevation amounts to 6½ feet from a 100-foot base, and the grade is a 6½ per cent or 1 in 15 grade. Similarly, a 1 in 3 grade is the same as a 33½ per cent grade, a 1 in 2 grade the same as a 50 per cent grade.

Table of Gradients

Slope	Percent Grade	Equal to Angle of	Rise or Fall in One Mile, Feet
1 in 5	20	11° 19'	1056
1 " 6	16.67	9° 26'	880
1 " 7	14.3	8° 09'	755
1 " 8	12.5	7° 08'	660
1 " 9	11.1	6° 17'	586
1 " 10	10	5° 43'	528
1 " 11	9.1	5° 11'	480
1 " 12	8.33	4° 46'	440
1 " 13	7.7	4° 24'	407
1 " 14	7.14	4° 05'	377
1 " 15	6.67	3° 49'	352
1 " 16	6.25	3° 35'	330
1 " 17	5.9	3° 22'	312

Measuring Grades from a Car

Neither the rise nor the length of the base line of a hill can be ascertained without careful surveying, and in automobile practice (such as in reporting road conditions) it is therefore necessary to find the grade by first measuring the angle of inclination, and then looking up the grade corresponding to this angle in a table compiled for this purpose.

A simple instrument for measuring the angle can be made on the plan shown in the illustration, as proposed by M. C. Krarup. Two pieces, *B* and *C*, of the shape shown are cut out of sheet brass about $\frac{1}{8}$ inch thick. A segment is cut out of *C* in order to render visible the triangular pendulum *D* suspended on a pin *E* between the two pieces. The pendulum can be cut from the same material as *B* and *C* and is marked with a line that is perfectly perpendicular when the pendulum hangs freely. A dial is marked along the open arc on *C*. With the dimensions indicated, this dial can show degrees, and fractions of degrees can be estimated. *B* and *C* are spaced apart by a straight-rule *A* about 1" broad projecting $\frac{1}{8}$ inch above their upper edges, its own upper edge affording a sighting line. *A* is of slightly thicker material than the pendulum, so that the latter has room to swing freely. The handle-pieces are not more than 3 inches long and $1\frac{1}{2}$ inch broad, and a pin at their lower end spaces them apart when they are held loosely in the hand. Wood facings secured to these handle-pieces improve the device. On the back of *B* is pasted the Table of Grades and Corresponding Angles of Inclines on the following page.

In operating, one sights over the edge of *A*, bringing it in line with the top of the hill. *D* swings around an angle equal to the angle of inclination, and the mark on *D* points out this angle on the dial. In this position *D* is held by squeezing the handle a little, and the angle can be read with a turn of the hand. The grade corresponding to this angle can be read from the table pasted on the other side of the device with another turn of the hand.

As the instrument held in the hand is about five feet above the ground at the foot of the hill, the angle, as read, is a little too small. To correct this, one sights again from the top of the hill to the foot, which gives an angle a little too large. The mean of the two angles is the correct one. Also, one reading checks the other.

Types and Dimensions for Pneumatic Tires and Rims

(1918 Standards S. A. E.)

The Tire and Rim Division of the S. A. E., the Tire and Rim Association and the National Automobile Chamber of Commerce have formulated and agreed upon a program for simplifying the variety in dimensions and types of pneumatic tires and rims, as follows:

CLASS A.—Approved standard.

NOMINAL TIRE AND RIM SIZES		OVERSIZE TIRE		TIRE-SEAT DIA. (RIM)		Type of Rim
Inches	Mm.	Inches	Mm.	Inches	Mm.	
30×3½	90/585	31×4	105/585	23	585	Clincher
32×3½	90/635	33×4	105/635	25	635	Straight Side
33×4	105/635	34×4½	120/635	25	635	Straight Side
34×4½	120/635	35×5	135/635	25	635	Straight Side
36×6	150/610	38×7	175/610	24	610	Straight Side
38×7	175/610	40×8	200/610	24	610	Straight Side
40×8	200/610			24	610	Straight Side

CLASS B.—List of sizes, production to be discontinued November, 1920.

Clincher	Q. D. Clincher
30×3 Plain and Non-Skid	35×5 Non-skid
Straight Side	
32×4 Plain and Non-skid 34×4 Plain and Non-skid 32×4½ Plain and Non-skid 33×4½ Non-skid	35×4½ Plain and Non-skid 33×5 Non-skid 37×5 Non-skid

CLASS C.—List of sizes, production to be discontinued November, 1919.

Clincher	Straight Side	Q. D. Clincher (Non-Skid)
None	33×4½ Plain 36×4½ Non-skid	35×4½ 37×5

Makes an End of Ignition Troubles

The present-day low grade gasoline, which causes so much trouble for the average ignition system, has an abundance of real power 'way down in its sluggish depths.

And it was left for Philbrin to get at and utilize this latent source of energy. The invention of the Philbrin contact maker and condenser has resulted in a new conception of ignition efficiency. The Philbrin spark is intensified, big-bodied, rendering—greatly increasing the horsepower and flexibility of a gasoline motor. Fuel mileage is increased. By the use of the High Frequency System (a feature of Philbrin Duplex Ignition) all starting difficulties are overcome and plug fouling is prevented.

You can install Philbrin Ignition in place of any system you are now using.

32×3½	33×4	32×4½	33×4½	34×4½	36×4½
-------	------	-------	-------	-------	-------

CLASS E.—The production of all sizes and types of tires not mentioned in any of the preceding four classes shall be discontinued at once.

INCH NOMENCLATURE

In inch nomenclature, nominal tire diameter = tire-seat diameter + twice tire cross-section diameter. Sizes are designated by giving outside diameter of tire and tire-section diameter, as (30×3½).

METRIC NOMENCLATURE

In metric nomenclature, the nominal diameter = tire-seat diameter. Sizes are designated by giving tire cross-section diameter and tire-seat diameter. When spoken, the size is referred to as "90 for 585"; but is branded as 90/585.

DETACHABLE AND PLAIN CLINCHER RIMS

Valve holes in wood felloe for detachable and plain clincher rims to be same diameter as valve hole in steel rim.

VALVE-HOLE SIZE, AUTOMOBILE RIMS

The valve hole in automobile rims for standard tire sizes shall be ⅝ in. diameter up to 4½ in. rims, inclusive. Valve-hole sizes for 6, 7 and 8-in. rims are not standardized.

FIT-ALL—The shim that can be cut to fit.

LAMINUM

Tire Loads and Inflation Pressures

RECOMMENDED BY DIFFERENT TIRE MANUFACTURERS

Several tire manufacturers refrain from giving directions. Others recommend the S. A. E. schedule. Varying recommendations are given in the following, slightly abbreviated:

Continental Rubber Works: Twenty pounds pressure per inch of tire cross-section. No load rule.

Quaker: Same.

National Rubber Co.: Same inflation (20 pounds per inch). Load rule for car "without passengers":

Cross section.....	3	3½	4	4½	5		
Diameter	28 to 30	30 to 34	31 to 36	34 to 36	35 to 37		
Wheel load.....	350	450 to 600	600 to 750	900 to 950	1000 to 1100		

Portage Rubber Co.: Same inflation (20 pounds per inch). Load rule, for "gross weights." Distinguishes between front and rear tires:

Cross section.....	3	3½	4	4½	5		
Diameter	28 to 32	30 to 36	30 to 40	32 to 42	35 to 38		
Rear wheel load.....	350 to 375	450 to 600	625 to 850	750 to 1200	1000 to 1200		
Front wheel load.....	425 to 450	550 to 700	750 to 1000	950 to 1450	1250 to 1450		

Hood: Inflation about 18 pounds per inch. Recommends rear tires stronger than front tires. Scale as follows:

Cross section.....	3	3½	4	4½	5	5½	
Diameter	28 to 34	30 to 34	31 to 37	32 to 37	35 to 37	37 to 38	
Inflation.....	55	65	70	80	90	100	
Wheel load.....	300 to 400	400 to 475	675 to 825	850 to 975	1050 to 1100	1275 to 1300	

Mason: Loads are per "gross weights." Odd sizes intended as oversize tires for smaller rims have relatively reduced loads.

Cross section.....	3	3½	4	4½	5	5½	6
Diameter	28 to 32	29 to 34	30 to 37	32 to 41	34 to 43	36 to 38	39
Inflation.....	60	70	80	90	90	100	100
Rear wheel load.....	350 to 375	400 to 600	600 to 750	725 to 1125	1000 to 1450	1200 to 1400	1600
Front wheel load.....	425 to 450	475 to 700	730 to 900	875 to 1375	1250 to 1700	1500 to 1600	1750

Century-Plainfield tires follow practically the same schedule.

Acme: Loads are for "gross weights." Inflation uniformly 20 pounds per inch.

Cross section.....	3	3½	4	4½	5	5½	
Diameter	28 to 32	28 to 36	30 to 36	32 to 38	35 to 43	36 to 38	
Inflation.....	60	70	80	90	100	110	
Rear wheel load.....	350 to 375	425 to 600	625 to 750	750 to 1050	1000 to 1450	1300 to 1600	
Front wheel load.....	425 to 450	500 to 700	750 to 900	950 to 1300	1250 to 1650	1550 to 1650	

(Continued on following page)

Does The Work of Ten Tools

This device will outlast any valve seat facer on the market, is instantly adjustable to any size valve, and will save you about 66% on the cost of the tools required at present to accomplish the same work. It is the only adjustable and interchangeable valve seat facer manufactured. The jaws are made of Tool Steel, properly hardened, and are as strong and accurate as a solid facer. This tool takes the place of TEN separate facing tools now necessary. The pilot stems are interchangeable and will fit any size valve stem accurately.

The ten separate tools will cost you \$36.00. The price of our Facer is \$12.00, and it will do more and better work than the expensive set, and besides is adjustable to all "off" sizes.

TABLES AND DATA

Fisk Rubber Co. gives a scale which in practice varies little from the proposed S. A. E Standard, with inflation pressures close to 15 pounds per inch of cross-section, as follows:

Tire Sizes	Maximum weight per wheel with load (including passengers) for sizes specified (Weight includes 150 lbs. for each passenger and 100 lbs. for extra equipment.)														
	300	400	500	600	700	800	900	1000	1200	1400	1600	1800	2000	2200	
3 × 28-34	60	65													
3½× 30-32 34-36		60	65 65	70 70	75										
4 × 32-36 38-42				65	70 65	75 70	80 75	80							
4½× 34-36 38-42							70	75 70	80 75	85 80	85				
5 × 36 38-40									75	80 75	85 80	85			
5½× 38-40				Air	Pressures							80	90		
6 × 40													85	95	

Miller Rubber Co. presents a sliding scale of loads and inflation pressures for each tire size, as follows:

Size	Weight Carried	Air Pressure
28 × 3	250 lbs.— 400 lbs.	35 lbs.— 50 lbs.
30 × 3	300 " — 500 "	35 " — 55 "
30 × 3½	400 " — 650 "	45 " — 65 "
31 × 3½	300 " — 650 "	40 " — 65 "
32 × 3½	500 " — 700 "	50 " — 65 "
31 × 4	500 " — 800 "	45 " — 65 "
32 × 4	600 " — 850 "	50 " — 70 "
33 × 4	650 " — 850 "	55 " — 75 "
34 × 4	700 " — 950 "	55 " — 80 "
36 × 4	700 " — 950 "	55 " — 80 "
34 × 4½	800 " — 1000 "	50 " — 80 "
35 × 4½	800 " — 1000 "	50 " — 80 "
36 × 4½	900 " — 1200 "	55 " — 85 "
37 × 4½	900 " — 1300 "	60 " — 85 "
35 × 5	900 " — 1350 "	60 " — 90 "
36 × 5	1000 " — 1450 "	65 " — 90 "
37 × 5	1050 " — 1600 "	65 " — 90 "
38 × 5½	1100 " — 1900 "	65 " — 100 "

Michelin prescribes finding front and rear axle loads with all seats occupied and gasoline and water tanks filled. Apart from oversize tires, the following scale is then recommended (ignoring diameters):

Axle Loads, Lbs.	Tire Sizes	Inflation Pressure, Lbs.
600 to 800	3	45
800 to 1000	3	50
600 to 1000	3½	50
1000 to 1400	3½	60
1400 to 1800	3½	70
1200 to 1600	4	50
1600 to 2000	4	60
2000 to 2400	4	70
1600 to 2000	4½	55
2000 to 2400	4½	65
2400 to 2800	4½	75
2200 to 2600	5	55
2600 to 3000	5	65
3000 to 3400	5	75

ALSO MANUFACTURERS OF BALL JOINTS

Republic Rubber Co. presents another elaborate scale as follows:

Inflation Pressure	Weights per wheel that may be carried under each tire section diameter						
	3"	3½"	4"	4½"	5"	5½"	6"
30	240						
35	280	350					
40	325	400	485				
45	365	450	545	660			
50	405	505	610	735	860		1125
55	450	555	675	810	945	1085	1240
60	490	605	735	885	1035	1185	1355
65		660	800	960	1120	1285	1465
70		710	860	1035	1210	1385	1580
75			925	1110	1295	1485	1700
80			985	1185	1385	1585	1910
85				1260	1470	1685	1925
90				1335	1555	1785	2035
95					1645	1885	2150
100						1985	2265

and adds the following directions:

"Pressure varies according to amount of load carried. Weigh separately front and rear of fully loaded car, and divide each weight by two, this will give the weight on each wheel. The tire should be inflated to the pressure given in the extreme left hand column that most nearly corresponds to the load weight under sectional diameter of tire used.

"Heavy-faced type in each column shows the ideal load for rear wheels. A heavier load, as figures under each sectional diameter indicate, may be carried, but owing to the added air pressure necessary to get good tire mileage, it is not desirable. Loads should not exceed the maximum figures at the bottom of each column."

Goodyear Tire & Rubber Co. presents a scale identical with the preceding one, excepting that the prescribed loads are 10 to 15 pounds higher, and that 10 per cent lower inflation pressures are recommended for cord tires.

For *United States* tires a uniform scale of 20 pounds of inflation pressure per inch of tire section is recommended (including 120 pounds pressure for 6-inch tires) in conjunction with a load scale, about which it is said: "The following is a list of the weights which tires of the different sizes are designed to carry, sufficient allowance being made for the usual number of passengers (cars to be weighed without passengers or luggage)":

Tire Dimensions	Rear Weight per Wheel, Lbs.	Front Weight per Wheel, Lbs.	Tire Dimensions	Rear Weight per Wheel, Lbs.	Front Weight per Wheel, Lbs.	Tire Dimensions	Rear Weight per Wheel, Lbs.	Front Weight per Wheel, Lbs.
28 × 3	350	425	34 × 4	700	875	34 × 5	950	1200

For *Kelly-Springfield* tires the following list is given, the weights to be understood as "gross weights per wheel (car empty)":

Size	Inflation Pressure, Lbs.	Rear Weight, Lbs.	Front Weight, Lbs.	Size	Inflation Pressure, Lbs.	Rear Weight, Lbs.	Front Weight, Lbs.
28 × 3	60	350	450	32 × 4½	85	800	975
30 × 3	60	375	475	33 × 4½	85	850	1050
32 × 3	60	375	475	34 × 4½	85	900	1125
				35 × 4½	85	950	1150
30 × 3½	65	475	575	36 × 4½	85	1000	1225
31 × 3½	65	500	600	37 × 4½	85	1050	1250
32 × 3½	65	525	625	38 × 4½	85	1100	1300
33 × 3½	65	550	650	40 × 4½	85	1125	1375
34 × 3½	65	575	675	42 × 4½	85	1250	1450
36 × 3½	65	600	700				
30 × 4	75	550	700	34 × 5	90	1000	1250
31 × 4	75	575	725	35 × 5	90	1050	1300
32 × 4	75	600	750	36 × 5	90	1100	1350
33 × 4	75	625	775	37 × 5	90	1150	1400
34 × 4	75	650	800	39 × 5	90	1250	1500
35 × 4	75	675	825				
36 × 4	75	700	850	36 × 5½	100	1275	1500
37 × 4	75	725	875	37 × 5½	100	1300	1550
40 × 4	75	800	950	38 × 5½	100	1350	1600
				39 × 6	100	1600	1750

In addition, millimeter sizes and interchangeable sizes are listed.

For *Goodrich* tires no scale of inflation pressures or maximum loads is offered. The use of an instrument called the Goodrich Tire Caliper-Gauge is recommended as more satisfactory, in the following words:

"A tire must be inflated for the load which it actually carries; an arbitrary inflation schedule of 18 or 20 pounds pressure per cross sectional inch is fallacious. Obviously it is foolish to use the same pressure for a four-inch tire carrying 400 lbs. weight on a roadster as that in a four-inch tire carrying 750 lbs. weight on a touring car.

"The Goodrich Tire Caliper-Gauge measures the flattening or deflection of the tire at the point where it touches the ground. If the deflection is so great that the tire will be injured when running, the Caliper-Gauge indicates that fact exactly. It is the only scientific way of procuring inflation for the load which the tire actually carries."

The *Firestone* Tire and Rubber Co. recommends for front wheels 15 to 18 pounds of inflation per inch of tire section and for rear wheels 15 to 20 pounds. The loads ("per wheel, car empty") are given in the following scale with the reminder: "These weights are influenced by extra passengers, luggage, power and speed of the car and the construction as before mentioned, therefore in some instances it will be necessary to equip with larger tires. Refer to *Oversize Tires*."

Size	Rear, Lbs.	Front, Lbs.	Size	Rear, Lbs.	Front, Lbs.	Size	Rear, Lbs.	Front, Lbs.

DE LUXE LINES ARE SUPERIOR

They Are Auto Necessities— Not Accessories

DeLuxe Sun and Rain Shields—all metal or glass, as desired. They beautify the car as well as giving driving comfort and safety. They are substantially built. They will not rattle. They are made for all cars—open or closed.

DeLuxe Rear Sight Mirrors are made of heavy plate—adjustable fittings—moisture proof backing—they will not blister.

DeLuxe Foot Throttles are of polished aluminum. They are adjustable to any position. They maintain a steady pressure on the gas accelerator. They cut down gas bills. A wonderful comfort on long drives.

Dealers—Handling the DeLuxe Lines is profitable business. Your customers will demand Sun and Rain Shields. Write us for prices.

DUNLOP

“MOORE” TRANSMISSION FOR FORDS

Four forward and two reverse speeds

The “MOORE” transmission is a compact set of gears of different ratio than Ford gears, to be installed on the Ford car

or truck as permanent equipment without altering the original design or control, and which provide two additional forward speeds and one reverse.

The underdrive type doubles the power of the Ford and enables it to travel rough or muddy roads or hills. The overdrive type increases the existing road speed on good roads or for fast city delivery service.

The Number One standard model is designed for all Ford cars and may be obtained in either type. The underdrive is especially desirable for use on closed Ford cars.

The Number Five truck model is a heavy duty commercial type, designed for the Ford one-ton worm drive truck, and may be secured in either type. The overdrive type of this model increases the road speed of the truck forty per cent on good roads.

Standardized Dimensions for Solid Tires

(S. A. E. Standard, according to 1918 Revision, but a number of changes were recommended in 1919 including 32 in. diameter and specifying tire widths.)

The standard nominal solid tire diameters are 34, 36 and 40 in.

Diameters and Wheel Circumferences

NOMINAL OUTER DIAMETER OF TIRES		ACTUAL DIAMETER OVER STEEL BAND		ACTUAL CIRCUMFERENCE OVER STEEL BAND	
in.	mm	in.	mm	in.	mm
34	860	28	711.2	87 $\frac{3}{4}$	2234.3
36	910	30	762.0	94 $\frac{1}{4}$	2393.9
40	1010	34	863.6	106 $\frac{1}{4}$	2713.1

The tolerances are shown separately on page 913.

Solid Tire Widths

The nominal width of solid tires in inches is measured inside the channel (see accompanying sketch), the tolerances being plus or minus $\frac{1}{16}$ in.

Bolt Equipment for Side Flanges

All bolts to be $\frac{1}{2}$ in. (12.7 mm) diameter.

Nominal Outside Tire Diameter, In.	DIAMETER BOLT HOLE CIRCLE		Number of Bolts
	in.	mm	
34	26 $\frac{1}{4}$	673.1	8, 12, or 24
36	28 $\frac{1}{4}$	723.9	8, 12, or 24
40	32 $\frac{1}{4}$	825.5	10, 15, or 30

Edges of Felloe Band

Bands to be rounded on two outside edges with radius not to exceed $\frac{1}{16}$ in. (1.59 mm) and on both inside edges with a radius of $\frac{1}{16}$ in. (4.76 mm).

(A change in this S. A. E. Practice of 1918 was recommended in 1919, providing $\frac{1}{32}$ in. radius for all four edges, because steel mills will not roll shape first adopted).

In measuring circumference of band, if there is not an allowance on the tapeline itself, a correction amounting to three times the thickness of the tapeline should be made.

NATION TIRE SPREADER

Patented and Patents Pending

SELLS ON SIGHT

A tire spreader that spreads them all. Works from the outside of the casing, leaving the body of the casing in its natural shape. Spreads the casing so that the workman can scrape, cement, place boots or interliners and inspect without removing or changing the tool. Two sizes, adjustable; one spreads all sizes Fabrics; the other spreads all sizes

Cords. Spreads them quicker, spreads them easier, spreads them wider.

Shipping weight 32 ounces; price, \$1.50. Set of three, \$4.50. Mailed postpaid upon receipt of price. We would appreciate the name of your jobber when ordering.

THE NATION CO.

332 West 16th St.

Width and Depth of Piston Ring Grooves

A formula developed from approved practice with iron or steel cylinders and pistons has

$$G = \sqrt{\frac{0.01 D^3}{8}} + 0.005$$

in which G is the depth of the piston ring groove and D the nominal diameter of the piston in inches. It is applicable for diameters from 1 to 7 inches and for concentric as well as eccentric rings. The width of rings and grooves can be standardized in five dimensions, as given in the appended table. As diameter H of groove bottom plus $2G$ equals actual piston diameter, piston clearance = $\frac{D - (2G + H)}{2}$

Diameter (D)	Depth (G)	Max'm Diameter H of Groove Bottom (Minus Tolerance 0.005)	Minimum Groove Width (Plus Tolerance 0.001)	Maximum Ring Width (Minus Tolerance 0.001)

2 $\frac{1}{4}$ to 2 $\frac{3}{8}$	$\frac{3}{8}$	$\frac{1}{8}$	4 $\frac{1}{8}$ to 4 $\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{8}$

Table for Total Keyway Depth

This table will be found very useful in feeding the milling cutter down into a shaft. Having the size of the shaft to be keywayed, look down the column marked "Size of Shaft" until you come to the number representing that size; then follow this line to the right until you reach the column representing the size keyway, and the decimal there represented is the distance "A," which added to the depth of the keyway will give the total depth from the point where the cutter first begins to cut.

Size of Shaft, Inches	WIDTH OF KEYWAY IN INCHES				
	$\frac{1}{4}$	$\frac{3}{8}$	$\frac{1}{2}$	$\frac{3}{4}$	$\frac{1}{2}$

MONOGRAMS for AUTOMOBILES

Dr. A. M.

GRACE

J. W. L.

G. W. C.

R. S. E.

Automobile owners like monograms on their cars; they give a distinctive appearance of character and individuality, afford protection against theft and make the marked car easily recognized among others of the same make.

Our Transfer Monograms last as long as the finish of the car. They are perfect and original in design, come in red, gold, white, blue and combinations of these colors and anyone following instructions may apply them.

Body works and paint shops all over the country use them profitably in preference to the hand-painted monograms because they are beautiful enough to create comment and inquiries wherever they are seen.

Write for our catalog showing designs in full colors and giving instructions as to use.

Brakes and Clutches

Designs for brakes and clutches for motor vehicles have been developed empirically, and the development of brakes continues to be carried on without close reference to the mathematical formulas for retardation of a moving mass. The maintenance of constant conditions in the braking organs, especially a constant co-efficient of friction, and the suitable disposal of the heat generated by braking efforts, especially on long declivities, constitute the points on which difficulties are still mostly experienced. In European motor trucks, friction brakes are usually designed with metal to metal contact, this giving harsh action but improved (though not yet sufficient) heat convection. In American-built vehicles, the friction surfaces are usually metal and fabric, and the properties of the latter under all actual conditions of vehicle operation are the most important factor, assuming that conventional types and dimensions are employed.

Conclusive data on brake and clutch facings have not as yet been compiled or received the sanction of authorities.

Formulas for Cone Clutches (C. A. Schaefer)

H.P. = horse-power transmitted.

N = revolutions of crank-shaft per minute.

r = mean radius of friction cone, in inches.

r_1 = large radius of friction cone, in inches.

r_2 = small radius of friction cone, in inches.

R_1 = outside radius of leather band, in inches.

R_2 = inside radius of leather band, in inches.

v = velocity of a point at distance r from the center, in feet per minute.

F = tangential force acting at radius r , in pounds.

P_n = total normal pressure between cone surfaces, in pounds.

P_s = spring pressure, in pounds.

α = angle of clutch surface with axis of shaft = 7 to 13 degrees.

β = included angle of clutch leather, when developed, in degrees.

f = coefficient of friction = 0.20 to 0.25 for greasy leather on iron.

p = allowable pressure per square inch of leather band = 1 to 8 pounds.

W = width of clutch leather, in inches.

$$R_1 = \frac{r_1}{\sin \alpha} \quad \text{H.P.} = \frac{P_n f r N}{63025}$$

$$R_2 = \frac{r_2}{\sin \alpha} \quad \text{Engagement with some slip:}$$

$$\beta = \sin \alpha \times 360 \quad P_n = \frac{P_s}{\sin \alpha}$$

$$r = \frac{r_1 \times r_2}{2} \quad P_s = \frac{\text{H.P.} \times 63025 \sin \alpha}{f r N}$$

$$v = \frac{2\pi r N}{12} \quad \text{Engagement without slip:}$$

$$F = \frac{\text{H.P.} \times 33000}{v} \quad P_n = \frac{P_s}{\sin \alpha + f \cos \alpha}$$

$$W = \frac{P_n}{2\pi r p}$$

$$P_s = \frac{\text{H.P.} \times 63025 (\sin \alpha + f \cos \alpha)}{f r N}$$

Please mention The Automobile Trade Directory

Multiple Disc Clutches

While multiple disk clutches are designed and dimensioned mainly under the guidance of experience, acceleration formulas are used for checking the designs in each case.

A formula for clutch capacity which is employed for this purpose is the following:

$$Hp. = \frac{PfSRN}{63.025}$$

in which P is spring pressure, f co-efficient of friction, S number of friction surfaces, R mean radius of friction ring in inches and N maximum revolutions per minute of crank-shaft.

It is found that this formula agrees well with experience if the value for f is taken as 12 to 15 per cent for asbestos woven clutch facings.

The torque which can be applied through a multiple disk clutch with V-grooves in the disks is determined by the formula:

$$T \text{ (in pounds-inches)} = rPf(N-1)C$$

in which r is the radius in inches of the V-groove, P the spring pressure, f equals 0.1 co-efficient of friction, N is the total number of disks and C a constant, which is 3.5 for automobile clutches and 2.5 for aeroplane clutches. The former have V-grooves of a 35-deg. angle, the latter of 45-deg. angle.

Widths of Silent Chains

According to recommended practice, the standard width of a silent chain is the width over all tension members and the maximum width of chain over rivet heads is this nominal width plus six-tenths the pitch. The table shows the extreme widths for the various pitches. Width of sprocket for the same nominal width of chain will vary according to the method of guiding the chain.

Chain Width No.	(N) Width Over Tension Members	EXTREME WIDTH OF CHAIN (N+0.6P)							
		3/8-In. Pitch	1/2-In. Pitch	5/8-In. Pitch	3/4-In. Pitch	1-In. Pitch	1 1/4-In. Pitch	1 1/2-In. Pitch	2-In. Pitch

THE STANDARD PARTS COMPANY
CLEVELAND, OHIO

Length of Sprocket Chains

D = Distance between centers.

A = Distance between limits of contact.

R = Pitch radius of large sprocket.

r = Pitch radius of small sprocket.

N = Number of teeth on large sprocket.

n = Number of teeth on small sprocket.

P = Pitch of chain and sprockets. (Distance from center to center of chain pins.)

$180^\circ + 2a$ = Angle of contact—large sprocket.

$180^\circ - 2a$ = Angle of contact—small sprocket.

$$\sin a = \frac{R - r}{D}$$

$$A = D \cos a$$

Length of chain = L

$$(1) \quad L = \frac{(90 + a) NP}{180} + \frac{(90 - a) nP}{180} + 2A$$

With only R , r and D known, the length of a sprocket chain can be figured with sufficient accuracy (very slightly short) from the formula.

$$(2) \quad L = (R + r) \pi + 2 \sqrt{D^2 - (R - r)^2} + \frac{2 (R - r)^2}{D}$$

which is simple when figures are inserted.

For example, with $R = 6$, $r = 2$ and $D = 20$,

$$L = 8 \times 3.1416 + 2 \sqrt{400 - 16} + \frac{32}{20} = 25.133 + 2 \times 19.60 + 1.60 = 65.93.$$

The figure obtained is rounded upward to allow for slack and to correspond to a multiple of chain pitch.

1-A—First radical improvement in piston rings in fifteen years.

2-A—Made of STEEL. Steel against cast iron makes the ideal bearing.

3-A—Has a Spring Insert, which maintains even pressure all around, keeps the cylinder sealed against loss of compression and makes oil trouble impossible, the Spring Insert automatically taking up the wear of cylinder and piston groove. One 3-A Ring outlasts six ordinary rings.

GUARANTEED — Absolute satisfaction or your money back.

Steel Spring Piston Ring Co.

147 Metropolitan Avenue, Brooklyn, N. Y.

STANDARD RIMS

30 Seconds Complete Change

What the Standard Rim Does

It Saves time and patience.

It Saves soiling your clothes.

It Saves using tire irons and tools.

It Saves all troubles in changing tires.

Therefore every man or woman who drives a car will want to have it equipped with these Rims.

We put the Rim in the Tire instead of the Tire on the Rim, doing away with the stretching and forcing the Tire over the Rim; this is in itself a big saving of Tires.

If your jobber is unable to supply you write direct to us.

Patented in the United States and Canada.

Pulley width, B.....	0.870 to 0.880	1.120 to 1.130	1.370 to 1.380	1.680 to 1.690

All dimensions in inches.

Non-Ferrous Metal Tubing Tolerances

Tubing can be furnished in copper, and the commercial alloys of copper and zinc, such as high brass, bronze, phosphor bronze, and tobin bronze.

Composition.—As specified to meet the requirements of use.

Temper.—As specified in the order; may be hard, half hard or annealed. If annealed, the tubing may be soft, or light annealed.

Size variation.—On inside and outside diameter and the thickness of the walls, as follows:

Outside and Inside Dimensions

Up to $\frac{1}{2}$ in. inclusive.....	0.002 in. over or under
Over $\frac{1}{2}$ in. to and including $\frac{3}{4}$ in.....	0.0025 in. over or under
Over $\frac{3}{4}$ in. to and including 1 in.....	0.003 in. over or under
Over 1 in. to and including $1\frac{1}{4}$ in.....	0.0035 in. over or under
Over $1\frac{1}{4}$ in. to and including $1\frac{1}{2}$ in.....	0.004 in. over or under
Over $1\frac{1}{2}$ in. to and including $1\frac{3}{4}$ in.....	0.0045 in. over or under
Over $1\frac{3}{4}$ in. to and including 2 in.....	0.005 in. over or under
Over 2 in.	$\frac{1}{4}$ of 1 per cent. over or under

No combination of variations on the same tube shall make the thickness of the wall vary from the nominal by more than the following amounts:

Thickness of Wall

Up to and including $\frac{1}{64}$ in.....	0.001 in. over or under
Over $\frac{1}{64}$ in. to and including $\frac{1}{32}$ in.....	0.002 in. over or under
Over $\frac{1}{32}$ in. to and including $\frac{1}{16}$ in.....	0.003 in. over or under
Over $\frac{1}{16}$ in. to and including $\frac{1}{8}$ in.....	0.005 in. over or under
Over $\frac{1}{8}$ in. to and including $\frac{1}{4}$ in.....	0.008 in. over or under
Over $\frac{1}{4}$ in. to and including $\frac{5}{16}$ in.....	0.0125 in. over or under
Over $\frac{5}{16}$ in. to and including $\frac{3}{8}$ in.....	0.015 in. over or under

Special limits.—On all stock where the above commercial variations are not permissible limits shall be specified in the order.

Sizes to the left of the left-hand zigzag line are difficult to straighten except with special equipment and are considered too flimsy for automobile propeller-shafts. Sizes to the right of the right-hand zigzag line are more than half as heavy as solid shafts of the same outside diameters.

Steel Bands and Strips

Steel bands, band edged flats and hoops or strips are rolled in the following widths and gages (all measurements in inches):

	Width $\frac{1}{8}$ $\frac{3}{16}$	Thickness	
		No. 4	No. 18
$\frac{1}{8}$ increasing by $\frac{1}{16}$ ths to		$\frac{1}{8}$ = .238	$\frac{1}{8}$ = .049
$1\frac{1}{8}$ " " " "	1	$\frac{1}{4}$ = .238	$\frac{1}{4}$ = .042
$2\frac{1}{8}$ " " " "	2	$\frac{1}{2}$ = .238	$\frac{1}{2}$ = .025
$3\frac{1}{8}$ " " " "	3	$\frac{3}{4}$ = .238	$\frac{3}{4}$ = .028
$4\frac{1}{8}$ " " " "	4	1 = .300	1 = .032
$4\frac{1}{4}$ " " " "	4	1 = .300	1 = .035
$4\frac{1}{2}$ " " " "	4	1 = .300	1 = .042
$4\frac{3}{4}$ " " " "	4	00 = .380	00 = .049
$4\frac{7}{8}$ " " " "	4	00 = .380	00 = .058
$5\frac{1}{8}$ " " " "	5	00 = .380	00 = .065
$5\frac{1}{4}$ " " " "	5	1 = .300	1 = .083
$5\frac{1}{2}$ " " " "	6	1 = .300	1 = .083
$5\frac{3}{4}$ " " " "	6	1 = .300	1 = .083
$5\frac{7}{8}$ " " " "	6	1 = .300	1 = .083
$6\frac{1}{8}$ " " " "	7	1 = .300	1 = .083
$6\frac{1}{4}$ " " " "	7	1 = .300	1 = .083
$6\frac{1}{2}$ " " " "	7	1 = .300	1 = .083
$6\frac{3}{4}$ " " " "	7	1 = .300	1 = .083
$6\frac{7}{8}$ " " " "	7	1 = .300	1 = .083
$7\frac{1}{8}$ " " " "	8	1 = .300	1 = .083
$7\frac{1}{4}$ " " " "	8	1 = .300	1 = .083
$7\frac{1}{2}$ " " " "	8	1 = .300	1 = .083
$7\frac{3}{4}$ " " " "	8	1 = .300	1 = .083
$7\frac{7}{8}$ " " " "	8	1 = .300	1 = .083
$8\frac{1}{8}$ " " " "	9	1 = .300	1 = .109

While the above sizes are generally considered standard, the majority of the mills roll strips as wide as 20 inches in the heavier gages.

DECIMAL SPECIFICATIONS PREFERRED

The gage used by the manufacturers of bands, hoops and strips is the Birmingham Wire Gage but it is recommended by the S. A. E. when writing specifications for bands, hoops and strips that the thickness desired be expressed in thousandths of an inch.

MERCHANT'S ANTI-SKID

Chain Tighteners

A simple device which fills a long-felt want and is a necessity to all motorists who use chains.

It prevents loss of chains and unnecessary wear and breakage of cross chains.

It stops rattling and banging of fenders by taking up the slack when the chains wear and stretch.

Most important of all, by a scientific equalization of tension from the five points of connection it allows the chain to creep, thus obviating any injury to the tire, at the same time doing its work perfectly.

Actual use has proven these facts.

Made in sizes to fit all cars or trucks.

Retail Price—\$1.00

Write us to-day for full particulars and our prices to the trade.

Sizes of Numbers of the United States Standard Gauge for Sheet and Plate Iron and Steel

AN ACT ESTABLISHING A STANDARD GAUGE FOR SHEET AND PLATE IRON AND STEEL

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled: That for the purpose of securing uniformity the following is established as the only gauge for sheet and plate iron and steel in the United States of America, namely:

NUMBER OF GAUGE	Approximate Thickness in Fractions of an Inch	Approximate Thickness in Decimal Parts of an Inch	Weight per Square Foot in Ounces Avoirdupois	Weight per Square Foot in Pounds Avoirdupois
0000000	$\frac{1}{2}$	.5	320	20.00
000000	$\frac{15}{32}$	.46875	300	18.75
00000	$\frac{7}{16}$	.4375	280	17.50
0000	$\frac{13}{32}$	.40625	260	16.25
000	$\frac{3}{8}$	.375	240	15.00
00	$\frac{11}{32}$	.34375	220	13.75
0	$\frac{5}{16}$	.3125	200	12.50
1	$\frac{9}{32}$	.28125	180	11.25
2	$\frac{17}{64}$	.265625	170	10.625
3	$\frac{1}{4}$	.25	160	10.00
4	$\frac{15}{64}$	.234375	150	9.375
5	$\frac{7}{32}$	.21875	140	8.75
6	$\frac{13}{64}$	.203125	130	8.125
7	$\frac{5}{16}$	.1875	120	7.5
8	$\frac{11}{64}$	.171875	110	6.875
9	$\frac{3}{32}$	.15625	100	6.25
10	$\frac{5}{64}$	.140625	90	5.625
11	$\frac{1}{8}$	.125	80	5.00
12	$\frac{3}{64}$	.109375	70	4.375
13	$\frac{5}{32}$	.09375	60	3.75
14	$\frac{7}{64}$	.078125	50	3.125
15	$\frac{9}{128}$	.0703125	45	2.8125
16	$\frac{1}{16}$	.0625	40	2.5
17	$\frac{5}{160}$	.05625	36	2.25
18	$\frac{1}{20}$	.05	32	2.
19	$\frac{7}{160}$	.04375	28	1.75
20	$\frac{3}{80}$	.0375	24	1.50
21	$\frac{11}{320}$	.034375	22	1.375
22	$\frac{1}{32}$	.03125	20	1.25
23	$\frac{5}{320}$	.028125	18	1.25
24	$\frac{1}{40}$	.025	16	1.
25	$\frac{7}{320}$	.021875	14	.875
26	$\frac{3}{160}$	.01875	12	.75
27	$\frac{11}{640}$	.0171875	11	.6875

29	$\frac{5}{640}$	.0140625	9	.5625
30	$\frac{1}{60}$	.0125	8	.5
31	$\frac{7}{640}$	.0109375	7	.4375
32	$\frac{11}{1280}$	.01015625	6 $\frac{1}{2}$	.40625
33	$\frac{3}{320}$	.009375	6	.375
34	$\frac{11}{1280}$	.00859375	5 $\frac{1}{2}$	.34375
35	$\frac{5}{640}$	.0078125	5	.3125
36	$\frac{11}{1280}$	.00703125	4 $\frac{1}{2}$	.28125
37	$\frac{17}{2560}$	.006640625	4 $\frac{1}{4}$	.265625
38	$\frac{1}{160}$	.00625	4	.25

And on and after July first, eighteen hundred and ninety-three, the same and no other shall be used in determining duties and taxes levied by the United States of America on sheet and plate iron and steel. But this act shall not be construed to increase duties upon any articles which may be imported.

SEC. 3.—That in the practical use and application of the standard gauge hereby established a variation of two and one-half per cent. either way may be allowed.

Approved March 3, 1893.

THE DOUBLE "I" TIMER

It's Sensible, Sure and Durable.

Consider these points:

A V-rim rotor that is always giving a perfect rolling and wiping contact.

Brass to brass there is nothing better for contacts. Wear that is negligible; that is only a lapping of contact surfaces to a smooth finish.

No Roller troubles. Rollers roll on a small center rather than the outside rim at a speed of 3-5 that of the ordinary timer.

Slower contacting speed that means a better contact. No lubricating troubles. Just fill with grease. The V-rim rotor cuts and wipes for a perfect spark.

Bridgeport, Conn.

"SEES ALL" MOTOR EYE "TELLS ALL"

THE MOTOR EYE takes the temperature directly from the water in the radiator—you do not have to wait for temperature indication until steam is up, as the slightest change in the temperature of the water is shown instantly in the thermometer of the MOTOR EYE.

The stem attached to the bottom of the MOTOR EYE extends down into the water, THAT houses and protects the delicate thermometer from injury.

The Motor Eye can be furnished with special design name plates on back for all makes of cars, trucks and tractors.

Manufactured by

Metalware Corporation

228 W. Superior Street, Chicago, Ill.

An Important Message To All Who Use or Sell Wrenches

This is a message to everyone in the automotive trade, who either sells wrenches or has occasion to use them in their daily work.

A short time ago one of the largest manufacturing companies in the world was in the market for drop forge wrenches—quality and price was to determine the line of wrenches they would purchase.

The test was a severe one. Nuts were threaded on the bolts and were set up until either the bolt or the wrench was broken.

The final result of this test proved so satisfactory with Lakeside Wrenches, that they gave us their contract.

Not even a book of a thousand pages could speak more eloquently for wrenches than the above test.

In a word, the result of the above test should conclusively prove to you that when you are in the market for drop forge wrenches and our stock wrenches for resale to your customers, that your final choice should be — Lakeside Wrenches.

We will gladly send you our complete catalog upon request.

Write us today.

Lakeside Forge Co.
Erie, Pennsylvania

A BABBITTER FOR ANY SIZE CONNECTING ROD

This N-A size Babbitter will re-babbitt any size auto engine connecting rod up to $1\frac{1}{2}$ inches in length from center to center.

This machine casts the bearings accurately to the size required, either solid in the rod or of the removable type. Very little scraping or fitting is necessary to make a perfect fit on the crank shaft. N-A Size Babbitters are packed in wooden boxes complete with instructions and four different diameter wooden mandrels as follows: $\frac{1}{4}$ ", $\frac{1}{2}$ ", $\frac{3}{4}$ " and 2". Special sizes furnished to order.

We also make special Babbitters for Ford Rods.

STANDARD PROPORTIONS FOR MACHINE SCREWS

The report of the committee on standard proportions for machine screws of the American Society of Mechanical Engineers is published in the October, 1906, proceedings of the society. The report is substantially in agreement with the recommendations adopted at the joint meeting held in New York, April 11, 1904.

The committee believes the following combined details to be essential in establishing and maintaining a standard for the diameters, threads and heads of machine screws, including, as it does, diameters, threads and limits for the taps which are to be used in connection therewith: (a) form of thread, (b) diameters, (c) number of threads per inch, (d) standard reference thread gauges, basic and for screws and taps, (e) working gauges for screws and taps, (f) limits of variation, measured in the angle of the thread, (g) limits of variation in external diameter, (h) limits of variation in the pitch of the thread screws and taps, (k) proportions of the heads.

Drill Sizes for Standard Threads

These sizes give an allowance above the bottom of thread on sizes $\frac{1}{4}$ to 2; varying respectively as follows: for "V" Threads, .010" to .055"; for U. S. S. and Whitworth threads .005" to .027".

These are found by adding to the size at bottom of thread $\frac{1}{4}$ of the pitch for "V" threads, and $\frac{1}{8}$ of the pitch for U. S. S. and Whitworth, the pitch being equal to $1" \div \text{No. of threads per } 1"$.

In practice it is better to use a larger drill if the exact size called for cannot be had.

Size Screw	No. of Threads	SIZE OF DRILL			Size Screw	No. of Threads	SIZE OF DRILL		
		U. S. S.	" V "	W.			U. S. S.	" V "	W.

The Acme Standard Thread

The Acme Standard Thread is a little shallower than the Worm Thread, but the same depth as the square thread and much stronger than the latter.

The various parts are obtained as follows:

$$\text{Width of Point of Tool for Screw or Tap Thread} = \frac{.3707}{\text{No. of Threads per in.}} - .0052$$

$$\text{Width of Screw or Nut Thread} = \frac{.3707}{\text{No. of Threads per in.}}$$

$$\text{Diameter of Tap} = \text{Diameter of Screw} + .020$$

$$\text{Diameter of Tap or Screw at Root} = \text{Diameter}$$

$$\text{of Screw} - \left\{ \frac{1}{\text{No. of Linear Threads per in.}} + .020 \right\}$$

$$\text{Depth of Thread} = \frac{1}{2 \times \text{No. of Threads per in.}} + .010$$

(Continued on following page)

Edstrom

KANT KINK

TOWLINES TIRE LOCKS

The Edstrom Kant Kink Towline is the first towline to be offered to motorists that carries a guarantee against kinking. It is made of Special Steel cable that withstands greater stress and has smaller bulk than any other cable for the same load. The sling is of manila rope.

PRICES

$\frac{1}{4}$ Size \$6.50
 $\frac{3}{8}$ Size \$9.50

Length 20 Feet

Kant Kink Tire Locks are made of the same strand and are covered with high grade Chrome Tanned leather. They keep the spare where it belongs, and discourage the tire thief.

Price \$1.75

The guarantee against kinking has a big appeal to the motorist. There will be a big demand. The profits are most satisfactory. Write us today for full details and our terms to the trade.

C = Constant for number of threads per inch.

D = Outside diameter.

D¹ = Diameter at bottom of thread.

$$D^1 = D - C.$$

EXAMPLE.—Given outside diameter of U. S. S. screw thread, 2 inches, 4½ threads per inch; find diameter at bottom of thread. D = 2 inches; for 4½ threads U. S. S., constant, C = .2886; then diameter at bottom of thread, D¹ = 2 - .2886 = 1.7114 inches.

NOTE:—The above formula and constants are based on a perfectly sharp thread in considering V threads. With the usual blunted threads, therefore, the actual bottom diameters are a trifle larger for bolts and a trifle smaller for nuts than the diameters obtained with the formula and V-thread constants.

MALCO TIRES AND TUBES

A Quality Line with Unusual Profits

Importers find "Malco" tires an ideal proposition. Quick sales, satisfied customers and an exceedingly liberal margin of profit.

Unique construction—ribbed and non-skid tread types. Materials and workmanship perfect throughout. A truly high-grade standard full weight tire, with a low list price and large discounts that particularly appeal to overseas buyers.

Responsible dealers and agents are urged to send at once for territory rights. Discounts and terms will be forwarded to you. Please state your yearly capacity.

FRONT AND REAR AXLES

All our facilities are devoted to the single purpose of producing high-grade complete Axles—Front Axles and Rear Axles—for passenger cars and commercial vehicles.

D A C Axle Designs represent the best engineering practices of the day and our factory and tool equipment enables us to give automobile and truck manufacturers valuable help in engineering co-operation as well as in satisfactory strictly-on-schedule delivery service.

A large stock makes it possible for us to furnish promptly axles of various types for experimental and development purposes.

For diameters not listed in the tables, figure from the following:

Circumference = diameter $\times$ 3.1416.

Area = $r^2\pi = r^2 \times 3.1416$, but when diameter, D , is known it is figured from diameter:

Area = $D^2 \times 0.7854$.

Gasco Mfg. Co.
K-D Valve Lifters.

DE LUXE Demountable Sedan Top

PLEASE do not confuse the De Luxe tops with the cheaper kind. The De Luxe tops are built of the best of material and workmanship. We use a three-way rain vision windshield built in, all wool cloth lining, finished decks and backs, separate door locks, hardwood construction, thirteen coat painting.

De Luxe tops do not detract from the finest Automobile when mounted.

Your touring car looks just like a Sedan when mounted with a De Luxe top.

Why buy a cheap top when you can get a De Luxe at about the same price? You do not buy a top every day.

The De Luxe is Some Top

No mistake made when ordering a De Luxe Sedan top. We manufacture for Franklin 9-B Touring, Buick K-45 and others.

Write for circular and prices.

Table for Division of Circles

Length of chord for angle $\alpha = 2r \sin \frac{\alpha}{2}$ Table is figured for r (being the radius of the circle) = 1. For other values of r , multiply by r .

Number of Divisions in Circumference	Angle of Each Division in Degrees and Minutes	Length of Chord for Each Division (for Radius = 1)	Number of Divisions in Circumference	Angle of Each Division in Degrees and Minutes	Length of Chord for Each Division (for Radius = 1)

This table should be useful for gear and chain wheel calculation and design.

$$\text{Length of arc of } a \text{ degrees} = 2\pi \frac{a}{360} = \frac{d\pi a}{360}$$

$$\text{Area of sector of } a \text{ degrees} = r^2 \pi \frac{a}{360} = \frac{d^2 \times 0.7854 a^2}{360}$$

Decimal Equivalents of Sixty-Fourths

To convert common fraction into decimal fraction, give the numerator decimal form by adding a period and ciphers. Then divide by denominator.

$\frac{1}{64} = .0156$	$\frac{1}{32} = .2656$	$\frac{3}{64} = .5156$	$\frac{5}{64} = .7656$
$\frac{2}{64} = .0312$	$\frac{3}{32} = .2812$	$\frac{1}{16} = .5312$	$\frac{3}{16} = .7812$

"HEATH"

Makes Storage Battery Separators

EXCLUSIVELY

THE making of storage battery separators has become a science just like everything else.

The jack of all trades is no longer a factor in business — today it's the man who concentrates his entire energies upon one thing, who produces something so superior that it stands out from the crowd.

Our specializing exclusively in the manufacturing of storage battery separators has made the name of "HEATH" stand for a definite quality IN STORAGE BATTERY INSULATORS.

So, for your own protection be sure and specify "HEATH" the next time you order.

HEATH MANUFACTURING CO.
GREENVILLE MICHIGAN

The "Big Ben" of Motordom
HARRIS LO-PRESSURE

TIRELARM

The motor world heralds the advent of a new accessory that is destined for a notable career.

A precision instrument that goes on the valve stem like a dust cap affording a **VISIBLE, AUDIBLE SIGNAL** when the air in the tire becomes 10 or 12 pounds lower than the predetermined pressure.

It is the most important invention of the times and will find ready sale wherever shown.

Now ready for marketing through jobbers and dealers. Attractive sales literature, window cards, counter display stands and dealer helps supplied. Write for complete information.

It Saves Tires

Units of Weight and Measure

(From Circular No. 47 of Bureau of Standards, Department of Commerce, Washington)

THE METRIC SYSTEM: Metric units are naturally related. For example: 1 cubic decimeter equals for all practical purposes 1 liter, and 1 liter of water weighs 1 kilogram. The metric terms are formed by combining the words "metre," "gram" and "liter" with the six numerical prefixes, as in the following table:

Prefixes	Meaning		Units
milli- = one-thousandth	$\frac{1}{1000}$	.001	"meter" for length
centi- = one-hundredth	$\frac{1}{100}$	.01	
deci- = one-tenth	$\frac{1}{10}$	.1	
Unit = one		1	"gram" for weight or mass
deka- = ten	$\frac{10}{1}$	10	"liter" for capacity
hecto- = one hundred	$\frac{100}{1}$	100	
kilo = one thousand	$\frac{1000}{1}$	1000	

Definitions of Units

The following lists of units include most of those in general use. Simple conversions may be made from the values here given more readily than from the "Simple and Compound Conversions of Weights, Measures and Money Values" on page 1156, and units not included in the latter may be found here and used. For example, if a conversion into nautical miles is wanted, the conversion factor for statute mile given in the conversion tables may be used by multiplying it by the factor 1.151 553 here given to show relation of nautical mile to statute mile.

LENGTH

FUNDAMENTAL UNITS

A meter (m) is a unit of length equivalent to the distance between the defining lines on the international prototype meter at the International Bureau of Weights and Measures when this standard is at the temperature of melting ice (0°C.). 1 m. = $\frac{3937}{1000}$ yd.

A yard (yd.) is a unit of length equivalent to $\frac{3600}{3937}$ of a meter.

Your Business

as it relates to

Our Job

If you manufacture or sell automotive products to car, truck or tractor makers—

If you distribute your merchandise thru jobber, dealer and garage owner channels—

If you want to reach the buyers of high and low degree throughout industry and trade—

the combined advantage of this Red Automobile Trade Directory and our special Mailing List Service will render you an advantage that is as economical and practical as it is unique.

Our Special Mailing List Service Includes:

- (1) Manufacturers of cars, trucks, tractors, airplanes and motorcycles with names of all company executives, including engineers, purchasing agents, etc.
- (2) Names of more than 1500 concerns interested in the wholesaling of automotive equipment—showing territory covered, the number of road salesmen, amount of stock carried, whether catalog is issued, name of manager, name of buyer, etc.
- (3) A list of more than 60,000 of the country's best dealers and garage owners, with information as to cars, trucks and tractors handled; whether they sell supplies, operate repair shop, etc.

This special Mailing List Service is invaluable to sales managers, service managers and other executives who are concerned with merchandising and maintenance. For those manufacturers who plan any "direct-by-mail" advertising it will prove so good as to justify the thousands of dollars annually spent by us to keep our special Mailing List Service the very best possible to obtain.

If you want complete details they will be sent promptly if you request. Just address:

WHITNEY

(PARALLEL)

ROLLER BEARINGS

Some Exclusive and Incomparable Features Distinctive of the Whitney (Parallel) Roller Bearing

The Keystone principle, as applied to roller bearings, transmit all loads, either thrust or side, directly to the face of the rollers only, as well as vertical to their axis constitutes the most recent development in modern anti-friction roller bearings guaranteeing possibilities never before realized.

The old and famous Keystone principle is employed and thoroughly practical.

The parallel roller principle is a fundamental factor. Greater speed under a heavy load is possible.

Cage friction is reduced to negligible quantity.

May be safely guaranteed during the life of any car.

The rollers have no tendency to work out from under the load.

All of the rollers are in contact with the bearing members all of the time.

Self-adjustment is safe, perfectly accurate and automatic at all times.

The load never touches the ends of the rollers.

The rollers have no tendency to work endwise under a load.

All the load rests on the cylindrical face of the rollers only, vertical to the axis of the rollers.

The rollers cannot jam, wedge or get locked.

CAPACITY

FUNDAMENTAL UNITS

A liter (l) is a unit of capacity equivalent to the volume occupied by the mass of 1 kilogram of pure water at its maximum density (at a temperature of 4° C. practically) and under the standard atmospheric pressure of 760 mm). It is equivalent in volume to 1.000 027 cubic decimeters. One l = 0.264168 gal.

A gallon (gal.) is a unit of capacity equivalent to the volume of 231 cubic inches. It is used for the measurement of liquid commodities only. 1 gal. = 3.785 332 liter. A British gallon is approximately 20 per cent larger.

A bushel (bu.) is a unit of capacity equivalent to the volume of 2150.42 cubic inches. It is used in the measurement of dry commodities only. The bushel is the so-called stricken or struck bushel. Many dry commodities are sold by heaped bushel, which is generally specified in the State Laws to be the usual stricken bushel measure "duly heaped in the form of a cone as high as the article will admit" or "heaped as high as may be without special effort or design." The heaped bushel was originally intended to be 25 per cent greater than the bushel. A British bushel is 3 per cent larger.

HIGHER AND LOWER UNITS

- 1 hectoliter (hl) = 100 liters.
- 1 dekaliter (dkl) = 10 liters.
- 1 deciliter (dl) = 0.1 liter.
- 1 centiliter (cl) = 0.01 liter.
- 1 milliliter (ml) = 0.001 liter = 1.000 027 cubic centimeters.
- 1 liquid quart (liq. qt.) = $\frac{1}{4}$ gallon = 57.75 cubic inches.
- 1 liquid pint (liq. pt.) = $\frac{1}{2}$ gallon = $\frac{1}{2}$ liquid quart = 28.875 cubic inches.
- 1 gill (gi.) = $\frac{1}{8}$ gallon = $\frac{1}{4}$ liquid pint = 7.21875 cubic inches.
- 1 fluid ounce (fl. oz.) = $\frac{1}{16}$ gallon = $\frac{1}{8}$ liquid pint.
- 1 fluid dram (fl. dr.) = $\frac{1}{16}$ fluid ounce = $\frac{1}{32}$ liquid pint.
- 1 minim (min. or m) = $\frac{1}{60}$ fluid dram = $\frac{1}{1920}$ fluid ounce.
- 1 firkin = 9 gallons.
- 1 peck (pk.) = $\frac{1}{4}$ bushel = 537.605 cubic inches.
- 1 dry quart (dry qt.) = $\frac{1}{2}$ bushel = $\frac{1}{4}$ peck = 67.200 625 cubic inches.
- 1 dry pint (dry pt.) = $\frac{1}{4}$ bushel = $\frac{1}{2}$ dry quart = 33.600312 5 cubic inches.
- 1 barrel (for fruit, vegetables and other dry commodities) = 7056 cubic inches = 105 dry quarts. (By U. S. Statute, March 4, 1915.)

MASS OR WEIGHT

FUNDAMENTAL UNITS

A kilogram (kg) is a unit of mass equivalent to the mass of the international prototype kilogram at the International Bureau of Weights and Measures. One kg. = 2.204 622 341 lb. av.

An avoirdupois pound (lb. av.) = 0.453 592 427 7 kilogram.

A gram (g) is a unit of mass equivalent to one-thousandth of the mass of the international prototype kilogram at the International Bureau of Weights and Measures.

A troy pound (lb. t.) is a unit of mass equivalent to $\frac{1770}{1000}$ of that of the avoirdupois pound.

HIGHER AND LOWER UNITS

- 1 metric ton (t) = 1000 kilograms.
- 1 hectogram (hg) = 100 grams = 0.1 kilogram.
- 1 dekagram (dkg) = 10 grams = 0.01 kilogram.
- 1 decigram (dg) = 0.1 gram.
- 1 centigram (cg) = 0.01 gram.
- 1 milligram (mg) = 0.001 gram.
- 1 avoirdupois ounce (oz. av.) = $\frac{1}{16}$ avoirdupois pound.
- 1 avoirdupois dram (dr. av.) = $\frac{1}{16}$ avoirdupois ounce = $\frac{1}{64}$ avoirdupois pound.
- 1 grain (gr.) = $\frac{1}{7000}$ avoirdupois pound = $\frac{1}{1920}$ avoirdupois ounce = $\frac{1}{6720}$ troy pound.
- 1 apothecaries' pound (lb. ap.) = 1 troy pound = $\frac{1770}{1000}$ avoirdupois pound.
- 1 apothecaries' or troy ounce (oz. ap. or ʒ, or oz. t.) = $\frac{1}{16}$ troy pound = $\frac{480}{1000}$ avoirdupois pound = 480 grains.
- 1 apothecaries' dram (dr. ap. or ʒ) = $\frac{1}{16}$ apothecaries' pound = $\frac{1}{4}$ apothecaries' ounce = 60 grains.
- 1 pennyweight (dwt.) = $\frac{1}{20}$ troy ounce = 24 grains.
- 1 apothecaries' scruple (s. ap. or ʒ) = $\frac{1}{24}$ apothecaries' dram = 20 grains.
- 1 metric carat (c) = 200 milligrams = 0.2 gram.
- The old carat in use in this country previous to July 1, 1913, was of 205.3 milligrams.
- 1 short hundredweight (sh. cwt.) = 100 avoirdupois pounds.
- 1 long hundredweight (l. cwt.) = 112 avoirdupois pounds.
- 1 short ton (sh. tn.) = 2000 avoirdupois pounds.
- 1 long ton (l. tn.) = 2240 avoirdupois pounds.

*The Wheels that Complete
the Car*

When you see a car with wheels that don't wobble, you know they're Disteel Wheels. By holding the tires firm and true Disteel Wheels save tires and gasoline and prolong the life of your car.

The inwardly Curved Wheel is the Disteel Wheel.

DISTEEL WHEEL CORPORATION

DETROIT, U. S. A.

Disteel wheels are manufactured exclusively by the Detroit Pressed Steel Company at their new plant, Cabot Avenue, Detroit.

The Mount Elliott plant is devoted entirely to the making of pressed steel frames for the automotive industry. Correspondence is invited from quantity manufacturers of passenger cars, trucks, tractors and trailers.

Spelling and Abbreviation of Units

Following the names of each unit in the list below is given the abbreviation which the Bureau has adopted. Attention is particularly called to the following principles:

1. The period is omitted after the abbreviations of the metric units, while it is used after those of the customary system.

2. The exponents "2" and "3" are used to signify area and volume, respectively, in the case of the metric units instead of the longer prefixes "sq" or "cu." In conformity with this principle the abbreviation for cubic centimeter is "cm³," instead of "c.c." or "c.m." The term "cubic centimeter" as used in chemical work is, in fact, a misnomer, since the unit actually used is the "milliliter," which has a slightly larger volume.

3. The use of the same abbreviation for both singular and plural is recommended. This practice is already established in expressing metric units and is in accordance with the spirit and chief purpose of abbreviations.

4. It is also suggested that, unless all the text is printed in capital letters, only small letters be used for abbreviations except in the case of A. for acre, where the use of the capital letter is general.

Simple and Compound Conversions of Weights, Measures and Money Values

BY MARTUS C. KRABUP

The figures in the conversion tables on page 1210 are taken from Circular No. 47 of the Bureau of Standards, Department of Commerce, Washington, D. C. The special arrangement of the figures is devised so that users of this **AUTOMOBILE DIRECTORY** may have in one place all the data required for simple and compound conversions, no other figuring being necessary than simple multiplication and division (though logarithms can be used to advantage if desired). The underlying idea is that it is usually much easier to figure a little than to find a table of equivalents in which the figuring is done. Also, that tables for compound conversions include only a few of the numerous compound conversions that may be demanded, and that all tables of ready-figured values leave gaps which must be figured anyway.

In the appended tables a conversion figure is established for every unit, and by this simple means all conversions become possible from very few data.

(Rule for multiplying with decimals: If one factor has m decimals and the other factor has n decimals, multiply without regard for decimal point and place it in the product $m+n$ places from the right.)

(Rule for division with decimals: If divisor has m decimals, move decimal point m places to the right in both figures. Place decimal point in quotient when it is reached in the division.)

For most practical purposes, the decimals may be cut down to three or four, greatly abbreviating the figuring.

HOW TO USE THE CONVERSION TABLES

For a simple conversion such as: How many bushels are 606 hectoliters? We have
 x bushels = 606 hectoliters

For bushels and hectoliters substitute their conversion figure. Then we have

$$x \times 35.2383 = 606 \times 100 \text{ and} \\ 60600 \\ x = \frac{60600}{35.2383} = 1719.718 \text{ bushels}$$

Example: How many kilograms does 4 liters weigh when 0.3 liquid quart weighs 7 lb. av.?

We have the ordinary equation by "rule of three" that

$$\begin{array}{r} x \text{ kg.} \quad 7 \text{ lb. av.} \\ 4 \text{ liters} \quad 0.3 \text{ qt.} \end{array}$$

Now the simple rule is: Replace the names of the units by their respective conversion factors
 The above equation then becomes:

$$\begin{array}{r} x \times 1 \quad 7 \times 0.4535924277 \\ 4 \times 1 \quad 0.3 \times 0.946332 \\ \hline \text{or, simplified by cutting down the decimals:} \\ \frac{x}{4} = \frac{7 \times 0.45359}{0.3 \times 0.94633} \text{ or } x \text{ (kg.)} = \frac{4 \times 7 \times 0.45359}{0.3 \times 0.94633} = 44.735 \text{ kg.} \end{array}$$

Example 2: If 4 British gallons cost 2£ 7 sh., what is 5 gallons worth in American money?
 We have

$$\begin{array}{r} x \text{ dollars} \quad 2£ \text{ 7 sh.} \\ 5 \text{ gal.} \quad 4 \text{ British gal.} \end{array}$$

We do not find British gallons in the conversion tables, but by looking under "Units of Weight and Measure" on page 1196 we see that a British gallon is 20 per cent larger than the American gallon. So for "British" we use the factor 1.20. The equation then becomes:

$$\begin{array}{r} x \times 1 \quad (2 \times 4.8665) + (7 \times 0.2433) \\ \hline 5 \times 3.785332 \quad 4 \times 1.20 \times 3.785332 \\ \text{or, simplified by crossing out the repeated conversion factor for "gallon":} \\ \frac{x}{5} = \frac{(2 \times 4.8665) + (7 \times 0.2433)}{4 \times 1.20} \\ \text{and } x \text{ dollars} = \frac{48.665 + (35 \times 0.2433)}{4.80} = \$11.91 \end{array}$$

Zinc.....	437	7.15	783	..	..

Heat and electric conductivity are measured in comparison with these properties in silver.

The weight of a cubic foot of distilled water is in pounds, 62.47 at 32 deg. F., 62.425 at 39 deg. F., 62.355 at 62 deg. F., 59.700 at 212 deg. F., and 57.400 as ice.

Your Business

as it relates to

Our Job

If you manufacture or sell automotive products to car, truck or tractor makers—

If you distribute your merchandise thru jobber, dealer and garage owner channels—

If you want to reach the buyers of high and low degree throughout industry and trade—

the combined advantage of this Red Automobile Trade Directory and our special Mailing List Service will render you an advantage that is as economical and practical as it is unique.

Our special mailing list service includes:

- (1) Manufacturers of cars, trucks, tractors, airplanes and motorcycles, with names of all company executives, including engineers, purchasing agents, etc.
- (2) Names of more than 1500 concerns interested in the wholesaling of automotive equipment—showing territory covered, the number of road salesmen, amount of stock carried, whether catalog is issued, name of manager, name of buyer, etc.
- (3) A list of more than 60,000 of the country's best dealers and garage owners, with information as to cars, trucks and tractors handled; whether they sell supplies, operate repair shop, etc.

This special Mailing List Service is invaluable to sales managers, service managers and other executives who are concerned with merchandising and maintenance. For those manufacturers who plan any "direct-by-mail" advertising it will prove so good as to justify the thousands of dollars annually spent by us to keep our special Mailing List Service the very best possible to obtain.

If you want complete details they will be sent promptly if you request. Just address:

Capacity of Atmospheric Air for Water Vapor at Different Temperatures

Temperature in Degrees Fahrenheit	Pounds per Cubic Feet Dry Air	Pounds of Vapor in One Pound of Air	Weight in Pounds, Saturated Air	Weight in Pounds, Vapor in Air	A / V
32	0.0807	0.00379	0.0802	0.000304	263.7
42	0.0791	0.00561	0.0784	0.000440	178.18
52	0.0776	0.00819	0.0766	0.000627	122.
62	0.0761	0.01179	0.0747	0.000881	85.
72	0.0747	0.01680	0.0727	0.001221	59.5
82	0.0733	0.02361	0.0706	0.001667	42.3
92	0.0720	0.03289	0.0684	0.002250	30.3
102	0.0707	0.04547	0.0659	0.002997	22

Variation of Volume and Temperature With Compression

Gauge Pressure	Volume	Temperature
0	1.000	60
2	.910	80.4
5	.810	106
10	.690	145
20	.543	207
30	.454	252
40	.393	302
50	.350	339
75	.276	420
100	.232	485
115	.213	518
130	.197	550
145	.184	580
160	.172	607
175	.163	632
200	.149	672

This table is figured on the assumption that no heat is added or abstracted.

Boiling Point of Water at Various Altitudes

Altitude Above Sea Level in Feet	Boiling Point of Water in Degrees Fahrenheit
0.000	212
1,025	210
2,063	208
3,115	206
4,169	204
5,225	202
6,304	200
7,381	198
8,431	196
9,579	194
10,685	192
11,800	190

To keep the cooling water from reaching the boiling point at any altitude, as well as at any atmospheric temperature, automatic heat regulation is therefore necessary.

Index to Tables and Data Appears on Pages 1087 and 1088

BEARING GRINDING COMPOUND

Saves 50% of the usual time consumed in scraping babbitt and bronze bearings and produces a far superior and more durable bearing surface.

"100%" is used and endorsed by many of the leading motor builders and prominent service organizations in the country.

"100%" is made in two grades, "fine" for finishing babbitt, and "coarse" for hard grades of babbitt also bronze bearings, wrist pin bushings, etc.

LIST PRICE

Single cans net weight 3 oz. each.....\$1.50

Packed in 6-oz. cartons, 24 cartons in wooden case

DISCOUNTS TO THE TRADE

If not stocked by your jobber write us direct, giving jobber's name.

RENREW PRODUCTS COMPANY

370 West 51st Street

New York City

"ELECTRIC SERVICE STATION ENGINEERS"

The Quality Growler

It tests Generator armatures or Starting armatures.

It detects troubles not found by the ordinary type of growler.

This automatic growler gives tests under operating conditions, short circuits and grounds in coils, leaks due to moisture and charred insulation, commutator trouble, loose leads, grounds and short circuited bars, reversed coils; transposed leads and other trouble quickly and accurately located. Comparative meter reading gives positive indication of all troubles that armatures and field coils are subject to.

FEATURES

Automatic Switch—Shunt Bars—Series Parallel Switch—Testing Bug

All possible armature troubles charted and instructions given for testing for each, with each device.

The Cadmium Tester—Another Quality trouble chaser. The Cadmium Tester is to your battery what the X-Ray is to the human body.

Quality Electric Products Co.

907 East 15th Street, Kansas City, Mo.

The AUTOMAT Plug

SELF-CLEANING

does everything any other spark plug does and

SIX

things no other can do.

IT

- (1) Cleans itself
- (2) Saves gasoline
- (3) Increases power
- (4) Cools itself
- (5) Reduces "oil pumping"
- (6) Permits direct priming

The AUTOMAT was subjected to severest tests for over a year and a half under actual operating conditions, without a failure. Official tests and letters in our files prove our claims.

The materials and workmanship in the AUTOMAT are of the highest grade.

Each AUTOMAT is guaranteed without limit as to time.

DEALERS: Write for our proposition and prices, stating your approximate monthly needs.

THE BUCKWALTER CONNECTING ROD ALIGNING DEVICE

REPAIRMEN: You realize that for A-1 results you must test and align every rod—on every motor you overhaul. The Buckwalter Aligning device is the quickest and most accurate tool for the purpose ever devised. Shows in a second to the thousandth of an inch any inaccuracy in a connecting rod. Nine bushings furnished with the tool enable you to test any size rod. So simple in operation that even an inexperienced mechanic can straighten connecting rods accurately and quickly.

Carefully made to insure absolute accuracy and stability.

JOBBER: There is still some good territory open for progressive distributors. Full information on request.

Tire-Pump Bases

S. A. E. Standard

In the tire-pump bases and pads shown in the accompanying sketch, the pads are to be 3 $\frac{3}{4}$ in. square, with four $\frac{3}{16}$ -in. holes symmetrically located on 3-in. centers, and two additional

holes to be used with two of the original four for pumps with small bases. In case of small pumps the unused part of the base may be omitted. If a rib is used on the bottom of the pad, it is to be located as shown in order to clear the bolts in all six of the holes.

Automobile Engine Light Lubricating Oil

Pure mineral oil. The following characteristics are desired:

Specific gravity.....	28° to 32° Baumé
Flash point, not less than.....	400° F.
Fire test, not less than.....	450° F.
Viscosity at 100° F., Saybolt viscosimeter, not over.....	300 seconds.
Viscosity at 210° F., Saybolt viscosimeter.....	40 to 50 seconds.
Viscosity at 210° F., Tagliabue viscosimeter.....	60 to 65 seconds.
Carbon residue, not over.....	0.50 per cent.

Magneto Dimensions

S. A. E. Practice

AIRPLANE, AUTOMOBILE, MARINE, MOTORCYCLE, TRACTOR

When it is desired to use a non-magnetic shim with magnetoes mounted on cast iron pads the shims shall be $\frac{1}{2}$ in. thick, and high strength bronze bolts used. The thickness of the shim shall be added to the dimension N on the drawing when laying out the distance from the face of the mounting pad to the center of the magneto shaft. A grid construction may be used for the shims.

FLEXIBLE DISK COUPLINGS

The following dimensions are recommended for flexible disk couplings for all magneto drives, including impulse type, and generators.

Outside diameter of disk $2\frac{3}{4}$ in., inside diameter of disk 1 in., diameter of bolt circle 2 in thickness of disk $\frac{1}{4}$ in., number of $\frac{1}{4}$ -in. bolts equally spaced 4.

Flange Mountings for Generators

Gear or Chain Drive

S. A. E. Standard

There are two standard sizes of generator flanges as shown. Each is provided with a pilot for locating in a bored hole when used with a gear drive and with slotted holes to allow for adjustment when used with chain drive. In the latter case the hole in the gear case will be made to clear the pilot.

Size No.	A	B	C	D	E	F	G	H	I
1	2 $\frac{1}{2}$	2 $\frac{1}{16}$	5 $\frac{1}{8}$	$\frac{1}{4}$	$\frac{3}{32}$	1 $\frac{1}{32}$	1 $\frac{1}{8}$	4 $\frac{1}{8}$	$\frac{7}{16}$
2	2 $\frac{1}{2}$	3 $\frac{1}{16}$	5 $\frac{1}{8}$	$\frac{1}{8}$	$\frac{1}{4}$	1 $\frac{1}{32}$	1 $\frac{1}{16}$	5 $\frac{1}{8}$	$\frac{1}{2}$

Size No.	J	K	L	M	N	P	R	S
1	6	$\frac{7}{16}$	1 $\frac{11}{32}$	1 $\frac{1}{16}$	$\frac{1}{8}$	$\frac{3}{4}$	0.6250 0.6245	1
2	8	1 $\frac{1}{16}$	1 $\frac{23}{32}$	1 $\frac{1}{16}$	1 $\frac{1}{8}$	1	0.7500 0.7495	1 $\frac{1}{4}$

Bracket Mounting for Generators

S. A. E. Standard

This specification is complete in regard to mounting dimensions of the generator. Bracket dimensions and the dimensions and location of the pad on the crankcase are not included.

Generator Shaft-End for Coupling Drive

S. A. E. Standard

The shaft-end illustrated under Bracket Mounting for Generators is considered of ample capacity for all sizes of generators, except in special instances where small generators, naturally not suited to this Standard, may be fitted with the standard magneto shaft-end in accordance with present practice.

Flange Mountings for Starting Motors

S. A. E. Standard

S. A. E. Size Nos. 2 & 3

S. A. E. Size No. 1

Size No.	A	B	C	D	E
1	$2\frac{3}{8}$	$2\frac{1}{4}$	$1\frac{1}{32}$	$\frac{1}{16}$	3.496 to 3.499
2	$2\frac{1}{2}$	$2\frac{1}{4}$	$1\frac{1}{32}$	$\frac{1}{16}$	3.621 to 3.624
3	$2\frac{1}{2}$	$3\frac{1}{4}$	$1\frac{1}{32}$	$\frac{1}{16}$	3.621 to 3.624

These standard flanges may be used for either right hand or left hand mounting of motors.

Index to Tables and Data Appears on Pages 1087 and 1088

Ignition Distributor Mounting

S. A. E. Standard

The ignition distributor mounting dimensions shown are suitable for use when the distributor is mounted on either the generator or the engine.

Attached and Removable Starting Cranks

S. A. E. Standard

No Woodruff key is to be provided in shafts for removable starting cranks.

Lock Washer Dimensions (S. A. E. Standard)

The outside diameters of lock washers shall coincide practically with the long diameters of S. A. E. Standard nuts, which are approximately the short diameters of United States Standard nuts.

The inside diameters of the lock washers shall be from 164" to 132" larger than bolt diameters. All lock washers shall be parallel-faced sections; and bulging or malformed ends must be avoided.

Table of Sizes

Automobile Heavy (A. H.)

For General Use

Bolt Diameter	Lock Washer Section	Bolt Diameter	Lock Washer Section
3/16"	1/16" x 1/16"	11/16"	1/4" x 1/4"
1/4"	5/64" x 5/64"	3/4"	1/4" x 1/4"
5/16"	1/8" x 1/8"	7/8"	17/64" x 17/64"
3/8"	1/8" x 1/8"	1"	5/16" x 5/16"
7/16"	11/64" x 11/64"	1 1/8"	5/16" x 5/16"
1/2"	11/64" x 11/64"	1 1/4"	3/8" x 3/8"
9/16"	13/64" x 13/64"	1 3/8"	3/8" x 3/8"
5/8"	13/64" x 13/64"	1 1/2"	7/16" x 7/16"

Automobile Light (A. L.)

For Optional Use Against Soft Metal

Bolt Diameter	Lock Washer Section
3/16"	1/16" x 3/64"
1/4"	5/64" x 1/16"
5/16"	1/8" x 3/32"
3/8"	1/8" x 3/32"
7/16"	11/64" x 1/8"
1/2"	11/64" x 1/8"
9/16"	13/64" x 5/32"
5/8"	13/64" x 5/32"
11/16"	1/4" x 3/16"
3/4"	1/4" x 3/16"
7/8"	17/64" x 3/16"
	5/16" x 1/4"

Test

Temper

After compression to flat, reaction shall be sufficient to indicate necessary spring power, and on a subsequent compression to flat the lock washer shall manifest no appreciable loss in reaction.

Toughness

Forty-five per cent. of the lock washer, including one end, shall be firmly secured in a vise, and forty-five per cent., including the other end, shall be secured firmly between parallel jaws of a wrench. Movement of the wrench at right angle to helical curve shall twist the lock washer through forty-five degrees without sign of fracture; and shall twist the lock washer entirely apart within one hundred and thirty-five degrees.

Oversize Cylinders (S. A. E. Standard)

There has hitherto existed no uniform practice as to the amount of metal removed in regrinding worn cylinders, with the result that difficulty is experienced in securing new pistons of correct size, from the manufacturers.

With a view to eliminating all unnecessary expense and delay, the following standards have been accepted by the Society:—

Ten Thousandths	(.010")	inch large for first oversize standard
Twenty	(.020")	" " " second " "
Thirty	(.030")	" " " third " "
Forty	(.040")	" " " fourth " "

100% LOAD CAPACITY FROM ANY ANGLE

The Shafer concave rollers, set at an angle, fit the convex cup and cone and travel a natural alignment without twisting or climbing when under load—full length contact is presented no matter from what angle the load is received.

Moreover, the Shafer is self-aligning—there can be no such thing as wear and breakdown through improper fitting. The cone fits into the nest of rollers accurately, giving it a freedom of motion in all directions—very similar to universal joint action—and providing positive correction of misalignment.

Shafers are also adjustable for wear, and having proven their superiority in road and breakdown tests merit consideration wherever a friction eliminant is used.

Send us your specifications—our engineering department will be glad to demonstrate in more detail.

SHAHER BEARING CORPORATION

4500 Ravenswood Ave., Chicago, Ill.

SHAHER

Roller Bearing

SPARK PLUG SHELL (S. A. E. Standard)

All dimensions below shoulder are identical for both spark plug shells.

If spark plug taps are made to dimensions shown in the accompanying table, the plugs can be turned in by hand, using a wrench only for final tightening.

THREAD FOR SPARK PLUG TERMINALS

NO. 8-32 (0.164 IN. DIA.) A. S. M. E. STANDARD

	Nominal Dimension	THREAD LIMITS	
		Spark Plug	Tap
Outside diameter	.875	.872 Min. .875 Max.	.877 Min. .879 Max.
Pitch diameter	.839	.836 Min. .839 Max.	.841 Min. .843 Max.
Root diameter	.803	.800 Min. .803 Max.	.805 Min. .807 Max.

Tap Drill Diameter
Nominal $\frac{1}{16}$ = .8125
.810 Min. .813 Max.

All dimensions in inches.

Stuck IN THE MUD?

Yes—but only for a minute if his dealer has sold him the most necessary Equipment a Motor Car can carry, namely,

The Auto Chain Pull

A simple device that gives slipping wheels traction. When stuck in the mud, simply hook short link around felloe, attach to chain—then stretch chain out in the direction you wish to go. Next attach anchor plate to end of chain and drive down long anchor pins. Car will come out by winding chain on wheel and automatically unhook from anchor plate as wheel passes over it.

Big seller wherever shown. Write for Dealer's or Jobber's Proposition.

Useful Functions of π The numerical values of the most frequently occurring combinations of π are given in the following table:

$\pi = 3.14159265$	$\frac{\pi}{7} = 0.44879895$	$\pi^2 = 9.86960440$	$\sqrt{\pi} = 1.77245385$
$\frac{\pi}{2} = 1.57079633$	$\frac{\pi}{16} = 0.19634954$	$\pi^3 = 31.00627668$	$^3\sqrt{\pi} = 1.46459189$
$\frac{\pi}{3} = 1.04719755$	$\frac{\pi}{24} = 0.13089969$	$\frac{1}{\pi} = 0.31830989$	$\frac{1}{\sqrt{\pi}} = 0.56418958$
$\frac{\pi}{4} = 0.78539816$	$\frac{\pi}{32} = 0.09817477$	$\frac{1}{\pi^2} = 0.10132118$	$\frac{1}{^3\sqrt{\pi}} = 0.68278406$
$\frac{\pi}{6} = 0.52359878$	$\frac{\pi}{180} = 0.01754329$	$\frac{1}{\pi^3} = 0.03225153$	$\text{Log } \pi = 0.49714987$

Gasoline of 64° Beaumé has a specific gravity of .72, and consequently weighs 5.96 pounds per gallon.

A British Thermal Unit represents the amount of heat required to raise the temperature of one pound of water one degree Fahrenheit at or near 39° F. Its symbol is B. T. U. There are 778 foot-pounds in a B. T. U. and 42.4 B. T. U. to a horsepower.

NATIONAL AUTOMOBILE AND ALLIED ORGANIZATIONS

National Automobile Chamber of Commerce, Inc.

Madison Ave. at 46th St., New York, N. Y.

Objects: To foster the interests of those engaged in the trade or business of manufacturing automobiles and all other self-propelling vehicles.

To reform abuses relative thereto.

To secure freedom of its members from unjust or unlawful exactions.

To diffuse accurate and reliable information as to the standing of merchants and others dealing with members as to all inventions, patents, processes or devices designed or intended for use in, upon, or in connection with such vehicles and the manufacture thereof, as to the state of the art relative thereto, and as to the conditions and development of the trade in which the members are engaged, in the United States and foreign countries.

To procure uniformity and certainty in the customs and usages of such trade.

To promote the construction of better highways.

To advocate the enactment of just and equitable laws affecting members.

To settle differences between members.

To promote a more enlarged and friendly intercourse among business men engaged in such trade or dealing with persons engaged therein.

To acquire by grant, gift, purchase, devise or bequest, to hold and to dispose of such property as the purposes of the corporation shall require, subject to such limitations as may be prescribed by law, including inventions, letters patent and processes, or rights thereunder, for the benefit of its members and not for pecuniary profit.

Officers

President, Charles Clifton

Vice-President, R. D. Chapin

Second Vice-Presidents:

C. C. Hanch, Gasoline Passenger Car Division

Windsor T. White, Commercial Vehicle Division

Secretary, A. J. Brosseau

Treasurer, H. H. Rice

Gen. Manager, Alfred Reeves

Show Manager, S. A. Miles

Society of Automotive Engineers, Inc.

29 W. 39th St., New York, N. Y.

Object: To promote the arts and sciences connected with engineering and mechanical construction of automotive apparatus.

Officers

President, David Beecroft

First Vice-President, H. L. Horning

Second Vice-President, B. B. Bachman

Second Vice-President, E. A. Johnston

Secretary and General Manager, Coker F. Clarkson

Second Vice-President, H. M. Crane

Second Vice-President, Jos. Van Blerck

Second Vice-President, T. C. Menges

Chairman of the Board of Directors, J. Ernest Miller, Montreal, Canada

The Motor and Accessory Manufacturers Association

33 West 42d St., New York, N. Y.

Objects: To promote in all lawful ways the interests of makers of motors, motor parts, and accessories.
 To aid in the protection of its members.
 To secure the advantages to be obtained by mutual co-operation.
 To safeguard the interests of its members whenever possible and to diffuse information concerning trade credits, and other matters of interest to the members of the Association.
 To co-operate with similar associations in other states.

Officers

President, C. E. Thompson	Treasurer, L. M. Wainwright
First Vice-President, E. H. Broadwell	Secretary and Asst. Treasurer, G. Brewer
Second Vice-President, Christian Gi I	Griffin
Third Vice-President, W. O. Rutherford	General Manager, M. L. Heminway

American Automobile Association

501 Fifth Ave., New York, N. Y.; Albee Bldg., Washington, D. C.

Objects: To unite in one body all the automobile associations and individual motorists of the country;
 to secure reasonable and just legislation.
 To aid in proper enforcement of automobile laws and ordinances; to advocate and obtain local, State and Federal aid in the construction and maintenance of good roads.
 To encourage touring, and to secure, prepare, and disseminate information relative thereto; and
 To support sportsmanlike contests and other movements that will advance motoring interests.

Officers

President, David Jameson	
Vice-Presidents:	
Ralph W. Smith	Clifford Ireland

Below Zero!

A Ford standing in the snow at the curb. The driver comes out—starts his motor.

In ten minutes the radiator sends forth a cloud of steam. Tiny streams of water flow from half a dozen bursted tubes of the frozen radiator.

Then a tow to the garage—and repair bills.

The Jaffe Not Injured by Freezing

All that trouble would have been avoided if the owner of the Ford had equipped his car with a Jaffe Radiator.

Neither freezing nor over-heating can injure the strongly constructed core of the Jaffe. The honeycomb walls are built of rolled brass, giving a resiliency which allows for expansion of ice or steam.

The Jaffe Radiator will not boil over. Two thousand hexagonal air cells give the flowing water a maximum amount of

radiating surface. During the hottest months of summer the Jaffe maintains a cool, even temperature.

Withstands Shocks and Strains

Vibration and severe strains cannot injure the Jaffe because of its flexibility and strong construction. The owner is protected by a complete guarantee covering defects resulting from faulty materials or workmanship.

Stop Worrying About Your Radiator

With a Jaffe, winter worries are ended. If a Ford is parked outside in zero weather by a careless driver, the radiator cannot be injured by freezing. And back of this claim is a **POSITIVE, WRITTEN GUARANTEE.**

"Unharm'd by winter's blasts"

"Cool while summer lasts"

MACHINE BRONZE

(CORED AND SOLID BRONZE BARS)

WOULD'N'T it be nice if you could buy your bearings from stock just as you would a pound of sugar or a box of cigars?

You can.

Machine Bronze, the wear-resisting bearing metal that is made in solid and cored bars 12" long and in 254 different sizes, is handled by dealers everywhere.

It is the long-lived bearing that is absolutely guaranteed against defects of any kind.

Made by specialists and sold on honor. You'll make no mistake when you specify Machine Bronze.

DUFF GENUINE BARRETT JACKS

A Moderate-Priced Automobile Jack

This jack meets, at a very moderate price, all requirements as to lifting capacity and different axle heights of the great majority of passenger cars and light commercial motor vehicles. The footlift is of the quickly adjustable, sliding type, instantly set at any height on the rack to fit under car axle, and reserving the entire "raise" of the lifting rack for actual lifting of the car above the ground. Jack is guaranteed to lift 2000 lbs. on the head and 1000 lbs. on the footlift. Furnished with 18-in. steel handle.

Jack No.	Capacity	Height Inches	Raise Inches	Foot Lift Adjustment		Weight with Lever	List Price
				Lowest	Highest		
08	1 ton	11 $\frac{1}{4}$	6 $\frac{1}{2}$	4 in.	10 $\frac{1}{2}$ in.	9 lbs.	\$5.50

"The Aristocrat of Auto Jacks"

An easily operated jack for lifting the heaviest passenger cars. Operating handle is twice as long as the ordinary jack handle. The long handle easily clears all obstructions at either the front or rear of the car, and may be used to place the jack in position or remove it. When not in use, the handle uncouples to half its length, easily fitting into the smallest tool box. By means of an adjustable foot lift, the jack can be made instantly to fit under the lower axle of any car. The range of adjustment is wide enough to handle any car in any position.

Jack No.	Capacity in tons	Height Inches	Raise Inches	Weight with Lever	Foot Lift Adjustment		List Price
					Lowest	Highest	
411	1 $\frac{1}{4}$	11	7	20 lbs.	4 in.	10 in.	\$15.00

Sturdy Motor Truck Jacks

The leverage in these jacks is so compounded by gears that the load is lifted with only one-third the effort required with a direct leverage jack. Furnished as standard equipment by many of the leading truck manufacturers. Recommended for constant service in garages where a heavily built jack is needed to stand the heavy wear that a garage jack is subjected to. Each jack is tested before shipment.

Jack No.	Capacity Tons	Height Inches	Raise Inches	Weight with Lever	Code Word
100	3	10 $\frac{1}{4}$	5 $\frac{1}{4}$	16 lbs.	Comet
200	5	13	6 $\frac{1}{4}$	28 lbs.	Autojax
207	5	12 $\frac{3}{4}$	5 $\frac{1}{2}$	22 lbs.	Meteor
205	10	16	5 $\frac{3}{4}$	43 lbs.	Motruv

Bearings and Oil Mileage

IT takes hours of expensive labor to first get at and then to take up or replace worn bearings or bushings. A few cents in parts costs "saved" by the car builder compels the owner to pay many dollars in repair labor and unnecessary maintenance costs.

Designers of the Locomobile, Mercer, Stevens Dur-yea, Lafayette, Oldsmobile, Stutz, Haynes, Chandler, Kissel and many other cars, know this and use Non-Gran Bronze. These men have learned to judge a bearing bronze not

only by its chemical analysis but by micro-photographic scrutiny of the alloy's actual molecular structure. Non-Gran is identified to them by the

toughest, densest structure that is offered for laboratory examination. Experience has proven these qualities are uniformly maintained.

Non-Gran is alloyed of new

metals—not remelted scrap. It is uniform physically as well as chemically—free from flaws, sand holes, air or gas pockets—a bearing bronze which can always be depended upon.

"Excessive oil consumption spells worn bearings, for loose bearings burn more oil—sometimes even pump oil from crank case to clutch housing."

—Second Hand Car Tips

Write for the Non-Gran booklets and a complete list of Non-Gran users who have found that Non-Gran has the knack of preventing the "knock." Address:
